

Report No. 459(55/2.0/2)

Informal Sector in India 1999 - 2000

Salient Features

**NSS 55th round
(July 1999 – June 2000)**

National Sample Survey Organisation
Ministry of Statistics and Programme Implementation
Government of India

May 2001

Preface

National Sample Survey Organisation (NSSO) conducted an integrated survey of households on employment-unemployment & consumer expenditure and non-agricultural enterprises in the informal sector during July 1999 to June 2000. The survey on non-agricultural enterprises in the informal sector covered enterprises carrying out activities of manufacturing, construction, trading, hotels & restaurants, transport, storage and communications, financial intermediaries, real estate, renting and business services, education, health and social work and other community, social & personal services. Unincorporated proprietary and partnership enterprises were treated as enterprises belonging to the informal sector. Alternatively, information on workers in the non-agricultural sector was also collected from the households selected for the employment-unemployment survey. This report mainly presents results from the information collected from the non-agricultural enterprises in the informal sector. However, comparable results on the non-agricultural workers in the informal sector as obtained from the household survey are also presented. This is the first-ever nation-wide survey on informal sector.

This report contains information on estimated number of enterprises, workers, value added and other key characteristics of the non-agricultural enterprises in the informal sector.

Field Operations Division (FOD) of the organisation conducted the fieldwork for the survey and data was processed and tabulated by the Data Processing Division (DPD) of the NSSO. Coordination and Publication Division (CPD) coordinated the overall survey activity. The Survey Design and Research Division (SDRD) of the NSSO developed the survey design and prepared the report.

I am grateful to the Chairman and other members of the Governing Council Of NSSO, heads of divisions of NSSO and their colleagues for the contribution made in preparing this report.

Comments and suggestions for improvement will be most welcome.

18.	Percentage of enterprises facing no specific problem in operation	28.5	30.9	29.5

Enterprise means non-agricultural enterprise in the informal sector belonging to NIC-1998 (see Annex-I) tabulation categories 'D' to 'O' (except tabulation categories 'E' and 'L'). The term 'enterprises' mentioned at sl, no, 14-18 above, represents own account enterprises and establishments collectively.

Section One

Introduction, Concepts and Definitions

1.0 **Introduction** National Sample Survey Organisation (NSSO) conducted an integrated survey of households and enterprises in its 55th round during July 1999 to June 2000. The subjects covered were household consumer expenditure, employment-unemployment and non-agricultural enterprises in the informal sector. The non-agricultural enterprises engaged in the activities of manufacturing, construction, trading and repair services, hotels and restaurants, transport storage and communications, financial intermediation, real estate, renting and business activities, education, health and social work, other community, social and personal service activities (excluding domestic services) were covered in this survey. Information on characteristics of the enterprises, fixed assets, employment, expenses and receipts, value added, employment etc. was collected from the enterprises surveyed. Alternatively, information on workers in the non-agricultural sector was also collected from the households selected for the employment-unemployment survey. This report mainly presents results from the information collected from the non-agricultural enterprises in the informal sector. However, comparable estimated number of workers from the household survey is also presented.

In the following part of this section, various concepts and definitions used in this report and relevant to the informal sector are presented for better understanding and appreciation of the results given in the report.

1.1 **Concept of informal sector:** The term 'informal sector' has been debated much during the last decade for want of a universally acceptable definition. Various issues relating to the concept and definition of the informal sector were discussed in the Fifteenth International Conference of Labour Statisticians held in January 1993 (ICLS - 1993) at Geneva and a resolution (Resolution-II) concerning statistics of employment in the informal sector was adopted at the end of the conference. Later, the System of National Accounts (1993) recommended by United Nations also endorsed this resolution with regard to the concept of informal sector. The concept and definition of the informal sector as per the resolution adopted at the Fifteenth International Conference of Labour Statisticians (ICLS - 1993) is briefly presented below in paragraphs 1.1.1 to 1.1.3.

1.1.1 (a) Informal sector may be broadly characterized as consisting of units engaged in the production of goods or services with the primary objective of generating employment and incomes to the persons concerned. These units typically operate at low level of organisation, with little or no division between labour and capital as factors of production and on a small scale. Labour relations, where they exist, are based mostly on casual employment, kinship, or personal or social relations rather than contractual arrangements with formal guarantees.

(b) The production units in informal sector have characteristic features of household enterprises (see para 1.1.3). The owners of these production units have to raise the necessary finance at their own risk and are personally liable, without limit, for any debts or obligation incurred in the production process. Expenditure for production is often indistinguishable from household expenditure. The capital goods such as building or vehicles may be used indistinguishably for the business and household purpose. The fixed and other assets used do not belong to the production units as such but to their owners.

(c) Activities performed by production units of the informal sector are not necessarily performed with the deliberate intention of evading the payment of taxes or social security contributions, or infringing labour or other legislations or administrative provisions. Accordingly, the concept of informal sector activities should be distinguished from the concept of activities of the hidden or underground economy.

1.1.2 Definition of informal sector: (a) For statistical purpose, the informal sector is regarded as a group of production units, which form part of the household sector as household enterprises or equivalently, unincorporated enterprises owned by households.

(b) Within the household sector, the informal sector comprises of '*informal own account enterprises*' and the '*enterprises of informal employers*'.

(c) The informal sector is defined irrespective of the kind of work place where the productive activities are carried out, the extent of fixed capital assets used, the duration of the operation of enterprise (perennial, seasonal or casual), and its operation as a main or secondary activity of the owner.

1.1.3 According to the United Nations System of National Accounts (Rev. 4), *household enterprises* (or equivalently unincorporated enterprises owned by households) are units engaged in the production of goods or services, which are not constituted as separate legal entities independently of the households or household members that own them, and for which no complete sets of accounts are available which would permit a clear distinction of the production activities of the enterprises from the other activities of their owners. The household enterprises include unincorporated enterprises owned and operated by individual household members or by two or more members of the same household as well as unincorporated partnerships formed by members of different households.

1.2 Informal sector in the Indian context: (a) The expert group, constituted by Department of Statistics, Government of India, for defining the informal sector in its meeting held on November 5, 1998 felt that 'Informal Own Account Enterprises' and 'Enterprises of the Informal Employers' as mentioned in the resolution adopted at the Fifteenth International Conference of Labour Statisticians (ICLS-1993) are conceptually close to that defined in the Indian Statistical System', i.e., 'Own Account Enterprises' and 'Establishments' with at least one hired worker. This definition which is enterprise based provides a good coverage of enterprises to work out the value added by industry groups required for the National Accounts Statistics. The group also felt that the work force in the Informal Sector could be better measured through the household surveys by taking into account the principal and subsidiary activities of each member of the household. In India, the term 'informal sector' has not been used in the official statistics or in the National Accounts Statistics (NAS). The terms used

in the Indian NAS are '**organised**' and '**unorganised**' sectors. The *organised sector* comprises of enterprises for which the statistics are available regularly from the budget documents or reports, annual reports in the case of Public Sector and through Annual Survey of Industries in case of registered manufacturing. On the other hand, the *unorganised sector* refers to those enterprises whose activities or collection of data is not regulated under any legal provision and / or those which do not maintain any regular accounts. Non-availability of regular information has been the main criteria for treating the sector as unorganised. This definition helps to demarcate organised from the unorganised. For example, units not registered under the Factories Act 1948 constitute unorganised component of manufacturing on account of activity not regulated under any Act. In case of the sectors like trade, transport, hotels & restaurants, storage and warehousing, and services, all non-public sector units constitute the unorganised sector. However, the enterprises covered under Annual Survey of Industries (ASI) do not fall under the purview of unorganised sector survey.

(b) The National Sample Survey Organisation conducted the first ever nation-wide survey on informal sector non-agricultural enterprises during 55th round (July 1999 - June 2000). Information on workers including those working in the proprietary and partnership non-agricultural enterprises was also collected for each member of the household during employment-unemployment survey. In this survey, all unincorporated proprietary and partnership enterprises were defined as **informal sector** enterprises. This definition differs from the concept of unorganised sector used in National Accounts Statistics. In the unorganised sector, in addition to the unincorporated proprietary or partnership enterprises, enterprises run by cooperative societies, trusts, private and public limited companies (Non ASI) are also covered. The informal sector can therefore be considered as a subset of the unorganised sector.

1.3 Other concepts and definitions: In this report comparative figures on employment in the informal sector as obtained from the enterprise survey approach and the household survey approach are given. The concepts relevant for the two approaches are presented here separately.

A: Enterprise survey approach

1.3.1 Enterprise: An enterprise is an undertaking which is engaged in the production and / or distribution of some goods and / or services meant mainly for the purpose of sale, whether fully or partly. An enterprise may be owned and operated by a single household or by several households jointly, or by an institutional body.

1.3.2 Own account enterprise (OAE): An own account enterprise is an undertaking run by household labour, usually without any hired worker employed on a 'fairly regular basis'. 'Fairly regular basis' means the major part of the period of operation(s) of the enterprise during the last 365 days.

1.3.3 Establishment: Those enterprises, which have got at least one hired worker on a 'fairly regular basis' are called establishments.

1.3.4 Proprietary enterprises: Proprietary enterprises are those where an individual is the sole owner of the enterprise.

1.3.5 Partnership Enterprises: Partnership is defined as the 'relation between persons who have agreed to share the profits of a business carried on by all or any one of them acting for all'. Partners may be from the same household or they may be from different households.

1.3.6 Seasonal enterprise: Seasonal enterprises are those, which are usually run in a particular season or fixed months of a year.

1.3.7 Non-agricultural enterprise: All enterprises covered under Tabulation Categories 'A' and 'B' of the National Industrial Classification, NIC-1998 (see Annex-I), are "agricultural enterprises" while the others covered under Tabulation Categories 'C' to 'Q' are "non-agricultural enterprises". However, in the 55th round survey, the enterprises falling under tabulation categories D to O (except E and L) have only been covered. Therefore, the non-agricultural enterprises belonging to mining & quarrying (Tabulation category C), electricity, gas and water (Tabulation category E), public administration and defence, compulsory social security (Tabulation category L), private households with employed persons (Tabulation category P), and extra territorial organisation and bodies (Tabulation category Q), have not been covered in this survey.

Extract of NIC 1998 giving activities covered under different tabulation categories (A-Q) is given at **Annex-I**. Detailed activities, coverage and their definition used in this survey are given in **Annex-II**.

1.3.8 Worker: A worker is defined as one who participates either full time or part time in the activity of the enterprise. The worker may serve the enterprise in any capacity - primary or supervisory. He/she may or may not receive wages/ salaries in return for his/ her work incidental to or connected with the entrepreneurial activity.

1.3.9 Working owner. In the case of proprietary enterprises, the owner himself / herself works / supervises the work in the enterprise and is considered as working owner. In fact, in most of the own-account enterprises the owner himself / herself manages all activities of the enterprise without the help of anybody else (on a 'fairly regular basis'). In the case of partnership enterprises, if only one partner or some of the partners or all the partners work in the enterprise on a fairly regular basis then they are treated as working owners.

1.3.10 Hired worker: A hired worker is a person employed directly or through any agency on payment of regular wage/ salary in cash or kind. Apprentices, paid or unpaid, are treated as hired workers. Paid household workers, servants and resident workers of the enterprise are also considered as hired workers.

1.3.11 Other worker/ helper: This includes all persons belonging to the household of the proprietor or households of the partners who are working in or for the enterprise without regular salary or wages. Persons working as exchange labourer in the enterprise without salary or wages will also be covered in this category. All unpaid household workers/ helpers who are associated with the activities of the enterprise during the reference month are considered against this category.

1.3.12 Mixed activity: There are enterprises, which carry out a number of activities simultaneously. For example, a grocery shop owner may also sell oil from his own *ghani*, a doctor may have a medical shop attached to his dispensary, a restaurant may run an STD booth in its premises, etc. Each such activity is treated as a separate enterprise if information for them is separately available. If the accounts are not separable then the data pertains to the enterprise as a whole and the enterprise will be classified as having mixed activities and the activities of such enterprises are a mixture of NIC's. The appropriate NIC in such cases is determined on the basis of **major** activity. Major activity refers to the activity, which yields maximum income / turnover / employment. The above criteria are applied in the given order, i.e. income first, then turnover and then employment, to determine the major activity. The activities may be mixed at any level of NIC, but for the present survey it is restricted to 2-digit level of NIC-98 in general. However, activities with NIC code 551(hotels), 552 (restaurants), 6302 (storage and warehousing), mixed with any other activity at same or higher level of NIC, have been considered as mixed activity even if the activities at 2 digit level of NIC are same.

1.3.13 Reference Period: *Last month* was used as the reference period to collect most of the data on enterprises. Various receipts and expenses as well as employment, emoluments, rent, interest and net surplus for the enterprises was collected for the last month only. *Last month refers to the last 30 days (preceding the date of survey) for perennial and casual enterprises irrespective of the number of days of operation. For seasonal enterprises also, last month refers to the last 30 days (preceding the date of survey), if they have worked continuously for the last 30 days or more (including scheduled holidays) in the current season. Only for seasonal enterprises, which have worked for less than 30 days in the current season, last month refers to an average month in the last working season. If some enterprise is unable to give information for the last 30 days and is able to give information for the last calendar month, figures for the same are taken.* For some of the items like value of fixed assets, amount of loan outstanding, etc., the reference period is 'as on the date of survey'. For some other items like net additions to fixed assets, number of months operated, number of other economic activities taken up etc., the reference period is the 'last 365 days preceding the date of survey'.

1.3.14 Fixed Assets: Fixed assets are assets held for the purpose of producing or providing goods and / or services such as land, building, plant and machinery, transport equipments, tools and other assets (new or used) that have a normal economic life of more than one year from the date of acquisition through out-right purchase / hire purchase/ loans / mortgage / construction regardless of their use. The value of assets, whether fully paid or not, owned by the enterprise is determined on the basis of present market value. Such assets are not held for resale in the normal course of activities of the enterprise.

1.3.14.1 Land and Building: Land will mean the land on which the enterprise is accommodated together with the surrounding area, which is used for the enterprise. In case a portion of the land belonging to the residence of the household is utilised for the enterprise, only that portion of the land is considered as fixed asset for the enterprise. Land owned includes land owned with permanent heritable possession with or without right to transfer the title. Land held on long-term lease, say, for 30 years or more is also treated as land owned. **Building** is the structure that houses the activities of the

enterprise. This will also include other structures like shed, house and also building under construction as well as parts of a house or structure and conveniences (like passage, wall, water tank, sewerage and tube-well) where activities of the enterprise are carried out.

1.3.14.2 Plant & Machinery: Plant is generally the name given to an assembly of machinery / equipment / devices installed for the operation of entrepreneurial activities. Machinery means an implement or mechanical device used in the entrepreneurial activities. These are assets of durable nature and can be easily identified.

1.3.14.3 Transport equipment: All vehicles, whether power driven or man / animal driven, used for transporting persons, goods or materials for the enterprise. Animals, if used for drawing vehicles or carrying loads, will be included. If the equipment is used both for domestic and for enterprise purposes, the criterion to be followed is major time disposition of the equipment.

1.3.14.4 Tools and Other Fixed Assets: Small loose implements, generally held in hand for operation and having normal life of more than one year, are considered as tools. Other fixed assets include other durable equipment like furniture & fixtures, laboratory equipment and office equipment, etc. Livestock used in the enterprise engaged in extraction of oil from oilseeds will be included here.

1.3.15 Factor income of the enterprise: The total income generated by any enterprise is distributed into four factors of production. **Interest** goes to the investors, **rent** goes to the owners of land and building, **emolument** goes to the workers and the remaining income is retained by the entrepreneur as net surplus.

1.3.15.1 Net surplus (including home consumption): Net surplus of an enterprise is the amount which the owner / partner(s) gets out of the entrepreneurial activity after making payments to the workers (individual or as group benefits), rent on land and building and interest on outstanding loan.

B: Concepts and definitions used in household survey approach

1.4 Household: A group of persons who normally live together and take food from a common kitchen constitute a household. The adverb “normally” means that temporary visitors are excluded but temporary stay-aways are included. Thus a child residing in a hostel for studies is excluded from the household of his/her parents, but a resident employee or a resident domestic servant or paying guest (but not just a tenant in the house) is included in the employer/host’s household. “Living together” is given more importance than “sharing food from a common kitchen” in drawing the boundaries of a household in case the two criteria are in conflict. However, in the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to space shortage, the household formed by such a person’s family members is taken to include the person also. Each inmate of a hotel, mess, boarding-lodging house, hostel, etc., is considered to be a single-member household except that a family living in a hotel (say) is considered one household only. The same principle is applicable for the residential staff of such establishments.

1.5 Economic activity: Any activity resulting in production of goods and services that add value to national product is considered as an economic activity. Such activities include production of all goods and services for market, i.e. production for pay or profit, and, the production of primary commodities for own consumption and own account production of fixed assets, among the non-market activities. As in earlier rounds, certain activities like prostitution, begging, smuggling etc., which though fetch earnings, are, by convention, not considered as economic activities.

1.6 Activity status: It is the activity situation in which a person is found during a reference period with regard to the person's participation in economic and non-economic activities. According to this, a person could be in one or a combination of the following three broad activity statuses during a reference period:

- (i) working or being engaged in economic activity (work) as defined above,
- (ii) being not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' if the 'work' is available and
- (iii) being not engaged in any economic activity (work) and also neither seeking nor available for 'work'.

Broad activity statuses mentioned in (i) & (ii) above are associated with 'being in labour force' and the last with 'not being in the labour force'. Within the labour force, broad activity status (i) and (ii) are associated with 'employment' and 'unemployment', respectively.

1.6.1 Categories of activity status: Identification of each individual into a unique situation could pose a problem when more than one of the three broad activity statuses listed above are concurrently obtained for a person. In such an eventuality, the identification uniquely under any one of the three broad activity statuses has been done by adopting *either the major time or priority criterion*. The former is used for classification of persons according to the 'usual activity status' approach and the latter for classification of persons according to the 'current activity status' approach. Each of the three broad activity statuses are further sub-divided into several detailed activity categories. If a person categorised as engaged in economic/non-economic activity by adopting one of the two criteria mentioned above is found to be pursuing more than one economic/non-economic activity during the reference period, the appropriate detailed activity status code relates to the activity in which relatively more time has been spent. The detailed activity categories under each of the three broad activity statuses used in the survey along with the codes assigned to them (in brackets) are stated below:

- (i) situation of working or being engaged in economic activities (employed):
 - (a) worked in household enterprise (self-employed) as own account worker (11);

- (b) worked in household enterprise (self-employed) as employer (12);
 - (c) worked as helper in household enterprises (unpaid family worker) (21);
 - (d) worked as regular salaried/wage employee (31);
 - (e) worked as casual wage labour (i) in public works (41), (ii) in other types of work (51);
 - (f) had work in household enterprise but did not work due to: (i) sickness (61), (ii) other reasons (62); and
 - (g) had regular salaried/wage employment but did not work due to: (i) sickness (71), (ii) other reasons (72);
- (ii) situation of being not engaged in work but seeking or available for work (unemployed):
- (a) sought work (81) and
 - (b) did not seek but was available for work (82)
- (iii) situation of being not available for work (not in labour force):
- (a) attended educational institutions (91);
 - (b) attended domestic duties only (92);
 - (c) attended domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle-feed etc.) sewing, tailoring, weaving etc. for household use (93);
 - (d) rentiers, pensioners, remittance recipient, etc. (94);
 - (e) not able to work due to disability (95);
 - (f) beggars, prostitutes (96);
 - (g) others (97) and
 - (h) did not work due to sickness (for casual workers only) (98).

1.7 Workers (or employed): Persons who are engaged in any economic activity or who, despite their attachment to economic activity, abstain from work for reason of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work, constitute workers. Unpaid helpers who assist in the operation of an economic activity in the household farm or non-farm activities are also considered as workers. All the workers are assigned one of the detailed activity statuses under the broad activity category 'working' or 'being engaged in economic activity' (or employed).

1.8 Seeking or available for work (or unemployed): Persons, who could not work owing to lack of work, but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing conditions of work and remuneration, are considered as those 'seeking or available for work' (or unemployed).

1.9 Self-employed: Persons who operate their own farm or non-farm enterprises or are engaged independently in a profession or trade on own-account or with one or a few partners are deemed to be self-employed in household enterprises. The essential feature of the self-employed is that they have

autonomy (i.e., how, where and when to produce) and *economic independence* (i.e., market, scale of operation and money) for carrying out their operation. The fee or remuneration received by them comprises two parts - share of their labour and profit of the enterprise. In other words, their remuneration is determined wholly or mainly by sales or profits of the goods or services which are produced.

1.9.1 Categories of self-employed persons : Self-employed persons are categorised as follows:

- (i) **Own-Account workers :** Those self-employed persons who operate their enterprises on their own account or with one or a few partners and who, during the reference period, by and large, run their enterprise without hiring any labour are categorised as Own Account Workers. They could, however, have unpaid helpers to assist them in the activity of the enterprise.
- (ii) **Employers** are those self-employed persons who work on their own account or with one or a few partners and, who, by and large, run their enterprise by hiring labour, and
- (iii) **Helpers in household enterprise** are those self-employed persons (mostly family members) who are engaged in their household enterprises, working full or part time and do not receive any regular salary or wages in return for the work performed. They do not run the household enterprise on their own but assist the related person living in the same household in running the household enterprise.

1.10 Regular salaried/wage employee: These are persons who work in others' farm or non-farm enterprises (both household and non-household) and, in return, receive salary or wages on a regular basis (i.e. not on the basis of daily or periodic renewal of work contract). This category includes not only persons getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part-time.

1.11 Casual wage labour: A person who is casually engaged in others' farm or non-farm enterprises (both household and non-household) and, in return, receive wages according to the terms of the daily or periodic work contract, is a casual wage labour.

1.12 Usual activity status: The usual activity status relates to the activity status of a person during the reference period of 365 days preceding the date of survey. The activity status on which a person spends relatively longer time (i.e. major time criterion) during the 365 days preceding the date of survey is considered as the *principal usual activity status* of the person. To decide the principal usual activity of a person, he/she is first categorised as belonging to the labour force or not during the reference period **on the basis of major time criterion**. Persons thus adjudged as not belonging to the labour force are assigned the broad activity status 'neither working nor available for work'. For persons belonging to the labour force, the broad activity status of either 'working' or 'not working but seeking and/or available for work' is ascertained based on the same criterion viz. relatively longer time spent in accordance with either of the two broad statuses within the labour force during the 365 days

preceding the date of survey. Within the broad activity status so determined, the detailed activity status of a person pursuing more than one such activity is determined once again on the basis of the relatively longer time spent on such activities. In terms of activity codes (stated earlier in para 1.6.1), codes 11-51 are applicable for persons classified as workers, while code 81 is assigned to people either seeking or available for work (unemployed persons) and codes 91-97 for those who are out of labour force.

1.13 Subsidiary economic activity status : A person whose principal usual status is determined on the basis of the major time criterion may be pursuing some economic activity **for a relatively shorter time** during the reference period of 365 days preceding the date of survey. The status in which such economic activity is pursued is the subsidiary economic activity status of that person. Thus, activity status codes 11-51 only are applicable for persons reporting some subsidiary economic activity. It may be noted that engagement in work in subsidiary capacity could arise out of the following two situations, viz.

- (i) a person could be engaged for a relatively longer period during the last 365 days in one economic/non-economic activity and for a relatively shorter period in another economic activity, and
- (ii) a person could be pursuing one economic activity/ non-economic activity almost throughout the year in the principal usual activity status and simultaneously pursue another economic activity for a relatively shorter period in a subsidiary capacity.

1.15 Number of subsidiary economic activities pursued during last 365 days: For persons reporting some subsidiary activity, the number of subsidiary activities pursued by him/her during last 365 days were ascertained and recorded. However, details of a maximum of two such subsidiary economic activities were recorded. The activities having different work status were considered as different activities. Activities within the same work status but with different industry and/or occupation are also considered as different activities. If the person is engaged in two or more subsidiary economic activities, the details of the subsidiary economic activity pursued for the maximum time period among all the subsidiary economic activities, or in other words, the major subsidiary economic activity is deemed as 'subsidiary status number I' and the next major one as 'subsidiary status number II'.

Section Two

Coverage, Sample Design and Estimation Procedure

1. General

1.1 **Subject coverage:** The 55th round of NSS conducted during July 1999 to June 2000 was an integrated survey on household consumer expenditure, employment-unemployment and informal sector non-agricultural enterprises.

1.2 **Geographical coverage:** The survey covered the whole of the Indian Union except (i) Ladakh and Kargil districts of Jammu & Kashmir, (ii) villages situated beyond 5 Kms. of bus route in the state of Nagaland and (iii) inaccessible villages of Andaman and Nicobar. As in the previous rounds, all the uninhabited villages of the country, according to 1991 census, are left out of the coverage of NSS 55th round.

1.3 **Sub round:** The fieldwork of the survey was carried out during 1st July 1999 to 30th June 2000. The entire survey period is divided into four sub-rounds of three months' duration each as indicated below and equal number of sample villages and blocks were allocated to each sub-round. Each FSU is surveyed during the sub-round period to which it is allocated. Within a particular sub-round, the fieldwork is spread out uniformly over different months to the extent possible.

- Sub-round 1: July-September 1999
- Sub-round 2: October-December 1999
- Sub-round 3: January-March 2000
- Sub-round 4: April-June 2000

2. Sample Design

2.1 **General:** A stratified sampling design has been adopted for selection of the sample first-stage units (FSUs). The FSUs are villages (panchayat wards for Kerala) for rural areas and Urban Frame Survey (UFS) blocks for urban areas. The Ultimate stage units (USUs) are households for canvassing consumer expenditure (schedule 1.0) & employment-unemployment schedules (schedule 10/10.1) and enterprises for canvassing informal sector enterprise schedule (schedule 2.0). USUs are selected by the method of circular systematic sampling from the corresponding frame in the FSU. Large FSUs are subdivided into hamlet groups (rural) / sub-blocks (urban) that are grouped into two segments, and USUs are selected independently from each of these segments.

2.2 **Sampling Frame:** List of villages (panchayat wards for Kerala) as per 1991 Census and latest lists of UFS blocks are respectively used for selection of rural and urban sample FSUs. For selection of sample villages from the State of Jammu & Kashmir, list of villages as per 1981 Census has been used as the sampling frame. As already mentioned that all the uninhabited villages of the country as per 1991

Census, interior villages of Nagaland situated beyond 5 kms. of a bus route and inaccessible villages of Andaman & Nicobar Islands are left out of the survey coverage of the NSS 55th round.

2.3 Sample size (FSUs): A total number of 10,384 FSUs were selected for survey in the *central sample* at all-India level (rural & urban combined) in the 55th round. Sample size for the whole round for each State/UT and Sector (i.e. rural/ urban) is allocated equally among the four sub-rounds. Sample FSUs for each sub-round are selected afresh in the form of two independent sub-samples. Of the 10384 FSUs selected for the survey, 10170 were actually surveyed. This comprises 6046 villages and 4124 urban blocks. State/UT wise distribution of FSUs allotted and surveyed is given Table 1 of Annex-III.

2.4 Stratification

2.4.1 Rural: Two special strata are formed at the **State/ UT level**, viz.

Stratum 1: all FSUs with population between 1 to 100, and

Stratum 2: FSUs with population more than 15,000.

[Note: The above two strata are spread across a given state and are not confined to any particular administrative division within the state.]

These strata of either type are formed if at least 50 such FSUs are there in the respective frames. Otherwise, they are merged with the general strata.

While forming general strata (consisting of FSUs other than those covered under strata 1 & 2), efforts were made to treat each district as a separate stratum. If limitation of sample size does not allow forming so many strata, smaller districts within a particular NSS region are merged to form a stratum. Each district with rural population of 2 millions or more as per 1991 Census (1.8 millions or more as per 1981 Census in case of Jammu & Kashmir) is split into a number of strata.

2.4.2 Urban: Strata are formed within **NSS Regions** as follows:

Stratum number	Composition of strata by considering population of various towns as per the 1991 Census
1, 3, 5 *	'hospital area' (HA) / 'industrial area' (IA) / 'bazaar area' (BA) blocks taken together of each single city with a population of 10 lakhs or more (there could be a maximum of 3 such cities within an NSS Region)
2, 4, 6 *	Other blocks of each single city with a population of 10 lakhs or more
7	HA or IA or BA blocks of all towns with population greater than or equal to 50,000 but less than 10 lakhs
8	Other blocks of all towns with population greater than or equal to 50,000 but less than 10 lakhs
9	HA or IA or BA blocks of all towns with population less than 50,000
10	Other blocks of all towns with population less than 50,000

* Stratum numbers 3, 4, 5 & 6 remain void if there is only one city in an NSS region with a population of 10 lakhs or more.

If limitation of sample size does not allow forming so many strata, all blocks of stratum 7 are merged with those of stratum 8 and all blocks of stratum 9 are merged with those of stratum 10.

2.5 Allocation of FSUs: State/ UT level rural sample size is allocated among the rural strata in proportion to population. State/ UT level urban sample size is first allocated among the three classes of towns (i.e. more than 10 lakh, 50000 to less than 10 lakhs and less than 50,000) in proportion to population. Then sample allocation for each of the three classes of towns, within an NSS region, is further allocated between two strata types consisting of - (i) HA/ IA/ BA blocks and (ii) the rest in proportion to total number of FSUs in the respective frames with double weightage given to the first category of blocks. Stratum level allocations for both rural and urban areas of a sub-round are made in even numbers in order to facilitate selection of FSUs in the form of 2 independent sub-samples. Sub-sample numbers are 1 & 2 for sub-round 1; 3 & 4 for sub-round 2; 5 & 6 for sub-round 3 and 7 & 8 for sub-round 4.

2.6 Selection of FSUs: For each sub-round, sample FSUs from each stratum are selected in the form of 2 independent sub-samples by following circular systematic sampling with (a) probability proportional to population for all rural strata other than stratum 1, and (b) equal probability for rural stratum 1 as well as all urban strata.

2.7 Formation of hamlet-group (hg's) in large villages and sub-block (sb's) in large urban blocks: Depending upon the values of approximate present population (P) and approximate total number of non-agricultural enterprises (E), decision is taken to divide the FSU into a fixed number of hamlet-groups (hg's - the term applicable for rural samples) / sub-blocks (sb's - the term applicable for urban samples) as per the rules given below:

Population (P)	No. of hg's/ sb's formed in the FSU as per population criterion	Number of enterprises (E)	no. of hg's/ sb's formed in the FSU as per enterprise criterion
(1)	(2)	(3)	(4)
Less than 1200	1 @	Less than 100	1 @
1200 – 1999	5	100 – 249	5
2000 – 2399	6	250 – 299	6
2400 – 2799	7	300 – 349	7
2800 – 3199	8	350 – 399	8
(and so on)		(and so on)	

@ no. of hg's/ sb's = '1' means the whole FSU is considered for listing.

[For rural areas of Himachal Pradesh, Sikkim and Poonch, Rajouri, Udhampur and Doda districts of Jammu & Kashmir, number of hg's formed in the village as per population criterion is : 1 for $P < 600$, 5 for $P = 600$ to 999, 6 for $P = 1000$ to 1199, 7 for $P = 1200$ to 1399, 8 for $P = 1400$ to 1599, and so on. (Procedure remains unchanged as per enterprise criterion.)]

The number (D) of hamlet-groups (hg)/ sub-blocks (sb) formed in the FSU is such that the higher of the two values as per population and enterprise criteria is chosen. If value of P is less than 1200 (600 for certain hilly areas specified above) as well as value of E is less than 100 for an FSU, hg/ sb formation is not resorted to and the whole FSU is considered for listing. In case hg's/ sb's are formed in the sample FSU, the same is done by more or less equalizing population.

2.8 Formation of Segments within FSU: The hg/ sb having maximum concentration of non-agricultural enterprises is selected with certainty for listing of households/ enterprises. This hg/ sb is referred to as segment 1. From the remaining (D-1) hg's/ sb's of the FSU, two more hg's/ sb's are selected circularly systematically and these two selected hg's/ sb's together are referred to as segment 2 for a combined listing of households/ enterprises. Thus listing of households/ enterprises is done only in segments 1 and 2 of the FSU. The FSU not requiring hg/ sb formation is treated as segment 1 for the purpose of data collection and estimation.

2.9 Sampling frame of households/ enterprises: Having determined the area(s) considered for listing, all the households (including those found temporarily locked) and non-agricultural enterprises are listed in the next step. Although all non-agricultural enterprises are listed, only the 'informal non-agricultural enterprises' (other than those covered under ASI and mining & quarrying and electricity, gas & water supply) which operated at least 30 days (15 days for seasonal enterprises) during the last year **qualify** for survey. Such enterprises are referred to as '**eligible enterprises**'. Listing of households as well as eligible enterprises for the purpose of sample selection is independent for segments 1 & 2.

2.10 Stratification of households: All the households listed in a segment (both rural & urban) are stratified into two second stage strata, viz. '**affluent households**' (forming second stage stratum 1) and **the rest** (forming second stage stratum 2). In **rural** sector, a household is classified as 'affluent' if the household owns certain items like motor car/ jeep, colour TV, telephone, etc. or owns land / livestock in excess of certain limits. In **urban** sector, the households having MPCE (monthly per capita consumer expenditure) greater than certain limit for a given town/city are treated as 'affluent' households for the present survey and are included in the frame of second stage stratum 1, and rest of the urban households are included in the frame of second stage stratum 2.

2.11 Stratification of enterprises: All the eligible informal non-agricultural enterprises (other than mining & quarrying and electricity, gas & water supply which operated at least 30 days (15 days for seasonal enterprises) during the last year in a segment (both rural & urban) are stratified into 12 strata by jointly considering their broad industry group and enterprise class. Eligible enterprises could belong to any of the 6 broad industry groups, viz. manufacturing - 1, construction - 2, trade & repair services - 3, hotels & restaurants - 4, transport, storage & communication - 5 and other service sector - 6. The enterprises are classified into two enterprise classes. Enterprise class of an enterprise is '1' for Own Account Enterprises. Enterprise class for Establishments is '2'. Thus there are 12 possible strata of various combinations of broad industry groups and enterprise classes.

2.12 Number of households/ enterprises selected for survey: The number of households/ enterprises selected for survey from each FSU in general is given below:-

segment	Household allotment * (sch. 1.0/10 each)			enterprise allotment (sch. 2.0)												
	SSS			broad industry group												
	1	2	total	1	2	3	4	5	6	total						
			enterprise class	enterprise class		enterprise class		enterprise class		enterprise class		enterprise class				
		1	2	1	2	1	2	1	2	1	2	1	2			
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)	(15)	(16)	(17)
FSU with hg/ sb formation:																
1	1	3	4	1	1	1	1	1	1	1	1	1	1	1	1	12
2	1	7	8	1	1	1	1	1	1	1	1	1	1	1	1	12
FSU with no hg/ sb formation:																
1	2	10	12	2	2	2	2	2	2	2	2	2	2	2	2	24

(‘SSS’ means 2nd stage stratum and ‘ent. class’ means enterprise class)

* The FSUs of sub-sample 1, sub-sample 3, and sub-sample 5 were revisited during sub-round 2, sub-round 3 and sub-round 4 respectively. In the FSUs of these re-visit sub-samples, all the households where schedule 10 was previously canvassed (i.e. during the previous sub-round) were revisited for canvassing schedule 10.1. However, in case such a household could not be surveyed during revisit, it was substituted and schedule 10 was canvassed in the substituted household. Further, schedule 10 was also canvassed for those households which were casualty during visit 1 but could be surveyed during the revisit. From among the newly formed households found during the revisit of a FSU (which constituted 2nd stage strata 9), a sample of 2 additional households (one each from the 2 segments) was canvassed (schedule 10).

3. Estimation procedure

3.1 General procedure of selection of households/ enterprises: Sample households/ enterprises are selected from the respective frames by circular systematic sampling with equal probability. For the purpose of systematic sampling, households in the frame of 2nd stage stratum 2 are arranged by means

of livelihood x land possessed classes for rural samples and by means of livelihood x MPCE classes for urban samples. Enterprises under each stratum (i.e. segment x broad industry group x enterprise class) are arranged in the ascending order of NIC 2 digit codes (3-digit codes for hotels & restaurants) before sampling.

3.2 Approach: This estimation procedure fulfils the twin objectives of providing (a) estimates on quarterly/ sub-round basis, and (b) the estimate of error from the sub-sample replicates. Tabulated estimate for a quarter/ sub-round is obtained by combining the estimates of the corresponding sub-sample replicates. Similarly, a tabulated estimate of the Round is obtained by combining the four sub-round-wise/ quarterly estimates.

3.3 The following notations are being used in this section:

- a : subscript for the a-th stratum
- r : subscript for the r-th sub-sample replicate (r=1,2,...,8)
- q : subscript for the q-th sub-round / quarter (q=1,2,3 & 4)
- f : subscript for the f-th sampled village/ block as First Stage Unit (FSU)
- v : subscript for the v-th visit of sampled village/ block (v=1 & 2)
- s : subscript for the s-th segment of sampled village/ block (s= 1 & 2)
- c : subscript for the c-th 2nd stage stratum of households in the sampled village / block (c= 1,2); for new hhs during revisit, c= 9.
- g : subscript for the g-th broad group of industry (g=1,2,3,...,6)
- t : subscript for the t-th enterprise class (t= 1 & 2)
- j : subscript for the j-th sampled household
- k : subscript for the k-th sampled enterprise
- p : subscript for pooled estimate
- z : size used for selection of an FSU from the sampling frame
- Z : total of sizes in the sampling frame for the stratum
- [Note: For urban sector, z=1 and Z=N which is the total number of UFS blocks (FSU's) in the frame.]
- n : number of sampled FSU surveyed within a stratum and a sub-sample replicate (including zero cases but excluding casualty and not reported cases) and used for tabulation
- L : number of sub-sample replicates surveyed and used for tabulation
- D : number of hamlet-groups/ sub-blocks formed in rural/ urban sampled FSU
- H : total number of households listed in the appropriate frame
- h : number of sampled households surveyed and used for tabulation from the frame
- E : total number of enterprises listed in the appropriate frame
- e : number of sampled enterprises surveyed and used for tabulation from the frame
- y, x : value of characteristic y, x obtained in the sample
- \hat{Y} , \hat{X} : estimated value of the total of characteristic y, x respectively.

3.4 Estimates of aggregates: In the formulae given in this section, \hat{Y} is the estimate of aggregate of any characteristic y for a given stratum (**a**), and for a particular sub-round (**q**) and sub-sample replicate

(r). These formulae [except (5) and (6)] are provided for the general case of FSU's having 2 segments 1 & 2. For the FSU's requiring no hg/ sb formation, the formula is identical to that given for segment 1 while the contribution from segment 2 is taken as zero.

3.4.1 Schedule 2.0

For estimating a characteristic of enterprises for a stratum of a sub-sample replicate from the selection frame based on a broad group of industry (g) x enterprise class (t):

Rural

$$\hat{Y}_{gt} = \frac{Z}{n} \sum_{f=1}^n \frac{1}{z_f} \sum_{s=1}^2 B_{fsgt} \sum_{k=1}^{e_{fsgt}} y_{fsgtk} \quad \dots(1)$$

Here $B_{fsgt} = \frac{E_{fsgt}}{e_{fsgt}}$, for segment 1 (s=1) and $B_{fsgt} = \frac{D_f - 1}{2} \times \frac{E_{fsgt}}{e_{fsgt}}$, for segment 2 (s=2).

Urban

$$\hat{Y}_{gt} = \frac{Z}{n} \sum_{f=1}^n \sum_{s=1}^2 B_{fsgt} \sum_{k=1}^{e_{fsgt}} y_{fsgtk} \quad \dots(2)$$

Here $B_{fsgt} = \frac{E_{fsgt}}{e_{fsgt}}$, for segment 1 (s=1) and $B_{fsgt} = \frac{D_f - 1}{2} \times \frac{E_{fsgt}}{e_{fsgt}}$, for segment 2 (s=2).

Note: For tabulating any characteristic from this detailed schedule, $\hat{Y} = \sum_g \sum_t \hat{Y}_{gt}$ is to be used.

3.4.2 Schedule 1.0/ 10/ 10.1

For estimating the total of a characteristic of household from a given 2nd stage stratum (c) in the selection frame:

Rural

$$\hat{Y}_c = \frac{Z}{n} \sum_{f=1}^n \frac{1}{z_f} \sum_{s=1}^2 B_{fjsc} \sum_{j=1}^{h_{fsc}} y_{fjscj} \quad \dots(3)$$

Here $B_{fjsc} = \frac{H_{fsc}}{h_{fsc}}$, for segment 1 (s=1) and $B_{fjsc} = \frac{D_f - 1}{2} \times \frac{H_{fsc}}{h_{fsc}}$, for segment 2 (s=2).

Urban

$$\hat{Y}_c = \frac{Z}{n} \sum_{f=1}^n \sum_{s=1}^2 B_{fsc} \sum_{j=1}^{h_{fsc}} y_{fscj} \quad \dots(4)$$

Here $B_{fsc} = \frac{H_{fsc}}{h_{fsc}}$, for segment 1 (s=1) and $B_{fsc} = \frac{D_f - 1}{2} \times \frac{H_{fsc}}{h_{fsc}}$, for segment 2 (s=2).

Note: For tabulating any characteristic from this detailed schedule, $\hat{Y} = \sum_c \hat{Y}_c$ is to be used.

3.4.3 Combined estimate from sub-samples

In the previous section, the estimate \hat{Y} of the total of characteristic y as obtained for a stratum (a), for a particular sub-round (q) and a sub-sample replicate (r), actually represent \hat{Y}_{aqr} . The combined /pooled estimate for a particular stratum and a particular sub-round is computed as the average of sub-sample replicate estimates and is given below:

$$\hat{Y}_{aq} = \frac{1}{L} \sum_{r=1}^L \hat{Y}_{aqr} \quad \dots(5)$$

3.4.4 Estimate of aggregates for a sub-round at State/ UT/ region level

If \hat{Y}_{qr} be the State/ UT/ Region level estimate of the aggregate from the r-th sub-sample replicate and q-th sub-round, and \hat{Y}_{qp} , the combined/ pooled estimate of the aggregate based on the whole sample, for a given sub-round/ quarter q, then:

$$\hat{Y}_{qr} = \sum_a \hat{Y}_{aqr} \quad \dots(6) \quad \text{based on sub-sample replicate group r,}$$

and

$$\hat{Y}_{qp} = \frac{1}{L} \sum_{r=1}^L \hat{Y}_{qr} \quad \dots(7) \quad \text{based on all sub-sample replicates.}$$

3.4.5 Estimates of aggregates for the round (i.e. all the 4 sub-rounds/ quarters together) at State/ UT/ Region level

The estimates of aggregates for the whole round are computed as the simple average of the sub-round estimates derived in previous section, and are given below:

$$\hat{Y}_r = \frac{1}{4} \sum_{q=1}^4 \hat{Y}_{qr} \quad \dots(8) \quad \text{based on sub-sample replicate 1 and 2*,}$$

and

$$\hat{Y}_p = \frac{1}{4} \sum_{q=1}^4 \hat{Y}_{qp} \quad \dots(9) \text{ based on whole sample.}$$

***Note:** In the Round, sub-samples 1, 3, 5 & 7 (in sub-rounds 1 to 4) are combined together to form sub-sample replicate 1 (annual) while sub-samples 2, 4, 6 & 8 (in sub-rounds 1 to 4) combine together to form sub-sample replicate 2 (annual). This is being followed in the remaining sections also.

Stratum level estimate for the Round is obtained similarly.

3.5 Estimates of ratio

If \hat{X} & \hat{Y} be the State/ UT/ Region level aggregate estimate corresponding to variables x and y, then the estimate of ratio is given below:

$$\hat{R}_r = \frac{\hat{Y}_r}{\hat{X}_r} \quad \dots(10) \text{ based on sub-sample group r,}$$

and

$$\hat{R}_p = \frac{\hat{Y}_p}{\hat{X}_p} \quad \dots(11) \text{ based on the whole sample.}$$

(The formulae for \hat{X} are obtained similarly by replacing \hat{Y} by \hat{X} and y by x in the above formulae stated in previous sections.)

Note: Estimates for the sub-round (/quarter) \hat{R}_{qr} and \hat{R}_{qp} may also be obtained by replacing \hat{Y}_r and \hat{Y}_p by \hat{Y}_{qr} and \hat{Y}_{qp} , respectively and \hat{X}_r and \hat{X}_p by \hat{X}_{qr} and \hat{X}_{qp} , respectively.

3.6 Error estimate

The estimated variances of pooled estimates (as computed above) are calculated on the basis of sub-sample replicate estimates of strata over State/ UT/ Region and obtained as follows:

$$\hat{Var}(\hat{Y}_p) = \frac{1}{L(L-1)} \sum_a \sum_{r=1}^L (\hat{Y}_{ar} - \hat{Y}_{ap})^2 \quad \dots(12)$$

$$\hat{MSE}(\hat{R}_p) = \frac{1}{L(L-1)\hat{X}_p^2} \sum_a \sum_{r=1}^L [(\hat{Y}_{ar} - \hat{Y}_{ap})^2 + \hat{R}_p^2 (\hat{X}_{ar} - \hat{X}_{ap})^2 - 2\hat{R}_p(\hat{Y}_{ar} - \hat{Y}_{ap})(\hat{X}_{ar} - \hat{X}_{ap})] \quad \dots(13)$$

Note: Such estimates for the quarter may also be obtained by suitable replacement as stated in 3.5.

4 Treatment for casualty

4.1 Schedule 2.0

i) If $E_{fsgt} > 0$ but $e_{fsgt} = 0$ for a particular frame of enterprises (i.e. for a broad industry group x enterprise class) in a FSU with no hamlet-group/ sub-block formation (i.e. $D_f = 1$), it is a case of casualty and the value of n will be reduced by 1.

ii) If $D_f > 1$ and $E_{fsgt} > 0$ but $e_{fsgt} = 0$ for $s=1$ (say, s') and if it is not a case for the entire FSU, here n will not be reduced by 1 and in this case $[(D_f - 1)/2] \times E_{fsgt}$ will be replaced by $\{ E_{fsgt} + [(D_f - 1)/2] \times E_{fsgt} \}$ in the formula for $s=2$.

iii) If $D_f > 1$ and $E_{fsgt} > 0$ but $e_{fsgt} = 0$ for $s=2$ (say, s') and if it is not a case for the entire FSU, here n will not be reduced by 1 and in this case E_{fsgt} will be replaced by $\{ E_{fsgt} + [(D_f - 1)/2] \times E_{fsgt} \}$ in the formula for $s=1$.

iv) If $E_{fsgt} > 0$ but $e_{fsgt} = 0$ in a particular frame of enterprises (i.e. for a broad industry group x enterprise class) for both the segments ($s = 1$ & 2) in an FSU, it is a case of casualty and the value of n will be reduced by 1.

4.2 Schedule 1.0/ 10/ 10.1

i) If $H_{fsc} > 0$ but $h_{fsc} = 0$ for a particular 2nd stage stratum of households in a FSU with no hamlet-group/ sub-block formation (ie. $D_f = 1$), it is a case of casualty and the value of n will be reduced by 1.

ii) If $D_f > 1$ and $H_{fsc} > 0$ but $h_{fsc} = 0$ for $s=1$ (say, s') and if it is not a case for the entire FSU, here n will not be reduced by 1 and in this case $[(D_f - 1)/2] \times H_{fsc}$ will be replaced by $\{ H_{fsc} + [(D_f - 1)/2] \times H_{fsc} \}$ in the formula for $s=2$.

iii) If $D_f > 1$ and $H_{fsc} > 0$ but $h_{fsc} = 0$ for $s=2$ (say, s') and if it is not a case for the entire FSU, here n will not be reduced by 1 and in this case, H_{fsc} will be replaced by $\{ H_{fsc} + [(D_f - 1)/2] \times H_{fsc} \}$ in the formula for $s=1$.

iv) If $H_{fsc} > 0$ but $h_{fsc} = 0$ for a particular 2nd stage stratum of households in both the segments ($s = 1$ & 2) in an FSU, it is a case of casualty and the value of n will be reduced by 1.

Section Three

Informal Sector in India

3.1 In this section, information on sample and estimated number of enterprises, workers, value added and other characteristics of the enterprises is presented at the State / Union Territory (UT) level. The results are based on the data collected during the NSS 55th round (July 1999-June 2000) from a representative sample of 6046 villages and 4124 urban blocks spread over all the States/UTs of the Indian Union. State/UT wise distribution of sample villages and urban blocks is given in Table 1 of Annex-III. Non-agricultural enterprises carrying out activities relating to tabulation categories 'D' to 'O' (except E and L) were surveyed. Statement 1, given below, shows the activities covered in the survey of non-agricultural enterprises in the Informal Sector along with their tabulation category as per National Industrial Classification (NIC) 1998.

Statement 1: Activities covered in the survey and their tabulation categories

Activity	tabulation category
1. manufacturing	D
2. construction	F
3. trading and repair services	G
4. hotels and restaurants	H
5. transport, storage and communications	I
6. financial intermediation	J
7. real estate, renting and business activities	K
8. education	M
9. health and social work	N
10. other community, social and personal service activities (excluding domestic services)	O

Most of the results in this section are presented for all the above tabulation categories combined. State/UT level tabulation category-wise important tables are given in **Annex-III** for rural, urban and combined (rural + urban). These tables give tabulation category-wise information for Own Account Enterprises (OAEs), Establishments, and also for both (all enterprises). The totals and proportions presented in detailed tables (Annex-III) may vary slightly, in some cases, due to rounding off effect. The expression 'combined for all tabulation categories' means the results are combined for all the tabulation categories mentioned in Statement 1. The term enterprise has been used in general to represent both 'OAEs' and Establishments.

The term 'major states' has been used, at some places, while discussing the results and in graphs their names are mentioned in abbreviated forms. Major states and their name in abbreviated form (in brackets) are; Andhra Pradesh (AP), Assam (ASM), Bihar (BHR), Gujarat (GUJ), Haryana (HAR),

Karnataka (KTK), Kerala (KER), Madhya Pradesh (MP), Maharashtra (MAH), Orissa (ORS), Punjab (PUN), Rajasthan (RAJ), Tamil Nadu (TN), Uttar Pradesh (UP) and West Bengal (WB).

3.2 Number of enterprises surveyed Statement 2 gives State/UT wise information on the number of enterprises surveyed by type of enterprise ('OAEs' or 'Establishments') for rural, urban and combined. Tabulation category-wise number of sample enterprises is given in Table 2 of Annex-III. A total of 197637 enterprises were surveyed all over India. Of them, 114506 (i.e., 58%) were from rural areas and 83131 from urban areas. Out of the total number of sample enterprises, 1.63 lakhs (82%) were OAEs and the rest were Establishments. Of the rural 1.14 lakhs sample enterprises, 89% were OAEs and the rest were Establishments. In the urban areas, 73% of the sample enterprises were OAEs and the rest were Establishments.

Statement 2: number of enterprises surveyed

The purpose of giving the information on number of sample enterprises is to inform the users so that the disaggregated estimates for the State/UT, tabulation category, or enterprise type are used with caution

keeping in view the number of enterprises surveyed at that particular level of disaggregation. In NSS report no. 456 titled 'Non-agricultural enterprises in the informal sector in India – 1999-2000' the number of enterprises surveyed was given as 197649. At the time of preparation of report no. 456, the data on receipts, expenses and the resulting value added from the enterprises were under validation and it was found that data for 12 enterprises was not usable for estimation of value added. Thus the number of sample enterprises given in this report is 197637. There has been a revision in the estimated number of enterprises and workers.

3.3 Estimated number of enterprises: Statement 3 gives the State / UT level estimated number of enterprises by type of enterprises (OAE or establishment) separately for rural, urban and combined. At the all India level, the number of non-agricultural enterprises has been estimated as 444.1 lakhs. Of these, 250.7 lakh (i.e., 56%) enterprises are located in rural areas and 193.4 lakh in the urban areas.

The highest number of enterprises is located in Uttar Pradesh (18%), followed by West Bengal (11%) and Maharashtra (9%). Tabulation-category wise estimated number of enterprises is given in Table 3 of Annex-III. Figure 1 presents the percentage distribution of estimated total number of enterprises by tabulation category at the all India level. A vast majority of enterprises belong to the tabulation categories D (manufacturing) and G (trading and repair services). Together these constitute over 71% of the enterprises. Percentage of enterprises of other tabulation categories is in single digit only.

Figure 1: Percentage distribution of estimated number of enterprises by tabulation category - All India

3.4 Estimated number of workers: Statement 4.1 gives the estimated number of workers by tabulation category and by enterprise type separately for rural, urban and combined. At the all India level, the number of non-agricultural workers has been estimated as 797.8 lakhs. Of these, 398.1 lakh

(i.e., 50%) workers work in enterprises located in rural areas and 399.7 lakh in enterprises located in the urban areas.

Considering rural, urban and combined, the number of workers estimated in 55th round are higher than the number of workers found in the fourth Economic Census -1998. In the Economic Census 1998, 594.8 lakh non-agricultural workers were found as compared to the 55th round estimate of 797.8 lakh workers. The Economic Census-1998 figures exclude the states of West Bengal and Andhra Pradesh. The estimate of 55th round is based on all the States/UTs but includes only the worker belonging to informal sector enterprises in tabulation categories DO (except E and L). Further, the Economic Census figures include all non-agricultural workers in the organised and unorganised sector enterprises.

Statement 4.2 gives the estimated number of workers, State/UT wise and by type of enterprises separately for rural, urban and combined. At the all India level, the total number of non-agricultural workers is estimated as 797.8 lakhs. Of these, 398.1 lakh (i.e., 50%) workers work in enterprises located in rural areas and 399.7 lakh in enterprises located in urban areas. The highest number of workers are in Uttar Pradesh (17%), followed by Maharashtra (10%) and West Bengal (10%). State/UT wise information by type of worker, i.e., working owner, hired worker, other workers, nature

of employment (full time, part-time) etc. is given in Table 6 of Annex-III. State/UT level estimated number of workers by gender and tabulation category is given in Table 4 of Annex-III.

3.5 Comparison of estimated number of workers obtained through enterprise survey and household survey approach: The estimate of the number of workers in the informal sector can be obtained independently through enterprise and household survey approaches. As already mentioned in Section One, during NSS 55th round, information on number of workers was collected from each surveyed (sample) enterprise in schedule 2.0 (Sch. 2.0). On the other hand, information on principal (ps) and subsidiary activity status (ss) was also collected for each member of the surveyed household through employment-unemployment schedule (Sch. 10). Further, if a household member was found to be engaged in any non-agricultural activity then he/she was asked to specify the type of enterprise he /she was working. The enterprise types were:

proprietary (male)	1	public sector	5
proprietary(female)	2	semi-public.....	6
partnership with members from same household	3	others (includes cooperative society, public/private limited company and other units covered under Annual Survey of Industries....	7
partnership with members from different households	4	not known.....	9

The estimated number of workers in informal non-agricultural enterprises as obtained from enterprise survey (Sch. 2.0) and those obtained from household survey (Sch. 10), i.e., workers in proprietary and partnership enterprises corresponding to the tabulation categories covered in informal sector enterprise survey (Sch. 2.0), is given in Statement-5.1.

Statement 5.1: Estimated number of workers from enterprise survey (Sch. 2.0) and household survey (Sch. 10) approach

ps: principal usual activity status. ss1: subsidiary economic activity status (activity 1)

The estimated number of workers from Sch. 10 presented here is based on the *principal usual activity status* (ps) and *subsidiary economic activity status* (activity 1) (ss1) of the persons during the reference period of 365 days preceding the date of survey. The relevant concepts have been

explained in Section One of this report. The tabulation category-wise estimate of the number of workers in the informal sector (Sch. 10) was computed by applying the corresponding proportions on total number of non-agricultural workers. On the other hand, the estimated number of workers from Sch. 2.0 is based on the number of workers usually working on a working day in the sample enterprises during the reference month, i.e., last 30 days preceding the date of survey. In the enterprise survey, a worker is one who participates in the activities of the enterprise on a fairly regular basis during the reference month either on full time or on part time basis. So the casual labourers are not captured in the enterprise survey approach. These workers can best be captured through the household survey approach (Sch. 10). The individuals serving as housemaids, cooks, gardeners, governess, baby sitters, chowkidars, night watchmen etc. were outside the coverage of enterprise survey, although they were included in the (employment-unemployment) household survey (Sch. 10).

It is seen from Statement 5.1 that the estimated number of workers from Sch. 10 is higher than those estimated from Sch. 2.0, both in rural and urban. The total number of workers (ps) from Sch. 10 is found to be about 12% higher than that from Sch. 2.0. The extent of divergence is almost same both in rural and urban areas. Figure 2 presents a comparison of estimated number of workers from Sch. 2.0 and Sch. 10 for rural, urban and combined. In the graphs (Figure 2 to Figure 4), the estimated number of workers (Sch.10) based on principal usual activity status (ps) has been used for comparison.

**Figure 2: Estimated number of workers (000) -All India
(combined for all tabulation categories)**

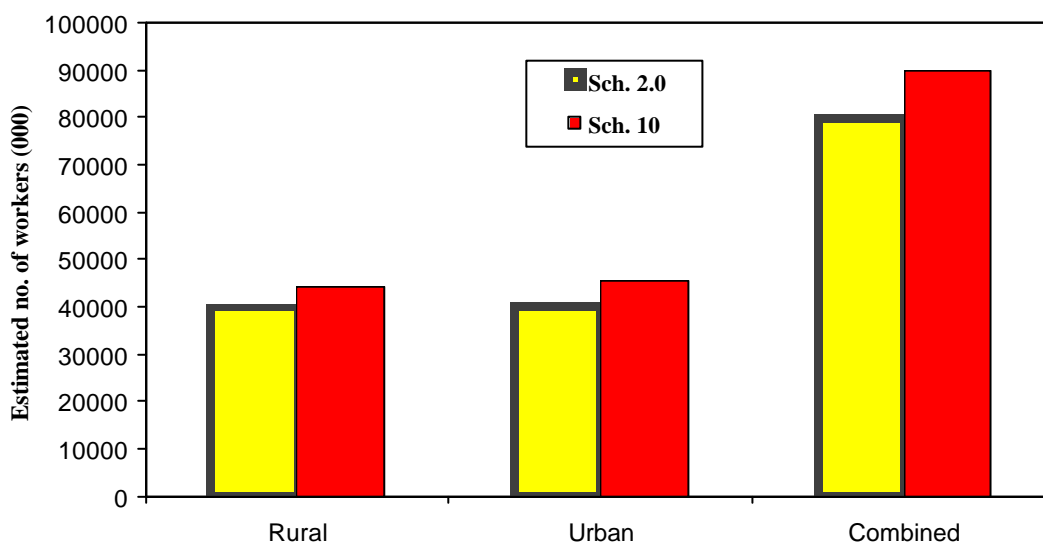

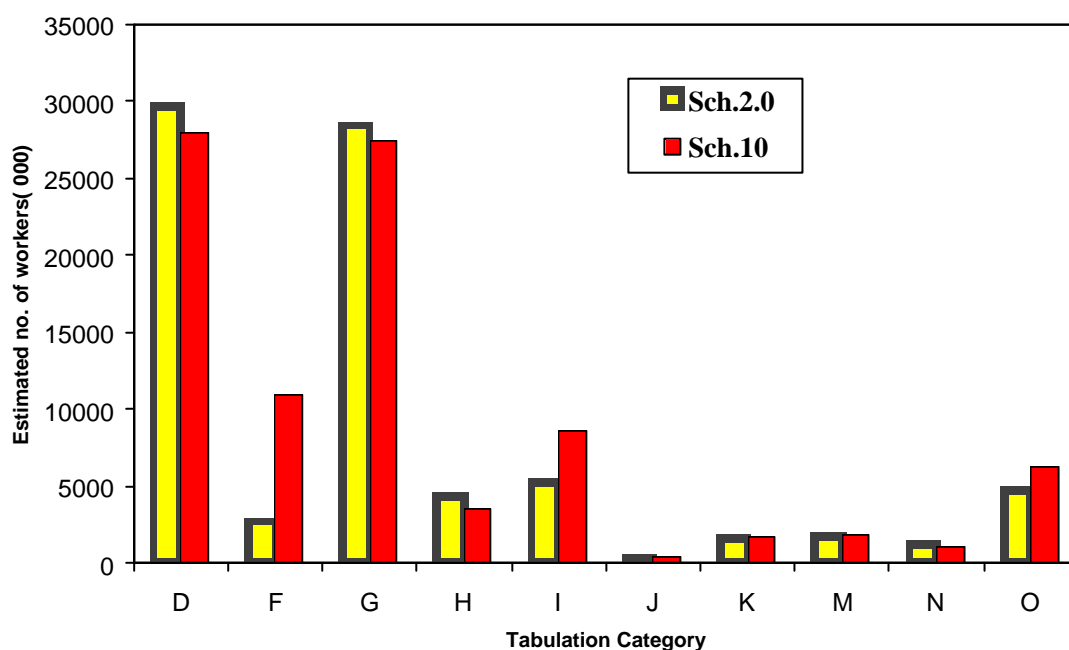

Figure 3 presents the tabulation category-wise comparison of estimated number of workers obtained from the two approaches. It may be seen that the estimated number of workers for tabulation category D (manufacturing), G (trade), H (hotels and restaurants) and N (health and social work) is higher for Sch. 2.0 as compared to the respective estimate obtained from Sch. 10. The estimated number of workers is close in case of tabulation categories K (real estate, renting and business activities) and M (education). In case of remaining tabulation categories, the estimates from Sch. 10 are higher than the estimates from Sch. 2.0. Further, the divergence in the two sets of estimates is quite large in case of tabulation categories F (construction) and I (transport, storage and communication). The enterprises belonging to construction and transport are perhaps difficult to be captured through enterprise survey approach. For example, a mason who works at different places (self employed) is treated as an enterprise in the enterprise survey. But the labourers accompanying him will not be captured as workers in the enterprise survey approach if they are not hired by the mason. Similarly, the porters / loaders etc. can not be captured in the enterprise survey approach if they are not hired on a fairly regular basis by the transport enterprises.

Figure 3: Estimated number of workers (000) by tabulation category from Sch. 2.0 and Sch. 10 - All India

Statement 5.2 gives state/UT wise estimated number of workers from enterprise (Sch. 2.0) and household survey (Sch. 10) approach. Figure 4 presents graphical comparison of the estimated number of workers from the two approaches for the major states of India. In all the major states, the estimated

number of workers from Sch. 10 is higher than the Sch. 2.0 except in the states of Bihar and Orissa, where the estimate for Sch. 2.0 is higher than Sch. 10.

Statements 5.3 and 5.4 respectively give State/UT wise estimated number of workers in manufacturing (tabulation category D) and ‘trade & repair services’ (tabulation category G) from Sch. 2.0 and Sch. 10. It may be seen that the estimated number of workers for manufacturing and trade as estimated from Sch. 2.0 is higher than those estimated from Sch. 10 for a number of States/UTs. State/UT and tabulation category-wise figures from Sch. 10 are given Table 5 of Annex-III.

Figure 4: Estimated number of workers (000) in major states (combined for all tabulation categories)

3.6 Distribution of enterprises by number of workers: Statement 6 gives the percentage distribution of enterprises by number of workers. Over 93% of the 'OAEs' have two or fewer workers and 6% of the 'OAEs' have 3-5 workers while only 0.3% have 6-9 workers. On the other hand the proportion of 'Establishments' with 6 or more workers is about 19%. The proportion of 'Establishments' with six or more workers is higher in urban areas (19%) as compared to the rural areas (17%). State-wise distribution of enterprises by number of workers by enterprise type (OAE, establishment, all) separately for rural, urban and combined is given in Table 7 of Annex-III.

Statement 6: Distribution of enterprises by number of workers

3.7 Value added per worker: The value added per worker per year is presented and discussed in this sub-section. This is referred to as 'annual value added per worker'. The data from the enterprises were collected for the reference month. The annual value added was computed by multiplying the related data by 12 in case of perennial and casual enterprises and by 'number of months operated' for seasonal enterprises. The tabulation category wise value added per worker by enterprise type separately for rural, urban and combined at the all India level is given in Statement 7.1. The value added estimates presented here are obtained by product approach. At the all India level, the annual value added per worker is estimated at Rs. 24242. The value added per worker for OAEs is Rs 18007 and for establishments it is Rs. 39153. For all the tabulation categories combined, the value added per worker in the rural areas is 45% of the value added per worker in the urban areas.

Figure 5: Annual value-added per worker (Rs.) by tabulation category All India

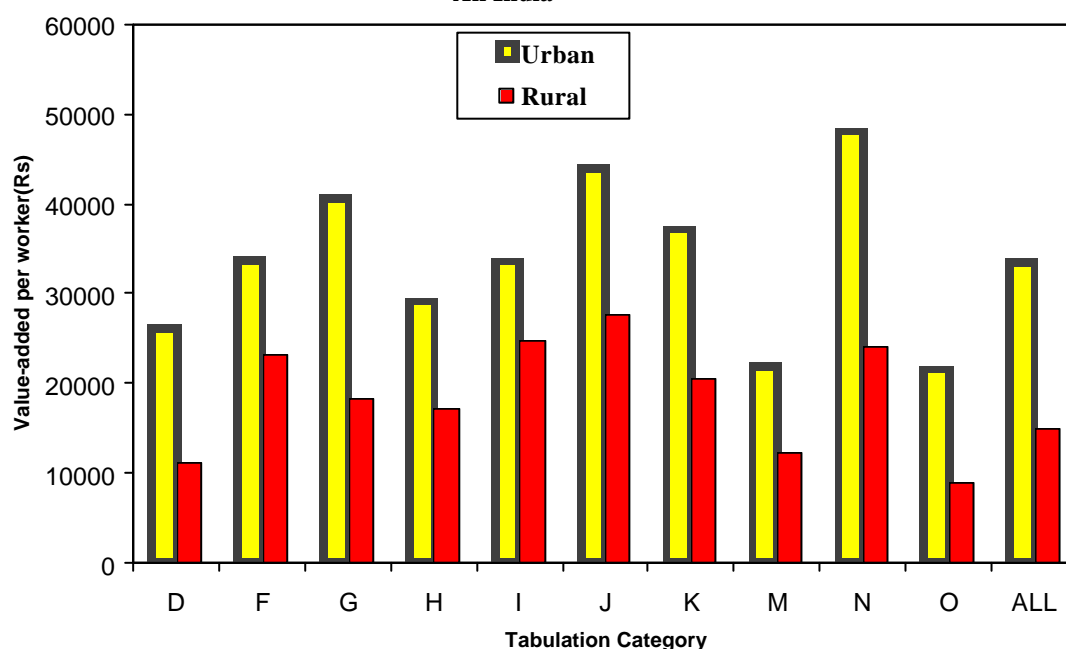

Figure 5 presents the annual value added per worker by tabulation category for rural and urban. In the urban areas, the highest value added per worker is for the tabulation category 'N' (health and social work) followed by tabulation categories 'J' (financial intermediation) and 'G' (trading and repair

services). The lowest value added per worker is for tabulation category ‘O’ (other community social and personal services) followed by tabulation category M (education). In the rural areas, the highest value added per worker is for tabulation category J (financial intermediation) followed by tabulation category I (transport, storage and communication) and N (health and social work). The lowest value added in rural areas is for tabulation category O (other community social and personal services) followed by tabulation category D (manufacturing).

State/UT level annual value added per worker by enterprise type, combined for all tabulation categories is given in Statement 7.2.

The value added per worker (all enterprises) for major states is graphically presented for rural and urban in Figure 6. In the rural areas, the annual value added per worker is highest for Punjab (Rs. 25091) followed by Kerala (Rs. 24389) and Maharashtra (Rs. 21820). The lowest value added per worker in the rural areas is observed for the state of Orissa (Rs. 7693) followed by Andhra Pradesh (Rs. 10406) and Madhya Pradesh (Rs. 12139). In the Urban areas, the highest value added per workers is for Maharashtra (Rs. 41540) followed by Gujarat (Rs. 40284) and Assam (Rs. 36837). The lowest value added per worker in urban areas is for Bihar (Rs. 23716) followed by Orissa (Rs. 24540) and West Bengal (Rs. 26090). For rural and urban combined, the value added per worker is highest for Maharashtra (Rs. 35777) followed by Gujarat (Rs. 34241) and Punjab (Rs. 32872). The lowest value added per worker, is for Orissa (Rs. 10999) followed by Bihar (Rs. 16486) and West Bengal (Rs. 17908).

Figure 6: Annual value added per worker (Rs.) in major states (combined for all tabulation categories)

State/UT wise annual value added per worker by tabulation category is given in Table 9 of Annex-III.

3.8 Other characteristics of enterprises

Some of the important characteristics of the enterprises are presented in this sub-section state-wise for all the enterprises (OAE + establishments) combined for all the tabulation categories for rural, urban and combined. Detailed State/ UT level tables by enterprise type are given in Annex-III tables.

3.8.1 Maintenance of accounts: Columns (2) to (4) of Statement 8.1 give percentage of enterprises maintaining accounts for rural, urban and combined. In this survey, an enterprise was considered to have maintained accounts if it has maintained usable books of accounts and made them available for collection of data. At the all India level, the percentage of enterprises maintaining accounts is estimated to be 5%. The proportion of enterprises maintaining accounts is higher in urban areas (9.0%) as compared to the rural areas (2.2%). Among the major states, the highest percentage of enterprises maintaining accounts is for Gujarat (14.7%) followed by Maharashtra (9.5%). Among other states, the percentage of enterprises maintaining accounts is exceptionally high in Arunachal Pradesh (38%) and Mizoram (24%). State-wise details regarding maintenance of accounts for OAE, establishments and 'all enterprises' separately for rural, urban and combined are given in Table 16 of Annex-III.

3.8.2 Status of registration: Columns (5) to (7) of Statement 8.1 give distribution of enterprises by status of registration with any agency. A little over 20% of the total enterprises are estimated to be registered with any registration agency. The overall proportion of registered enterprises is higher in urban areas (31%) as compared to the rural areas (12%). Among the major states, the highest percentage of registered enterprises is in the state of Kerala (42.5%) followed by Maharashtra (41.3%) and Gujarat (39.1%). The lowest percentage of registered enterprises is in the state of Orissa (3.4%) followed by Bihar (6.3%). State/UT wise details by agency of registration are given in Table 19 of Annex-III.

3.8.3 Working on contract: Columns (8) to (10) of Statement 8.1 give percentage of enterprises carrying out some work on contract basis. About 11% of the total enterprises are estimated to be undertaking at least some work on contract basis. The proportion of enterprises working on contract is slightly higher in rural areas as compared to the urban areas. Among the major states, the highest percentage of enterprises working on contract is in the state of West Bengal (26.4%) followed by Tamil Nadu (19.3%). State/UT wise details by type of contract, supply of equipment, raw material, and specification of design are given in Table 18 of Annex-III.

3.8.4 Type of ownership: Information on the type of ownership of each enterprise was collected. Different types of ownerships were proprietary (male), proprietary (female), partnership between members of the same household and partnership between members of different households. It is noted that 98% enterprises are run on proprietary basis and only 2% are run on partnership basis. Columns (2) to (4) Statement 8.2 give the percentage of 'proprietary female' enterprises separately for rural, urban and combined. It may be seen that 'female proprietors' run about 12% of the estimated total non-agricultural enterprises. The percentage of enterprises run by females is 13% in rural areas and 10.5% in urban areas. Among the major states, the female proprietary enterprises are highest in the state of Tamil Nadu (24%) followed by Karnataka (21%). A considerably higher percentage of

‘proprietary female’ enterprises are in the states of Manipur, Meghalaya and Mizoram as compared to other states. State/UT wise details are given in Table 16 of Annex-III.

3.8.5 Location of the enterprises: Columns (5) to (7) of Statement 8.2 give percentage of enterprises located within the household premises. Out of the total enterprises, 36% are operated from within the household premises. The percentage of the enterprises run in the household premises is higher in rural areas (45%) as compared to the urban areas (24.3%). About 48% of the enterprises are located within the household premises in the states of Orissa and West Bengal. The lowest percentage of enterprises located within the household premises is for the state of Haryana. State/UT wise details on location of enterprises by enterprise type are given in Table 17 of Annex-III.

3.8.6 Nature of operation: Information on the nature of operation was collected from each surveyed enterprise. The enterprise have three types of nature of operation, i.e., perennial, seasonal or casual. Columns (8) to (10) of Statement 8.2 give percentage of enterprises operating on seasonal or casual basis. The seasonal and casual enterprises constitute a little over 3% of the total enterprises. About 97% of the total enterprises are run on perennial basis. The seasonal enterprises are more prevalent in the rural areas (4.4%) as compared to the urban areas (1.6%). Among the major states, the highest percentage of seasonal and casual enterprises is in the state of Orissa (7.3%) followed by Uttar Pradesh (4.1%) and Madhya Pradesh (4.0%). State/UT wise details by enterprise type are given in Table 22 of Annex-III.

3.8.7 Problem faced in operation: Information on various types of problems faced by the enterprise was collected. The list of problems included shortage of capital, lack of lighting facility, problem of power cut, lack of infrastructure facilities, local problems, competition from larger units, non-availability of labour, labour problems, raw material/fuel not available, non-recovery of service charges and other problems, if any. This was a multiple-choice question and the respondent had the option to report up to a maximum of three problems. Columns (2) to (4) of Statement 8.3 give the percentage of enterprises facing no specific problem in their operation. About 30% of the total enterprises did not face any specific problem in their day-to-day operation. The percentage of enterprises not facing any specific problem is 29% in rural areas and 31% in urban areas. Among the major states the highest percentage of enterprises not facing any problem is for the states of Andhra Pradesh (47%) and Tamil Nadu (47%). The states where highest percentage of enterprises is facing any problem are Bihar (85%) and West Bengal (83%). Table 21 gives State/UT level details about the types of problem faced by each enterprise type separately for rural, urban and combined.

3.8.8 Other economic activities undertaken: Since many of the enterprises in the informal sector operate at low level, information on the number of activities (other than the current activity) carried out by the entrepreneurs simultaneously or at different point of time during the last 365 days was collected. These include any economic activity such as self employment in agriculture, wage earning etc. Columns (5) to (7) of Statement 8.3 give percentage of enterprises undertaking no additional economic activity separately for rural urban and combined. It is estimated that 64% of the entrepreneurs have not undertaken any additional economic activity during the last 365 days. The percentage of entrepreneurs undertaking no additional economic activity is 52.5% for rural and 79.4% for urban. Table 23 of

Annex-III gives State/UT wise distribution of other economic activities taken up for each type of enterprise separately for rural, urban and combined.

3.8.9 Growth status of the enterprise over last three years: Information on the growth status of the enterprise over last three years was collected. The objective of collecting this information was to have the owner's impression about the growth of the enterprise over the last three years. The enterprises were categorised into expanding, stagnant, contracting and enterprises that have run for less than three years. At the all India level, the percentage of expanding, stagnant and contracting enterprises were 20%, 63% and 10% respectively. The rest of the enterprises (7%) started their business activity during the last three years. Columns (8) to (10) of Statement 8.3 give the state-wise percentage of enterprises with expanding business activity. Among the major states, the highest percentage of enterprises reporting expanding business activity is estimated for the state of Gujarat (27.4%) followed by Tamil Nadu (26%) and Madhya Pradesh (24.3%). Table 23 of Annex-III gives State/UT level details of expanding, stagnant, contracting and enterprises that started their operation during the last three years by enterprise type. Among the major states, the highest percentage of enterprises reporting contracting business activity is estimated for the state of Haryana followed by Orissa, Kerala and Rajasthan.

Information on more characteristics of the enterprises like proportion of enterprises by number of months operated, agency for purchase of basic inputs, sale of final products, assets and loans, etc. is also given in tables of Annex-III.

Q	EXTRA-TERRITORIAL ORGANISATIONS AND BODIES
99	EXTRA-TERRITORIAL ORGANISATIONS AND BODIES

Activity coverage in NSS-55th Round.

Detailed coverage of various activities in the NSS, 55th round, along with their two digit codes is summarised below.

Activity / NIC 2 digit code	Coverage
Manufacturing NIC (15-37)	<p>Manufacturing is the process of transformation of raw materials into final products.</p> <p>All units mainly engaged in manufacturing which are not registered under Sections 2m(i) and 2m(ii) of the Factories Act 1948, are covered under this activity. Enterprises engaged in manufacturing of Bidi and Cigars, other than those covered in ASI, are also covered.</p>
Construction NIC (45)	<p>All units like contractors, sub-contractors, overseers, plumbers, masons, electricians, mistries for mosaic or tiles fitting, etc. connected with the construction activity are covered. However, own-account construction is outside the coverage. The self-employed persons engaged in construction activity will generally be listed in their households. But promoters/ contractors, who have offices of their own, are listed against their main offices, if they have any such office.</p>
Trading and repair services NIC(50-52)	<p>Generally, the activity of trading (wholesale as well as retail) involves only purchase of goods and their disposal by way of sale, without any intermediate physical transformation of goods. In wholesale trade, goods are generally purchased from the producer and sold to the retailer. The activities of intermediaries (commission agents) who do not actually purchase or sell goods but only arrange their purchase and sale and earn remuneration by way of brokerage and commission are also included. In retail trade, goods are generally purchased from the wholesaler and sold to the ultimate consumers.</p> <p>Sale of agricultural produce or manufactured goods directly by the producer is excluded. Also excluded from trade are the agency activities of intermediaries in stock exchange, real estate and other financial matters. Free collection and sale of agricultural produce is excluded. Separate and distinct trading units of manufacturing concerns (like Sale shops of DCM, Bombay Dying, Bata Shoe, etc.) are excluded. However, if private dealers or agents run these units, they are covered.</p>
Hotels and restaurants NIC (55)	<p>A hotel is an enterprise, which provides lodging services with or without arrangements for meals, other prepared food and refreshments. Dharamshala type lodging places are also covered under hotels.</p> <p>A restaurant generally provides eating and drinking services where prepared</p>

Activity / NIC 2 digit code	Coverage
Transport, storage and communications NIC(60-64)	<p>meals, food and refreshments and other snacks are sold for immediate consumption without any provision for lodging.</p> <p>Such establishments are variously known as restaurants, cafes, cafeteria, snack bars, lunch counters, refreshment stands, milk bar canteens, etc. Bars and other drinking places are also treated as restaurants. Canteens located in offices, factories, etc. are treated as restaurants if private contractors operate them. But departmental canteens run by government are excluded.</p> <p>Transport means rendering transport service to others as a business proposition. Transport activity relates to the act of carrying passenger and/or goods from one place to another. Supporting services incidental to transport such as packing, freighting, travel agency etc. are also covered under transport. Both mechanised and non-mechanised transport is covered. The following activities are also covered: (i) hackney carriages, carriage by bullock-carts/ ekka/ tonga, etc. (ii) transport by animals like horses, elephants, mules, camels, etc., (iii) transport by man including rickshaw-pullers, cart-operators, etc., (iv) non-mechanized inland/ ocean/ coastal and water transport, (v) pipeline transport, (vi) supporting services to land transport like operation of highway bridges, toll roads, parking lots, etc. and (vii) supporting services to water transport like operation and maintenance of piers, docks, light house, loading and discharging vessels, etc.</p> <p>The operation of storage and warehouses on hire to the farm producer, dealer, trader, processor and manufacturing enterprises, as an independent business is covered in this survey.</p> <p>Warehousing services may be given to the private individuals/households also. Storage and warehousing services in respect of grains, other food articles, oil seeds and other agricultural commodities like cotton, jute and tobacco, are included. Also included are the refrigerated storage facilities on hire to other enterprises for potato, fruits, dairy products, fish and other food products and also refrigerated food locker on rental services chiefly delivered to individual household. Storage of all manufactured products including textiles, machine tools, apparatus and equipment are to be included. Spaces for lumber, waste and scrap materials are included. But farm produce stored by the owner of the farm in his own godown or a dealer or a manufacturer storing his commodities in his own godown or warehouse are excluded from the scope of this survey. Also excluded are the establishments of Central Warehousing corporation, State Warehousing Corporations and the warehousing by the Central and State Governments. Lockers in commercial banks and in other type of enterprises for safe storage of precious belongings are also excluded.</p> <p>All enterprises providing communication services, not owned by government, Public Sector undertakings, local bodies and corporate sector, are covered.</p> <p>This will include courier services, ISD/STD/ PCO booths; Voice Mail Services through computer networking, Video/fax services, phone plus services, voiced</p>

Activity / NIC 2 digit code	Coverage
	and non-voiced leased circuits, telex/FAX/data services through computer network, radio paging, cellular mobile telephone services, and audio services etc.
Financial intermediation NIC(65-67)	All financial intermediation activities like, financial leasing, activities of hire-purchase financing, life insurance agents, non-life insurance agents, administration of financial markets, stock brokers, actuaries, financial advisors, etc. are covered.
Real estate, renting and business activities NIC (70-74)	Real estate activities are covered under NIC code 70. They include activities like: (i) purchase, sale, letting and operating of real estate i.e. residential/non-residential buildings, (ii) developing and sub-dividing real estate into lots, (iii) lessors of real property and (iv) real estate agents, brokers and managers engaged in renting, buying and selling, managing and appraising real estate on a contract or fee basis. Letting out of an accommodation is not included except in case of real estate agents running such a business.
	Renting of machinery and equipment will be covered under NIC 71. Note that a household hiring out machinery & equipment or household durables are also treated as an enterprise. All business activities classifiable under NIC codes 72 to 74 are covered in this survey.
	Stamp vendors are not covered here but covered under retail trade.
Education NIC(80)	Only such educational institutions are included which are under proprietary or partnership control. Research and scientific services rendered by institutions and laboratories are also covered provided they satisfy the above criterion. These may be engaged in research in biological, physical and social sciences. Meteorological institutes and medical research organizations belonging to the informal sector are also included. Management training institutes, computer training centres, Nursing schools, schools of music, drama, dance, modelling, fashion designing, yoga and physical education and general coaching centres (e.g. for various competitive examinations) etc. are to be covered. Private tutors are covered only when the person (tutor) is giving tuition in his own house/coaching centre.

Activity / NIC 2 digit code	Coverage
Health and social work NIC (85)	<p>All enterprises engaged in health and medical services other than those owned by government, public sector undertakings, local bodies or corporate sector are covered, irrespective of the system of medicine.</p> <p>All dispensaries, clinics and consultation chambers run by doctors are also covered. The survey also covers activities of veterinary services including bird hospitals. An employed doctor and para-medical person (such as midwife, dai, etc.) doing private practice are covered and his/her private practice alone is considered as an enterprise. Included in this activity are all kinds of health clubs. Big hospitals like Escort, Apollo, Peerless, etc. are not covered as they belong to the corporate sector.</p>
Other community, social and personal service activities (excluding domestic services) NIC (90-93)	<p>This cover the activities like sewage and refuse disposal, activities of membership organizations, recreational, cultural and sporting activities covered under NIC 90 to 93; and other service activities like washing and cleaning of textile products, hair dressing, funeral and related activities, massage saloons, sauna baths, activities of shoe shiners, porters, car parkers etc; activities such as tailoring, embroidery, etc. classified under NIC 93. Palmists and astrologers are also covered here.</p> <p>It may be noted that individuals serving as housemaids, cooks, gardeners, governess, baby sitters, chowkidars, night watchmen, etc. are in general outside the coverage of the present survey. However, if such activities are provided by some agencies against prescribed fees, those agencies will be treated as enterprises under NIC 93. For example, an agency, which supplies baby sitters, or night watchmen, with some profit margin, is covered.</p>

Activities such as agriculture, fishing, mining and quarrying, electricity, gas and water supply, public administration & defence, compulsory social security, private households with employed persons and extra territorial organisations & bodies are excluded in coverage.
