## संदेश

कृषि और इसके सहयोगी क्षेत्र भारत में, मुख्य रूप से वृहत् ग्रामीण क्षेत्रों में, गण्य आजीविका प्रदाता हैं। देश की खाद्य सुरक्षा के लिए डेटा आधारित नीति चक्र में कृषि सांख्यिकी का योगदान महत्वपूर्ण है।

2. देश में मुख्य फसलों की उपज दर मुख्यतः वैज्ञानिक रूप से डिज़ाइन किए गये फसल प्राक्कलन सर्वेक्षण के अंतर्गत संपन्न फसल कटाई प्रयोगों के विश्लेषण द्वारा प्राप्त किए जाते हैं। सामान्य फसल प्राक्कलन सर्वेक्षण (GCES) के अंतर्गत औसत उपज आंकलित करने हेतु उत्तम प्रकार से अभिकल्पित आंकलन सर्वेक्षणों के अंतर्गत फसल कटाई प्रयोग संचालित किए जाते हैं। दो मुख्य घटकों, 'कृषि क्षेत्र आच्छादन' एवं 'औसत उपज', के आंकड़ों के संग्रहण की प्राथमिक ज़िम्मेदारी राज्य/संघ शासित प्रदेशों की होती है। वर्तमान में, 78 फसलों (61 खाद्य एवं 17 गैर- खाद्य) के प्रति हेक्टर उपज का अनुमान वैज्ञानिक रूप से योजनाबद्ध फसल कटाई प्रयोगों द्वारा लिया जाता है। इस प्रकार प्राप्त उपज दर अनुमानों का उपयोग एवं किसान कल्याण मंत्रालय द्वारा उत्पादन के आधिकारिक अनुमान निर्धारण के लिए किया जाता है।

3. सामान्य फसल प्राक्कलन सर्वेक्षण 20 भू-अभिलेख राज्यों, 3 ईरास (EARAS) राज्यों एवं 6 अन्य राज्यों/संघ शासित प्रदेशों में नियमित रूप से आयोजित किए जाते हैं। जी.सी.ई.एस. की अभिकल्पना स्तरीकृत बहुस्तरीय यादच्छित प्रतिदर्श पर आधारित है तथा क्षेत्र कार्य आमतौर पर राज्य सरकार के अधिकारियों को सौंपा जाता है। राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय (रा०प्र०स०का०) की समग्र ज़िम्मेदारी राज्यों को तकनीकी दिशा-निर्देश प्रदान कर सहायता करने की है। रा०प्र०स०का० का क्षेत्र संकार्य प्रभाग विभिन्न राज्य सरकार/ संघ शासित प्रदेशों से प्राप्त जानकारी के आधार पर प्रति वर्ष फसल प्राक्कलन सर्वेक्षण के तहत फसल कटाई प्रयोगों के निष्कर्षों को समेकित करता है। इन निष्कर्षों का विश्लेषण, वार्षिक प्रकाशन "मुख्य फसलों पर फसल अनुमान सर्वेक्षण के समेकित परिणाम" के रूप में प्रकाशित किया जाता है। यह प्रतिवेदन मुख्य खाद्य एवं गैर खाद्य फसलों के समेकित परिणाम प्राप्त करने की दिशा में एक प्रयास है। वर्तमान प्रतिवेदन शृंखला का 72वां अंक है तथा यह कृषि वर्ष 2019-20 से संबंधित है। मैं इस रिपोर्ट को तैयार करने में श्रीमती नितिका गुप्ता, उप महानिदेशक, रा०प्र०स०का० (क्षे०स०प्र०), कृषि सांख्यिकी मुख्यालय, फरीदाबाद व उनकी टीम के अधिकारियों के प्रयासों की सराहना करता हूँ जिनके प्रयासों से उपयोगी रिपोर्ट जारी की गयी है।

4. मुझे विश्वास है कि यह रिपोर्ट प्रतिभागी राज्यों में कृषि के समग्र विकास के लिए नीति निर्माताओं, कृषिविदों, शोधकर्ताओं, सांख्यिकीविदों व योजनाकारों के योगदान में बहुत उपयोगी साबित होगी।

### Message

Agriculture with its allied activities is the substantial livelihood provider in India, especially in the rural areas. The contribution of agricultural statistics to a data- driven policy cycle is seminal for the nation's food security.

2. The primary responsibility for the collection of agriculture statistics on Area Sown and Average Yield rests with State/UT Governments. The yield rates of major crops are obtained in the country based on the Crop Cutting Experiments conducted under scientifically designed General Crop Estimation Surveys (GCES). At present, estimates of the average yield (per hectare) of 78 crops (61 food and 17 non-food) are derived from scientifically planned Crop Cutting Experiments. The estimates of yield rates thus arrived are used for determining official estimates of crop production by the Ministry of Agriculture & Farmers Welfare.

3. GCES is conducted on a regular basis in 20 land record States/ UTs, 3 EARAS States, and 6 other States/UTs. The sampling design of GCES is stratified multistage random sampling and the fieldwork is entrusted to the State Government Officials. National Sample Survey Office (NSSO) has the overall responsibility of providing technical direction and overall coordination of crop surveys in different States. The Field Operations Division (FOD) of the NSSO continues to consolidate the results of crop-cutting experiments under the Crop Estimation Survey every year on the basis of information received from various State Government/UTs. The results of Crop Estimation Surveys are analyzed & an annual publication entitled "**Consolidated Results of Crop Estimation Surveys on Principal Crops**" is brought out. The report attempts to bring out the consolidated results on principal food and non-food crops. The present report is the 72nd in the existing series and relates to the Agriculture year 2019-20. I take this opportunity to convey my appreciation to Smt. Nitika Gupta, Deputy Director General, and her team of officers of Agricultural Statistics Headquarters of NSSO (FOD), whose efforts have led to the compilation of this publication.

4. I am sure that this publication will be of immense use to policymakers, agriculturalists, researchers, statisticians, and planners for the overall development of agriculture in the country.

(Dr. Bivas Chaudhuri)

### प्रस्तावना

भारत में प्रमुख खाद्यान्जन तथा गैर खाद्यान्जन फसलों पर उपज दरों का आंकलन “फसल प्राक्कलन सर्वेक्षण” (फ.प्र.स.) नामक राष्ट्रीय कार्यक्रम के अन्तर्गत 29 राज्यों/संघ राज्यों में फसल कटाई प्रयोगों के संचालन के आधार पर किया जाता है। फसल कटाई प्रयोग (सी.सी.ई.) अपने लंबे समय से स्थापित वैज्ञानिक वैधता, निष्पक्षता, याउचिकता, अनुभववाद और विविध कृषि जलवायु क्षेत्रों और कृषि प्रथाओं में निर्बाध प्रयोज्यता के कारण फसल उपज अनुमान का स्वर्ण मानक बने हुए हैं।

2. राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय (रा.प्र.स.का.) का क्षेत्र संकार्य प्रभाग (क्षे.सं.प्र.) प्रमुख फसलों की उपज दरों के आंकलन हेतु फसल प्राक्कलन सर्वेक्षणों के आयोजन तथा संचालन में राज्यों/संघ-राज्यों को तकनीकी मार्गदर्शन प्रदान करता है। अपने तकनीकी निगहबानी के अधिमत के अंतर्गत रा.प्र.स.का. (क्षे.सं.प्र.) यह सुनिश्चित करता है कि विभिन्न राज्यों/संघ-राज्यों द्वारा एक जैसी मानक तकनीक, कार्यविधि एवं प्रक्रिया अपनायी जाए। इसके अतिरिक्त रा.प्र.स.का., राज्यों/संघ-राज्यों के सहयोग से फसल सांख्यिकी सुधार (फ.सां.सु.) योजना के अन्तर्गत क्षेत्रफल परिणाम, क्षेत्रफल समुच्चयन एवं फसल कटाई प्रयोगों के प्रतिदर्श जांच कार्यक्रम को भी कार्यान्वित करता है। फसल कटाई प्रयोगों पर प्रतिदर्श जांच के कार्यक्रम का कार्यान्वयन करते समय, प्रतिदर्श ग्रामों के चयन से लेकर क्षेत्र कर्मचारियों के प्रशिक्षण तथा क्षेत्र कार्य के पर्यवेक्षण जैसे फसल कटाई प्रयोगों के पहलुओं को विधिवत ध्यान में रखा जाता है। इस प्रक्रिया में फसल उपज आंकलन हेतु फसल कटाई प्रयोग के संचालन सम्बन्धी कुछ महत्वपूर्ण सूक्ष्म स्तरीय जानकारी भी एकत्र होती है।

3. फसल प्राक्कलन सर्वेक्षण के विश्लेषित निष्कर्षों को समेकीकृत कर रा.प्र.स.का. (क्षे.सं.प्र.) द्वारा “प्रमुख फसलों पर फसल प्राक्कलन सर्वेक्षण के समेकित परिणाम” नामक शीर्षक के अन्तर्गत इस वार्षिक प्रकाशन के रूप में निकाला जाता है। वर्तमान प्रकाशन इस श्रृंखला का 72 वां अंक है। प्रतिवेदन का उद्देश्य विभिन्न राज्यों / संघ-राज्यों में सर्वेक्षण के बहुमुखी पहलुओं जैसे कार्य-क्षेत्र, विस्तारण, सर्वेक्षण-आभिकल्प तथा प्रतिदर्श आकार इत्यादि की संक्षिप्त समीक्षा करना तथा वर्ष 2019-20 के दौरान मानक त्रुटि के साथ फसल उपज दर आंकलित कर सर्वेक्षण के परिणामों पर ध्यान केन्द्रित करना है।

4. वर्ष 2019-20 के दौरान फ.प्रा.स. के अंतर्गत विभिन्न राज्यों तथा संघ-राज्यों में 61 खाद्यान्जन तथा 17 गैर-खाद्यान्जन फसलों को शामिल करते हुए 17,49,586 फसल कटाई प्रयोगों को नियोजित किया गया। इस प्रतिवेदन में किये गये विश्लेषण तथा प्राप्त किए गये निष्कर्ष मुख्य रूप से सम्बन्धित राज्यों/संघ-राज्यों के राज्य कृषि सांख्यिकी प्राधिकारों द्वारा प्रदत्त आंकड़ों तथा जानकारी पर आधारित है। इस प्रतिवेदन के प्रस्तुतीकरण में विभिन्न राज्यों के राज्य कृषि सांख्यिकी प्राधिकारों एवं उच्च स्तरीय समन्वय समिति के अध्यक्षों एवं सदस्यों द्वारा दिये गये समर्थन एवं सहयोग के लिए आभार व्यक्त किया जाता है।

5. प्रतिवेदन की विषय वस्तु एवं प्रस्तुतीकरण में सुधार हेतु सुझावों का स्वागत है।

09 OCT 2023

## PREFACE

In India, estimates of yield rates of principal food and non-food crops are obtained on the basis of crop cutting experiments (CCEs) conducted in 29 States/UTs under the National Programme of Crop Estimation Surveys (CES). The CCEs continue to be the gold standard of crop yield estimation due to their long-established scientific validity, objectivity, randomness, empiricism, and seamless applicability in the diverse agro-climatic regions and agrarian practices.

2. Field Operations Division (FOD) of the National Sample Survey Office (NSSO) has been providing technical guidance to States/UTs for organizing and

conducting CES for estimating yield rates of principal crops. In the purview of its mandate of technical oversight, NSSO (FOD) also ensures adoption of uniform standard technique, methodology and procedures by different States/UTs. In addition, NSSO in collaboration with the States/UTs implements sample check programmes on Area Enumeration, Area Aggregation and conduct of Crop Cutting Experiments under the Scheme of Improvement of Crop Statistics (ICS). While executing the programme of sample checks on Crop Cutting Experiments, the operational aspects of the conduct of crop cutting experiments right from selection of sample villages, training of field staff and supervision of field work are duly taken into consideration. In the process, certain vital micro-level details relating to conduct of crop cutting experiments for estimation of crop yield are also captured.

3. The analysed results of CES are consolidated and brought out by NSSO (FOD) in this annual publication titled **"Consolidated Results of Crop Estimation Survey on Principal Crops"**. The present publication is the **72<sup>nd</sup>** issue of the series. The report purposes to review briefly the multifaceted aspects such as scope, coverage, survey design and sample size etc. of the survey in various States/UTs and focuses attention on the results of the surveys in setting out the estimates of crop yields and associated standard errors during the year **2019-20**.

4. **17,49,586** crop cutting experiments covering **61** food and **17** non-food crops were planned in different States/UTs during **2019-20** under CES. The analysis made and conclusions drawn in the report are primarily based on the data and information furnished by the State Agriculture Statistics Authorities (SASAs) of the concerned States/UTs. The support and co-operation received from SASA, the Chairpersons and members of High-Level Coordination Committee (HLCC) of various States in the presentation of the report is gratefully acknowledged.

5. Suggestions for further improvement in the content and presentation of the Report are welcome.

(S.C. Malik)

## **A. Agricultural Statistics Schemes & NSSO**

### **1. National Sample Survey office(NSSO)**

The Directorate of National Sample Survey (NSS), established in the year 1950, was reorganized into the present NSSO under the Government of India's Resolution of 5<sup>th</sup> March, 1970. The organization now consists of four functional Divisions with a Director General (DG) at the apex level. Each of the Divisions viz. (i) Survey Design and Research Division, (ii) Data Processing Division (DPD) (iii) Survey Coordination Division and (iv) Field Operations Division is headed by an Additional Director General. The Field Operations Division (FOD) undertakes the field work relating to Socio - Economic Surveys, Industrial Surveys, Surveys for collection of retail prices in urban and rural areas, Urban Frame Survey for updation of area frame in urban areas for use in Socio-Economic Surveys & Methodological Surveys/Studies. Agriculture Statistics Headquarters of Field Operation Division is engaged with Agricultural Surveys under the scheme for Improvement of Crop Statistics (ICS).

### **2. Timely Reporting Scheme (TRS)**

The Ministry of Agriculture initiated TRS in 1968-69 in land record states in order to reduce the time lag between completion of sowing and the availability of estimates of area sown and similarly between the completion of harvesting and availability of estimates of production in respect of important crops.

### **3. Establishment of an Agency for Reporting Agricultural Statistics (EARAS)**

The Ministry of Agriculture sponsored a scheme in 1975-76 for Establishment of an Agency for Reporting Agricultural Statistics (EARAS) in three permanently settled States of Kerala, Odisha & West Bengal and later extended it to Arunachal Pradesh, Nagaland, Sikkim and Tripura.

### **4. General Crop Estimation Surveys (GCES)**

Crop Estimation Surveys (CES) are conducted by States and Union Territories for obtaining sufficiently precise estimates of average yield of principal food and non-food crops using the objective technique of Crop Cutting Experiments (CCE) by applying scientific sampling method.

### **5. Improvement of Crop Statistics (ICS)**

The scheme of ICS which had a modest beginning in the year 1973-74 reached to the optimum coverage in subsequent years. The scheme is closely related to the schemes of TRS, EARAS and GCES and was initiated with the objective of pointing out deficiencies in the system of collection of area & yield statistics through the joint efforts of the NSSO (FOD) & State Agricultural Statistics Authority (SASA) and to suggest remedial measures. NSSO (FOD) is also entrusted with the responsibility of providing technical guidance and assistance to the states in developing suitable survey techniques for obtaining timely and reliable estimates of crop area & yield and imparting training to State Government field personnel. The scheme is operational in 20 states and 2 U.T at present covering about 44 crops.

## B. Concepts & Definitions

### 1(a). Food crops

The food crops cover Cereals, Pulses & Beans, Small Millets, Condiments & Spices, Fruits & Vegetables and Sugar (Sugarcane & Cocoa).

### 1(b). Non-Food crops

The non-food crops include Oil-seeds, Fibres and Drugs & Narcotics.

### 2(a). Temporarily settled States

States and Union Territories which have been cadastrally surveyed and where area & land use statistics form a part of the land records maintained by the revenue agency are referred to as “Temporarily Settled States”. This system is followed in 19 States namely, Andhra Pradesh, Assam (excluding hill districts), Bihar, Chhattisgarh, Goa, Gujarat, Haryana, Himachal Pradesh, Jammu & Kashmir, Jharkhand, Karnataka, Madhya Pradesh, Maharashtra, Punjab, Rajasthan, Tamil Nadu, Telangana, Uttarakhand and Uttar Pradesh, and the five Union Territories of Chandigarh, Dadra & Nagar Haveli, Daman & Diu, Delhi and Puducherry, covering about 86% of area.

### 2(b). Permanently settled States

Kerala, Odisha and West Bengal are categorised as “Permanently Settled States”, as there is no land revenue agency at the village level and crop area & land use statistics are collected through a scheme of sample surveys. These States cover about 9% of area.

### 2(c). Other States

Parts of Assam (hill districts), Arunachal Pradesh, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim and Tripura and the two Union Territories of Andaman & Nicobar Islands and Lakshadweep, for which only “conventional” estimates are available, cover about 5% of area.

### 3. Seasons

Agricultural Year can be broadly divided into the following three major seasons based on the periods of sowing and harvesting:

Kharif	-	July to December
Rabi	-	January to March
Summer (or Zaid Rabi)	-	April to June

### 4. Reference period

The reference period for a survey is Agricultural Year (July to June) e.g. year 2019-20 is July 2019 to June 2020.

### 5. Crop mixtures

Two or more crops of the same season grown in a patch with the constituent crops being sown intermixed or in different rows, will constitute a crop mixture.

## **6. Geographical Area**

India has an area of 32,87,263 sq. km. It is the seventh largest country of the world after Russia, Canada, China, the U.S.A., Brazil and Australia. India accounts for about 2.4 per cent of the total surface area of the world.

## **7. Nine fold classification of Area**

a. Forests

### **Area not available for cultivation**

b. Area under non-agricultural uses

c. Barren and unculturable land whether in isolated blocks or within cultivated holding

### **Other uncultivated land excluding Current fallow**

d. Permanent pastures and other grazing lands

e. Miscellaneous tree crops and groves not included in the net area sown

f. Culturable waste

### **Fallow land**

g. Fallow land other than current fallow

h. Current fallow: This represents cropped area which is kept fallow during the current year.

i. Net area sown: This represents the total area sown with crops and orchards. Area sown more than once in the same year is counted only once.

## **8. Gross Cropped Area**

This represents the total area sown once and/or more than once in a particular year, i.e. the area is counted as many times as there are sowings in a year. This total area is also known as total cropped area or total area sown.

## **9. Area Sown more than once**

This represents the areas on which crops are cultivated more than once during the agricultural year. This is obtained by deducting Net Area Sown from Gross Cropped Area.

## **10. Irrigated Area**

The area is assumed to be irrigated for cultivation through sources such as canals (Govt. & Private), tanks, tube-wells, other wells and other sources.

## **11. Cropping Intensity**

Cropping intensity refers to raising of a number of crops from the same field during one agricultural year; it can be expressed as

$$\text{Cropping Intensity} = (\text{Gross Cropped Area} / \text{Net Sown Area}) \times 100$$

## **12. Recovery ratio**

The first weight of the produce taken out from the plants i.e. cobs in case of Jowar, Bajra, Maize, weight of grains in case of Paddy, Wheat, Barley, Gram etc., the ratio between the cobs to grain (wet), Paddy to rice (after taking away husk) are known as recovery ratio.

- i) **Driage ratio:** The ratio of weight between the wet grains or produce to dried and marketable produce is known as Driage ratio.
- ii) **Ginning ratio:** The weight of cotton to lint Cotton without seeds (i.e. cotton minus seeds) is known as ginning ratio. This ratio is obtained from ginning factories.
- iii) **Net weight:** In Agricultural Statistics, the net weight will always be more than gross weight. While reporting the weight of crop (produce) when sown in mixture, the percentage of the experimental crop sown in that mixture is also given. In this case, one has to work out the produce had it been sown pure.

## **13. Moisture meter**

Moisture meter is an instrument to measure the moisture content in the grains from which the driage ratio can be calculated.

## **14. Improved Agricultural Practices**

Agricultural practices include irrigation, crop rotation, application of fertilizers & pesticides, and the domestication of livestock. Improved agricultural practices could increase production, which can allow the population to feed itself without imports, or it might allow excess production so that the surplus can be sold to have increased buying power for other goods and services. The improved practices can reduce the cost of fertilizer and use of fuel. Also, some practices preserve the land environmentally, such as reducing erosion, etc.

## **15. Conventional Method of Yield Estimation :-**

### **(a) Annawari system**

Under ‘traditional method’, the yield per hectare is obtained either in terms of a direct estimate in quintals per hectare by eye-appraisal or as the product of ‘normal yield’ and the ‘condition factor’.

### **(b) Normal Yield**

The normal yield is somewhat vaguely defined as the yield which is typical of the area. It is considered to be the yield on the average soil in a year of average character. The normal yield is the yield for which past experiences have shown to be most occurring crop yield. This is the typical crop yield of the local area, which a cultivator has a right to expect and with which he is content, while if he gets more, he has reason to rejoice and if he gets less he has reason to complain. Normal yields have been fixed usually for each district empirically on the basis of past experience.

### **(c) Condition factor**

The condition factor is an estimate of the crop yield in a given year in relation to normal yield and is usually fixed in terms of annas, with a specified number of annas representing normal yield.

### **(d) Calculation of yield**

The lower officers of Revenue and Agriculture departments make a guess of the condition factor of the crop in their jurisdiction on the basis of their impression through personal observations and enquiries with local cultivators and pass on their estimates to their superiors, who may modify those in the light of their experience.

## **16. Statistical Methods of Yield Estimation:-**

### **General Crop Estimation Surveys (GCES)**

GCES consists of performing a specified number of crop cutting experiments in randomly selected fields. Crop cutting experiment conducted under well designed estimation survey is an effective technique for estimating the average yield by selecting the field, randomly locating a plot of a specified size, harvesting, threshing, weighing and recording the weight of the produce from the plot. The sampling design of GCES is that of stratified multistage random sampling, in which Taluks/CD Blocks/Anchals are taken as strata, villages within the stratum as FSUs, and plots of specified size within the field (survey numbers/sub-survey numbers) as ultimate units of sampling. In the land record states, villages selected under TRS in a stratum for the current year forms the sampling frame of FSUs for GCES.

## **17. Conversion factor**

Converting the yield from Grams per plot to Kg. per hectare  
Weight of produce in Gms.

----- X 10

Plot size in Sqr. Mtrs.

## **18. Standard Error**

The calculation of standard errors and their study is helpful in assessing the adequacy of the sample size, trend of changes in yield rates and in planning other allied studies. It is calculated as under:-

$$\% \text{ Standard Error} = \frac{\text{S.E. of the Estimate}}{\text{Estimate}} \times 100$$

## कार्य सारांश

प्रत्येक राज्य/जिला/प्रभाग या ऐसे प्रशासनिक स्तरों के लिए, प्रमुख खाद्यान्न तथा गैर-खाद्यान्न फसल का प्रति हैक्टेयर औसत उपज आंकलन जो कि फसल उत्पादन आंकलन की दृष्टि से बहुत महत्वपूर्ण है, फसल आंकलन सर्वेक्षण कार्यक्रम के अन्तर्गत वैज्ञानिक रूप से नियोजित फसल कटाई प्रयोगों से प्राप्त किया जाता है। वर्ष 2019-20 के लिए फसल प्राक्कलन सर्वेक्षण की मुख्य विशेषताएँ निम्न हैं:

- वर्ष 2019-20 के दौरान फसल प्राक्कलन सर्वेक्षण कार्यक्रम के अन्तर्गत **61** खाद्यान्न तथा **17** गैर-खाद्यान्न फसलों को शामिल किया गया। नई फसलों का समावेश राज्यों द्वारा उपज दर के सांख्यिकीय प्राक्कलन हेतु प्रयोग में ली जाने वाली वैज्ञानिक पद्धतियों एवं प्रक्रियाँ पर बल देने को परिलक्षित करती है। **(पैरा-3.3)**
- आन्ध्र प्रदेश, बिहार, गुजरात, झारखंड, कर्नाटक, महाराष्ट्र, राजस्थान तथा तमिलनाडु में कुछ महत्वपूर्ण फसलों के लिए दो परतीय के साथ-साथ चार परतीय स्तरीकरण को अपनाया गया है, जबकि मध्य प्रदेश तथा छत्तीसगढ़ में धान तथा गेहूं के लिए तीन परतीय वर्गीकरण को अपनाया गया। **(पैरा-4.6 और सारणी-3)**
- गत वर्ष के कुल प्रयोगों **17,26,577** की तुलना में वर्ष 2019-20 के लिए विभिन्न फसलों के कुल प्रयोग **17,49,586** नियोजित किये गए। प्रतिदर्श परिमाण में **23,009** प्रयोगों की कुल वृद्धि खाद्यान्न फसलों में **11,189** प्रयोगों की वृद्धि तथा गैर-खाद्यान्न फसलों में **11,820** प्रयोगों की वृद्धि के कारण हुई। **(पैरा-7.1)**
- खाद्यान्न फसलों के लिए **14,81,837** प्रयोगों में से केवल **63821 (4%)** प्रयोग **20** फल तथा सब्जी की फसलों पर **13** राज्यों में नियोजित किये गये। यह विरोधाभासी है क्योंकि भारत बागवानी फसलों और फलों का दूसरा सबसे बड़ा उत्पादक है। राज्य कृषि सांख्यिकी प्राधिकरण बागवानी फसलों और फलों के बढ़ते महत्व और जीसीईएस के तहत इन फसलों के कमतर प्रतिनिधित्व के बीच की अंतर पर ध्यान दे सकते हैं। **(पैरा-7.5 और परिशिष्ट-II)**
- फसल कटाई प्रयोगों के संचालन में लगे प्राथमिक कर्मियों के लिए नियमित प्रशिक्षण कार्यक्रमों को वर्ष 2019-20 के दौरान सभी राज्यों/संघ राज्यों में आयोजित किया गया। असम, गोवा, ओडिशा, राजस्थान, पश्चिम बंगाल, दादर और नगर हवेली तथा पुडुचेरी राज्यों/ संघ राज्यों ने प्राथमिक कर्मचारियों की शत प्रतिशत उपस्थिति दर्ज कराई जो कि अत्यंत सराहनीय है। बिहार, छत्तीसगढ़ (कृषि/सांख्यिकी), हिमाचल प्रदेश (खरीफ), महाराष्ट्र, पंजाब (रबी में कृषि) एवं उत्तराखण्ड में विभिन्न एजेंसियों की उपस्थिति अखिल भारतीय औसत (**84%**) से कम थी। अप्रशिक्षित कर्मचारियों द्वारा फसल कटाई प्रयोगों का क्षेत्र कार्य किये जाने से इसकी वस्तुनिष्ठता पर विपरीत प्रभाव पड़ता है। अनुपस्थित रहे प्राथमिक कर्मियों के लिए अलग से प्रशिक्षण कार्यक्रम आयोजित करने की सम्भावनाओं को और अधिक मुहैया करवाए जाने की आवश्यकता है। **(पैरा-8.2)**
- फसल कटाई प्रयोग के संचालन में कार्यरत प्राथमिक कर्मियों को प्रशिक्षण देने के लिए आयोजित कुल **1895** प्रशिक्षण केन्द्रों में से **735 (39 %)** प्रशिक्षण केन्द्रों में रा.प्र.स.का. के अधिकारियों ने पर्यवेक्षक के रूप में भाग लिया और **131 (7 %)** केन्द्रों में प्रशिक्षण अधिकारी के रूप में भाग लिया। **(पैरा-8.3)**
- फसल प्राक्कलन सर्वेक्षण 2019-20 के अन्तर्गत नियोजित प्रयोगों में से लगभग 20 प्रतिशत प्रयोगों का ही पर्यवेक्षण किया गया जिसमें रा.प्र.स.का. द्वारा कार्यान्वित फसल सांख्यिकी सुधार योजना के अंतर्गत 2 प्रतिशत पर्यवेक्षण भी सम्मिलित हैं। आन्ध्र प्रदेश, बिहार, छत्तीसगढ़, गोवा, हरियाणा, हिमाचल प्रदेश, जम्मू एवं कश्मीर, झारखण्ड,

कर्नाटक, मध्य प्रदेश, मेघालय, ओडिशा, पंजाब, राजस्थान, उत्तराखण्ड तथा पश्चिम बंगाल में राज्य सांख्यिकी विभाग द्वारा कुल पर्यवेक्षण 10 प्रतिशत से कम था। पर्याप्त पर्यवेक्षण उपज सांख्यिकीय की गुणवत्ता के लिए आवश्यक है।

(पैरा-9.3)

8. फसल सांख्यिकी सुधार योजना के अंतर्गत फसल कटाई प्रयोगों पर प्रतिदर्श जांच के निष्कर्ष अनुलग्नक III(c) में सारणीबद्ध है। विगत वर्षों में प्राथमिक कर्मचारियों द्वारा किए गए फसल कटाई प्रयोगों के जांच से संबंधित राज्यों में सामान्य फसल प्राक्कलन सर्वेक्षण नियमावली (जी सी ई एस मैनुअल) की निर्धारित कार्यप्रणाली का पालन करने वाले फसल कटाई प्रयोगों के प्रतिशत में वृद्धि हुई है अखिल भारतीय औसत का आंकड़ा यह दर्शाता है की 67 % फसल कटाई प्रयोग निर्धारित सा.फ.प्रा.स. कार्यप्रणाली और सांख्यिकीय प्रक्रियां के अनुसार सम्पन्न किए गए। यह गत वर्ष की तुलना में 1 % की वृद्धि है। इन निष्कर्षों को नियमित रूप से विभिन्न राज्य कृषि सांख्यिकी प्राधिकारों के ध्यान में लाया गया। समस्या वाले क्षेत्रों को उच्च स्तरीय समन्वय समिति की बैठकों में चर्चा के दौरान सामने लाने पर भी पर्याप्त ज़ोर दिया गया है।

(पैरा-9.6)

9. राज्यों यथा: ओडिशा, तेलंगाना, उत्तराखण्ड दादर और नगर हवेली, दमन और दीव तथा पुड्योरी से फसल प्राक्कलन सर्वेक्षण का प्रत्युत्तर दर शत प्रतिशत दर्ज किया गया जो कि अति सराहनीय है। वर्ष 2019-20 के दौरान फसल प्राक्कलन सर्वेक्षण के अंतर्गत कुल प्रत्योत्तर 90 प्रतिशत था। असम, बिहार, छत्तीसगढ़, गोवा, हरियाणा, जम्मू एवं कश्मीर, हिमाचल प्रदेश, झारखण्ड, कर्नाटक, महाराष्ट्र तथा मध्य प्रदेश में प्रत्युत्तर 90 प्रतिशत से कम था। फसल अनुमानों की विश्वसनीयता को बढ़ाने हेतु इन सभी राज्यों के राज्य प्राधिकारों को प्रत्युत्तर बढ़ाने के लिए उचित उपचारी उपाय अपनाए जाने की आवश्यकता है।

(पैरा-10.2)

10. अप्रत्युत्तरों को नियंत्रित करने हेतु प्रभावी उपचारी कदम उठाने के उद्देश्य से यह आवश्यक है कि क्षेत्र स्तर पर अप्रत्योत्तर तथा सारणीयन स्तर पर प्रयोगों को रद्द करने के कारणों का विश्लेषण किया जाए।

(पैरा-10.6)

11. फसल प्राक्कलन सर्वेक्षण 2019-20 के परिणामों से स्पष्ट होता है कि चावल, गेहूँ, रागी, जौ, ज्वार (खरीफ), बाजरा, मक्का, चना, कपास, अलसी एवं मूँगफली (रबी और ग्रीष्म) ज्यादातर महत्वपूर्ण फसलों में पिछले वर्ष की तुलना में अखिल भारतीय स्तर पर उपज दर अनुमानों में वृद्धि दर्ज की गई है।

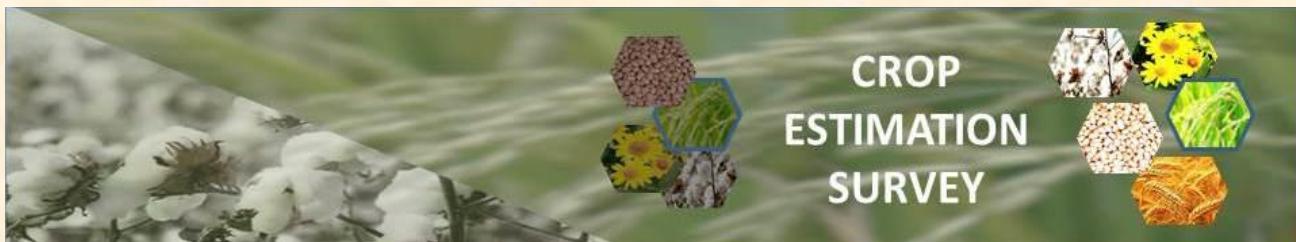

(पैरा-11.3)

12. असम, हिमाचल प्रदेश, कर्नाटक, केरल, मेघालय, राजस्थान एवं उत्तराखण्ड में सभी फसलों के उपज दरों के अनुमानों का 5% मानक त्रुटि प्रतिशत की स्वीकृत सीमा के अंदर था। जबकि, आंध्र प्रदेश में कुल्थी (खरीफ); छत्तीसगढ़ में ज्वार (खरीफ), सोयाबीन (खरीफ), जौ, तिल, कोडन कुटकी, हरियाणा में मक्का, कर्नाटक में मक्का (ग्रीष्म उच्च उपज), ; उरद (रबी); सेव, मिर्च (खरीफ), अलसी, मूँगफली (रबी); लोबिया (खरीफ/ग्रीष्म), फूलगोभी, सूरजमुखी (ग्रीष्म, सिंचित); मध्य प्रदेश में चावल (खरीफ उच्च उपज सिंचित); मिर्च (रबी), तेलंगाना में बाजरा (खरीफ), तिल (खरीफ), कोरा; तमिलनाडु समई; दादर एवं नगर हवेली में चावल और रागी ; फसलों के उपज दरों के अनुमानों का मानक त्रुटि प्रतिशत (10 प्रतिशत से अधिक) पाया गया। राज्य कृषि सांख्यिकी प्राधिकरणों अपने प्रतिदर्श आकार एवं रूपरेखा पर दोबारा गौर करके गैर- सुखवन और सुखवन फसलों के लिए क्रमशः 5% और 10% से कम रखने का प्रयास करना चाहिए। यह लंबे समय से राज्यों में प्रचलित महत्वपूर्ण फसलों के जिला स्तर पर आकलन में अपेक्षित परिशुद्धता को सुनिश्चित करने के लिए अविभाज्य होगा।

(पैरा-11.5 और सारणी 17)

13. उपज दरों के स्तरीकरणोत्तर विश्लेषण को कुछ राज्यों में कुछ फसलों पर लागू किया जा रहा है। यह आवश्यक है कि इस विश्लेषण के क्षेत्र को सभी राज्यों में अधिक से अधिक फसलों पर लागू किया जाए। जिसे प्राक्कलन की परिशुद्धता को दो महत्वपूर्ण निविष्ट यथा सिचाई एवं बीज किस्म के आधार पर बढ़ाया जाए।

(पैरा-12.2)

## EXECUTIVE SUMMARY

Estimates of average yield per hectare of principal food and non-food crops for each State/District/Division or such administrative levels which are of importance from the point of view of working out estimates of crop production, are derived from scientifically planned crop cutting experiments under the programme of Crop Estimation Surveys. The salient features of the Crop Estimation Surveys for the year 2019-20 are highlighted below: -

1. **61** food and **17** non-food crops were covered under the programme of Crop Estimation Surveys (CES) during the year 2019-20. Inclusion of new crops reflects the emphasis of the State(s) on the increasing adoption of Statistical methodologies and procedures for the scientific estimation of Crop yield rate. **(Para-3.3)**
2. Two-fold as well as four-fold stratification has been adopted for some important crops in Andhra Pradesh, Bihar, Gujarat, Jharkhand, Karnataka, Maharashtra, Rajasthan and Tamil Nadu. In Madhya Pradesh and Chhattisgarh, however, a three-fold classification has been adopted for Paddy and Wheat. **(Para-4.6, & Table-3)**
3. A total of **17,49,586** crop cutting experiments were planned on different crops during 2019-20 as compared to **17,26,577** experiments in the previous year. The net increase of 23,009 experiments in the sample size is due to increase of **11,189** experiments under food crops and increase of **11,820** experiments under non-food crops. **(Para-7.1)**
4. Out of **14,81,837** experiments for food crops, only **63,821 (4 %)** experiments were planned on 20 Fruits and Vegetable crops covered in 13 States. This is paradoxical as India is the second largest producer of horticulture crops & fruits. SASAs may take note of the chasm between increasing importance of horticulture crops and fruits and poor representation of these crops under GCES. **(Para-7.5 & Appendix-II)**
5. Regular programmes of training for primary workers engaged in the conduct of crop cutting experiments were organised in all the States/UTs during 2019-20. It is encouraging to note that States: Assam, Goa, Odisha, Rajasthan, West Bengal, Dadar & Nagar Haveli, Daman & Diu and Puducherry recorded cent percent attendance of their primary staff. However, attendance of various agencies at the training centers was less than All India average (84%) in Bihar, Chhattisgarh (Agricultural/Statistical), Himachal Pradesh (Agriculture in Kharif), Maharashtra, Punjab (Agriculture in Kharif) and Uttarakhand. Conducting of the experiments by untrained personnel would impact its objectivity adversely. The feasibility of organising separate training for the absentee primary workers needs to be explored. **(Para-8.2)**
6. In all, out of the **1895** training centers, NSSO officials participated in **735 (39%)** centers as observers and imparted training in **131 (7%)** centers. **(Para-8.3)**
7. **20%** of the experiments planned under CES during 2019-20 were supervised. This includes **2%** experiment which were supervised under Scheme of Improvement of Crop Statistics (ICS Scheme) implemented by NSSO. The total supervision by State Statistical Department was below 10% in Andhra Pradesh, Bihar, Chhattisgarh, Goa, Haryana, Himachal Pradesh, Jammu & Kashmir, Jharkhand, Karnataka, Madhya Pradesh, Meghalaya, Odisha, Punjab, Rajasthan, Uttarakhand and West Bengal. Adequate supervision is essential for quality of Yield Statistics. **(Para-9.3)**

8. The findings of the sample check on crop cutting experiments under the Scheme of Improvement of Crop Statistics are tabulated in **Annex III(c)**. The Supervisory checks over the years on CCEs conducted by primary workers have resulted in increasing percentage of CCEs adhering to prescribed methodologies of the respective State GCES manual. The figure of all India average shows that **67%** sample experiments were conducted as per the prescribed GCES manual & Statistical procedures of the respective States/ UTs. This is an increase of **1%** vis-à-vis previous year. These findings are brought to the notice of the various State Agricultural Statistics Authorities (SASAs) on a regular basis. Adequate emphasis is also given to focus on the problem areas in the deliberations of the High Level Co-ordination Committee meetings of the States. **(Para-9.6)**
9. It is commendable to note that CES response rate was cent percent from Odisha, Telangana, Dadar & Nagar Haveli, Daman & Diu and Puducherry. However, in 2019-20, the overall response under CES was 90 percent. In Assam, Bihar, Chhattisgarh, Goa, Haryana, Himachal Pradesh, Jammu & Kashmir, Jharkhand, Karnataka, Maharashtra and Madhya Pradesh the response was below **90** per cent. Adequate remedial measures need to be taken by SASAs of these States to improve the response so as to increase the reliability of the crop yield estimates. **(Para-10.2)**
10. With a view to take effective remedial measures to control non-response, it is necessary to analyse the reasons for non-response at field level and rejection of experiments at the tabulation stage. **(Para-10.6)**
11. The results of CES for 2019-20 reveal that the yield rate estimates at All-India level increased as compared to the previous year for majority of important crops viz., Paddy(Kh.), Wheat, Ragi , Barley, Groundnut (Rabi & Summer), Linseed , Jowar (Kh.), Bajra, Maize, Gram and Cotton. **(Para-11.3)**
12. The percentage standard error of the estimates of yield rate of all crops was found to be within the acceptable limits of 5% for the States namely: Assam, Himachal Pradesh, Kerala, Meghalaya, Uttarakhand and Puducherry. However, it was high (more than 10%) in Andhra Pradesh for Horsegram (Kharif); Chhattisgarh for Soyabean (Kharif), Barley, Sesamum and Kodan-Kutki; Haryana for Maize; Karnataka for Maize Sum. Hyv., Blackgram (Rabi),Save, Chilies (Kharif), Groundnut (Rabi), Linseed, Cowpea, Cabbage, Sunflower Sum. Irr., Madhya Pradesh for Rice (Kh. Hyv Ir.), Chilies (Rabi); Telangana for Bajra (Kharif),Korra; Tamilnadu for Samai; and Dadar Nagar & Haveli for Rice & Ragi;. **State SASAs must endeavor to keep it below 5% and 10 % for non-dried & dried crops respectively through revisiting sample size or design.** This is indispensable to ensure that the desired precision which is followed since long in various States in estimates at the district level is obtained. **(Para-11.5 & Table-17)**
13. Post-stratification analysis of yield rates as is being adopted by some States for a few crops. It is necessary to extend the scope of this analysis to more crops in all the States to increase the precision of estimates according to the two critical inputs viz. Irrigation and Seed Variety. **(Para-12.2)**

# INTRODUCTION

1

- 1.1 Agricultural sector continues to play a dominant and vital role in the Indian Economy by contributing a sizable share in the National Product and absorbing bulk of the economic activity pursued by majority of the population. In the context of primacy of Agriculture, timely and reliable statistics on crop production is of vital importance and significance. Crop Production has two major components viz., Area sown and average Yield rate. The primary responsibility for collection of statistics on these two aspects rests with the State/UT Governments. Statistics of Land Use and Area under Crops are obtained as by-product of land revenue administration in respect of the land record States/UTs, commonly known as Temporarily Settled States. On the other hand, the Permanently Settled States, viz., Kerala, Odisha and West Bengal are reporting Land Utilisation and Area Statistics based on sample surveys. At present, over **95 percent** of food grain production is estimated on the basis of yield rates obtained from scientifically planned crop cutting experiments conducted under the programme of Crop Estimation Surveys (CES) carried out by the State/UT Governments.
  
- 1.2 The Field Operations Division of National Sample Survey (NSS) as a consequence of the Cabinet Resolution of 1952 that mandated work related to the estimation of food production and large-scale sample survey spearheaded the systematic attempt to develop Statistical architecture for Crop Statistics in India. This involved monitoring, forecasting and estimation of area under major crops and estimation of crop wise yield through twin surveys namely Land Utilisation Surveys (LUS) and Crop Yield Statistics (CYS) till 1970. In 1962, Agriculture Statistics Division of Directorate of NSS started publication of systematic series of reports on its work and the first such review was published in September 1964 containing consolidated results of Crop Estimation Surveys on principal food crops carried out in the States from 1949-50 to 1960-61. Field Operations

Division (FOD) of National Sample Survey office (NSSO) continues to consolidate the results of crop cutting experiments under Crop Estimation Survey every year on the basis of information received from various State Government/UTs. The report attempts to bring out the consolidated results on principal food and non-food crops. The present report is Seventy-first in the existing series and relates to the Agriculture year 2019-20.

## OBJECTIVE 2

- 2.1 “An Extensive series of CCE’s on paddy carried out by Sir John A. Hubback more than 20 years ago over a greater part of the Rice tracts in Bihar and Orissa . So far as I know these are the earliest CCE’s experiments based on the principle of random sampling anywhere in the world”

Professor RA Fisher in his memorandum dated 2<sup>nd</sup> March 1945 addressed to Imperial Council of Agricultural Research, GoI.

Sir John A. Hubback carried out crop cutting work in India in 1923, 1924 and 1925 and was a pioneer in CCEs based on principle of Simple random sampling. His de novo work not only inspired administrators like Shri C.D. Deshmukh & Shri P.S. Rau but also legendary Statisticians like Professor R.A. Fisher in Britain and Dr. P.V. Sukhatme of ICAR-Indian Agricultural Statistics Research Institute, New Delhi and Prof. P.C. Mahalanobis of Indian Statistical Institute (ISI), Kolkata in India.

The primary objective of Crop Estimation Surveys is to obtain fairly reliable estimates of average yield rates of principal food and non-food crops for each State and Union Territory and for lower administrative unit such as Block, District etc. which are important from the point of view of crop production. The estimates of yield rates, thus arrived at, are generally adopted for the compilation of official estimates of crop production and used for the purposes of planning, policy formulation and implementation.

- 2.2 Under the programme of Crop Estimation Surveys, data on yield rates are collected through organising and conducting crop cutting experiments by applying statistical techniques of random sampling. The crop cutting experiment consists of identification & marking of an experimental plot of a specified size & shape in a selected field on the principle of random sampling, harvesting & threshing the produce and recording the weight of the produce. For a part of the experimental produce or in some cases for the entire produce of experiment, further processing of the harvested produce is done for determining the percentage recovery of dry grains or the marketable produce. For Paddy and Cotton, the yield is expressed in terms of Rice and Lint respectively after applying the standard recovery ratio and ginning ratio.

# COVERAGE 3

- 3.1 During 2019-20, Crop Estimation Surveys (CES) was conducted in 20 land record States/UTs, 3 EARAS States and 6 other States / UTs as given in **Table-1**.

**Table –1: Details of CES coverage during 2019-20**

States in which C E S was conducted	
<b>Land Record States/UTs</b>	1. Andhra Pradesh 2. Assam 3. Bihar 4. Chhattisgarh 5. Gujarat 6. Haryana 7. Himachal Pradesh 8. Jammu &Kashmir 9. Jharkhand 10. Karnataka 11. Madhya Pradesh 12. Maharashtra 13. Punjab 14. Rajasthan 15. Tamil Nadu 16. Telangana 17. Uttar Pradesh 18. Uttarakhand 19. Dadra & Nagar Haveli 20. Puducherry
<b>EARAS States</b>	1. Kerala 2. Odisha 3. West Bengal
<b>Other States and UTs</b>	1. Andaman district of A & N Islands 2. Daman & Diu 3. Goa 4. Manipur 5. Meghalaya 6. Tripura
States/UTs in which CES was not conducted	
1. Arunachal Pradesh 2. Chandigarh 3. Lakshadweep	4. Mizoram 5. Nagaland 6. Sikkim

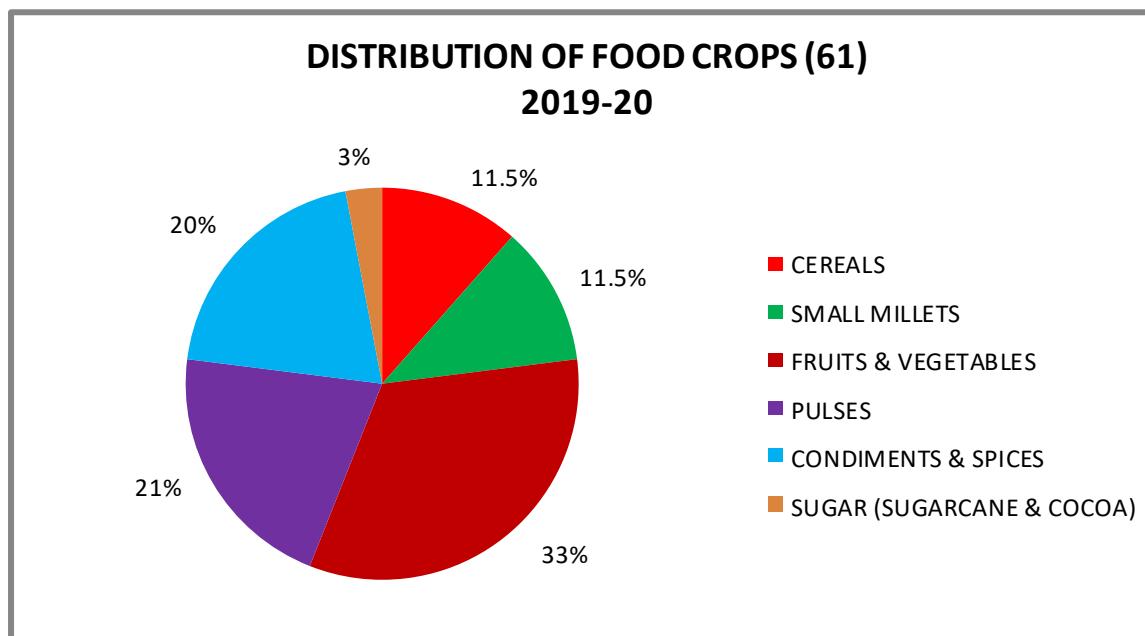

- 3.2 Details of crops for which crop cutting experiments under CES were planned in States/UTs together with the year of initiation of the survey and adoption of CES results for estimates of production are given in **Appendix-I**. It also gives information about the stratum, pre-stratification, if any, made in different States and size & shape of the plot adopted for the crop cutting experiments. It is evident that there is no uniformity among the States in respect of the plot size and shape even for major crops. Attempts need to be made to adopt the uniform shape and size of the cuts at least for important crops.
- 3.3 During the agricultural year 2019-20, a total of 78 crops comprising 61 food and 17 non-food crops were covered under CES in different States/UTs. The details of different categories of crops are given in Table –2 and also presented in Chart I & II.

**Table - 2: Crops covered under CES during 2019-20**

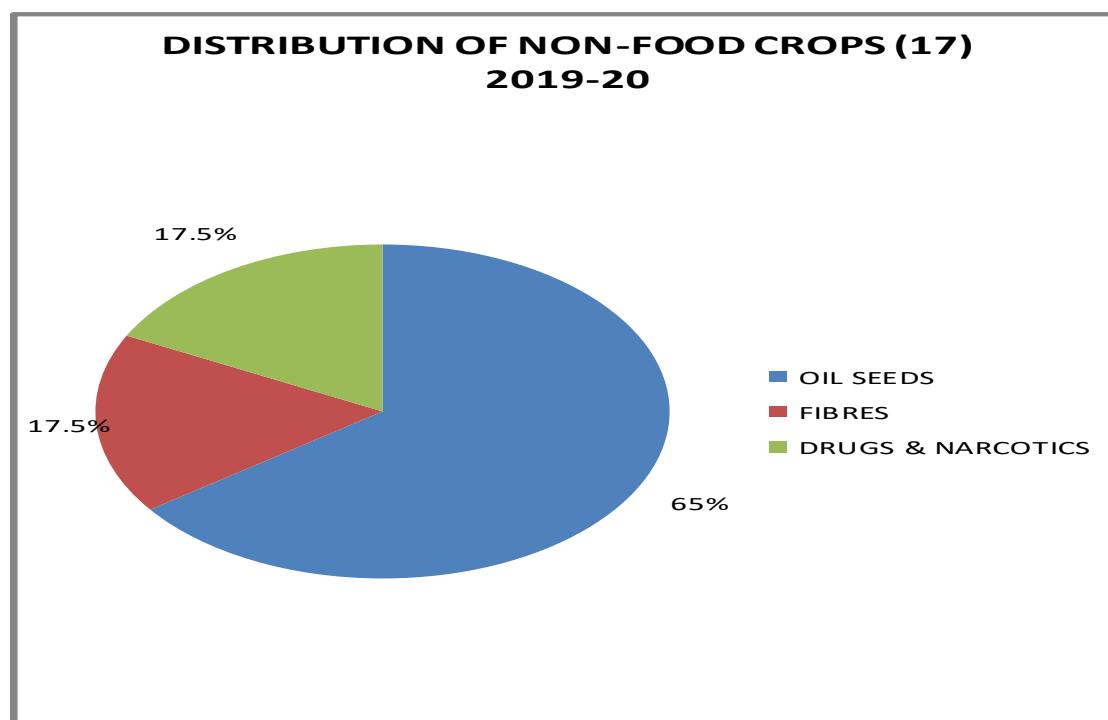

S. No.	Particulars	No. of crops (%)
<b>A. Food Crops</b>		
1	Cereals ( Paddy, Jowar, Bajra, Maize, Ragi (Mandua), Wheat, Barley )	7 (11.5%)
2	Pulses & Beans ( Gram (Bengalgram), Redgram (Tur/Arhar), Greengram (Moong), Blackgram (Urd), Lakh (Khesari), Masur, Horsegram (Kulthi), Peas, Moth, Cowpea (Lobia), Guar, Chowla, Rajma Beans)	13 (21%)
3	Small Millets ( Sawan (Jhangora), Korra, Kodon-Kutki (Kodan), Navane, Save, Samai, Varagu )	7 (11.5%)
4	Condiments & Spices (Chillies, Cumin, Fennel, Areca nut, Pepper, Saffron, Turmeric, Ginger, Garlic, Coriander, Methi, Nutmeg)	12 (20%)
5	Fruits & Vegetables (Lichi, Banana, Mango, Guava, Jackfruit, Cashewnut, Tapioca, Pine Apple, Potato, Onion, Brinjal, Tomato, Cauliflower, Papaya, Plantain, Avare (Sem), Tamarind, Beans, Cabbage, Bitter Gourd)	20 (33%)
6	Sugar (Sugarcane & Cocoa)	2 (3%)
<b>Total</b>		<b>61</b>
<b>B. Non –Food Crops</b>		
1	Oil Seeds (Groundnut, Sesamum (Gingelly), Castor, Rape & Mustard, Linseed (Alsi), Safflower, Sunflower, Soyabean, Tara Meera, Coconut, Niger )	11 (65%)
2	Fibres (Cotton, Jute, Mesta )	3 (17.5%)
3	Drugs & Narcotics (Tobacco, Isabgol, Betel Leaves )	3 (17.5%)
<b>Total</b>		<b>17</b>

**Chart - I**

**Chart – II**

3.4 The Field Operations Division (FOD) of the National Sample Survey office (NSSO) continuously reviews the coverage of crops under CES in States / UTs from the point of view of its importance, relative significance etc. measured in terms of share in All India production.

## SAMPLING DESIGN

4

- 4.1 The sampling design generally adopted for the CES during 2019-20 is that of Stratified Multi-Stage Random Sampling, with Tehsils/Taluks/RI circles/CD Blocks/Anchals etc. as Strata and revenue village within a Stratum as the First Stage Unit of sampling, survey number/field within each selected village as the Second Stage Unit of sampling and experimental plot of a specified shape and size as the ultimate unit of sampling. **Appendix -I** inter-alia, gives the stratum, shape and size of the experimental plot for each crop in different States/UTs. In each selected primary unit of sampling, generally two survey numbers/fields growing the experimental crop are selected for conducting crop cutting experiments. However, in Dadra and Nagar Haveli, three survey numbers/ fields are selected instead of two.
- 4.2 Generally, 80-120 experiments are conducted for a crop in a major district, where a district is considered as major for a given crop if the area under the crop in the district exceeds 80,000 hectares or lies between 40,000 and 80,000 hectares but exceeds the average area per district in the State. Otherwise, district is considered as minor for a given crop. Experiments in minor districts are so adjusted that the precision of the estimate is fairly high and the workload on the field staff is manageable. On an average, about 44 or 46 experiments are planned in a minor district. The number of experiments allotted to a district is distributed among the strata within the district roughly in proportion to the area under the crop in the stratum.

- 4.3 In the 3 non-land record States of Kerala, Odisha and West Bengal, both area and yield are estimated on the basis of sample surveys. The crop cutting experiments are planned in a sub-sample of the primary units selected for the purpose of area enumeration. While the general procedure for selection of sampling units at different stages is the same as that in other States, some special features in these States need specific mention.
- 4.4 In **Kerala**, block/city corporation or municipalities with an area of 10 sq. kms. and above are treated as separate stratum. Municipalities with an area of less than 10 sq. kms. are merged with adjoining blocks and treated as a single stratum. These blocks are divided into a number of Investigator Zones depending on the area of a block, nature of land etc. City corporation area is divided into three Investigator Zones. Each Municipality with an area more than 10 sq. kms. is treated as a single Investigator Zone. The number of crop cutting experiments conducted in each Investigator Zone is 8 per season for Paddy, 3 each for Coconut and Banana, and 2 each for Tapioca, Areca nut, Cashewnut, Pepper, Plantain, Sesamum and Jackfruit in an agricultural year. In Municipal area having separate Investigator Zone, 10 crop cutting experiments are conducted in respect of Paddy per season and 5 for Coconut per year. For City Corporation areas, 8 experiments for Paddy per season and 5 for Coconut per year in one Investigator Zone are conducted.
- 4.5 In **Odisha**, crop-cutting experiments for Paddy are conducted in 40% of EARAS villages having even serial nos. except serial nos. ending with “Zero” i. e. 10, 20, etc. in each block and for other crops, 50% of sample villages occurring against the even serial nos. i.e. 2, 4 and 6 etc. during Autumn and Winter Seasons. In Summer season, all the villages selected for Area Enumeration Survey under EARAS are covered under CES for Paddy and other crops. For Paddy, the crop cutting experiments are planned in proportion to crop area subject to minimum of two and maximum of four experiments in a village. For other crops, only one experiment is conducted in a village.
- 4.6 In the State of **West Bengal**, the area and yield surveys conducted by the Bureau of Applied Economics & Statistics (BAE&S) on the basis of grid sampling followed till 1985-86, has been dispensed with and the Scheme “Establishment of an Agency for Reporting Agricultural Statistics” (EARAS) has become not only the primary source for area statistics but also the source to provide the frame for selection of villages

for conduct of crop cutting experiments under CES in the State. Since Kharif 1996-97, the frame for sampling of plots for CCEs is prepared by BAE&S on its own. Ten mouzas out of all the EARAS mouzas in a block are randomly selected for CCE. A 10% systematic sample (subject to a minimum of 100 plots) of all the plots in a selected mouza is taken and the type of land use for each plot in the sample is identified. In this way, a sub-frame of plots cultivating each crop is prepared for each such mouza. If the number of plots cultivating a crop in a mouza is too small, all the plots cultivating the crop are enumerated. The plots for conducting CCEs are sampled out of this sub-frame. In all, 20 plots are taken in the form of two inter-penetrating sub-samples of size 10 each for each block for a crop. On the basis of these, two independent estimates of yield rate are obtained for a block and these are later combined to give an overall estimate.

- 4.7 In some States, the sampling design takes into account the stratification according to inputs viz. Irrigation and Seed variety for major crops. Details of such stratification are given in **Table-3**. While the idea of evolving a general design for stratification needs examination, it is felt that there would be practical difficulties in attempting stratification according to variety mainly due to non-availability of required data in the present system of area statistics at different levels.

## CROP ESTIMATION SURVEY

**Table - 3: Stratification according to inputs adopted in sampling design during 2019-20**

Sl. No.	State	Crop for which pre- stratification is done according to Irrigation & seed	Irrigation	Seed
1.	Andhra Pradesh	-	Paddy (Kharif & Rabi)	-
2.	Bihar	Paddy (Agh.) & Wheat	Paddy (Bha.) & Sugarcane	Paddy (Gar.) & Maize (Bha. & Gar.)
3.	Chhattisgarh	Paddy* & Wheat*	-	-
4.	Gujarat	-	Paddy (Kharif), Wheat & Cotton	-
5.	Jharkhand	-	-	Paddy (Agh.) & Wheat
6.	Karnataka	Paddy (Kharif, Rabi.* & Sum.*), Jowar (Kharif Rabi & Sum.**), Bajra (Kharif), Maize (Kharif, Rabi & Sum.**), Ragi (Kharif,Rabi & Sum.**) & Wheat	Groundnut <sup>@</sup> (Kharif, Rabi & Sum.), Cotton (Kharif), Gram , Sunflower (Kharif, Rabi & Sum. *)	Maize (Sum.)
7.	Madhya Pradesh	Paddy * & Wheat *	-	-
8.	Maharashtra	-	Paddy (Kharif), Jowar (Rabi), Bajra, Wheat & Cotton .	-
9.	Rajasthan	-	Gram & Wheat	-
10.	Tamil Nadu	-	Jowar, Bajra, Maize, Ragi, Groundnut, Sesamum & Cotton.	-

\* Pre –stratification according to seed is only for irrigated.

@ Pre-stratification is only in the relevant districts and not for the State as a whole.

\*\* Pre –stratification according to irrigation is only for HYV.

# ORGANISATION

5

- 5.1 Assignment relating to planning of survey, training of field staff, organisation of field work and tabulation of data is the responsibility of the State Agricultural Statistics Authority (SASA) in each State/UT. The SASA in the State is either the Director of the Bureau/Directorate of Economics and Statistics or the Director of Agriculture or the Director of Land Record depending on the administrative arrangements in each State/UT.
- 5.2 The primary field work of the survey is generally entrusted to the staff of the State Department of Revenue, Agriculture, Community Development or Statistics, exclusively or as a part of their normal duties. In the five States viz. Assam, Kerala, Meghalaya, Odisha and in the UT of Puducherry, the primary work during 2019-20 was carried out by trained whole time staff of the Department of Statistics. **Appendix-III** gives State-wise information about the primary agency assigned with the task of conduct of crop cutting experiments on different crops. Workload of the primary field staff of different agencies in the State/UT in the two seasons and also for the entire year is shown in **Appendix-IV**. It is observed that at all India level, 7.4 percent and 7 percent of the primary workers had to conduct more than 12 experiments during Kharif and Rabi respectively. Likewise, 7.4 percent of the primary workers had to conduct more than 20 experiments annually during 2019-20. As per the detail given in **Table-4**, it is observed that the workload of primary worker during the year was high (more than the All India figures, **Appendix-IV**) in Andhra Pradesh, Assam, Goa, Gujarat, Kerala, Madhya Pradesh, Meghalaya, Odisha, Telangana, West Bengal and Puducherry.

**Table - 4: Details of the high workload of primary workers during 2019-20**

State	Agency for field work	Total strength	No. of primary workers conducted more than		
			12 Experiments	20 Expts.	Annually
Kharif	Rabi				
Andhra Pradesh	Statistical/Agriculture	1870	445	254	371
Assam	Statistical	243	78	78	78
Goa	Agriculture Kh.	24	16	-	19
	Agriculture Rabi	23	-	16	
Gujarat	Agriculture	3207	1281	997	1256
Kerala	Statistical	995	775	811	811
Madhya Pradesh	Revenue	4407	1072	1275	1285
Meghalaya	Statistical	55	55	-	55
Odisha	Statistical	607	607	607	607
Telangana	Statistical/Agriculture	2664	295	207	100
West Bengal	Agriculture	254	210	242	183
Puducherry	Statistical (Rabi-I)	22	-	7	-

- 5.3 Heavy work load of primary workers adversely affects the results of crop cutting experiments and may also lead to loss of experiments. States may make efforts to ensure that experiments are allotted to the primary workers as per the norms in order to improve the quality in the conduct of experiments.

# CO-ORDINATION

6

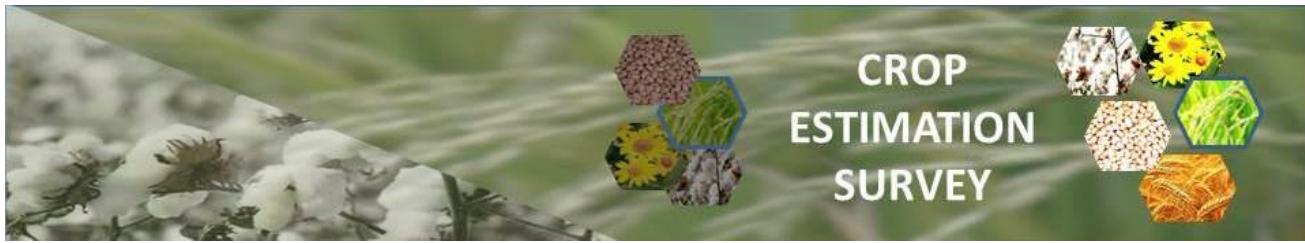

- 6.1 The Field Operations Division of National Sample Survey office i.e. NSSO (FOD) has the overall responsibility of assisting the States/UTs in developing suitable techniques for obtaining reliable and timely estimates, providing technical guidance and ensuring adoption of uniform concepts, definitions and procedures in CES in the States/UTs. It reviews the design, plan, details of implementation and the results of the surveys. NSSO (FOD) also associates itself with the conduct of training camps organised for the State field staff in the capacity of trainers and observers. Under the scheme namely Improvement of Crop Statistics (ICS), it participates in the primary field work on sample basis by exercising technical supervision.
- 6.2 The NSSO (FOD) received plan of work of CES for the year 2019-20 from most of the States and offered comments, wherever necessary, with regard to planning and organisation of the survey. Some of the earlier suggestions with regard to timely selection of sample units, improving the response rates, ensuring adequate departmental supervision, timely communication of preliminary results and supply of equipment are reiterated. NSSO (FOD) stresses on adoption of statistical methodology by the States in the conduct of Crop Cutting Experiments which are not covered in CES.

## 7

## SAMPLE SIZE

- 7.1 During the year 2019-20, a total of 17,49,586 experiments were planned under CES at All India level. The corresponding figure during 2018-19 was 17,26,577 experiments. This shows an increase of 23,009 experiments during 2019-20. The net increase in sample size is due to increase of 11,189 experiments under food crops and increase of 11,820 experiments under non- food crops as shown in **Table-5** below.
- 7.2 The number of experiments planned over the last 10 years, given in **Table-5**, shows an overall rising trend, indicating the overwhelming response to the adoption of objective sampling technique of crop cutting experiments in greater magnitude from year to year for estimation of yield rates in the country. The number of experiments is showing steady increase over the past few years owing to the need for crop yield estimates at lower administrative levels i.e. Block, Gram Panchayats in the wake of Government's efforts of providing insurance cover to farmers for crop damage under Pradhan Mantri Fasal Bima Yojana (PMFBY) also conspicuous in 2019-20. **However, the methodological juxtaposition of PMFBY in GCES is raising serious quality concerns in collection of Yield data and estimation procedure in some States due to marked procedural deviations and objectives of PMFBY vis-à-vis GCES.** In a welcome from the agricultural year 2023-24, Union M/o Agriculture & Farmers' Welfare has all States/UTs to keep production series (GCES) distinct from the CCEs of other schemes viz., insurance, smart sampling etc.
- 7.3 The adoption and continuance of single series by the respective SASA(s) may have unwholesome bearings on the sampling plan, workload of primary worker and generation of stipulated crop-wise and district-wise statistical tables & annexures viz. Standard Error, Driage experiments, Frequency distribution of plot yields, Analysis of variance of Plot Yields etc. vital to ensure precision of the estimates & control over sampling process and implementation. The testimony to it is provided in the **Table-8**, which gives a snapshot of humongous increase of experiments noticed in the State of Maharashtra & Odisha and a decline of 24,286 experiments for the State of Gujarat.

**Table –5: Number of experiments planned under CES for last ten years.**

- \* It does not include figures for West Bengal and Meghalaya as information was not received.
- @ It includes figures for the year 1998-99 for Jammu & Kashmir as no data for the year 1999-2000 was received from SASA.

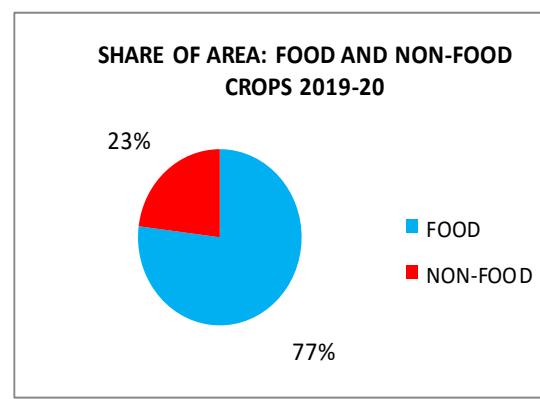

## It includes figures repeated for the year 2010-11 in the State of Maharashtra and 2013-14 in the State of Karnataka  
\$ It includes figures repeated for the year 2016-17 in the States of Haryana, Jharkhand, and Madhya Pradesh

- 7.5 Details of number of experiments planned under CES during 2019-20 for food and non-food crops are given in **Annexure-I(a)**. It may be seen from the Annex-I(a) that out of total 17,49,586 experiments planned, 14,81,837 (85%) were on food crops and 2,67,749 (15%) on non-food crops (Chart -III). Corresponding shares in cropped area under food and non-food crops which may be seen from **Annexure-V** were 77% and 23% respectively (Chart-IV). If season-wise details are considered, it may be observed that Kharif crops account for a major share of 9,53,844 (55%) experiments and Rabi crops for 7,95,742 (45%) experiments.

**Chart – III**

**Chart – IV**

- 7.6 Fruits and Vegetables form an essential component of human diet. Twenty important Fruits and Vegetable crops in 13 States were covered under CES (**Appendix-II**) on which information has been presented in this report. It can be seen from the **Table-7** that out of 14,81,837 (85%) experiments for food crops, only 63,821 (4%) experiments were covered under 20 Fruits and Vegetable crops. This is paradoxical as India is the second largest producer of horticulture crops & fruits. SASAs may take note of the chasm between increasing importance of horticulture crops and fruits and poor representation of these crops under GCES. Also, adequate efforts should be made by the States to include new crops in GCES based on its importance, relative significance etc. measured in terms of share in all India production. Among fruits and vegetable crops, 15% of the experiments were accounted for fruits and 85% for vegetable crops.

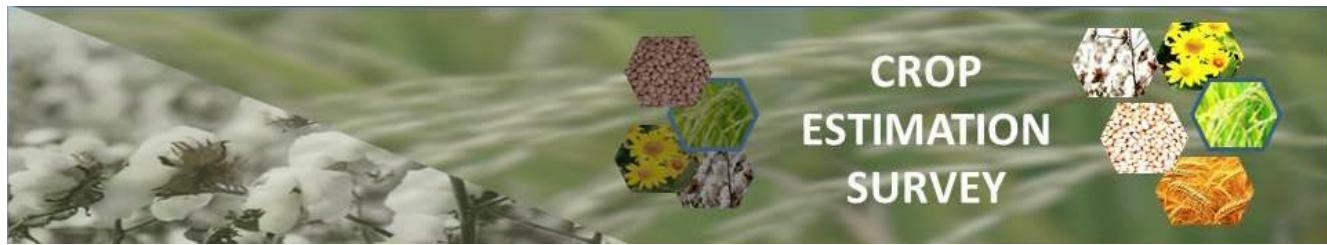

**Table –7: Fruits and Vegetables covered under CES during 2019-20**

<u>Sl. No.</u>	<u>Fruits</u>	<u>No. of Experiments Planned</u>
1	Lichi	300
2	Banana	2968
3	Mango	600
4	Guava	280
5	Jackfruit	2038
6	Pineapple	1554

8	Plaintain	1622
9	Avare	660
10	Cabbage	100
11	Bitter Gourd	1627
<b>Total</b>		<b>56049</b>

The Centrally Sponsored Scheme “Crop Estimation Survey on Fruits and Vegetables” which started in the year 1982-83 is no longer in operation largely after 2013-14. However, some States/UTs continue to conduct CCEs on the horticulture crops & fruits considering in the rising importance for nutritional sufficiency of population and income security of the farmers.

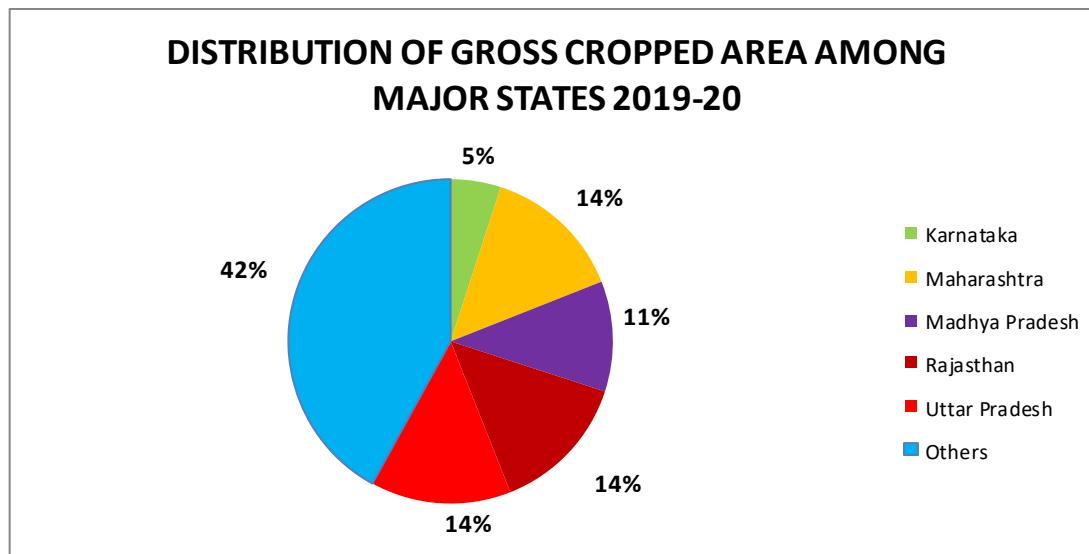

To supplement State/UT Govt. efforts, the Department of Agriculture & Cooperation, Ministry of Agriculture has launched a national level programme on horticulture assessment and development, called CHAMAN (Coordinated Horticulture Assessment and Management using geo-informatics) from September, 2014. This programme envisages use of satellite remote sensing data for area and production estimation of 7 horticultural crops (Potato, Onion, Tomato, Chili, Mango, Banana and Citrus) in selected districts of major producing States. SASAs need to strengthen CES on Horticulture crops & Fruits for reliable data driven policy for the sector & farmers' welfare

- 7.7 The States of Rajasthan (14%), Uttar Pradesh (14%), Madhya Pradesh (11%), Maharashtra (14%), and Karnataka (5%) have accounted for more than 58 percent of the gross cropped area (Chart-V). However, the distribution of experiments over States/UTs reveals that nearly 77 percent of the experiments were planned in Uttar Pradesh (37%), Rajasthan (14%), Bihar (10%), Karnataka (8%) and Maharashtra (8%) (Chart-VI).

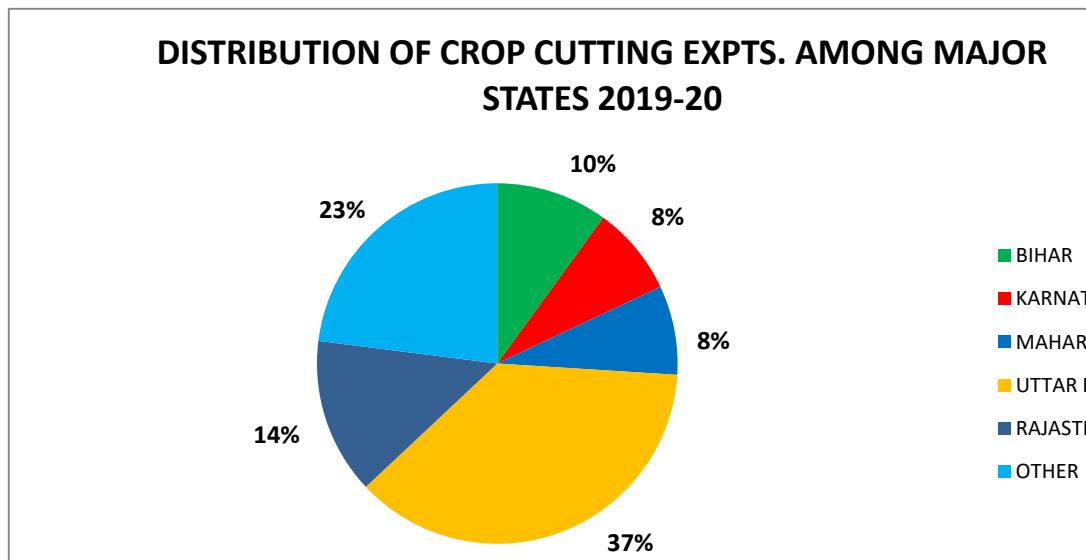

\* Figures for experiments planned are obtained from Annexure V.

### Chart – V

### Chart – VI

7.8 **Table-8** shows increase of 55,300 experiments during 2019-20 due to increase in number of experiments planned for a number of crops in the States of Andhra Pradesh, Assam, Chhattisgarh, Dadar & Nagar Haveli, Maharashtra, Odisha, and Punjab. The total number of

experiments planned decreased by 32,291 due to decrease in experiments planned in the States of Bihar, Goa, Gujarat, Jammu & Kashmir, Kerala, Meghalaya, Puducherry, Rajasthan, Telangana, Uttar Pradesh, Uttarakhand and West Bengal. This shows net increase of experiments in the States is 23,009 during 2019-20 over 2018-19. There was no change in planning in the States of Himachal Pradesh, Tamil Nadu and Daman & Diu whereas for the States of Haryana, Jharkhand and Madhya Pradesh information was not received.

**Table-8: Comparison of number of experiments planned during 2019-20 and 2018-19**

States showing increase in experiments planned	No. of experiments planned			States showing decrease in experiments planned	No. of experiments planned		
	2018-19	2019-20	Net increase over previous year		2018-19	2019-20	Net decrease over previous year

6.	Gram	75756	4.33	3.90
7.	Jowar	64172	3.67	2.94
8.	Redgram	39299	2.25	1.99
9.	Groundnut	51656	2.95	3.11
10.	Blackgram	40673	2.32	2.23
11.	Sugarcane	22399	1.28	1.70
12.	Sesamum	32512	1.86	1.82

7.10 **Annexure-V** also provide information on the percentage of area covered under CES to the total area in the CES States. Crop-wise summary for main crops is presented in **Table-11**, which indicates that the area covered under CES for food and non-food crops was substantial. However, there exists a need for extending CES in different States to cover important pulses, oil seeds fruits & vegetables along with cash crops. The issue of extending the scope of the CES to encompass important crops which are not covered at present needs attention of the concerned SASAs of the States/UTs. Distribution of area and experiments by category of crops

which are not covered at present needs attention of the concerned States/UTs. are presented in **Chart-VII** and **Chart-VIII** respectively

**Table – 11: Percentage of area covered under CES during 2019-20**

Sl. No.	Crop	%age of area covered by CES to total area under the crop in the States covered

## CROP ESTIMATION SURVEY

Chart-VII

### DISTRIBUTION OF AREA BY CATEGORY OF CROPS 2019-20

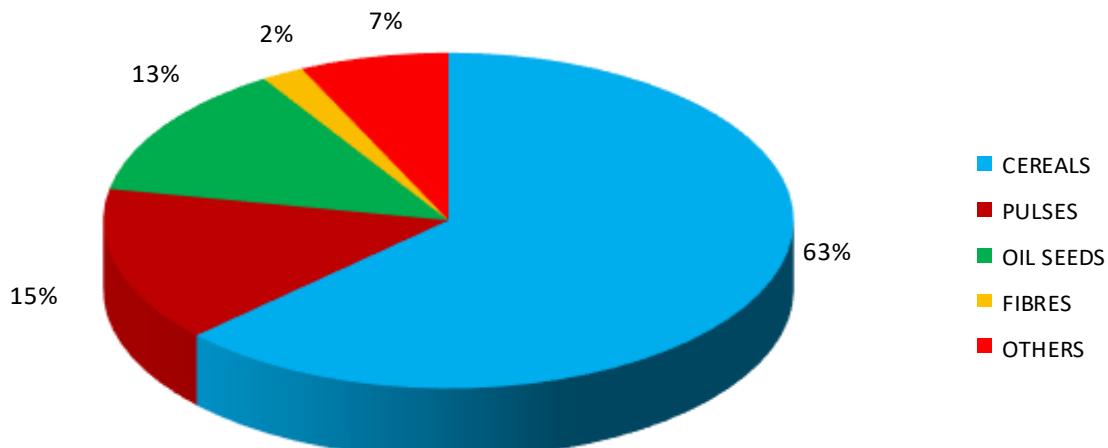

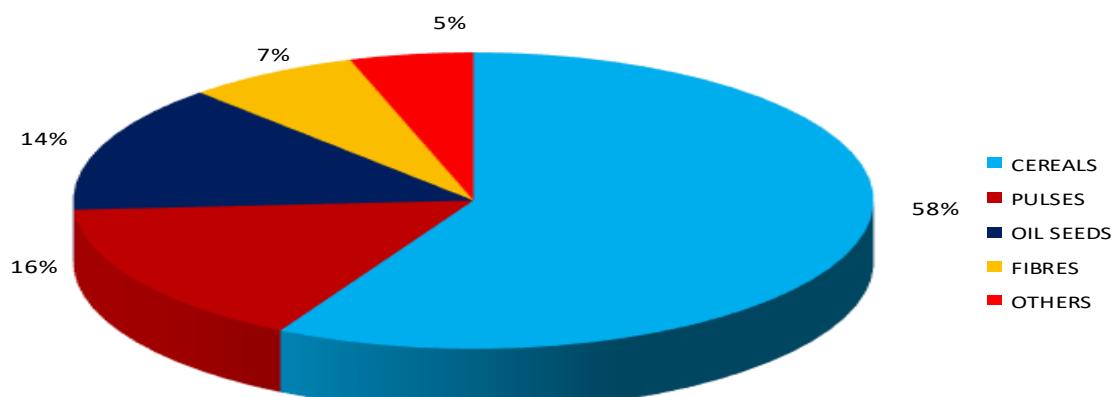

Chart- VIII

### DISTRIBUTION OF CROP CUTTING EXPTS. BY CATEGORY OF CROPS 2019-20

# TRAINING

8

- 8.1 A programme for imparting training to primary workers engaged in the conduct of crop cutting experiments under CES is held in each State by respective agencies (**Annex-II**) at the beginning of each season/year. In Goa, Haryana, Himachal Pradesh, Jammu & Kashmir, Maharashtra, Punjab, Rajasthan, Uttar Pradesh and Puducherry, the training was held in the beginning of each crop season and in other States, it was held at the commencement of the agricultural year 2019-20. NSSO officials also participated in the training programmes either as trainers or as observers.
- 8.2 **Annexure-II** shows the agency-wise details of the number of training centres, number of primary workers who attended the training and the extent of NSSO participation in the training programmes in the year 2019-20. During the year, training was organised in 1895 centres. It is pleasing to note that States: Assam, Goa, Odisha, Rajasthan, Dadar & Nagar Haveli, Daman & Diu and Puducherry recorded cent percent attendance of their primary staff. However, at All India level, 90263 out of 91387 primary workers were called for training and 76638 attended the training camps resulting in 85% attendance in CES training camps. States where the attendance of primary workers of various agencies was less than the All-India average were Bihar, Chhattisgarh (Statistical), Himachal Pradesh (Agriculture in Kharif & Rabi and Revenue in Kharif), Maharashtra, Punjab (Agriculture in Rabi) and Uttarakhand. It is essential that all the staff engaged in the conduct of crop cutting experiments is fully familiar with the technical aspects, the methodology and operational procedures relevant to the conduct of the experiments. Conduct of experiments by untrained personnel would introduce subjectivity and result in generation of unreliable data. To obviate this, the feasibility of arranging separate training for absentees subsequently needs to be explored.
- 8.3 During 2019-20, the officers of NSSO (FOD) posted in different States associated themselves with the training programmes, either as trainers or observers in all the States except in Andhra Pradesh, Assam, Bihar, Chhattisgarh, Goa, Gujarat, Jammu & Kashmir, Karnataka, Kerala, Maharashtra, Odisha, Punjab, Telangana, Uttar Pradesh, Uttarakhand, West Bengal, Dadra & Nagar Haveli and Daman & Diu. In all, out of the 1895 training centers, NSSO officials participated in 735 (39%) centers as observers and imparted training in 131 (7%) centers.

# SUPERVISION

9

- 9.1 Supervision of field work is an essential part of any large-scale sample survey for ensuring quality of data collected. A threefold approach is adopted in the States for supervision of crop cutting experiments planned under CES. This includes the following:-
- (i) Supervision by the statistical staff of State Agricultural Statistics Authorities (SASA),
  - (ii) Supervision by the Departmental staff i.e. by the supervisory officers of the Departments whose workers are responsible for the conduct of crop cutting experiments in the field and
  - (iii) Supervision by the Technical personnel of the NSSO (FOD).
- 9.2 In the States of Andhra Pradesh, Assam, Kerala, Odisha, Rajasthan and the UT of Puducherry, the field work and supervision were done only by the Statistical Department. In the case of Bihar, though there are other supervisory agencies, the supervision was done by the State Statistical Departments only. NSSO (FOD) was instrumental in the creation of institutional framework through the Land Utilization Surveys (LUS) and CES (Crop Estimation Surveys) as large scale sample surveys by NSS during the 1950s. This acted as a hand holding exercise and inspired many State Governments to create and develop a Modular Statistical System at State level in sync with agrarian practices, needs and heterogeneity. Later on, the launch of Improvement in Crop Statistics (ICS) in 1973-74, resulted in dovetailing of TRS/EARAS and GCES schemes of Union Ministry of Agriculture and State/UT governments respectively. This ushered coterminous supervision by the State Supervisory officials apart from NSSO (FOD) officers of collection of crop statistics by the primary workers of the State Government. Currently, the Scheme for Improvement of Crop Statistics (ICS) is operational in 21 States and 1 Union Territory from the year 1973-74 (Rabi) onwards. During the year 2019-20, total numbers of experiments planned for sample check under the ICS Scheme were 15,662 for each Central and as well for State samples during Kharif, Rabi and Summer seasons.

9.3 **Annexure-III (a)** shows State-wise total number of experiments planned under CES, number of experiments inspected by each agency and breakup of these supervisory checks for Kharif and Rabi seasons according to food and non-food crops. **Annexure-III (b)** gives crop-wise details of experiments supervised by each agency in a State. Summary of details of supervision at All India level is given in **Table -12**.

9.4

**Table –12: Supervision of crop cutting experiments during 2019-20**

Item	No. of expts. Planned	No. of Experiments Supervised by					
		State Statistical Department		Other State Departments		NSSO

<b>TOTAL (Percentage)</b>	<b>1749586</b>	<b>65083</b>	<b>52533</b>	<b>255749</b>	<b>218397</b>	<b>11893</b>	<b>10344</b>

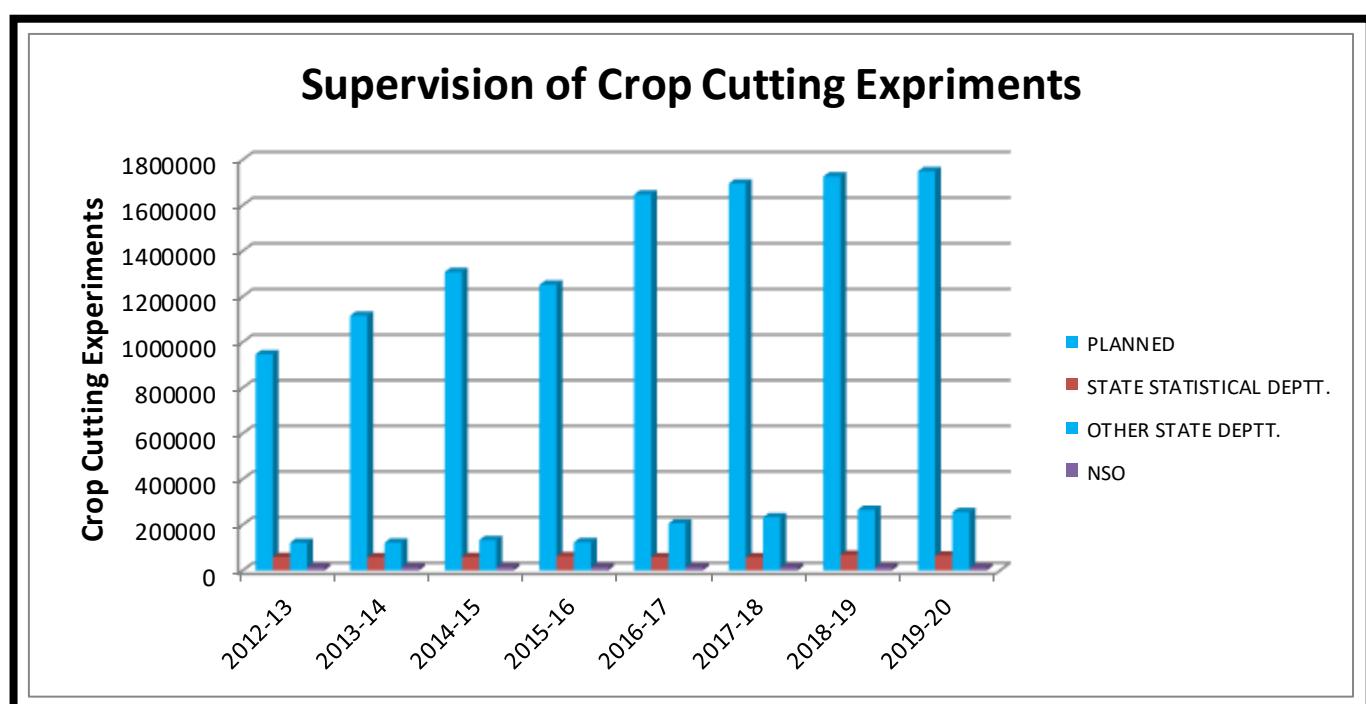

\* Total Percentages have been calculated by including only those States from which complete data was received.

During 2019-20, about 20% of the total experiments planned were supervised, out of which 20 percent were supervised by the State Statistical Department, 77 percent by other State Departments and 4 percent by NSSO. However, the supervision was conducted at harvest stage in approximately 82% cases. It may also be observed from the State-wise position as given in **Annexure-III (a)** that the total supervision by State Statistical Department was above 25

percent in the States Gujarat, Kerala, Tamil Nadu, and Union Territories of Dadra & Nagar Haveli, Daman & Diu and Puducherry and was below 10 percent in the States of Andhra Pradesh, Bihar, Chhattisgarh, Goa, Haryana, Himachal Pradesh, Jammu & Kashmir, Jharkhand, Karnataka, Madhya Pradesh, Meghalaya, Odisha, Punjab, Rajasthan, Uttarakhand and West Bengal. Total supervision by other State Departments was above 25 percent in case of Chhattisgarh, Gujarat, Rajasthan, Dadar & Nagar Haveli and Daman & Diu. The same was below 10 percent in the States of Himachal Pradesh, Karnataka, Meghalaya, Tamil Nadu and West Bengal. Adequate supervision is essential for quality of Yield Statistics. Total supervision by NSSO officers in individual States varied from 0.2 percent in Jharkhand to 7 percent in Haryana, Tamil Nadu and Puducherry. Above details are summarised in the following Bar diagram (Chart-IX). Inspection plays an integral part in the improvement of data collection of data and requires due attention of the controlling supervisory officers associated with the GCES & ICS programme. **No information regarding the supervision by State agencies has been received from Maharashtra and Uttar Pradesh although the supervisory agencies are in existence.**

### Chart – IX

9.4 **Annex-III (a)** also gives the breakup of experiments supervised during the two major seasons. It is seen that the supervision was well distributed between both the seasons as well as over food and non-food crops. Crop-wise details of supervision given in **Annex-III (b)** are summarised in **Table-13**. It is seen that at All India level, the total supervision (adding up figures for all the concerned departments) varied between 10 and 43 percent for important crops like Paddy, Jowar, Bajra, Maize, Ragi, Wheat, Barley, Groundnut, Sesamum, Cotton and Jute, and in the range of 12 to 41 percent for crops like Gram, other Pulses and Beans, Small Millets, Condiments & Spices, Linseed, Castor, Rape & Mustard and other Oilseeds. For other crops like Sugars, Drugs & Narcotics, Fruits & Vegetables and Mesta, the supervision was in the range of 4 to 36 percent, which needs improvement. **It is evident from the data presented that there is a need to increase the level of supervision for the crops where cumulative of all departments supervision is less than 10%.** This will definitely have a lasting effect on the improvement of the quality of data collected in the field.

**Table-13: Crop- wise percentage of experiments supervised during 2019-20**

Crop	Percentage of Experiments supervised by								
	State Statistical Deptt		Other State Departments		NSSO		All Deptts		
	Total	At Harvest stage	Total	At Harvest stage	Total	At Harvest stage	Total	At Harvest stage

Mesta	4	4	0	0	0	0	4	4	
Drugs & Narcotics	14	2	23	23	0	0	36	25	

9.5 An idea about the extent of participation by the State Statistical and the NSSO officials under the Scheme for Improvement of Crop Statistics (ICS) by way of association in the sample check on crop cutting experiments may be taken from the details presented in **Table-14**. It is seen that a total of

22111 (1.5%) experiments out of the 14,95,397 experiments planned (for the crops covered under ICS) were spot checked at harvest stage either by Central or State agencies during 2019-20 as against 21616 (1.5%) experiments out of 14,77,346 experiments planned during 2018-19. Details of Crop-wise allocation of number of experiments under ICS implementing States are presented in **Appendix VII**. The sample checks are undertaken by the supervisory staff of NSSO (FOD) and State Govts. on matching basis in two non-overlapping samples.

**Table -14: Supervision under ICS scheme during 2019-20**

Sl. No.	State/UT	Number of Experiments			Percentage of Supervision under ICS at harvest stage	
		Planned under CES (for important crops covered under ICS)	Supervised under ICS at harvest stage by	Total	Central Staff	State Staff
1	2	3	4	5	6	7
1.	Andhra Pradesh	15782	607	573	1180	7.48
2.	Assam	11254	335	301	636	5.65
3.	Bihar	128263	545	483	1028	0.80
4	Chhattisgarh	7164	304	236	540	7.54
5.	Gujarat	38580	813	668	1481	3.84
6.	Haryana	8994	599	503	1102	12.25
7.	Himachal Pradesh	8306	195	186	381	4.59
8.	Jammu & Kashmir	4750	210	81	291	6.13
9.	Jharkhand	59790	220	162	382	0.64
10.	Karnataka	103856	543	752	1295	1.25
11.	Kerala	14039	507	518	1025	7.30
12.	Madhya Pradesh	28310	1126	470	1596	5.64
13.	Maharashtra	123460	847	831	1678	1.36
14.	Odisha	51797	554	793	1347	2.60
15.	Punjab	6954	633	491	1124	16.16
16.	Rajasthan	197638	791	699	1490	0.75
17.	Tamil Nadu	5284	640	663	1303	24.66
18.	Telangana	9890	413	419	832	8.41
19.	Uttarakhand	6456	2250	128	2378	36.83
20.	Uttar Pradesh	624972	180	142	322	0.05
21.	West Bengal	39560	632	8	640	1.62
22.	Puducherry	298	30	30	60	20.13
	<b>All States</b>	<b>1495397</b>	<b>12974</b>	<b>9137</b>	<b>22111</b>	<b>1.48</b>

Note: Important crops include Paddy, Jowar, Bajra, Maize, Ragi, Wheat, Barley, Gram, Tur, Cotton, Jute, Sugarcane, Groundnut and Rape & Mustard.

9.6 Sample checks under ICS scheme are being undertaken since the year 1973-74 to assess the extent to which the prescribed techniques and procedures are adhered to by the State primary workers while conducting the experiments and provide spot guidance, wherever necessary. As detailed in **Annexure III-C. The figure of all India reveal that during 2019-20, 67 percent experiments were conducted as per the prescribed procedures.** This shows an increase of 1% vis-à-vis previous year. The occurrence of one or more type of discrepancy was observed in the remaining set of analyzed experiments. There exists ample scope for improvement especially with regard to selection of random numbers and locating & marking of plots (e4). The sample checks revealed that the primary workers assigned with the task of conducting the experiment do not use, in sizeable number of cases i.e., more than All India average figures, the equipment supplied for the purpose. This incidence was particularly noticeable in all States except, Andhra Pradesh, Jharkhand, Kerala, Odisha, Punjab, Telangana, West Bengal & Puducherry. The tendency to delegate the work of crop cutting experiments to others including untrained workers was observed to be comparatively high (more than All India average figures) in case of Bihar, Jammu & Kashmir (Kharif), Jharkhand, Uttar Pradesh, West Bengal(Aus. & Aman) during 2019-20. Although these small percentages do not speak for themselves, the damage done to the quality of fieldwork is substantial. Proper arrangements are needed in this regard for ensuring training of the field worker entrusted with CES work especially for those officials who are joining these ranks after the regular training camps are over, or those entrusted with these duties as a stop-gap arrangement.

## RESPONSE

10

- 10.1 State-wise number of experiments analyzed and percentage response during Kharif and Rabi seasons for food and non - food crops under CES are detailed in **Annex-IV (a)**.
- 10.2 It is commendable to note that CES response rate was cent percent from Odisha, Telangana, Uttarakhand, Dadar & Nagar Haveli, Daman Diu & Puducherry. However, in 2019-20, the overall response under CES was 90 percent. Percentage response for food crops during Kharif and Rabi, 2019-20 was 91% & 90% respectively and for non-food crops, it was 89 % & 84 % respectively. Response was below 90 percent in Assam (69%), Bihar (72%), Chhattisgarh (82%), Goa (36%), Haryana (89%), Himachal Pradesh (69%), Jammu & Kashmir (56%), Jharkhand (71%), Karnataka (77%), Maharashtra (81%) and Madhya Pradesh (85%). **Special measures are needed to improve the percentage of response to more than 90 percent in these States.**
- 10.3 An analysis of non-response was attempted with a view to focus and identify the specific causes leading to non- response, facilitating taking adequate corrective measures. State-wise details of number of experiments that could not be taken up for analysis are given in **Annex-IV (b)**. For all crops taken together, it is seen that 90 percent of the total number of experiments planned were analysed, 9.2 percent were reported to be lost in the field, 0.7 percent were reported to be rejected at tabulation stage and for 0.1 percent of experiments, precise reasons for the exclusion were not available.
- 10.4 Out of 9.2 percent experiments lost in the field, no specific reasons had been reported in respect of 8.6 percent experiments while 0.52 percent experiments were lost due to harvesting of the crop by the cultivator prior to the date fixed for the experiments.
- 10.5 At All India level, data for less than 0.1 percent of the experiments could not be included for analysis. **In Haryana (10%) experiments were rejected at the tabulation stage. This is a wastage of manpower, time & financial resources and it demands serious attention of higher authorities.** The percentage of experiments lost (in the field + rejected by Statisticians) was more than 10 % in the States like Assam (31 %), Bihar (27%), Chhattisgarh (18%), Goa (64%), Haryana (11%), Himachal Pradesh (31%), Jammu & Kashmir (45%), Jharkhand (29%), Karnataka (23%), Maharashtra (19%) and Madhya Pradesh (14.9 %).

- 10.6 **No reason could be ascribed for exclusion of experiments from analysis in 10% of experiments in Haryana.** Non-response is to be kept within the permissible margin and timely remedial measures need to be taken for exercising adequate checks.
- 10.7 Results of crop cutting experiments for each crop along with the number of experiments planned and analyzed indicating the response achieved during 2019-20 are given in **Annex -V.** **Table-15** shows the crop-wise percentage response at All India level for important crops during 2019-20.

**Table-15: Crop - wise percentage response at All India level for important crops under CES 2019-20**

Sl.No.	Crop	Response (%)
1	Paddy (Kharif)	96
	Paddy (Rabi / Sum.)	88
2	Jowar (Kharif)	78
	Jowar (Rabi)	84
3	Bajra (Kharif)	95
	Bajra (Sum.)	99
4	Maize (Kharif)	71
	Maize (Rabi / Sum.)	63
5	Ragi (Kharif)	92
	Ragi (Rabi / Sum.)	76
6	Wheat	96
7	Barley	91
8	Gram	89
9	Redgram/Tur	91
10	Sugarcane	84
11	Groundnut (Kharif)	84
	Groundnut (Rabi / Sum.)	78
12	Sesamum (Kharif)	88
	Sesamum (Rabi)	86
13	Castor	99
14	Rape & Mustard	93
15	Linseed	60
16	Cotton	94
17	Jute	91

# RESULTS 11

- 11.1 The estimates of average yield rate along with percentage Standard Error are presented in **Annex-V**. The method of estimation followed by the States for working out the average yield rate and its Standard Error (SE) is explained in **Appendix-V**. The trend of area, yield rates and production under important crops during 2013-14 to 2019-20 are presented in **Charts-X to XII** respectively.
- 11.2 The results of CES for 2019-20 reveal that for some crops, response was very low in few States. For instance, it was less than 50 percent in (i) Andhra Pradesh for Soyabean (36%) (ii) Bihar for Rice (Bhadai 30%), Maize (Bhadai 33%), Mesta (39%), (iii) Chhattisgarh for Jowar (46%), Barley (17%), Chillies (25%), Potato (9%), Onion (Rabi 36%); (iv) Goa for Groundnut ( Kharif 38%), Cowpea (Kharif 16%); (v) Haryana for Sunflower (29%) (vi) Jharkahand for Redgram (42%) (vii) Jammu & Kashmir for Potato (Kharif 26%, Rabi 18%), (viii) Karnataka for Castor (40%), Safflower (48%), Sunflower (Rabi 31% & Summer irr. 19%) (ix) Rajasthan for Tarameera (49%) (x) Tamil Nadu for Sunflower (Kharif 4%) and (xi)Uttar Pradesh for Sunflower (12%). **Such cases of extreme low response affects the reliability of estimates of yield rate.**
- 11.3 Estimates of average yield rates at All India Level for the year 2019-20 and for the previous year for some important crops are given in **Table-16**. These results show that the average yield per hectare during 2019-20 was more than that of previous year for Ragi, Sugarcane, Wheat, Barley, Rape & Mustard, Linseed, Groundnut (Rabi/Sum.) and Cotton . In case of Rice Kharif and Rabi, Jowar Kharif and Rabi, Bajra, Maize, Gram, Redgram, Groundnut (Kharif), Seasamum, Castor, Cotton and Jute the average yield has shown decline as compared to the previous year 2018-19.

**Table -16: Comparison of CES Yield Rates during 2019-20 and 2018-19**

Sl. No.	Crop	Yield rate in (kg/ha.)		Percentage difference
		2019-20	2018-19	
1.	Rice (Kharif)	3032	2660	13.98
2.	Rice (Rabi/Sum.)	4143	4031	2.78
3.	Jowar (Kharif)	1023	994	2.92
4.	Jowar (Rabi/ Sum.)	980	635	54.33
5.	Bajra (Comb.)	1399	1176	18.96
6.	Maize (Comb.)	3066	2700	13.56
7.	Ragi (Comb.)	1961	1360	44.19
8.	Wheat	3555	3663	-2.95
9.	Barley	3048	2902	5.03
10.	Gram	1084	962	12.68
11.	Redgram/Tur	803	675	18.96
12.	Sugarcane	82946	83670	-0.87
13.	Groundnut (Kharif)	1996	1259	58.54
14.	Groundnut (Rabi / Sum.)	2342	2313	1.25
15.	Sesamum (Comb.)	383	442	-13.35
16.	Castor	1865	1690	10.36
17.	Rape & Mustard	1383	1481	-6.62
18.	Linseed	552	518	6.56
19.	Cotton (Lint)	1047	765	36.86
20.	Jute	1690	2602	-35.05

11.4 The dimension of the standard error provides an idea about the precision of the estimate. In an attempt to standardise the measure, generally it is expressed in percentage terms. The percentage standard errors of the estimates of average yield are furnished along with the estimates in **Annex-V**. Standard error was not calculated for any crop in Goa, Jharkhand, Punjab, Rajasthan and Uttar Pradesh. Standard Error was calculated in Gujarat only for Rice, Redgram, Blackgram, Moth, Garlic, Onion, Groundnut Kh., Cotton Ir & UI and Rape & Mustard & in Jammu & Kashmir only for Rice, Wheat and Maize. The standard error was also not calculated in Bihar for Rice, Maize, Ragi, Wheat, Barley, Gram Redgram, Greengram, Lakh, Masur, Sugarcane, Chillies, Lichi, Banana, Mango, Guava, Potato (Agh.), Cauliflower, Onion, Rape & Mustard, Jute and Mesta; Haryana for Gram, Redgram, Sugarcane, Sunflower Rabi and Cotton; Madhya Pradesh for Banana and Papaya; Kerala for Sugarcane, Cocoa, Turmeric, Ginger, Jackfruit, Cashewnut, Pineapple, Plantain, Sesamum and Betel Leaves.

11.5 Technically, standard errors are associated with efficiency of the estimates and the degree of precision reduces with increase in the standard error. The desirable range of standard error of a good estimate of crop yield at State level is between 0 to 5 percent. It is observed that in a good number of cases, the standard errors were above the desirable limits. The State Governments may consider increasing the sample size of the concerned crops with increased supervision. **Table-17** presents the cases where the standard errors were higher than the desirable range. **State SASAs must endeavor to keep it below 5% and 10 % for non-dried & dried crops respectively through revisiting sample size or design.**

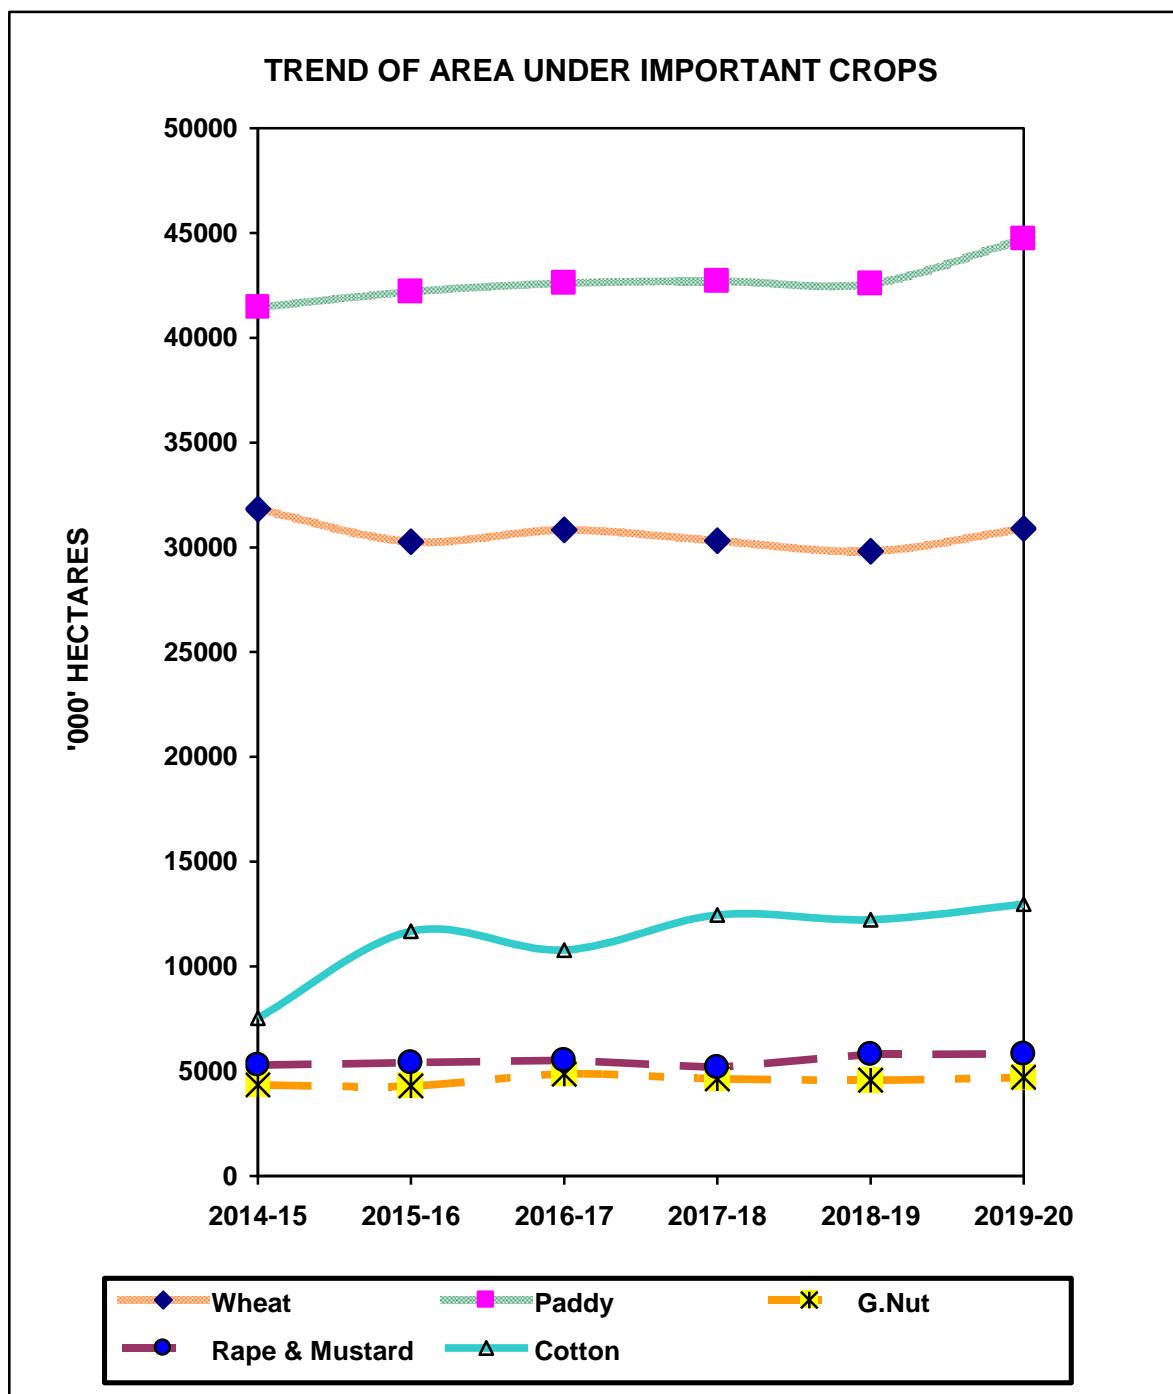

**Table-17: State-wise crops with high standard error during 2019-20**

Sl. No	State	Crop with percentage S.E.
1	Andhra Pradesh	Horsegram Kh. (37.9), Sunflower Kh. (9.0), Castor (5.7), Tobacco (6.7)
2	Bihar	Brinjal Rabi (7.82)
3	Chhattisgarh	Soyabean (10.2), Barley (14.99), Sesamum (10.8), Lakh(5.9), Kodan Kutki (19.9), Rape & Mustard (5.6) and Linseed (7.6)
4	Gujarat	N.A.
5	Haryana	Maize (12.6)
6	Karnataka	Maize Sum. Hyv. (11.5); Ragi Sum. Hyv Ir (8.5), Blackgram Rabi (13.2), Navane (5); Save (10); Chillies Kh. (12), Linseed (25), Onion Rabi (9.6), & Summer (11.6), Groundnut Rabi (13.4), Cotton Rabi (13), Potato Kh (6.3), Rabi (7), Tomato Rabi (8.19), Summer (16.45), Cowpea Kharif (6.0), Rabi (18), Summer (24); Cabbage (29.0), Sunflower Rabi (6.7), Sum. Irr. (16.9), Tobacco Kharif (7) and Jowar Kh. (5.7), Horse gram (5.2)
8	Madhya Pradesh	Rice Kh. Hyv Ir. (20.6); Kh. LV Ir. (8.2) and Chillies (29.6)
9	Maharashtra	N.A.
10	Odisha	Ragi Sum. (5.7), Groundnut Sum. (5.7)
11..	Telangana	Bajra Kh. (13.6), Sesamum Kh (15.9), Horse gram Rabi (5.6), and Castor (8.2) Blackgram Rabi (5.6), Korra (15.6), Tobacco (8.9)
12	Tamil Nadu	Cowpea Rabi (7.0), Samai (12)
13	West Bengal	Lakh (6.7), Sugarcane (8.9) and Linseed (8)
14	Dadar & Nagar Haveli	Rice (13.2) , Ragi (55.4)
15	Daman & Diu	Bajra Kharif (8.08)

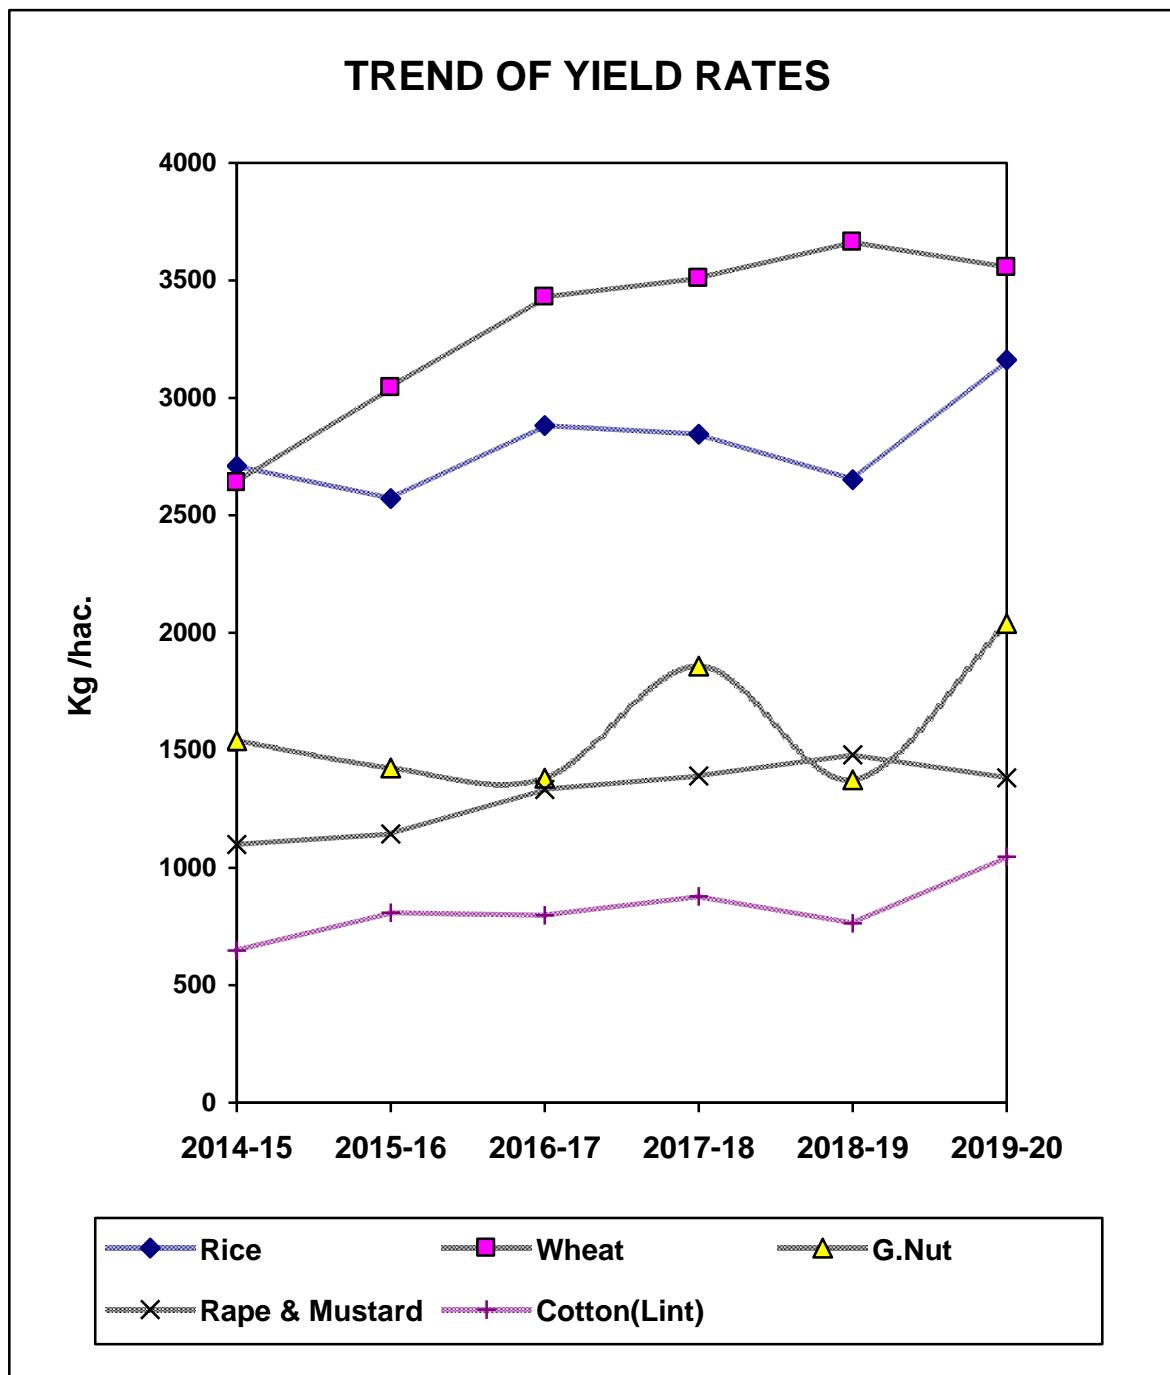

## CROP ESTIMATION SURVEY

### Chart - X

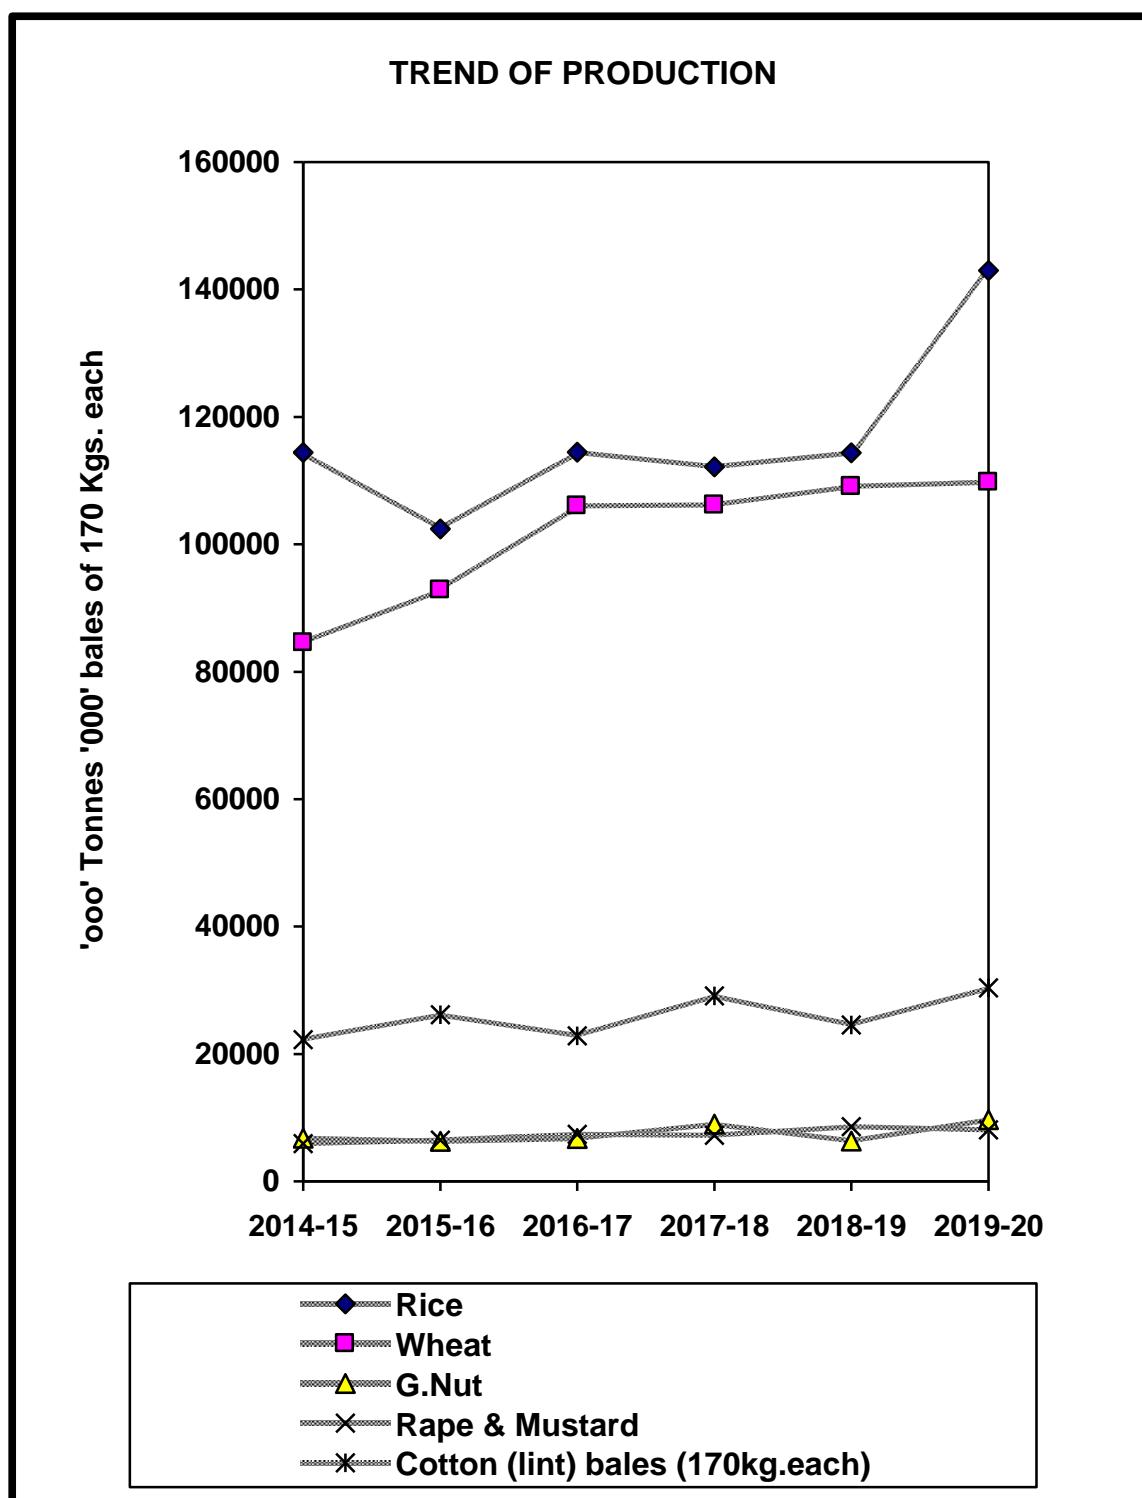

## Chart – XI

## Chart - XII

11.6 Comparison of estimates of crop production for 2019-20 based on the CES results furnished by the States with the corresponding estimates issued by the Directorate of Economics and Statistics (DES), Union Ministry of Agriculture and Co-operation, shows differences in some cases. The details of such cases where the difference between the two estimates is more than 5% in area, production or average yield rate are presented in **Annex-VI**. There may be several reasons for such deviations, some of which are listed as follows:-

- (i) *Non-adoption of survey estimates for preparing official estimates for some crops in the States:* This may be due to the small size of sample adopted for these crops.
- (ii) *Adoption of survey estimates only for part of the State or part of the year (season)*
- (iii) Utilisation of previous year's area figures for official estimates.

## ANCILLARY DATA

12

- 12.1 Ancillary information regarding use of inputs such as irrigation, variety of seeds, fertilizers, manures and pesticides etc. are collected in the primary schedule for crop cutting experiments. An analysis of input data by multi-fold classification, providing an idea about the extent of adoption of improved agricultural practices, enables proper appreciation of the observed yield differentials.
- 12.2 In certain States, the sampling design provides for stratification at planning stage itself. The inputs considered for this purpose are irrigation, variety of seed or both for various crops. For these crops, separate estimates of average yield for each category are available as per standard procedure. In cases where pre-stratification is not envisaged, NSSO has been advocating post-stratification analysis of the experiments according to four-fold classification (Irrigated, Un-irrigated, High yielding variety and Local variety) for major crops like Rice, Jowar, Bajra, Maize and Wheat and two-fold classification (Irrigated and Un-irrigated) for other crops. Under the procedure suggested, the estimates of average yield for each category are worked out as simple average at the stratum level and as weighted average at district level using corresponding area as weights. Likewise, the district level estimates are pooled in a similar manner to arrive at State level estimates. It has further been suggested that in the absence of area figures for different categories based on girdawari, TRS estimates of area may be used as weights to work out estimates at district as well as State level.
- 12.3 Preference of area figures over number of experiments adopted earlier as weights has distinct advantages and as such the procedure is being progressively adopted in many States. However, numbers of experiments continue to be used as weights in a large number of cases and as such average yield in such cases may not tally with the averages worked out on the basis of area figures as respective weights. Such cases are listed in **Table-18**.

**Table-18: States where number of experiments have been used as weights instead of area for yield calculation during 2019-20**

Sl.No.	State	Crop
1.	Assam	All Crops
2.	Himachal Pradesh	All Crops
3.	Madhya Pradesh	All Crops except Rice & Wheat
4.	West Bengal	All Crops

- 12.4 Data according to four-fold classifications for crops of Rice, Jowar, Bajra, Maize and Wheat were not received from States listed below in **Table-19**.

**Table-19: Non-receipt of data on four-fold classification during 2019-20**

Sl.No.	State	Crop
1.	Himachal Pradesh	Rice, Maize, Wheat and Barley
2.	Jharkhand	Rice, Maize and Wheat
3.	Rajasthan	Rice, Jowar, Bajra, Maize & Wheat
4.	Uttar Pradesh	Rice, Jowar, Bajra, Maize and Wheat

- 12.5 On account of operational problems, it is noticed that data as per the two fold classifications i.e. irrigated and un-irrigated, were not received (**Table-20**) from the following States for the crops mentioned against each: -

**Table-20: Non-receipt of data on two-fold classification during 2019-20**

Sl. No.	State	Crop
1.	Jammu & Kashmir	Saffron, Potato, R&M, Linseed.
2.	Jharkhand	All Crops.
3..	Kerala	All Crops except Rice.
4.	Rajasthan	All Crops except Rice, Jowar, Bajra, Maize and Cotton.
5.	Uttar Pradesh	All Crops.

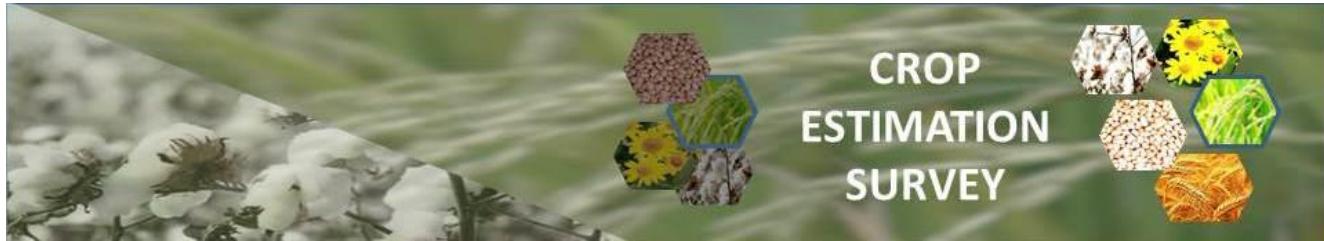

- 12.6 Estimates of yield rates calculated separately for irrigated and un-irrigated fields are presented in **Annex-VII**. Yield rates according to four-fold classification for five major crops are detailed in **Annex-VIII**.
  
- 12.7 Tabulation of CES data based on the extent of area benefited by improved agricultural practices, such as use of improved variety of seed, fertilizers, manures and application of pesticides has been attempted in this report. Information about proportion of area under different agricultural practices as reported by the States is presented in **Annex-IX**. This information has not been received from Gujarat, Himachal Pradesh, Jammu & Kashmir, Maharashtra and Uttar Pradesh for all the crops; Jharkhand for Barley; Rajasthan for Wheat, Barley, Gram, Rape & Mustard, Cumin Seed, Linseed, Tarameera, Methi, Masur and Coriander; Kerala for all Crops except Paddy and Madhya Pradesh for Banana & Papaya crops.

## **DRIAGE EXPERIMENTS** 13

- 13.1 The produce which is harvested and weighed at the time of actual conduct of crop cutting experiments is often different from the marketable produce. The results of the Crop Estimation Surveys are presented in terms of the marketable produce. Therefore, determination of driage ratio, ratio of weight of marketable produce to that of the harvested produce is an important stage in the entire process. For this purpose, driage experiments are carried out in all the States. Such experiments are usually conducted in a sub-sample of plots selected for crop cutting experiments. Information enabling adequate insight about the procedure followed for different crops in various States is given in **Appendix-VI**. The details include information on the form of produce harvested for first weighment, the form of marketable produce, procedure for drawing the sub-sample for driage experiments, quantity of produce kept for driage, duration of the driage experiment, level of application of driage ratios, etc.
- 13.2 Results of the driage experiments for different crops, relevant details about the number of experiments planned and analysed, percentage recovery etc., for the year 2019-20 are given in **Annex-X (a)**. The recovery percentage shown in the Annex relates to the State level, although in actual practice, district level recovery percentages are worked out and used for estimating yield rate and production.
- 13.3 In view of the practical difficulties experienced by the field staff in conducting driage experiments, it was considered desirable to examine if the driage experiments could be conducted at a central place. Exploratory studies conclusively established the feasibility of arranging driage experiments at a Central place and accordingly, central driage experiments were conducted as a part of the programme of supervision of CES in the State from 1960-61 to 1971-72. State Governments were also requested to arrange driage experiments at a few selected centres in the CES series of crop cutting experiments.

The results of the driage experiments are not being received from the States regularly. The results for Central driage experiments for 2019-20 were received only from Assam, Karnataka, Odisha and Rajasthan. These results are presented in **Annex-X (b)**. It may be noted that in Assam, Karnataka and Odisha, field driage experiments are not conducted for the crops for which central driage experiments are planned and driage ratios used for CES results of these crops are based on Central driage experiments. Only in Rajasthan, Central driage experiments are still planned along with field driage experiments. Column (7) of **Annex-X (b)** shows the recovery percentage according to field driage experiments only for one State viz., Rajasthan in 2019-20. In Rajasthan, it is seen that loss in driage as per central driage is less for all crops except Gram from field driage.

- 13.4 As it can be seen from the procedure of conducting driage experiments that various resources have to be engaged, the experimental results are to be observed on several days and then the driage factor is to be calculated. This procedure also leads to wastage of grains etc. Instead of the conventional procedure of the driage experiments, moisture meter may be used to obtain the driage ratio. Moisture meter is an instrument to measure the moisture content in the grains from which the driage ratio can be calculated. The instrument was used by Govt. of Uttar Pradesh and the results obtained were compared with those of the conventional method. It was observed that the driage ratios obtained by the two methods were comparable. Other States may also start using moisture meter for calculating the driage ratio.

## LIST OF ANNEXURES

ANNEX		PAGE NO.
Annex 1(a)	Sample size – Total number of experiments planned under CES	50
Annex 1(b)	Sample size – Kharif food crops under CES	51-53
Annex 1(c)	Sample size – Rabi food crops under CES	54-55
Annex 1(d)	Sample size – Kharif non -food crops under CES	56-57
Annex 1(e)	Sample size – Rabi non-food crops under CES	58-59
Annex II	Training of primary workers under CES	60-61
Annex III(a)	Supervision of field work – All Crops (Season wise)	62-66
Annex III(b)	Supervision of field work – Cropwise	67-79
Annex III(c)	Incidence of errors, use of equipment and delegation of work of crop cutting experiments	80-81
Annex IV(a)	Response under CES	82
Annex IV(b)	Reasons for loss of experiments under CES	83-85
Annex V	Estimates of yield rates and production under CES	86-110
Annex VI	Comparison of survey estimates and official estimates in respect of those crops where difference in Area, production and yield was more than 5%	111-114
Annex VII	Estimates of yield rates from Irrigated and Un-Irrigated plots	115-127
Annex VIII	Estimates of yield rate for Irrigated and Un-Irrigated plots according to High Yielding and local varieties	128-131
Annex IX	Percentage of area under different improved Agricultural practices	132-148
Annex X(a)	Results of field driage experiments under CES	149-154
Annex X(b)	Results of central driage experiments organised by the States under CES	155-158

## LIST OF APPENDICES

APPENDIX		PAGE NO.
Appendix I	Statewise Crop coverage and details of design under CES	159-172
Appendix II	Crops coverage under CES	173-175
Appendix III	Primary field agency for crop cutting experiments under CES	176-179
Appendix IV	Workload of primary field staff on account of crop cutting experiments under CES	180-181
Appendix V	Estimation procedure under CES	182-184
Appendix VI	Procedure for driage experiments under CES	185-189
Appendix VII	Sample size under ICS (Central Samples)	190-191

Note :-

1. Crops included under "Others" are :-

Andhra Pradesh :- Ragi (170), Horsegram (296), Chillies (402) and Rajma Beans (54) under regular Scheme.

Assam :- Potato (1004)

Bihar:- Lakh (420), Masur (980),Chillies(340), Banana (500), Mango(600),Guava (280),Potato(424) ,

Onion (424), Brinjal (340), Tomato (280), Cauliflower (340), Jackfruit (420), Lichi (300)

and Redgram (616).

Chhattisgarh :- Lakh (662), Potato (174), Chillies (12) and Onion (54) .

Goa:- Cowpea(190)

Gujarat:- Bajra-Sum.(2078), Cumin (2040), Fennel (688), Onion (Rabi:646, Sum:80), Banana (0), Garlic (342) and Potato (965)

Jammu & Kashmir :- Potato (168).

Jharkhand:- Redgram (660),Brinjal (480), Potato (7830),Tomato (540) , Onion (630) and Masur (720) .

Karnataka:- Ragi-Rab.Hyv.i (1452),Sum.Hyv.(300), Horsegram (4584), Potato (250), Cowpea rabi(70). Summer(40)

Onion- Rabi( 410), Summer (170) and Chillies-Rabi (0), Summer (0),Avare Rabi (100), Summer(0),Tomato Rabi(280)Summer(60)

Madhya Pradesh:- Lakh (220), Chillies(80), Banana (138), Potato (432), Onion(642) and Papaya (32).

Meghalaya :- Potato-Sum.(234).

Odisha:- Ragi-Sum.(99) and Horsegram Sum. (5).

Tamil Nadu:- Cumbu(204), Ragi(200), Horsegram(320) and Cowpea(112)

Rajasthan :- Cumin (5812), Methi (1284), Masur (856) and Coriander (2072).

Telangana :- Horsegram(0), Chillies(198)

Uttar Pradesh:- Masur (16152),Peas (8028), Sawan-Zaid (20), Potato (21512), Onion- Rabi (70)

and Onion- Zaid (620).

West Bengal Lakh (358), Masur (2537), Peas(314), Redgram (127) and Sugarcane(439).

1. # : Figure repeated from the year 2013-14 in respect for crops Banana, Onion and Papaya and all other crop 2015-16 for Madhya Pradesh.

Note :- (i) % : Percentage figures given under Col.6, 8, 10, 12, 14 and 16 are based on total figures in col. 4. The data in column 4 have been

excluded for percentage calculation at all India level where data under any of columns 5, 7, 9, 11, 13 and 15 has not been received from concerned States.

(ii)%% : Figures repeated from the year 2015-16.

(iii) # : Figure repeated from the year 2013-14 in respect for crops Banana, Onion & Papaya and all other crops 2015-16 for Madhya Pradesh .

(iv) \$\$ : Data repeated from year 2011-12 for crops Linseed, Potato, R&M and Saffron, all other crop repeated from the year 2014-15.

(v) @ : ICS Scheme is not operational & Data of State Statistical Department and Other State Department repeated from the year 2016-17.

(vi). % : Data of State Statistical Department and Other State Department repeated from the year 2016-17.

(vii) \* : Data repeated from the year 2015-16

(viii) \*\* : Figure of State Statistical Department and Other State Department repeated from the year 2015-16.

(ix) \*\*\* : Data of State Statistical Department and Other State Department repeated from the year 2016-17.

Note : Sum total of percentages in Col. (5), (12), (18) and (19) may not always be 100.

1. % : Percentage figures given under Col. 5 to 20 are based on total figures in col. 4. The data in column 4 have been excluded for percentage calculation at all India level where data under any of columns from 5 to 20 has not been received from concerned States.

- A - Primary worker being absent, on leave, transfer etc.
- B - Primary worker not attending the work due to other assignments.
- C - Primary worker not attending the work due to other reasons.
- D - Prior harvest by cultivators.
- E - Crop not available.
- F - Other reasons.
- P - Incomplete data.
- Q - Discrepant data.
- R - Unreliable data.
- S - Late receipt of returns.
- T - Other reasons.
- U - Experiments for which reasons for non inclusion in analysis are not known.

2.# : Figure repeated from the year 2013-14 in respect of crops Banana, Onion, Papaya and all other crops 2015-16 for Madhya Pradesh.

3. & : Data repeated from the year 2016-17.

4.\* : Data repeated from the year 2015-16.

## APPENDIX - V ESTIMATION PROCEDURE UNDER CES

The methodology generally adopted for estimating the average yield of a crop and its sampling error is outlined below:

At the stratum level, the average yield of the crop is obtained as a simple arithmetic mean of plot yields (net) within it.

If

$X_{ijk}$  = The plot yield (net) in gms/plot of the  $k^{\text{th}}$  plot in the  $j^{\text{th}}$  village in the  $i^{\text{th}}$  stratum

$n_{ij}$  = No of experiments analysed in the  $j^{\text{th}}$  village of  $i^{\text{th}}$  stratum,

$m_i$  = Number of villages in which experiments are analysed in the  $i^{\text{th}}$  stratum .

$n_i$  = Number of experiments analysed in the  $i^{\text{th}}$  stratum

$S$  = The number of strata in a district

$a_i$  = The area (net) of the crop in the  $i^{\text{th}}$  stratum

$\bar{x}_{ij}$  = The sample arithmetic mean of the green yield of the  $i^{\text{th}}$  stratum,

$\bar{x}$  = The district average yield of the dry marketable produce

$d$  = The driage ratio

and  $f$  = The conversion factor for converting the green yield per plot into the yield of dry marketable produce per hectare.

We have the stratum level average of the green yield as

$$\bar{x}_{ij} = \frac{1}{n_i} \sum_{j=1}^{m_i} \sum_{k=1}^{n_{ij}} X_{ijk}$$

and the district level average yield of the dry marketable produce per hectare is given by

## APPENDIX - V ESTIMATION PROCEDURE UNDER CES

$$\bar{x} = d.f. \frac{\sum_{i=1}^s a_i - x_{ij}}{\sum_{i=1}^s a_i}$$

The sampling variance of the mean  $\bar{x}$  is obtained as

$$V(\bar{x}) = \frac{d^2 \cdot f^2 \left[ W \sum_{i=1}^s \frac{a_i^2}{n_i} + (B - W) \sum_{i=1}^s \frac{a_i^2}{\lambda_i n_i^2} \sum_{j=1}^{m_i} n_{ij}^2 \right]}{\left[ \sum_{i=1}^s a_i \right]^2}$$

$$\frac{n_i^2 - \sum_{j=1}^{m_i} n_{ij}^2}{n_i - (m_i - 1)}$$

$$\text{Where } \lambda_i = \frac{n_i^2 - \sum_{j=1}^{m_i} n_{ij}^2}{n_i - (m_i - 1)}$$

$$B = \frac{s \sum_{i=1}^s \frac{\left( \sum_{j=1}^{m_i} \sum_{k=1}^{n_{ij}} x_{ijk} \right)^2}{n_{ij}} - \frac{\left( \sum_{j=1}^{m_i} \sum_{k=1}^{n_{ij}} x_{ijk} \right)^2}{n_i}}{\sum_{i=1}^s (m_i - 1)}$$

$$\text{the mean square between villages}$$

## APPENDIX - V ESTIMATION PROCEDURE UNDER CES

$$\sum_{i=1}^s \left[ \frac{\sum_{j=1}^{m_i} \sum_{k=1}^{n_{ij}} x_{ijk}^2 - \sum_{j=1}^{m_i} \frac{(\sum_{k=1}^{n_{ij}} x_{ijk})^2}{n_{ij}}}{\sum_{j=1}^{m_i} (n_j - m_i)} \right]$$

$$W = \frac{\sum_{i=1}^s (n_i - m_i)}{\sum_{i=1}^s (n_i - m_i)^2}$$

the mean square within villages

The percentage standard error is given by

$$\% \text{ SE } (\bar{x}) = \frac{\sqrt{V(\bar{x})}}{\bar{x}} \times 100$$

### **Note:**

- (i) In case the crop sown is pure, the net yield is the same as the actual yield obtained from the plot.
- (ii) If the crop is sown in mixture, then the net yield is obtained by dividing the actual yield by the eye estimate of the proportion of area occupied by the concerned crop as per the primary worker at time of crop cutting experiments.
- (iii) Net area under the crop in a stratum is the sum of the area under the pure crop and the apportioned area under the crop from all mixed crops having the crop as component, the apportionment being done at the field level on the basis of eye estimation at the time of area enumeration in some states and at district level in others on the basis of conventional ratio.
