Chapter 1: Note on 79th NSS

Introduction

The National Sample Surveys (NSS) are conducted by the Government of India since 1950 to collect data on various socio-economic indicators employing scientific sampling methods. The seventy-ninth round of NSS will commence from July 2022.

NSS 79th round is earmarked for collection of data for compilation of a number of SDG indicators through a „Comprehensive Annual Modular Survey (CAMS)“ along with a survey on Ayurveda, Yoga, Naturopathy, Unani, Siddha, Sowa-Rigpa/Amchi and Homoeopathy (AYUSH).

Objectives of the survey

Comprehensive Annual Modular Survey (CAMS): CAMS is introduced to cater the emerging need of information on high-frequency socio-economic indicators that are not available from any other sources like administrative data, etc. CAMS will collect information required for the purpose of generating some SDG indicators and sub- indicators of Global Indices. This survey will be annual in which some of the modules may be repeated annually and some periodically with more than one year periodicity. List of some SDG and sub-indicators of Global indices which will be generated from CAMS is given below:

- Proportion of population using safely managed drinking water services
- Proportion of population using (a) safely managed sanitation services and (b) a hand-washing facility with soap and water
- Proportion of individuals who own a mobile phone, by sex
- Proportion of population covered by a mobile network, by technology
- Percentage of Household with a computer
- Percentage of individuals using internet during last 3 months, last 365 days
- Percentage of adult having an account at a formal financial institution
- Percentage of women having an account at a formal financial institution
- Proportion of children under 5 years of age whose births have been registered with a civil authority, by age
- Proportion of population that has convenient access (0.5 km/1 km) to public transport (low/ high-capacities) stop.
- Participation rate of youth and adults in formal and non-formal education and training in the previous 12 months, by sex
- Proportion of youth (aged 15–24 years) not in education, employment or training
- Mean year of schooling
- Out-of-pocket medical expenditure on hospitalization during last 365 days

Survey on AYUSH: As mentioned earlier, the 79th round NSS will also cover the first ever all-India survey on AYUSH. The survey on AYUSH will be undertaken simultaneously with CAMS. This survey will gather information for development of the following broad indicators:

1. Percentage of population aware of AYUSH system,
2. Percentage of population hospitalized for taking AYUSH treatment during last 365 days,
3. Ailment/disease for which hospitalization is made,
4. The system(s) of AYUSH (namely, Ayurveda, Unani, Siddha, Sowa-Rigpa, Yoga & Naturopathy and Homeopathy) used for taking treatment on hospitalization,
5. Expenditure incurred on AYUSH medicines/treatment for hospitalization during last 365 days,
6. Percentage of population taken treatment using AYUSH medicines as an out- patient during last 365 days,
7. Usage of AYUSH medicines for pre-natal and post-natal care.

Outline of the Survey programme

Geographical coverage: The survey will cover the whole of the Indian union except the villages in Andaman and Nicobar Islands which are difficult to access.

Survey Period: The survey will commence from July 2022 and it will be of one year duration. CAMS and AYUSH will be carried out simultaneously in same FSU but in different household.

Sub-rounds: The survey period of the round will be divided into four sub-rounds of three months duration each as follows:

- sub-round 1 : July - September 2022
- sub-round 2 : October - December 2022
- sub-round 3 : January - March 2023
- sub-round 4 : April - June 2023

In each of these four sub-rounds equal number of sample First Stage Units (FSUs) will be allotted for survey with a view to ensure uniform spread of sample FSUs over the entire survey period. Attempt should also be made to survey each of the FSUs during the sub-round to which it is allotted.

Because of the arduous field conditions, this restriction need not be strictly enforced in Andaman and Nicobar Islands, Lakshadweep, Leh and Kargil districts of Ladakh and rural areas of Arunachal Pradesh and Nagaland.

Schedule of enquiry: During this round, the following Schedules of enquiry will be canvassed:

Schedule OOCM : List of Households

Schedule CAMS2022-23 : Comprehensive Annual Modular Survey Schedule AYUSH 2022-23 :
AYUSH

Participation of States: All the States and Union Territories except Andaman & Nicobar Islands, Daman & Diu and Dadra & Nagar Haveli are participating in this round. Following is the matching pattern of the participating States/UTs in this round:

State/UT	Extent of matching
-----------------	---------------------------

Nagaland (U)	: triple
--------------	----------

Manipur, Telangana	: double
--------------------	----------

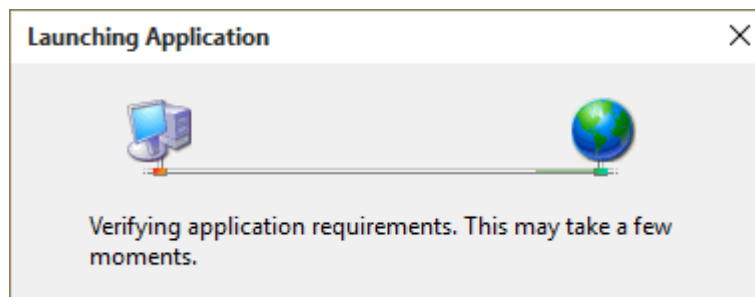

Maharashtra (U)	: one and half
-----------------	----------------

Remaining States/ UTs:	equal
------------------------	-------

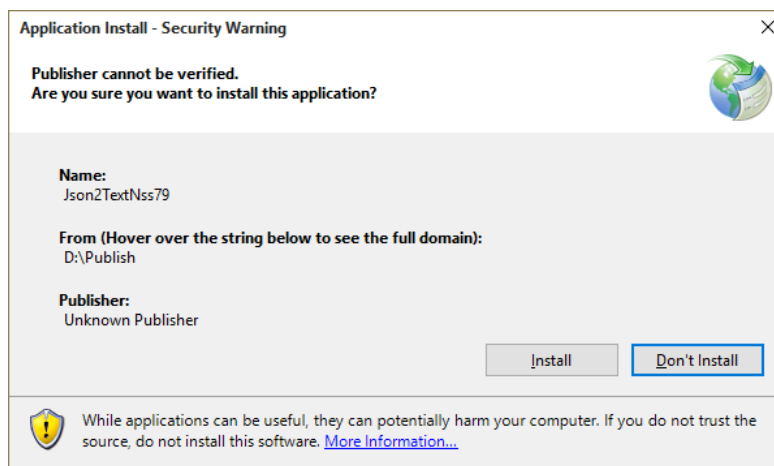

Chapter 2: Data Extraction – User Manual

Instruction Steps for Conversion of Json files to CSV files

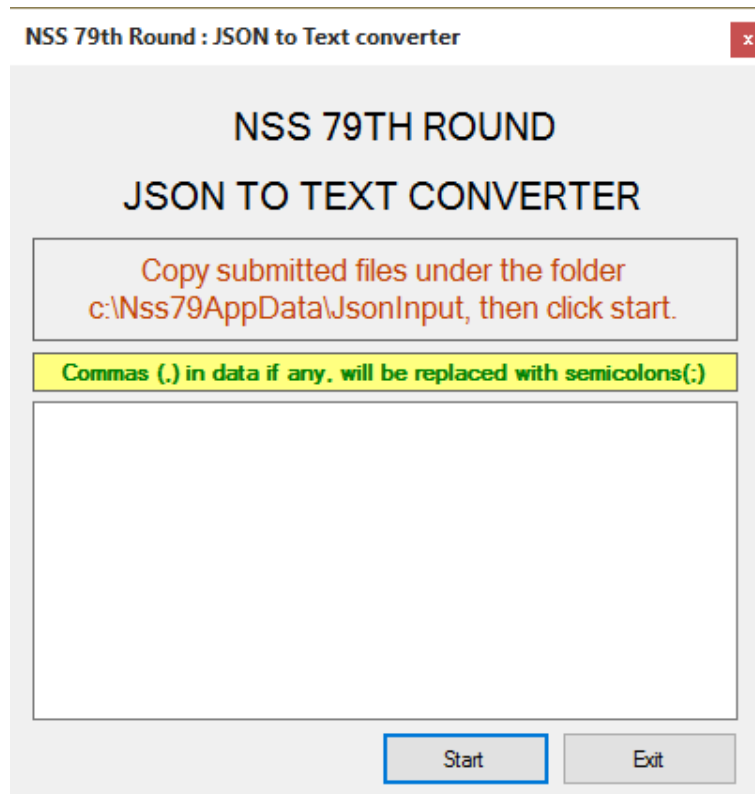

- Step-1) Copy 'Publish' & 'Nss79AppData' folders to C Drive (C:\)
- Step-2) 'Publish' folder contains following folder & files:
- 'Application Files' [Folder]
 - 'autorun.inf' [File]
 - 'Json2TextNss79.application' [File]
 - 'setup.exe' [File]
- Step-3) 'Nss79AppData' folder contains following folder & files:
- 'JsonInput'** [Folder]
 - 'Nss79JsonTxt2CSV.exe' [File]
 - 'TextOutput'** [Folder]
- Step-4) Copy-paste all of your 'json' files under **'JsonInput'** folder (e.g., NSS79_F34170_01Dec2022.json.zip etc.)
- Step-5) Double click on 'setup.exe' under 'Publish' folder
- Step-6) Following screens will appear:
-

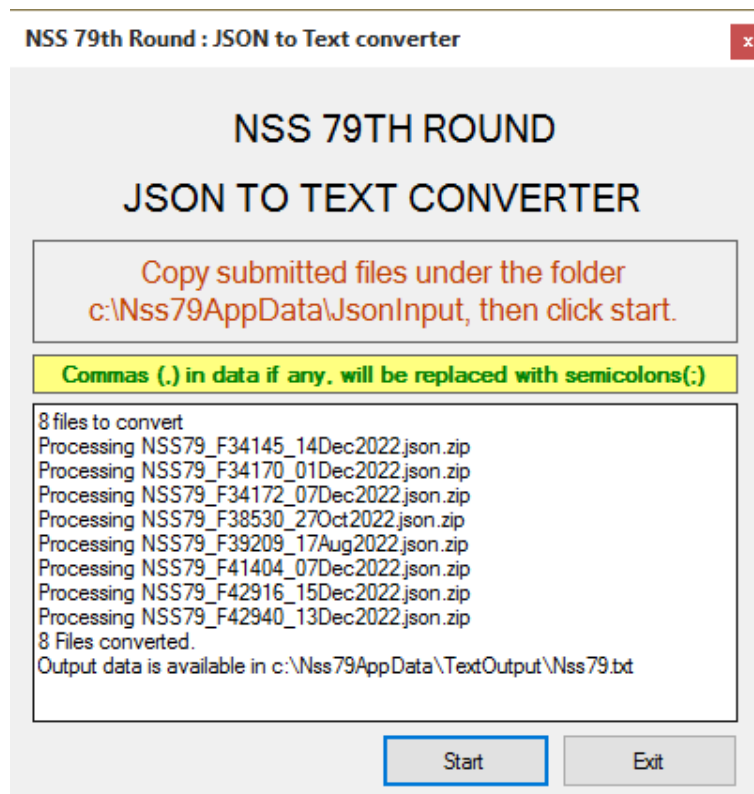

b.

Step-7) Single left click on 'Install' button. Following dialog box will appear:

Step-8) Single left click on 'Start' button. Following type of screen will appear finally:

Step-9) Now single left click on 'Exit' button. Output data is available in
C:\Nss79AppData\TextOutput\NSS79.txt

Step-10) Copy this 'NSS79.txt' file from 'C:\Nss79AppData\TextOutput\' folder and
paste it under 'C:\Nss79AppData \' folder where 'Nss79JsonTxt2CSV.exe' file
already exist.

Step-11) Open 'Command Prompt' window by using Windows Key+R and then
type 'cmd' and click 'OK' button.

Step-12) Go to the 'C:\Nss79AppData \' directory and type the following
command:

```
C:\Nss79AppData>Nss79JsonTxt2CSV NSS79.txt
```

Step-13) Eight (8) CSV files will be created under 'C:\Nss79AppData\' folder [viz.,
DDDB_AYUSH_HH.csv, DDDB_AYUSH_HH_Mem.csv, DDDB_CAMS_HH.csv,
DDDB_CAMS_HH_ErstMem.csv, DDDB_CAMS_HH_Mem.csv,
DDDB_CAMS_HH_Mem_CourseLevel.csv, DDDB_Listing_AYUSH.csv,
DDDB_Listing_CAMS.csv] .

Chapter 3: Python Installation Guide

Installing Python 3.11 and Setting Up pip + Libraries

✓ STEP 1: Download Python 3.11

1. **Go to the official Python website:**

👉 <https://www.python.org/downloads/release/python-3110/>

2. Scroll down to "**Files**" and download the **Windows installer** (choose either 64-bit or 32-bit depending on your system): Windows installer (64-bit)

64-bit: <https://www.python.org/ftp/python/3.11.0/python-3.11.0-amd64.exe>

32-bit: <https://www.python.org/ftp/python/3.11.0/python-3.11.0.exe>

✓ STEP 2: Install Python 3.11 with PATH Option Enabled

1. **Run the downloaded installer** (example: python-3.11.0-amd64.exe).
 2. At the bottom of the first screen:
 - ✓ **Check the box** that says:
 - [✓] Add Python 3.11 to PATH

[This step is very crucial to use the software from the command prompt]
 3. Click **Install Now**.
 4. After installation, you'll see a screen saying **Setup was successful**. You can now close the installer.
-

✓ STEP 3: Verify Installation via Command Line

1. Open **Command Prompt** (press Win + R, type cmd, and hit Enter).
2. Check Python version:
3. `python --version`

✓ Output should be something like: Python 3.11.0

4. Check pip version:
5. `pip --version`

✓ Output: pip 23.x.x from ...

If pip is not found, follow the optional step below.

OPTIONAL: If pip Not Installed

You can manually install pip (in rare cases where it's missing):

1. Download get-pip.py from:
 <https://bootstrap.pypa.io/get-pip.py>
 2. Run this command in the folder where get-pip.py is saved:
 3. `python get-pip.py`
-

STEP 4: Install Required Python Libraries

Install pandas and numpy:

In the Command Prompt:

`pip install pandas numpy`

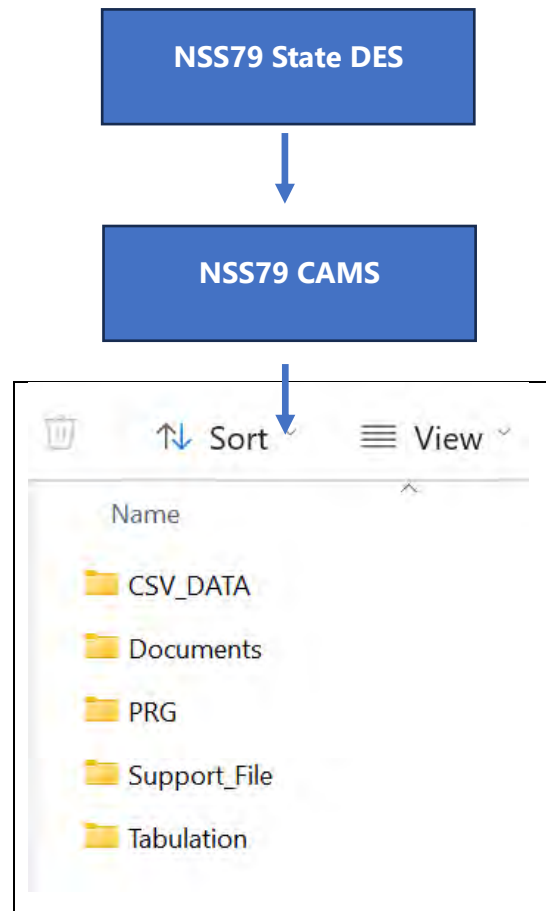

`pip install openpyxl`

Summary Checklist

Task	Status
Python 3.11 downloaded	
Python added to PATH	
pip installed	
Libraries installed (pandas, numpy)	

Chapter 4: CAMS Data Processing & Tabulation

Operational Layout for CAMS

- 1) All state should Process and Tabulate their CAMS data within "**NSS79 CAMS**" folder,

NSS79 CAMS Data Processing & Tabulation Manual (DES)

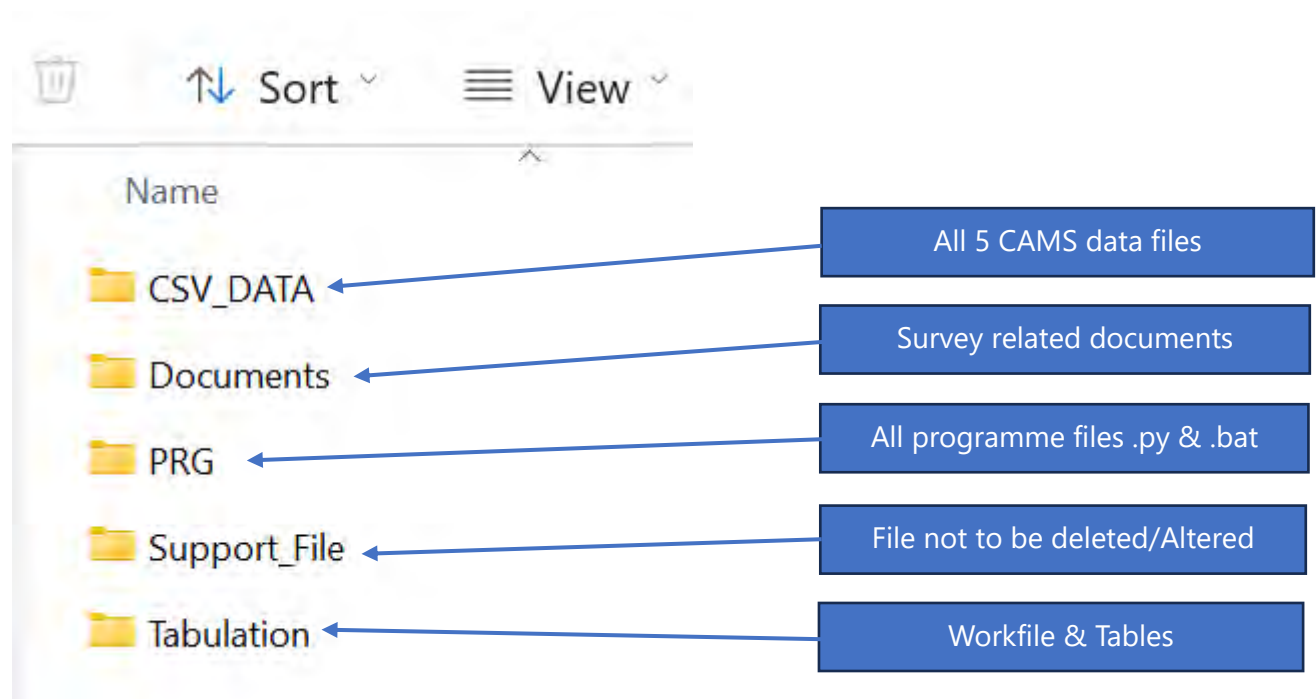

This documentation explains the step-by-step process to prepare and process State DES data related to CAMS using a series of scripts.

[A] Initialisation

Before starting of work, an user shall place in all files in each of the following designated folder.

This step is necessary for segregation of files as per their role/function. The following is a brief diagrammatic representation of folder structure.

Folder Structure and Contents

[B] Execution

Step-by-Step Breakdown

Step 1: Data Extraction

After extraction there will be following CAMS data files in csv format

- 1) DDDB_CAMS_HH.csv
- 2) DDDB_CAMS_HH_ErstMem.csv
- 3) DDDB_CAMS_HH_Mem.csv
- 4) DDDB_CAMS_HH_Mem_CourseLevel.csv
- 5) DDDB_Listing_CAMS.csv

All these data files are to be kept in "**CSV_DATA**" folder.

Step 2: Multiplier Generation

Support files :

- 1) nss79_state_zst.pkl,
- 2) samplelist79st.pkl,
- 3) tabulation_state.pkl

Support files are essential for generating multiplier and deletion or altering/corrupting these file shall result in no multiplier generation.

The user need to open command prompt, and change the directory to **"PRG"** folder with the following command

cd /D "E:\NSS79_CAMS\PRG"

where "CAMS-mult.py" programme file is available.

Then use the following command for generation of multiplier

python CAMS-mult.py

After successful run, the user shall be displayed the estimated no. of households in the state and the total population estimate of the state.

Also, the following files will be generated in the "Support" folder

- 1) cams_mult79.pkl (Pickle file for multiplier : Read Only & fsu,sss row-wise)
- 2) cams_mult79.xlsx (Pickle file for multiplier : Excel format & fsu,sss row-wise)
- 3) cams_mult79sd.pkl (Pickle file for multiplier : Read Only format & fsu row-wise)
- 4) cams_mult79sd.xlsx (Pickle file for multiplier : Read Only format & fsu row-wise)

Step 3: Quintile Class (Umpce class) formation

Support files :

- 1) cams_mult79.pkl,
- 2) tabulation_state.pkl

The file named "cams_mult79.pkl" shall be generated after completion of Step 2 i.e Multiplier Generation.

The user need to open command prompt, and change the directory to **"PRG"** folder with the following commands

cd /D "E:\NSS79_CAMS\PRG"

where "CAMS-umpce.py" programme file is available.

Then use the following command for generation of umpce class

python CAMS-umpce.py

After successful run, the user shall get 2 different set of umpce classes

- 1) ugs – Where the whole data is used to form 5 umpce classes as 01,02,03,04,05 ;
01- Lowest consumption class & 05-Highest consumption class.
- 2) ugss– Where the whole data is used to form 5 umpce classes as 01,02,03,04,05 for Rural and another 5 similar classes for Urban; i.e a total of 10 classes for the state formed sector-wise

In case of rural sector estimates of any indicator with umpce class-wise breakup, ugss is to be used and similarly for urban.

However, in case of Rural and Urban combined estimates of any indicator with umpce class-wise breakup, ugs is to be used.

Also, the following files will be generated in the "Support" folder

- 5) cams-umpcehh.pickle (Pickle file for umpce class : Read Only)
- 6) cams-umpcehh.xlsx (Excel file for umpce class : Editable)

Step 4: Workfile Genaration

Support files :

- 1) tabulation_state.pkl
- 2) cams_umpcehh.pickle
- 3) hhlay.pkl
- 4) memlay.pkl
- 5) courselay.pkl
- 6) erstlay.pkl
- 7) nss79_dtype.pkl
- 8) nss79_mtown.pkl

The user need to open command prompt, and change the directory to "**PRG**" folder with the following commands

`cd /D "E:\NSS79_CAMS\PRG"`

The following file will be available which are programme files related to workfile generation:

- 1) CAMS-NSS79wf1.py
- 2) CAMS-NSS79wf2.py
- 3) CAMS-NSS79wf3.py
- 4) CAMS-NSS79wf4.py
- 5) CAMS-NSS79wf5.py

Each of the workfile is used to generate certain Tables as per Tabulation Plan.

The following command is for generation of 1st workfile based on household level data:

python CAMS-NSS79wf1.py

Similarly, all other workfile programmes is to be called from command prompt for generation of all tables from Tabulation Plan.

After successfully running the following work files will be generated in the "Tabulation" folder

- 1) wf1 - Household level workfile
- 2) wf1layout - Fixed-width data layout of wf1
- 3) hh_mult.csv - Multiplier posted household level csv data

After successful running of all workfile programmes the following file will also be generated:

- 4) wf2 - Member/Person level workfile
- 5) wf2layout - Fixed-width data layout of wf2
- 6) mem_mult.csv - Multiplier posted person level csv data
- 7) wf3 - Member-wise Course level workfile
- 8) wf3layout - Fixed-width data layout of wf3
- 9) wf3_mult.csv - Multiplier posted course level csv data
- 10) wf4 - Erstwhile member level workfile
- 11) wf4layout - Fixed-width data layout of wf4
- 12) wf4_mult.csv - Multiplier posted Erstwhile member level csv data

Special Caution : It is observed in data spurious entries with exorbitant field-widths are available, due to which any one or all workfiles may not be generated.

In such a case an error list will be generated by the workfile programme which the user needs to refer and update/correct the data in the data-entry/update module. Then the user has to re-extract the updated data and run the whole process from start.

For example, if error is observed while generating wf1 the **wf1_error_df.xlsx** file will be generated in the same place which will be household level error list and wf1.txt/wf1.csv shall not be generated.

Step 5: Tabulation

Support files :

- 1) wf1.txt
- 2) wf2.txt
- 3) wf3.txt
- 4) wf4.txt
- 5) wf5.txt
- 6) NSS79_CAMS_Tables.bat
- 7) .def files

The user need to open command prompt, and change the directory to **"Tabulation"** folder with the following commands

cd /D "E:\NSS79_CAMS\Tabulation"

Run the tabulation batch file in the command prompt:

NSS79_CAMS_Tables.bat

This step runs a series of tabulation programs (.def files) and NSS79_CAMS_Tables.bat to generate all tables as per tabulation plan. The print files of the tables shall be available into the **"Tables"** sub-folder under **"Tabulation"** folder

Step 6: RSE Generation

Support files :

- 1) Cams_mult.pkl

The user need to open command prompt, and change the directory to **"PRG"** folder with the following commands

cd /D "E:\NSS79_CAMS\PRG"

User has to use the following RSE programme for generation of RSE for % population having access to latrine :

- 1) CAMS-RSE_Access_to_Latrine.py

The following command is to be used

python CAMS-RSE_Access_to_Latrine.py

Similarly, all other RSE programmes is to be called from command prompt for generation of certain RSE tables by the user. The RSE tables shall be available into the “**RSE**” sub-folder under “**Tabulation**” folder

Final Tables

- All the Text/Print files of the tables will be available in the “Tables” sub-folder within Tabulation folder.
- A few selected RSE Tables shall be generated in the “RSE” sub-folder within Tabulation folder.
- Also 4 multiplier posted data files (***hh_mult.csv, mem_mult.csv, course_mult.csv, erst_mult.csv***) will be available in the same Tabulation folder.
- ---

Notes for Users

- Always ensure Python is installed and added to your system PATH.
 - Run each script in order if doing manually.
 - Do not alter the file names or their sequence unless you understand the dependencies.
 - If Users faces a Python error, read the message carefully—it often tells you what is missing or wrong.
-

○ Option : One-Click Execution from Multiplier to Tables/RSE

At the execution level

- Run the **All_steps_NSS79_CAMS_states.bat** file by double-clicking it or executing via the command prompt; this file shall be available in the “**PRG**” folder.

For running it in command prompt first change the directory to “PRG” folder as:

```
cd /D "E:\NSS79_CAMS\PRG"
```

Then type

```
> All_steps_NSS79_CAMS_states.bat
```

This runs the entire process from data extraction to table generation in sequence.

Chapter 5: AYUSH Data Processing & Tabulation

Overview

This documentation explains the step-by-step process to prepare and process NSSO data related to AYUSH using a series of Python scripts and batch files.

Folder Structure

The directory structure must be as follows for smooth execution:

1.

State Tabulation AYUSH/

|

|—— CSV_DATA

|—— PRG

|—— Support_File

|—— Tabulation

2.

PRG/

|

|—— AYUSH_1_data_prep.py

|—— AYUSH_2_data_check.py

|—— AYUSH_3_mult.py

|—— AYUSH_4_umpce.py

|—— AYUSH_5_wf1.py

|—— AYUSH_6_wf2.py

|—— AYUSH_7_rse.py

|—— 79_ayush_states.bat

3.

Tabulation/

|

|—— Tables

|—— 79_ayush_tab.bat

⚠ Make sure all Python scripts and the main batch file (79_ayush_states.bat) are in the **PRG folder**, and the 79_ayush_tab.bat file is inside the **Tabulation** folder.

⚠ Installation of Python software using instruction provided separately as **Complete Guide of Python Installation.docx** and **Python_Installation_Guide_Windows.pdf**. Always ensure Python is installed and added to your system PATH. Installation of **pandas, numpy and openpyxl** libraries are necessary for executing the codes.

Execution Process

1. At first, we have to convert the json file to txt to csv file for respective state. Kindly refer to the **Instruction Steps for Conversion of Json files to CSV files.docx** file for step-by-step guide into how to convert the json file into csv. Please refer to folders **Nss79_Data_Extraction** and **Nss79JsonTxt2CSV** for necessary utilities.
2. Next, we have to copy extracted data after converting from Json to txt to csv of the respective state to **CSV_DATA** folder. Please make sure **only 8 csv files of a single state** are present inside the CSV_DATA folder before proceeding to next step.
3. Next, we can execute either the **79_ayush_states.bat** file under PRG folder for one-click execution (**option - 1**) or we can run each python file step by step (**option - 2**).

Option 1: One-Click Execution (Recommended)

Run the **79_ayush_states.bat** file by double-clicking it or executing via the command prompt:

79_ayush_states.bat: This runs the entire process from data extraction to table generation in sequence.

Option 2: Manual Execution

Each step below corresponds to a script executed in the batch file. Run them manually using command prompt.

Step-by-Step Breakdown

Step 1: Data Extraction

Script: *python AYUSH_1_data_prep.py*

Purpose: Loads and prepares raw data for processing.

Step 2: Data Validation

Script: *python AYUSH_2_data_check.py*

Purpose: Validates data consistency and checks for any input issues.

Step 3: Multiplier Generation

Script: *python AYUSH_3_mult.py*

Purpose: Generates multipliers for use in tabulation or weighting.

Note: For multiplier computation, ZS file having the total number of FSU counts ("nss79_state_zst.xlsx") is available in the Support_File folder.

The field "zst" of this file is posted in the data file of Sch. 0.0 using sector, state, strm, sstrm for computation of multiplier

Step 4: UMPCE Class Generation

Script: *python AYUSH_4_umpce.py*

Purpose: Categorizes households/individuals into UMPCE (Uniform Monthly Per Capita Expenditure) classes.

Step 5: Work file Generation

Scripts:

- *python AYUSH_5_wf1.py*
- *python AYUSH_6_wf2.py*

Purpose: Processes and formats data into work files used for final analysis.

Step 6: Tabulation

After all preprocessing is done, navigate to the Tabulation folder:

```
cd..
```

```
cd Tabulation
```

Run the tabulation batch file:

```
79_ayush_tab.bat
```

This step runs a series of tabulation programs to generate final tables.

. **Description** of the Tabulation batch file (**79_ayush_tab.bat**)

- i) In the tabulation batch file, first the workfiles wf1 and wf2 are sorted using the **tabsort function** according to key as defined.
- ii) Next the **dostab function** is generating the desired output tables (Eg. pt01 etc.) which are stored in the Tables folder.

Step 7: RSE calculation

Script: python *AYUSH_7_rse.py*

Purpose: Calculates the error variance of the estimates of selected indicators.

Final Output

- After executing the scripts either by option -1 or option – 2, the output Tables are generated in the **Tables folder** under the **Tabulation Folder**.
- Intermediate files like multipliers, cleaned data, and work files are stored in the Support_File directory or designated output folders based on the script design.

Notes:

- Always ensure Python is installed and added to your system PATH.
 - Run each script in order if doing manually.
 - Do not alter the file names or their sequence unless you understand the dependencies.
 - If you face a Python error, read the message carefully—it often tells you what is missing or wrong.
-

	(iii) Scrutiny										
	(iv) Despatch										
3.	Total time taken to canvass the questionnaire by the team of enumerators (SE/JSO) (in minutes) [no decimal point]										
4.	Number of enumerators (SE/JSO) in the team who canvassed the Questionnaire										
5.	Whether any remark has been entered by SE/JSO/SS/SSO	(i) In block 9 /10 (yes -1, no -2)									
		(ii) Elsewhere in the Questionnaire (yes -1, no -2)									
6.	name of informant: [Instruction: A pop-up with the details of household members as listed in Block 3, Col. 2 will appear along with an option 'not a household member' against 'srl. no. of the household member' '99'. The enumerator should select the 'informant' from that list]										
	Srl no. of the household member		Name				Select the informant				
							○				
							○				
	99		not a household member				○				
7.	Mobile number of informant/any other household member who can be contacted										
8.	Landline number of the household, if any (Start with STD code)										
9.	Response code of the informant as assessed by SE/JSO <i>informant co-operative and capable -1, informant co-operative but not capable -2, informant busy -3, informant reluctant -4, others -9</i>										

[Block 9] Remarks by Survey Enumerator (SE)/Junior Statistical Officer (JSO)

[Block 10] Remarks by Survey Supervisor (SS)/Senior Statistical Officer (SSO)

A. List of diseases/ailments and codes given in Block 5 & 6

Name of Diseases/Ailments	Code
Musculoskeletal system – spine disc problem, knee joint problems (arthritis), etc.	01
Nervous system - migraine, paralysis, parkinson's, addictions, etc.	02
Integumentary system - eczema, psoriasis, ring worm, etc.	03
Geriatric problems – osteoporosis, prostate, dementia, etc.	04
Respiratory system - frequent cough & cold, asthma, allergies, etc.	05
ENT and ophthalmic - sinusitis, dry eye, glaucoma, etc.	06
Dental - caries, gingivitis, etc.	07
Gastrointestinal system - colitis, constipation, hyperacidity, irritable bowel syndrome, worms, etc.	08
Anorectal - piles, fistula, fissure in ano, etc.	09
Female reproductive system– infertility, menstruation problems, leucorrhoea, etc.	10
Paediatrics- immunity and memory boosting	11
Genitourinary system - male infertility, urinary tract infections, renal stones, etc.	12
Hepato-biliary system - jaundice, gall stones, etc.	13
Cardio vascular – anaemia, hypertension, heart disease, etc.	14
Prediabetes / Diabetes / Thyroid disease	15
Obesity / Slimming	16
Psychiatric – stress, anxiety, depression, etc.	17
Cosmetics - Skin, hair beauty care	18
Acute conditions- pain, fever, vomiting, loose motions, etc.	19
Cancer	20
Others- bone setting, bites, burn, wounds, etc. (including COVID-19)	99
General Immune boosting	91
Poorvakarma (snehana, svedana), thokkanam, etc.	92
Panchakarma, regimental therapy, yogic shatkriya	93

Socio-Economic Survey

NSS 79th Round

Schedule CAMS 2022-23:
Comprehensive Annual Modular Survey 2022-23

List of Blocks of the Schedule

Block Number	Description
1	Identification of sample household
2	Particulars of field operations
3.1	Demographic and other particulars of household members
3.2	Usage of mobile, computer etc. by the household members of age 3 years or more
3.3	ICT particulars of household members of age 15 years or more who can use smart phone/ desktop computer/laptop/tablet/palmtop/notebook etc.
4.1	General household characteristics
4.2	Household assets and amenities
4.3	Information on particulars of health
5.1 - 5.3	Information on education for household members with age ≥ 3
5.4	Person level information on formal education of erstwhile household member (age ≥ 18 years) studying outside India, if any
6	Household consumer expenditure
7	General Remarks by Survey Enumerator (SE)/ Junior Statistical Officer (JSO)
8	General Comments by Survey Supervisor (SS)/ Senior Statistical Officer (SSO)

**GOVERNMENT OF INDIA
NATIONAL STATISTICAL OFFICE
SOCIO-ECONOMIC SURVEY
SEVENTY NINTH ROUND
SCHEDULE CAMS 2022-23: COMPREHENSIVE ANNUAL MODULAR SURVEY 2022-23**

[Block 1] Identification of sample household

[Information on items 1 to 8 and 11 will be available from the sample list. Information on items 12, 12.1 and 13 will be available from the schedule for listing (Sch 0.0). Items 14 and 15 are to be filled by the field officials.]

Q no.	Question description	Code/Entry
1.	Sector (<i>rural -1, urban -2</i>)	
2.	Type of Sample (<i>central -1, state -2</i>)	
3.	State/U.T. Name	
4.	District Name	
5.	Name of Sub-District/Tehsil/Town	
6.	Village Name:	
7.	Investigator Unit Number/Block Number:	
8.	Sample Sub-Unit (SU) Number:	
9.	Round Number:	79
10.	Schedule name:	CAMS 2022-23
11.	Serial Number of Sample FSU:	
12.	Sample Sub-Division Number:	
12.1	Second-stage stratum number:	
13.	Sample Household Number:	
14.	Survey Code (<i>original -1, substitute -2, casualty -3</i>)	
FOR CODES 2 or 3 in Q14, GO TO Q 15. OTHERWISE GO TO BLOCK 3.1.		
15.	Reason for substitution/casualty of the original household (<i>informant busy -1, members away from home -2, informant non-cooperative -3, others -9</i>) (<i>The interviewer will fill up this item if a substituted household is canvassed or the household is a casualty</i>)	

[Block 3.1] Demographic and other particulars of household members

[illegible]

[Block 3.1] Remarks

Notes for filling up Block 3.1:

1. Col 2: As per usual practice of NSS, name of the household members will start from the name of the head of household followed by spouse of the head and the next their children. If the household has any non-relatives, then their name will be listed at the end.
2. Col 7:
 - a. **Enrolment would cover** education acquired through formal pre-school, school, college, university, institutions, ITIs, vocational/ technical training institutes, special schools for children with special needs, etc. Formal education covers general, technical, professional, vocational courses offered by schools, colleges, universities, open schools, open and distance education universities, CA/ CFA/ ICWA/ CS or similar professional bodies or other institutions.  - b. **Enrolment would not cover**
 - i. Education acquired through play schools or any Government run literacy programmes e.g., Non-Formal Education Centres/Total Literacy Campaign/Adult Education Centres and similar programmes run by NGOs,
 - ii. Gaining knowledge from master craftsmen, motor repairing shops, parents/ relatives who work in agriculture, tailoring, pottery, cobbler, carpenter, etc; work-based training given at offices.
3. For filling the Col 11, 'indebtedness' of at least cash amount of Rs 500/- is to be considered.

[Block 3.2] Usage of mobile, computer etc. particulars of household members of age 3 years or more

[Information will be collected in this block for household members of age 3 years and more [i.e. entry (col. 5) \geq 3]. Entries in col. 1 and col. 2 are to be auto-populated/copied from corresponding entries of Block 3.1]

Auto-populated/ Copied from Block 3.1		Whether able to use mobile telephone?	For code 1, 2 in col. 3	For code 1, 2, 3 in col. 4	Whether able to use any of:	For codes 1,2 in col. 3 or 1 in col.6				
Srl. No. (as in col. 1, bl. 3.1)	Age (as in col. 5, bl. 3.1)	(yes: <i>smart phone-1</i> yes: <i>mobile telephone excluding smart phone -2, no -3</i>)	Whether uses any mobile telephone (including smart phone) with active sim card for the last three months for making personal calls and/ or to access the internet? (yes: <i>exclusive use -1, yes: shared with household member (s) -2, yes: shared with non-household member(s) -3, no - 4</i>)	What is the type of mobile technology <i>mainly</i> used? (5G and above-1, 4G-2, 3G-3, 2G-4, others-5, don't know-9) [In case of more than one code, the code appearing first in the code list is to be reported.]	desktop computer/ laptop/ tablet/ palmtop/ notebook etc.? (yes -1, no -2)	Whether able to use internet with/via mobile telephone/ smart phone/ desktop computer/laptop/ tablet/ palmtop/ notebook etc. for any purposes? (yes: <i>for entertainment purpose (including communication) only-1, yes: for information purpose only -2, yes: both for entertainment (including communication) and information purpose -3, no-4</i>)	For codes 1,2,3 in col. 7			
						Whether used internet at least once during last 3 months (yes-1, no-2)	For code 2 in col. 8 Whether used internet at least once during last 12 months (yes-1, no-2)	Whether able to send or receive emails? (yes -1, no -2)	Whether able to use any of: mobile phone/smart phone/desktop computer/laptop/ tablet/palmtop/ notebook etc.for performing banking transaction like digital payment? (yes -1, no -2)	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(8.1)	(9)	(10)
[Block 3.2] Remarks										

[Block 3.3] ICT particulars of household members of age 15 years or above who can use smart phone/ desktop computer/laptop/tablet/palmtop/notebook etc.

[For household members with age 15 years or more [i.e. with entry 15 or more in col. 2 of Block 3.2] who can use smart phone/ desktop computer/laptop/tablet/palmtop/notebook etc. [i.e. with entry 1 in col. 3 or entry 1 in col. 6 of Block 3.2]; the Block 3.3 will be generated/filled-in. Entries in col. 1 and col. 2 are to be auto-populated/copied from corresponding entries of Block 3.2]

Auto-populated/ Copied from Block 3.2		Whether the household member (age 15 years and above) has executed the following ICT skills during last 3 months using any of smart phone/ desktop computer/laptop/tablet/palmtop/notebook etc.										
Srl. No. (as in col. 1, bl. 3.2)	Age (as in col. 2, bl. 3.2)	Use copy and paste tools to duplicate or move data, information, documents etc. (yes - 1, no - 2)	Send messages (e.g. e-mail, messaging service, SMS) with attached files (e.g. document, pictures and video) (yes - 1, no - 2)	Use basic arithmetic formulae in a spread- sheet (excel) (yes - 1, no - 2)	Connect and install new devices (e.g. modem, camera, printer) through wired or wireless technologies (yes - 1, no - 2)	Search, down- load, install and con figure software and apps (yes-1, no-2)	Create electronic presentations with presentation software (including text, images, sound, video or charts) (yes - 1, no - 2)	Transfer files or applications between devices (like PC, tablet, pen drive, portable disk etc.) (yes - 1, no - 2)	Set up effective security measures to protect devices and online accounts (e.g. strong passwords, log-in attempt notification etc.) (yes - 1, no - 2)	Change privacy settings on device, account or app to limit the sharing of personal data and information (e.g. name, contact information, photos etc.) (yes - 1, no - 2)	Verify the reliability of online information (yes - 1, no - 2)	Write programme or code to develop/ modify software, mobile app etc. (yes - 1, no - 2)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)

[Block 3.3] Remarks

[Block 4.1]General household characteristics		
Qs. No.	Question description	Code/Entry
(1)	(2)	(3)
1.	Household size	
2.	Religion <i>(Hinduism -1, Islam -2, Christianity -3, Sikhism -4, Jainism -5, Buddhism -6, Zoroastrianism -7, others -9)</i>	
3.	Social group <i>(scheduled tribe(ST) -1, scheduled caste(SC) -2, other backward class (OBC)-3,others-9)</i>	
4.	Language mainly spoken at home <i>(Assamese-01, Bengali-02, Gujrati-03, Hindi-04, Kannada-05, Kashmiri-06, Konkani-07, Malayalam-08, Manipuri-09, Marathi-10, Nepali-11,Odia-12, Punjabi-13, Sanskrit-14, Sindhi-15, Tamil-16, Telugu-17, Urdu-18, English-19, Bodo-20, Dogri-22, Khasi-23, Garo-24, Mizo-25, Bhutia-26, Lepcha-27, Limboo-28, French-29, Santhali-39, Maithali-51, Other Languages-99)</i> Notes: <i>(i) Language mainly spoken by majority of household members is to be considered.</i> <i>(ii) In case equal number of household members is speaking in two or more different languages, the language spoken by the head of household is to be reported.</i>	
A. Drinking water facilities		
5.	Source of drinking water from which most of the drinking water is obtained by the household during last 365 days i.e. Principal source of drinking water <i>(bottled water-01, piped water into dwelling-02, piped water to yard/plot-03, piped water from neighbour-04, public tap/standpipe-05, tube well-06, hand pump-07, well: protected-08, unprotected-09; tanker-truck: public-10, private-11; spring: protected-12, unprotected-13; rainwater collection - 14, surface water: tank/pond-15, other surface water (river, dam, stream, canal, lake, etc.)-16; others (cart with small tank or drum, etc)-19)</i>	
6.	Is availability of drinking water from the principal source sufficient throughout the year (i.e. during each calendar month of the last 12 months)? (yes-1, no -2)	
7.	Type of access to the principal source of drinking water <i>(exclusive use of household- 1, common use of households in the building -2, neighbour's source- 3, community use- 4; others- 9)</i>	
8.	Distance to the principal source of drinking water <i>(within dwelling -1, outside dwelling but within the premises -2, outside premises- 3)</i>	
9.	Method used by the household for treatment of drinking water received from principal source <i>(not required to treat the drinking water as household received or perceived to receive safe drinking water - 1, treated: electric purifier - 2, non-electric purifier - 3, boiling - 4, chemically treated with alum - 5, chemically treated with bleach/chlorine tablets - 6, filtered with cloth - 7, others - 9; not treated -8)</i>	

[Block 4.1]General household characteristics		
Qs. No.	Question description	Code/Entry
(1)	(2)	(3)
B. Sanitation facilities		
10.	Type of access of the household to latrine (<i>An infrastructure which allows safer and more hygienic disposal of human excreta</i>) (exclusive use of household-1, common use of households in the building -2,public/community use of latrine -3, others -9, no access to latrine-4) FOR CODES 1 TO 3 OR 9,GO TOQ11. FOR CODE 4,GO TOQ12.	
11.	Type of latrine in which the household has access (flush/pour-flush to: piped sewer system-01, septic tank-02, twin leach pit -03, single leach pit -04, elsewhere (open drain, open pit, open field, etc)-05; ventilated improved pit latrine-06, pit latrine with slab-07, pit latrine without slab/open pit-08, composting latrine-10, open drain/nallah-11, others-19)	
11.1	FOR CODE 1 IN Q10 AND CODES 02 - 04, 06, 07, 10 IN Q11, Whether excreta from septic tank/pit/composting latrine have ever been emptied? (yes - 1, no - 2, not known - 3)	
11.2	FOR CODE 1 IN Q11.1, Place of disposal of excreta last time (treatment plant - 1, buried in covered twin leach pit/single pit - 2, uncovered pit/open land/pond/river etc. - 3, other places - 9, not known - 4)	
11.3	FOR CODE 1 IN Q11.1, How frequently excreta is emptied? (once or more in a year - 1, once in 2 years - 2, once in 5 years - 3, once in 10 years - 4, others - 9, not known - 5)	
12.	Is hand washing facility available within the household premises? (yes: with water and soap/detergent - 1, with water and ash/mud/sand etc.- 2, with water only - 3; no - 4)	
C. Energy used by household for cooking, lighting, heating		
13.	What is the primary source of energy used by the household for cooking? (firewood, chips & crop residue - 01, LPG - 02, other natural gas - 03, dung cake - 04, kerosene - 05, coke, coal - 06, gobar gas - 07, other biogas - 08, charcoal - 09, electricity (incl. generated by solar /wind power generators) - 10, solar cooker - 11, others - 19, no cooking arrangement - 12)	
14.	What is the primary source of energy used by the household for lighting? (electricity (incl. generated by solar /wind power generators) - 1, kerosene - 2, other oil - 3, gas - 4, candle - 5, others - 9, no lighting arrangement - 6)	
15.	What is the primary source of energy used by the household for heating? (firewood, chips & crop residue - 01, LPG - 02, other natural gas - 03, dung cake - 04, kerosene - 05,

Schedule:	Comprehensive Annual Modular Survey	A1-A49
Schedule:	Survey on AYUSH	B1-B27

**Schedule CAMS: Comprehensive Annual Modular Survey
NSS 79th Round (July, 2022 - June, 2023)**

Notes on Tabulation Plan

1. Based on the data of Schedule CAMS of NSS 79th round, one report has been planned to be brought out in the form of fact sheet. The title of the report is proposed as 'Report of Comprehensive Annual Modular Survey in India, 2022-23'. The report will contain key results of the survey for at State/UT and all-India level.
2. The tables for the report will be generated for each State/UT and as well as for all-India. The tables are to be generated at State/UT level as per the alphabetical order given below:

Sl. No.	State/UT /all-India	Sl. No.	State/UT /all-India	Sl. No.	State/UT /all-India
1	Andhra Pradesh	14	Madhya Pradesh	27	Uttarakhand
2	Arunachal Pradesh	15	Maharashtra	28	Uttar Pradesh
3	Assam	16	Manipur	29	West Bengal
4	Bihar	17	Meghalaya	30	A & N Islands
5	Chhattisgarh	18	Mizoram	31	Chandigarh
6	Delhi	19	Nagaland	32	Dadra & Nagar Haveli and Daman & Diu
7	Goa	20	Odisha	33	Jammu & Kashmir
8	Gujarat	21	Punjab	34	Ladakh
9	Haryana	22	Rajasthan	35	Lakshadweep
10	Himachal Pradesh	23	Sikkim	36	Puducherry
11	Jharkhand	24	Tamil Nadu	zz	all-India
12	Karnataka	25	Telangana		
13	Kerala	26	Tripura		

3. Some of the tables, specially which are related with SDG, will also be generated for aspirational districts and million plus cities of State/UT as per the list given below.
4. Tables of this tabulation plan have been divided into three sections. *Section A* contains tables which are requested by SSD for generating estimates of various SDG indicators as well as for sub-indicators of different global indices. *Section B* contains tables which are requested by M/o Education for generating estimates of various sub-indicators of global indices. *Section C* contains tables which are requested by M/o Health and Family Welfare. Section D contains some basic core tables. The report will be prepared based on tables of Section A, B and C.
5. The tables for the report will be generated for each aspirational districts of State/UT (wherever required), State/UT level and as well as for all-India. DQAD has to generate all the tables. Frequencies of reported cases have to be given for all the cells of all the tables along with estimates and RSEs and all of these are to be generated in the same format of the table. Dissemination of final tables will depend upon the sufficiency of number of reported cases and reliability of estimates.

6. Tables linked with UMPCE as a classificatory variable will be generated for quintile classes (each group containing 20 percent of the population) for all-India and the State/UT for rural, urban and (rural + urban). The quintile classes will be formed on the basis of UMPCE (Rs.) obtained from item 6, Block 6 of Schedule CAMS.
7. In the tables with categorical variable 'religion', 'others (religion)' will include 'Jainism', 'Buddhism', 'Zoroastrianism' and 'others'. However, estimates for these individual religions may also be generated at all-India level.
8. Guidelines for 'calculations of the cell figures', 'codes to be considered', etc., for each table, wherever necessary, have been given in the body of the tables.
9. All cell values of the tables (viz. percentage of households/persons or percentage distribution of households/persons) are to be calculated considering the reported cases only. All the percentage figures should be generated and reported in one decimal of places.
10. For classificatory variables like UMPCE, social group, religion etc., category 'all' represents the households excluding n.r. cases in respect of those categorical variables. Transgender will be counted in 'male' category of gender. For any table, estimated and sample figures in the rows are to be given excluding the n.r. cases for the classificatory variables mentioned in the table.

List of Aspirational districts

Sl. No.	Aspirational districts	State/UT	Sl. No.	Aspirational districts	State/UT
1.	Vizianagaram	Andhra Pradesh	41.	Garhwa	Jharkhand
2.	Visakhapatnam*		42.	Chatra	
3.	Y.S.R.*		43.	Giridih	
4.	Lohit	Arunachal Pradesh	44.	Godda	
5.	Dhubri	Assam	45.	Sahibganj	
6.	Goalpara		46.	Pakur

List of Tables

Table No.	Description	Page No.
(1)	(2)	(3)
A1	Number of borrowers per 1,00,000 persons and percentage distribution of population having accounts by age group	A-8
A2	Percentage distribution of persons of age < 5 years who have received birth certificate	A-9
A3.1	Percentage distribution of population of age 3 years or more using mobile telephones with an active sim card during last 3 months by age group	A-10
A3.2	Percentage of population covered by mobile network by type of technology	A-11
A4	Percentage distribution of population of age 3 years or more able to use internet by status of regular usage by age group	A-12
A4.1	Percentage of population of age 3 years or more able to use internet by status of regular usage by age group, among all persons of age 3 years or more	A-13
A5	Percentage of persons (15 years and above) by type of Information and Communication Technology (ICT) skills for each age group of youth and adult population	A-14
A6	Percentage of persons in formal and non-formal education and training in the previous 12 months	A-15
A7	Proportion of persons not in education, employment and training (NEET) by age group	A-16
A8	Percentage of households possessing computer, Laptop, TV etc for household use	A-17
A9	Percentage of persons having improved drinking water source accessible on premises, available when needed and treated	A-18
A10	Percentage of persons having exclusive access to improved latrine with hand washing facilities with water, soap/detergent	A-19
A10.1	Percentage of persons having hand washing facilities within household premises	A-20
A11	Proportion of households using clean fuel as a primary source of energy	A-21
A12	Percentage of persons with all-weather road within a distance of 2 km from the place of living of the household	A-22
A13	Percentage of persons having convenient access to low and high capacity public transport	A-23
A14	Percentage distribution of households by distance of the nearest open public space from the place of living of the household	A-24
B1	Percentage distribution of population able to use internet out of those able to use mobile or computer like devices by type of purpose	A-25
B2	Percentage of persons who are digitally literate	A-26
B3	Percentage of persons in tertiary education, percentage of graduates in science and technology and percentage of persons with some secondary education	A-27
B4(S2)	Level of educational attainment of persons (10 years and above)	A-28
B5	Percentage distribution of persons (age 6 to 10 years) who are enrolled in primary	A-29

Table No.	Description	Page No.
(1)	(2)	(3)
	education by type of school currently enrolled	
B6	Percentage of literate persons who are able to read and write short simple statement in their everyday life with understanding	A-30
B7	Percentage distribution of persons who have never being enrolled in formal education by major reasons	A-31
B8	Percentage distribution of households in which at least one member is studying outside India of age ≥ 18 by number of erstwhile members enrolled	A-32
B9	Percentage of persons of age ≥ 18 years studying tertiary education outside India at present in comparison to proportion of persons of age ≥ 18 years studying tertiary education in India at present and percentage distribution of persons studying outside India by level of enrolment	A-33
B10	Average number (0.0) of telephone, mobile phone, Desktop PC, Laptop, TV etc. possessed by household	A-34
C1	Average medical expenditure (Rs.) per household for treatment on non-hospitalisation and/or preventive measures and/or self-care during the last 30 days and its break-up by component of expenditure for each State/UT	A-35
C2	Average medical expenditure (Rs.) per household for treatment on hospitalisation (including institutional delivery) during the last 365 day and its break-up by component of expenditure for each State/UT	A-36
C3	Average out-of-pocket medical expenditure (OOPME) per household for treatment on hospitalisation during the period of last 365 days and non-hospitalisation during the last 30 days for each State/UT/all-India	A-37
D1	Number of first stage units (FSUs) allotted, surveyed and number of sample households surveyed for each state/UT	A-38
D2	Estimated number of persons (00) and average household size (0.0) for each state/UT classified by household social group and religion group	A-39
D3	Percentage distribution of persons by principal source of drinking water	A-40
D4	Percentage distribution of persons by access to the principal source of drinking water	A-41
D5	Percentage distribution of persons by distance to the principal source of drinking water	A-42
D6	Percentage distribution of persons by method used for treatment of drinking water received from principal source	A-43
D7	Percentage distribution of persons by access to latrine	A-44
D8	Percentage distribution of persons with access to latrine by type of latrine	A-45
D9	Percentage distribution of households by primary source of energy used for cooking	A-46
D10	Percentage distribution of population of age 3 years or more who are able to use mobile telephone by type of mobile phone	A-47
D11	Percentage distribution of population of age 3 years or more who are able to use mobile telephone by type of usage in last 3 months preceding date of survey	A-48
D12	Mean years of schooling (Considering completed status)	A-49
D13	Mean years of schooling (Considering completed and non-completed status)	A-50
S1	Number per 1000 households covered by any health financing scheme/insurance scheme for each State/UT/all-India	A-51

Table A1: Number of borrowers per 1,00,000 persons and percentage distribution of population having accounts by age group

gender: male/female/all

Tabulation Plan for Survey on AYUSH

NSS 79th Round (July, 2022 to June, 2023)

Explanatory Note:

A. Report: Based on data collected from the Survey on AYUSH of NSS 79th round, a report entitled 'AYUSH in India' is proposed to be prepared and the contents in the form of summarised data is given in the tabulation plan presented here. The report will be published in factsheet format.

B. Notes on tables:

1. All the tables are proposed to be generated for each State, UT and all-India level for rural and urban sector separately, if not otherwise mentioned in the detailed tables. Tables for State/UT are to be generated alphabetically, starting with States and then UTs.
2. In all cases 'n.r.' stands for 'not reported'. 'N.R.' for a particular variable is to be separated out as separate row/col. whenever distribution is done on that particular variable. Otherwise, it may be included in 'all' category in the respective tables, wherever applicable.
3. Code/item/row/column references, given in heading/sub-heading of the detailed tables, are only for reference of DQAD. These are not to be printed in heading/sub-headings of the detailed tables.
4. Person in all the tables (wherever mentioned) is inclusive of *Transgender*.
5. Estimates of number of persons wherever generated for States and UTs or for all India will be generated for the purpose of internal consumption only. These numbers will not be published.
6. **Household's Usual Monthly Per Capita Expenditure (UMPCE):** UMPCE for each household is to be obtained by dividing the entry against Question 10, Block 4 (i.e., household's usual monthly consumer expenditure) by entry against item 1 (households size) of Block 4. Tables are to be generated for quintile classes of UMPCE (separately for rural and urban sectors) at the State/UT and at all-India level. For each State/UT and at all-India level, quintile classes of UMPCE are to be determined based on usual monthly consumer expenditure of all the households. UMPCE quintile distribution, which does not cover all persons / all households, will be assumed to be same as the UMPCE distribution of the entire households.

C. RSE: RSE will be generated for selected key indicators.

List of Tables

Sl. No	Table no.	Title	Page no.
1	Table 1	Number of persons per 1000 (i) aware of AYUSH (age 15 years & above) and (ii) have used AYUSH during last 365 days by gender	B-4

Note on Sample Design and Estimation Procedure of NSS 79th round

1.0 Introduction

The National Sample Surveys (NSS) are conducted by the Government of India since 1950 to collect data on various socio-economic indicators employing scientific sampling methods. The seventy-ninth round of NSS will commence from July 2022.

NSS 79th round is earmarked for collection of data for compilation of a number of SDG indicators through a 'Comprehensive Annual Modular Survey (CAMS)' along with a survey on Ayurveda, Yoga, Naturopathy, Unani, Siddha, Sowa-Rigpa/Amchi and Homoeopathy (AYUSH).

1.1 Subject Coverage:

1.1.1 Comprehensive Annual Modular Survey (CAMS): CAMS is introduced to cater the emerging need for supply of information on high-frequency socio-economic indicators that are not available from any other sources like, administrative data etc. CAMS will collect information required for the purpose of generating some SDG indicators and sub-indicators of Global Indices. This survey will be annual in which some of the modules may be repeated annually and some periodically with more than one year periodicity.

1.1.2 Survey on AYUSH: As mentioned earlier, the 79th round NSS will also cover the first ever all-India survey on AYUSH. The survey on AYUSH will be undertaken simultaneously with CAMS.

1.2 Outline of the Survey programme

1.2.1 Geographical coverage: The survey will cover the whole of the Indian union except the villages in Andaman and Nicobar Islands which are difficult to access.

1.2.2 Survey Period: The survey will commence from July 2022 and it will be of one year duration. CAMS and AYUSH will be carried out simultaneously in same FSU but in different household.

1.2.3 Sub-rounds: The survey period of the round will be divided into four sub-rounds of three months duration each as follows:

sub-round 1 :	July - September 2022
sub-round 2 :	October - December 2022
sub-round 3 :	January - March 2023
sub-round 4 :	April - June 2023

In each of these four sub-rounds equal number of sample First Stage Units (FSUs) will be allotted for survey with a view to ensure uniform spread of sample FSUs over the entire survey period. Attempt should also be made to survey each of the FSUs during the sub-round to which

it is allotted. *Because of the arduous field conditions, this restriction need not be strictly enforced in Andaman and Nicobar Islands, Lakshadweep, Leh and Kargil districts of Ladakh and rural areas of Arunachal Pradesh and Nagaland.*

1.2.4 Schedule of enquiry: During this round, the following Schedules of enquiry will be canvassed:

Schedule 00CM :	List of Households
Schedule CAMS2022-23 :	Comprehensive Annual Modular Survey
Schedule AYUSH 2022-23 :	AYUSH

1.2.5 Participation of States: All the States and Union Territories except Andaman & Nicobar Islands, Daman & Diu and Dadra & Nagar Haveli are participating in this round. Following is the matching pattern of the participating States/UTs in this round:

State/UT	Extent of matching
Nagaland (U)	triple
Manipur, Telangana	double
Maharashtra (U)	one and half
Remaining States/ UTs	equal

1.3 Sample Design

1.3.1 Formation of sub-units (SUs):

1.3.1.1 Rural areas: A rural village will be notionally divided into a number of sub-units (SU) of more or less equal population during the preparation of frame. Census 2011 population of villages will be projected by applying suitable growth rates and the number of SUs to be formed in a village will be determined apriori.

1.3.1.2 The above procedure of SU formation will be implemented in the villages with population *more than or equal to 1000 as per Census 2011*. In the remaining villages, no SU will be formed.

1.3.1.3 The number of SUs to be formed in the villages (with Census 2011 population 1000 or more) of the frame will be decided before selection of the samples following the criteria given below:

projected population of the village	no. of SUs to be formed
less than 1200	1
1200 to 2399	2
2400 to 3599	3
3600 to 4799	4
4800 to 5999	5
.....and so on

1.3.1.4 Special case:

For rural areas of (i) Himachal Pradesh, (ii) Sikkim, (iii) Andaman & Nicobar Islands, (iv) Uttarakhand (except four districts Dehradun, Nainital, Hardwar and Udham Singh Nagar), (v) Punch, Rajouri, Udhampur, Reasi, Doda, Kishtwar, Ramban of Jammu and Kashmir (vi) Leh and Kargil districts of Ladakh region and (vii) Idukki district of Kerala, numbers of SUs to be formed in a village will be determined in such a way that each SU contains 600 or less projected population. Further, SUs will not be formed in the villages in the above mentioned districts/States with population less than 500 as per Census 2011. In the remaining villages the number of SUs to be formed for these States/districts will be as follows:

projected population of the village	no. of SUs to be formed
less than 600	1
600 to 1199	2
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
.....and so on

For rural parts of Kerala, similar procedure as mentioned in para 1.3.1.3 above will be adopted with the modification that the SUs will be formed within Panchayat Wards instead of villages.

1.3.1.5 Urban areas: SUs will be formed in urban sector also. The procedure will be similar to that adopted in rural areas except that SUs will be formed on the basis of number of households in the UFS frame instead of population, since UFS frame does not have population. Each UFS block with number of households more than or equal to 250 will be divided into a number of SUs. In the remaining UFS blocks, no SU will be formed.

1.3.1.6 The number of SUs to be formed in the UFS blocks of the frame will be decided before selection of the samples following the criteria given below:

number of households of the UFS block	no. of SUs to be formed
less than 250	1
250 to 499	2
500 to 749	3
750 to 999	4
1000 to 1249	5
.....and so on

1.3.2 Outline of sample design: A stratified multi-stage design will be adopted for the 79th round survey. *The first stage units (FSU) will be villages/UFS blocks/sub-units (SUs) as per the situation.* The ultimate stage units (USU) will be households in both the sectors.

1.3.3 Sampling Frame for First Stage Units (FSUs):

1.3.3.1 There will be no SU formation in uninhabited villages and villages (Panchayat wards for Kerala) with population less than 1000 as per Census 2011 (less than 500 as per Census 2011 for the areas mentioned in para 1.4.1.4.1) and entire village will be considered as one FSU. All such villages (Panchayat wards for Kerala) will be the First Stage Units (FSUs).

1.3.3.2 In the remaining villages, notional sub-units (SUs) following the procedure as described in para 1.4.1.1 will be formed. Such SUs will be considered as First Stage Units (FSUs).

1.3.3.3 For the UFS blocks with less than 250 households, the entire UFS block will be considered as one FSU. In the remaining UFS blocks, the SUs will be considered as First Stage Units (FSUs).

1.3.3.4 List of FSUs as described above will be the sampling frame for respective cases.

1.3.4 Stratification of FSUs:

Rural Sector:

A Special Rural stratum, at all-India level for central sample, will be formed comprising all the uninhabited villages as per census 2011 belonging to all States/UT.

For the remaining villages which are inhabited as per census 2011, districts will be basic geographical unit for stratum formation. Within each district, two Stratum will be formed:

- (a) The villages (i) within a distance of 5 Kms from the district headquarter or (ii) within a distance of 5 Kms from a city/town with more than 5 lakh population, will form a stratum (stratum 1). The information will be obtained from the village directory of census 2011. It will be the stratum 1 for a particular district.
- (b) Rest of the villages will constitute another stratum (stratum 2) of the particular district.
- (c) Special rural stratum has been formed for the State samples also for those State/UTs which have at least 50 uninhabited villages as per census 2011.

Urban Sector:

Two or more strata will be formed in urban areas of each district:

- (i) each million plus city as per census 2011 will constitute separate stratum .
Stratum no will be 01, 02, 03.....,19
- (ii) rest of the urban areas of the district. Stratum no will be 20.

1.3.5 Sub-stratification of FSUs:

1.3.5.1 **Rural sector:** Three groups of villages will be formed within each stratum, except special rural stratum at all-India level as mentioned in para 1.4.4

Group 1: all villages (Panchayat wards for Kerala) with Census 2011 population less than 250

Group 2: all villages (Panchayat wards for Kerala) with Census 2011 population more than or equal to 250 but less than 500

Group 3: remaining villages

The sample size for a rural stratum will be allocated among 3 groups in proportion to population. Let r_1 , r_2 and r_3 be the allocations to Group 1, Group 2 and Group 3 respectively. The villages within each group will be first arranged in ascending order of number of population. For all the three groups within each strata, ' $r_1/4$ '>1, ' $r_2/4$ '>1 and ' $r_3/4$ '>1, will imply formation of 2 or more sub-strata in each group. Sub-strata will be demarcated in Group 1, Group 2 and Group 3 respectively in such a way that each sub-stratum will comprise a group of villages (all SUs of a village considered together) of the arranged frame and have more or less equal population.

If number of FSUs in a particular Group is very small, no sub-stratum may be formed in that Group.

1.3.5.2 **Urban sector:** Let 'u' be the sample size allocated for an urban stratum. For all strata, if ' $u/4$ ' >1, implying formation of 2 or more sub-strata, all the UFS blocks within the stratum will be first arranged in ascending order of total number of households in the UFS blocks as per urban frame. Then sub-strata will be demarcated in such a way that each sub-stratum will comprise a group of UFS blocks (all SUs of a block considered together) having more or less equal number of households. If number of blocks in a particular stratum is very small, no sub-stratum will be formed in the stratum.

1.3.6 **Total sample size (FSUs):** 15416 FSUs will be surveyed at all-India level for CAMS and AYUSH survey.

1.3.7 **Allocation of total sample to State/UTs:** As per NITI AYOOG list, at present there are 114 aspirational districts in the rural area and 112 in the urban areas. Socio economic upliftment of these districts is of prime interest of the Government. With a view to generate estimates for these aspirational districts, all aspirational districts and larger districts in rural India will be allocated 20 FSUs with the allocation for other districts will be a minimum of 4 FSUs. In Urban areas, all aspirational districts will be allocated 20 FSUs and districts having million plus towns will have at least 20 FSU allocations. For other districts 4 FSUs will be allocated.

1.3.8 **Allocation to strata:** In rural areas, 20 FSUs will be allocated to the Stratum corresponding to the 'Aspirational Districts (as declared by NITI AYOOG)' and large districts and a minimum 4 FSUs will be allocated to the stratum corresponding to other districts in rural areas. In urban areas, 20 FSUs will be allocated to the stratum corresponding to the

‘Aspirational Districts’ and a minimum 20 FSUs will be allocated to the stratum related to million plus cities. But some of the big million plus cities will be allocated more than 100 FSUs. The stratum related to other urban districts will have a minimum of 4 FSUs allocation. Stratum level allocation will be adjusted to multiples of 4 with a minimum sample size of 4. Within a rural district different group-wise allocation will be proportional to as per census 2011 population. *For special stratum formed at all-India level, 20 FSUs will be allocated.*

1.3.9 Allocation to sub-strata:

1.3.9.1 Generally, allocation will be 4 for each sub-stratum in the rural/urban sector. However, allocation will be adjusted in case of constraints of sample size. Thus, allocations may be more than 4 or less than 4 in some cases.

1.3.10 Selection of FSUs within a stratum/sub-stratum:

1.3.10.1 From all the sub-strata in both rural and urban sector within each stratum, required number of FSUs will be selected by Simple Random Sampling without Replacement (SRSWOR) scheme.

1.3.11 Formation of sub-units and listing of households

1.3.11.1 **Procedure of formation of SUs:** After identification of the boundaries of the village/ UFS block which contains the sample FSU, the village/ UFS block is to be divided into a number of SUs (say, D) as given in the sample list by more or less equalising the present population of the village/UFS block in which the sample FSUs are located. It is to be ensured that SUs formed are clearly identifiable in terms of physical landmarks. For villages/blocks where the number of SUs to be formed is 1 as per the sample list, no SU formation is required.

1.3.11.2 **Listing of households:** All the households of the sample FSU will be listed. Temporarily locked households will also be listed after ascertaining the temporariness of locking of the households through local enquiry.

1.3.12 **Formation of Sub-divisions in the selected SU:** It has been observed in the previous rounds that there happen to be some extreme cases where the population/number of households of the selected SU is very high and listing becomes very difficult. To take care of such extreme situations, such SU may be sub-divided into a number of smaller units (i.e., Sub-divisions) and one of them may be randomly selected. Listing and selection of households may be done in the selected Sub-division unit only. The procedure for formation of Sub-divisions is same as that of formation of SUs within village/blocks. The listing of hamlets will not be required but Sub-divisions will be formed such that each Sub-division has more or less equal population and is a compact area.

The criteria for determining the number of Sub-divisions (D_1) to be formed in the selected rural/urban SUs is as follows:

Approx. population of the SU	no. of Sub-divisions (D_1) to be formed
less than 1500	1
1500 to 2399	2
2400 to 3599	3
3600 to 4799	4
4800 to 5999	5
.....and so on

1.3.12.1 Special case:

1.3.12.1.1 For rural areas of (i) Himachal Pradesh, (ii) Sikkim, (iii) Andaman & Nicobar Islands, (iv) Uttarakhand (except four districts, i.e., Dehradun, Nainital, Hardwar and Udham Singh Nagar), (v) Punch, Rajouri, Udhampur, Reasi, Doda, Kishtwar, Ramban of Jammu (vi) Leh and Kargil districts of Ladakh region and (vii) Idukki district of Kerala, the criterion for determining the number of sub-divisions (D_1) to be formed in rural SUs is as follows:

Approx. population of the SU	no. of Sub-divisions to be formed
less than 750	1
750 to 1199	2
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
.....and so on

1.3.13 Formation of second stage strata (SSS) of households and allocation among SSS:

CAMS: 2 SSS will be formed for CAMS.

- SSS1: households with at least one member (**including deceased former member**) hospitalized (including institutional childbirth) during last 365 days.
- SSS2: remaining households.

AYUSH: 2 SSS will be formed for AYUSH.

- SSS1: Households incurring expenditure for AYUSH treatment/services as in-patient or out-patient for at least one member during last 365 days OR households with at least one member having knowledge about AYUSH systems,
- SSS2: Remaining households.

20 households will be surveyed in each FSU for CAMS while 12 household will be surveyed in each FSU for AYUSH. For CAMS 5 households will be selected from SSS 1 and 15 households will be selected for SSS 2. For AYUSH, 8 households will be selected from SSS 1 and 4 from SSS 2.

survey	SSS	Composition of SSS	Number of households to be surveyed
CAMS	1	households with at least one member (including deceased former member) hospitalized (including institutional childbirth) during last 365 days	5
	2	remaining households	15
AYUSH	1	households incurring expenditure for AYUSH treatment/services as in-patient or out-patient for at least one member during last 365 days OR households with at least one member having knowledge about AYUSH systems	8
	2	remaining households	4

1.3.14 Selection of households: The sample households from each SSS for each of the Schedule will be selected by SRSWOR. The two different surveys will be conducted in two different households. If there is any shortage of households then same households will be canvassed for different schedules.

2. Estimation Procedure

2.1 Notations:

s = subscript for s-th stratum

t = subscript for t-th sub-stratum

i = subscript for i-th FSU [SU/ village /panchayat ward/ block]

j = subscript for j-th second stage stratum in an FSU

k = subscript for k-th sample household within an FSU

D_1 = total number of sub-divisions formed in the sample FSU. $D_1=1$, if no Sub-division is formed in the SU)

N = total number of FSUs in any rural/urban sub-stratum

n = number of sample FSUs surveyed including ‘uninhabited’ and ‘zero cases’ but excluding casualty for a particular sub-stratum

H = total number of households listed in a second-stage stratum of an FSU

h = number of households surveyed in a second-stage stratum of an FSU

x, y = observed value of characteristics x, y under estimation

\hat{X} , \hat{Y} = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

y_{stijk} = observed value of the characteristic y for the k-th household of the j-th second stage stratum of the i-th FSU for the t-th sub-stratum of s-th stratum.

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

2.2 Formulae for Estimation of Aggregates for a stratum \times sub-stratum:

422.1 Schedule 00CM (Rural/Urban):

- (i) For estimating the number of households in a stratum \times sub-stratum possessing a characteristic:

$$\hat{Y} = \frac{N}{n} \sum_{i=1}^n D_{1 \times} y_i$$

where y_i is the total number of households possessing the characteristic y in i-th FSU respectively.

2.2.2 Schedule CAMS 2022-23 & AYUSH 2022-23:

2.2.2.1 For j-th second-stage stratum of a stratum \times sub-stratum:

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} \left[D_1 * \frac{H_{ij}}{h_{ij}} \sum_{k=1}^{h_{ij}} y_{ijk} \right]$$

Where n_j is the number of sample FSUs with non-void j-th second-stage stratum.

2.2.2.2 Aggregate \hat{Y} is obtained combining all the second-stage strata:

$$\hat{Y} = \sum_j \hat{Y}_j$$

Note: Values of j for both the Schedule will be 2.

i.e., for Schedule CAMS 2022-23, j = 1, 2.

for Schedule AYUSH 2022-23, j = 1, 2.

2.3 Overall Estimate for Aggregates for a stratum:

Overall estimate for a stratum (\hat{Y}_s) will be obtained as

$$\hat{Y}_s = \sum_t \hat{Y}_{st}$$

2.4 Overall Estimate of Aggregates at District/State/UT/all-India level:

The overall estimate \hat{Y} at the District/State/ UT/ all-India level is obtained by summing the stratum estimates \hat{Y}_s over all strata belonging to the District/State/ UT/ all-India.

District level estimates can be generated only aspirational districts as per NITI ayog list and million plus cities only for some common socio economic indicator.

2.5 Estimates of Ratios:

Let \hat{Y} and \hat{X} be the overall estimates of the aggregates Y and X for two characteristics y and x respectively at the District/State/ UT/ all-India level.

Then the combined ratio estimate (\hat{R}) of the ratio ($R = \frac{Y}{X}$) will be obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}.$$

2.6 Estimation of Errors:

2.6.1 Formula for estimated variance (for Rural/Urban):

2.6.1.1 Here FSU is selected by SRSWOR method and USU (households) also selected SRSWOR method. If i^{th} FSU has been selected then h_i unit is selected from this particular FSU x SSS by SRSWOR method.

(a) Formula for aggregate \hat{Y} (for Rural/Urban):

$$\widehat{Y}_{ij} = H_{ij} * \overline{y}_{ij} * D_{1si} \quad \text{and} \quad \overline{y}_{ij} = \frac{\sum_1^{h_{ij}} y_{ijk}}{h_{ij}}$$

$$V\hat{ar}(\hat{Y}) = \sum_s V\hat{ar}(\hat{Y}_s) = \sum_s \sum_t \sum_j V\hat{ar}(\hat{Y}_{stj})$$

$$\begin{aligned} v\hat{ar}(\widehat{Y}_{stj}) = & N_{st}^2 \left(\frac{1}{n_{stj}} - \frac{1}{N_{st}} \right) (1/(n_{stj} - 1)) \sum_1^{n_{stj}} (H_{stij} * D_{1sti} * \overline{y}_{stij} - \frac{1}{n_{stj}} \sum_1^{n_{stj}} H_{stij} * D_{1sti} \overline{y}_{stij})^2 \\ & + \frac{N_{st}}{n_{stj}} \sum_1^{n_{stj}} H_{stij}^2 * D_{1sti}^2 \left(\frac{1}{h_{stij}} - \frac{1}{H_{stij} * D_{1si}} \right) s_{wij}^2 \end{aligned}$$

$$\text{where } s_{wij}^2 = \frac{1}{(h_{stij} - 1)} \sum_{k=1}^{h_{stij}} (y_{stijk} - \overline{y}_{stij})^2$$

(b) Formula for ratio \hat{R} (for Rural/Urban):

Note that $X^2 \text{MSE}(\hat{R})$ is unbiasedly estimated by $V(\hat{Y} - R\hat{X})$

$V(\hat{Y} - R\hat{X}) = v(\hat{u})$ where $u_{ijk} = (y_{ijk} - R x_{ijk})$,

$U_i = (Y_i - R X_i)$ and $U = (Y - RX) = 0$ at domain level (State/District).

$$\widehat{X^2 \text{MSE}}(\hat{R}) = \widehat{V}(\hat{U}) \text{ at } R = \hat{R}$$

$$\widehat{Y}_{stij} = \frac{1}{N_{st}} * \sum_k y_{stijk} * n_{stj} * \text{multiplier}$$

$$\widehat{X}_{stij} = \frac{1}{N_{st}} * \sum_k x_{stijk} * n_{stj} * \text{multiplier}$$

$$M\hat{SE}(\hat{R}) = \frac{1}{\hat{X}^2} \sum_s \sum_t M\hat{SE}_{st}(\hat{R})$$

Finally;

$$\widehat{MSE}_{st}(\hat{R}) = \sum_j N_{st}^2 \left(\frac{1}{n_{stj}} - \frac{1}{N_{st}} \right) \frac{1}{(n_{stj} - 1)} \sum_1^{n_{stj}} (H_{ij} D_{1si} \bar{u}_{ij} - \frac{1}{n_{stj}} \sum_1^{n_{stj}} H_{ij} D_{1si} \bar{u}_{ij})^2$$

$$+ \sum_j \frac{N_{st}}{n_{stj}} \sum_1^{n_{stj}} H_{ij}^2 * D_{1si}^2 \left(\frac{1}{h_{ij}} - \frac{1}{H_{ij} * D_{1si}} \right) s_{uij}^2$$

Where $s_{uij}^2 = \frac{1}{(h_{ij} - 1)} \sum_{k=1}^{h_{ij}} (u_{ijk} - \bar{u}_{ij})^2$

$$\bar{u}_{ij} = \bar{y}_{ij} - \hat{R} \bar{x}_{ij}$$

Multiplier formulae are as given in Section 5.

2.6.2 Estimates of Relative Standard Error (RSE):

$$R\hat{SE}(\hat{Y}) = \frac{\sqrt{Var(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{SE}(\hat{R}) = \frac{\sqrt{M\hat{SE}(\hat{R})}}{\hat{R}} \times 100$$

3. Multipliers:

3.1 The formulae for multipliers at stratum/sub-stratum/second-stage stratum level for a Questionnaire type are given below.

schedule	sector	formula for multipliers
00CM	Rural/urban	$\frac{N_{st}}{n_{st}}$
CAMS 2022-23& AYUSH 2022-23	Rural/urban	$\frac{N_{st}}{n_{stj}} * D_1 * \frac{H_{stij}}{h_{stij}}$
	j = 1, 2	

Note:

- (i) For estimating any characteristic for any domain not specifically considered in sample design, indicator variable may be used.

- (ii) Multipliers have to be computed on the basis of information available in the listing Schedule 00CM irrespective of any misclassification observed between the listing Schedule and detailed enquiry Schedule.

4. Treatment for zero cases, casualty cases etc.:

4.1 While counting the number of FSUs surveyed (n_{st} or n_{stj}) in a stratum/sub-stratum, all the FSUs with survey codes 1 to 6 in Schedule: 00CM will be considered. In addition, if no household is available in the frame then also that FSU will be treated as surveyed. However, household of a particular Schedule type are available in the frame of the FSU but none of these could be surveyed then that FSU has to be treated as casualty and it will not be treated as surveyed in respect of that Schedule.

4.2 *Casualty cases*: FSUs with survey code 7 as per Schedule: 00CM are treated as casualties. In addition to this, an FSU, although surveyed, may have to be treated as casualty for a particular Schedule type and a particular *second stage stratum* as given in the following para:

4.2.1 FSUs with survey codes 1 or 4 as per Schedule: 00CM having number of households in the frame of j-th second stage stratum greater than 0 (i.e. $H > 0$) but number of households surveyed according to data file as nil ($h = 0$), will be taken as casualties for j-th second stage stratum.

All the FSUs with survey codes 1 to 6 as per questionnaire 0.0 minus the number of casualties as identified above will be taken as the number of surveyed FSUs (n_{stj}) for that (stratum/sub-stratum) \times (second stage stratum).

5. Treatment in cases of void second-stage strata/sub-strata /strata at FSU or household level

5.1 A stratum/sub-stratum may be void because of the casualty of all the FSUs belonging to the stratum/sub-stratum.

5.2 When a stratum/sub-stratum is void, the following procedure is recommended:

Case(I): Stratum/Sub-stratum void cases at FSU levels (i.e. all FSUs having survey code 7):

- (i) If a rural/urban sub-stratum is void then it may be merged with the other sub-stratum of the same Group of the stratum. If for a particular group only one sub-stratum is there and only one FSU is allocated and the FSU become casualty then this sub-stratum can be merged with next group sub-stratum with proper size adjustment. Merged(in which void sub-stratum is merging) sub-stratum size may be calculated as :

Merged stratum size + Merging stratum size * (per FSU size of merging sub-stratum/per FSU size of merged sub-stratum).

Here merging sub-stratum means void sub-stratum and merged sub-stratum means in which void sub-stratum is merging. Here per FSU size of a sub-stratum means average number of households per sub-unit in urban area and average population per sub-unit in rural area.

- (ii) If a rural/urban stratum (district) is void due to all FSUs being casualty, it may be excluded from the coverage of the survey. The state level estimates will be based on the estimates of districts for which estimates are available and remarks to that effect may be added in appropriate places.

Case (II): Stratum/Sub-stratum void case at second stage stratum level (i.e. all the FSUs were casualties for a particular second stage stratum):

An FSU may be a casualty for a particular *second stage stratum* although survey code is not 7. If all the FSUs of a stratum/sub-stratum become casualties in this manner for a particular *second stage stratum*, the stratum/sub-stratum will become void.

Table 1: Allocation of Sample FSUs in NSS 79th round						
State	Central			State
