MESSAGE

Agriculture and allied sectors is one of the major industry sectors in India, contributing to about a fifth of total Gross Domestic Product (GDP) in the economy. It continues to employ majority of the workforce in the country. Besides its direct role in supporting livelihood of millions of Indians, the sector impacts the lives of all the citizens by ensuring availability of sufficient food for all. It is in this background that this sector becomes all the more important.

Policy-makers have always shown a keen interest in formulating plans and policies for the all-round development of the sector. In today's world when need of more and more data for policy making is increasingly growing, the latest edition of the publication "Statistical Report on Value of Output of Agriculture and Allied Sectors" by the Ministry of Statistics and Programme Implementation for the period 2011-12 to 2023-24 is a welcome step. I am sure that it will equip policy-makers with enough information to formulate better policies going forward.

Our farmers have shown a great deal of commitment in making the country not only self-sufficient in food production but also in producing surplus as can be witnessed from the agricultural exports. Agricultural output has grown significantly during last decade outpacing the population growth. As the global population is projected to grow progressively, it is important to maintain this momentum in years to come.

Publications like this have helped in measuring the performance of the Agriculture sector and devising policies for its betterment. I express hope that academia, Agricultural Institutes/Universities, Food Processing Industry and other users of this publication will find it engaging and insightful. I congratulate MoSPI for bringing out this publication.

MESSAGE

It gives me immense pleasure to present the latest edition of the publication "**Statistical Report on Value of output from Agriculture and allied sectors**", which covers the period from 2011-12 to 2023-24 and provides output values at both current and constant (2011-12) prices. This publication stands as a testimony to our sustained commitment to provide robust, timely and disaggregated statistical data.

Agriculture and allied activities continue to hold a pivotal place in our economy. Over the years, this sector has witnessed notable transformations, marked by technological advancements, introduction of high-yielding and resilient crop varieties, improvements in animal husbandry practices, diversification of farming systems, enhancement of irrigation and storage infrastructure, and greater integration with domestic and international markets.

This publication provides granular data on the value of output across States and Union Territories, disaggregated by sub-sectors such as crops, livestock, forestry & logging, and fishing & aquaculture, thereby equipping policymakers, planners, researchers, academicians, and other stakeholders with crucial insights to better understand the regional pattern and design well-informed, evidence based strategies.

As we move forward, the Ministry remains steadfast in its commitment to continuously enhance the relevance, accuracy, and accessibility of its statistical products. Your inputs would play an essential role in strengthening the quality and utility of future editions of this publication.

I congratulate officers of National Accounts Division for the timely preparation of the publication. I also extend my sincere appreciation to all stakeholders, including data-providing ministries, for their continued support in making this publication possible.

FOREWORD

“Statistical report on Value of Output from Agriculture and allied sectors” provides information on State/UT wise and item wise value of output of all the four sub-sectors of Agriculture and allied activities for the period 2011-12 to 2023-24, at both current and constant prices. The publication contains salient information on item wise GVO of crop, livestock, forestry and fishery sub-sectors, besides graphical presentation of the data.

Agriculture and allied sectors contribute approximately 18% to the country's Gross Value Added at current prices in the year 2023-24. Over time, the sector has undergone significant structural changes. Marked improvements have been made in mechanization, use of high-quality seeds and fertilizers, diversification of cropping patterns, and the expansion of efficient irrigation systems. Additionally, greater investments in essential infrastructure including storage facilities, transportation networks, cold chains, and agricultural marketing systems have been made.

The preparation of this report has entailed the meticulous collection and compilation of extensive datasets, which has been made possible through the sincere and dedicated efforts of the Directorates of Economics and Statistics of all States and Union Territories, Ministry of Agriculture and Farmers Welfare, Ministry of Fisheries, Animal Husbandry and Dairying, Government of India, and other stakeholders. Their valuable contributions are gratefully acknowledged and deeply appreciated.

I would also like to place on record my deep appreciation for the dedicated efforts of all officers and staff of the Agriculture Unit, under the guidance of Shri Siddhartha Kundu, Additional Director General (NAD) and Dr. Subhra Sarker, Deputy Director General (NAD), whose commitment, hard work, and technical expertise have made the timely release of this publication possible.

MESSAGE

National income and related macro-economic aggregates are published by National Accounts Division (NAD), Ministry of Statistics & Programme Implementation. NAD, in its latest publication "Statistical report on value of output of Agriculture and allied sectors", is providing disaggregated information on value of output of items produced by agriculture and allied sectors, encompassing crop, livestock, forestry & logging, and fishing & aquaculture.

As of 2023–24, agriculture and allied sectors contribute around **18%** to the total Gross Value Added of the country. This sector plays a crucial role in ensuring food security by providing food to the economy, generating employment, and supporting overall economic growth. By offering detailed and disaggregated data, this brochure enables a deeper understanding of inter-State differences, highlights regional strengths and shortcomings, supports data-driven policy decisions. This brochure, thus, acts as a valuable reference, presenting comprehensive State/UT and item-wise value of output for the years 2011–12 to 2023–24, at both current and constant (2011–12) prices.

It is hoped that this brochure will prove useful to administrators and planners across Ministries, as well as to researchers in diverse institutions. Suggestions for further refinement and improvement are sincerely appreciated. I would like to acknowledge and commend the dedicated efforts of Dr. Subhra Sarker, DDG (NAD), and her team viz., Ms. Monami Mitra, Director, Ms. Priyanka S. Pant, Deputy Director, Shri Pradeep Kumar, Senior Statistical Officer, Ms. Pratibha Yadav and Shri Vishal Beniwal, Junior Statistical Officers, in the successful preparation and release of this publication.

(Shri Siddhartha Kundu)

27th June, 2025

New Delhi

Acknowledgement

This publication of “Statistical report on value of output from agriculture and allied sectors” presents the time series data on the value of output for agriculture and allied sectors based on data received from Ministry of Agriculture and Farmers Welfare, Ministry of Fisheries, Animal Husbandry and Dairying, Tea Board, Coffee Board, Cashew nut & Cocoa Development Board, Directorate of Areca nut & Spices Development, Central Bureau of Narcotics, Rubber Board, Silk Board, Food Corporation of India, Forest Survey of India, all State/UT Directorates of Economics and Statistics and many more. The Ministry gratefully acknowledges the cooperation of these organizations and looks forward to their continued support in the future as well.

Officers/Officials associated with preparation of Brochure 2025

Dr. Subhra Sarker	Deputy Director General
Ms. Monami Mitra	Director
Ms. Priyanka S. Pant	Deputy Director
Shri Pradeep Kumar	Senior Statistical Officer
Ms. Pratibha Yadav	Junior Statistical Officer
Shri Vishal Beniwal	Junior Statistical Officer

Key highlights of Brochure 2025

Economic Contribution and Growth

- Gross Value Added (GVA) for the Indian economy increased over threefold from ₹8,107 thousand crore in FY 2011–12 to ₹27,413 thousand crore in FY 2023–24 at current prices.
- Agriculture and allied sectors contributed ₹4,878 thousand crore in FY 2023-24 at current prices, making up 17.8% of total GVA (down from 18.5% in 2011-12), due to faster growth in non-agricultural sectors.
- At constant (2011-12) prices, overall agriculture output grew by 54.6% in FY 2023-24.

GVO for Crop Sector (at constant prices)

- Crop sector remains the largest contributor to total GVO of agriculture and allied sectors, even though its share declined from 62.4% to 54.1%.
- Cereals and fruits & vegetables together accounted for 52.5% of total crop GVO in 2023-24.
- Uttar Pradesh contributed highest GVO in cereals group though its share fell from 18.6% in 2011-12 to 17.2% in 2023-24.
- Value of output of ‘fruits & vegetables’ has increased from ₹270.1 thousand crore to ₹410.0 thousand crore at constant prices during 2011-12 to 2023-24.
- In total GVO of ‘fruits & vegetables’ and floriculture, Uttar Pradesh, West Bengal and Madhya Pradesh were three top performing States in 2023-24. However, in 2011-12 West Bengal, Maharashtra and Tamil Nadu were top three States.
- In the total GVO of oilseeds group, rapeseed and mustard together with groundnut attributed to around 55% in 2023-24.
- Rajasthan, Gujarat and Madhya Pradesh together accounted for 57% of total GVO of oilseeds group in 2023-24.
- Gram and Arhar together accounted for over 58% of the value of output of ‘pulses’ group during 2023-24.
- Madhya Pradesh recorded the highest value of output in pulses during 2023-24 with a share of around 22%.
- Approximately 51% of the GVO for the ‘condiments & spices’ group was collectively accounted for by chillies, arecanut and cumin in 2023-24.
- Madhya Pradesh recorded a substantial rise in its share in the value of national ‘condiments and spices’ output. Its contribution increased from 3.8% in 2011–12 to 19.2% in 2023–24.
- More than half of the value of output of fibres group is contributed by Gujarat and Maharashtra taken together in 2023-24.

- State of Uttar Pradesh alone accounted for almost 55% of value of output of sugar crops in 2023-24.

GVO for Livestock Sector (at constant prices)

- The value of output of livestock has nearly doubled from ₹488 thousand crore (25.6%) to ₹919 thousand crore (31.2%) during 2011-12 to 2023-24.
- Milk group remained dominant in this sector with 66% share in 2023-24, but share of meat group in total GVO of livestock sector increased from 19.7% to 24.1% during 2011-12 to 2023-24.
- Eggs contributed around 4% in total value of output of livestock sector.
- Uttar Pradesh led livestock GVO but its share declined slightly whereas Tamil Nadu and Rajasthan registered significant gains during 2011-12 to 2023-24.

GVO for Forestry and Logging GVO (at constant prices)

- GVO for ‘forestry and logging’ rose from ₹148.7 thousand crore in 2011-12 to ₹227.5 thousand crore in 2023-24.
- Share of value of industrial wood surged from 49.9% in 2011-12 to 70.2% in 2023-24.
- Share of output of firewood declined considerably, reflecting rural energy transitions.

GVO for Fishing and aquaculture (at constant prices)

- Share of value of output of ‘fishing and aquaculture’ rose from 4.2% in 2011-12 to 7.0% in 2023-24 in the GVO of this sector.
- Fishing and aquaculture sector display an ever-increasing trend, with its GVO more than doubling over the period 2011-12 (₹80.1 thousand crore) to 2023-24 (₹207.2 thousand crore).
- Value of output of inland fish has increased twofold from ₹46.2 thousand crore in 2011-12 to ₹103.9 thousand crore in 2023-24, while the same for marine fish has increased by almost three times during the same period.
- Andhra Pradesh dominates the sector in 2023–24 with an enormous 39.1% share in total GVO at all-India level, whereas West Bengal was the highest contributor with a share of 24.6% in 2011-12.

1. Introduction

- 1.1 GVA for the entire economy increased significantly from ₹8,107 thousand crore in 2011–12 to ₹27,413 thousand crore in 2023–24, more than tripling over the period. Agriculture serves as the backbone of India's economy, playing a pivotal role in ensuring food security, providing employment, and contributing to overall economic development. It supports the livelihoods of a significant portion of the population and remains vital to India's socio-economic fabric. Recognizing its importance, the Government of India has implemented various initiatives which has led to substantial improvements in food grain production, increased income for farmers, enhanced credit facilities, better crop insurance, and significantly increased budget allocations to strengthen the sector.¹ As a result, the agriculture sector continues to evolve and thrive, securing India's position as a global leader in agricultural production and export.
- 1.2 The allied sectors encompass a wide range of activities beyond traditional crop production, including animal husbandry, fisheries, and forestry. Each of these components contributes uniquely to the agricultural economy and rural well-being. Over the years, these sectors have witnessed transformative changes, largely driven by advancement in science and technology. In crop production, there has been a noticeable shift toward crop diversification, along with increased adoption of high-yielding and genetically modified varieties of seeds aimed at boosting productivity and resilience against climate change. The use of modern agricultural practices and improved marketing strategies has further enhanced the efficiency and profitability of crop farming.
- 1.3 Similar trends are evident in the livestock and fisheries sub-sectors. In livestock, the application of biotechnology and improved breeding techniques has led to increased productivity and a higher output of milk, meat, and other animal products. Additionally, this sector has seen growing investments in infrastructure, such as cold chains and veterinary services, which have improved animal health and product quality. In the fisheries sector, a surge in prawn farming and the commercialisation of aquaculture practices have opened up new avenues for income generation and export potential. The

¹ PIB (<https://pib.gov.in/PressReleasePage.aspx?PRID=2098424>)

increasing adoption of scientific techniques in inland and marine fisheries has enhanced yields and contributed to rural prosperity in coastal and riverine areas.

- 1.4 Given these dynamic developments, it becomes imperative to systematically analyse how the value of output across different commodities within agriculture and allied sectors has evolved over the years across various States and Union Territories. This includes examining changes, in both nominal terms (current prices) and real terms (constant prices), to account for the impact of inflation and provide a more accurate picture of growth. Such an analysis is essential for informed policy-making, targeted investments, and identifying regional disparities in agricultural performance, thereby helping to formulate strategies that can enhance productivity, equity, and sustainability across the sector.
- 1.5 In the process of analysing and compiling estimates of national income and other related macroeconomic aggregates originating from agriculture and its allied sectors, the National Accounts Division (NAD) has built a comprehensive repository of valuable data spanning several decades. This extensive dataset, accumulated over years of meticulous statistical work, serves as a crucial resource for a wide range of stakeholders—including research scholars, policy analysts, academic institutions, government departments, and other national and international agencies involved in agricultural planning and economic development.
- 1.6 However, given the vastness and complexity of this data, incorporating every detail into the annual National Accounts Statistics (NAS) publication would not only be impractical but also risk overwhelming users with excessive information. Recognising this, and in order to make the data more accessible and user-friendly for focused analysis, the need for a domain-specific publication dedicated exclusively to agriculture and allied sectors became apparent.
- 1.7 To fulfil this requirement, NAD began publishing a specialised brochure from the year 1985 onwards, designed specifically to present a consolidated long-term time-series dataset on the Gross Value of Output (GVO) from ‘Agriculture and allied sectors’. This brochure offers granular, State/UT-wise information, capturing the economic contributions of various sub-sectors such as crop production, livestock, fisheries, and

forestry. By providing this data in a single, cohesive document, the brochure facilitates longitudinal analysis, inter-state comparisons, and evidence-based policy formulation.

1.8 The current edition of this brochure continues this tradition of knowledge dissemination by presenting updated and detailed information on the GVO of ‘Agriculture and allied sectors’ for all States and Union Territories for the period 2011–12 to 2023–24. The estimates are provided at both current prices (reflecting actual market values for each year) and constant prices (2011–12 base year), which adjust for inflation and allow for meaningful comparison over time. This dual presentation enables users to distinguish between nominal growth and real growth in output, thereby offering deeper insights into sectoral trends in production, and economic performance across the country. The four sub-sectors of ‘Agriculture and allied sectors’ are:

- a) Crop;
- b) Livestock;
- c) Forestry and logging; and
- d) Fishing and aquaculture.

1.9 The economic activities included in compilation of Gross Value of Output from crop sector are in alignment of NIC-2008² and includes:

- a) growing of field crops, fruits, nuts, seeds and vegetables;
- b) management of tea, coffee and rubber plantations;
- c) agricultural and horticultural services on a fee or on contract basis such as harvesting, baling and thrashing, preparation of tobacco for marketing, pest control, spraying, pruning, picking, packing etc.;
- d) ancillary activities of cultivators such as gur making, transportation of own produce to primary markets etc.; and
- e) operation of irrigation systems which comprises supply of water through various Government canals, tube-wells, tanks etc. to the agriculturists.

1.10 Livestock sector includes breeding and rearing of animals and poultry (besides private veterinary services), production of milk, slaughtering, preparation and dressing of meat,

² National Industrial Classification (NIC) 2008 is a classification developed in India based on United Nations International Standard Industrial Classification (ISIC) Rev 4.

production of raw hides and skins, eggs, dung, raw wool, honey and silk worm cocoons etc.

1.11 Forestry and logging sector (forestry, in short) includes:

- a) Forestry;
- b) logging and transportation of forest products to the sale depots/assembly centres; and
- c) farmyard wood (industrial wood and fuelwood collected by the primary producers from trees outside regular forests).

The forest products are classified into two broad groups, namely:

- (a) major products comprising industrial wood (timber, roundwood, match and pulpwood) and fuelwood (firewood and charcoal wood) and
- (b) Non-timber Forest Products (NTFP) comprising a large number of wild growing forest material such as bamboo, fodder, lac, sandalwood, honey, resin, gum, tendu leaves, cork, balsams, vegetable hair, eelgrass, acorns, horse chestnuts, mosses, lichens etc.

1.12 The activities covered in the fishing and aquaculture sector (fishing, in short) are:

- a) commercial fishing in (i) ocean, coastal and offshore waters and (ii) inland waters, that includes catching, tackling and gathering of fish from rivers, irrigation and other canals, lakes, tanks, fields, inundated tracts etc.;
- b) subsistence fishing in inland waters and artificial ponds;
- c) gathering of sea weeds, sea shells, pearls, sponges and other ocean & coastal water products; and
- d) fish curing, namely salting and sun-drying of fish. The activities of salting and sun-drying of fish are also included in fishing sector, since these are undertaken predominantly by the same households, which are engaged in commercial/ subsistence fishing.

2. Methodology for Valuation of Output

2.1 Valuation of output of crops

- a) The different groups of crops under the crop sub-sector, published in the NAS are: (1) cereals, (2) pulses, (3) oilseeds, (4) sugars, (5) fibres, (6) indigo, dyes and tanning material, (7) drugs and narcotics, (8) condiments & spices, (9) fruits & vegetables, (10) floriculture, (11) other crops, (12) by-products, and (13) crops produced in kitchen garden. The State/UT-wise estimates of area and production of major crops are sourced from the Ministry of Agriculture and Farmers Welfare (MoAgFW). The estimates of area and production of fruits and vegetables, not covered by MoAgFW, are obtained from HSD, MoAgFW. The unit of reporting of data on area and production of loose flowers are hectare and tonne, respectively, and that of spikes are in numbers. These are obtained from HSD, MoAgFW for each State and UT. The estimates of area and production of plantation crops *viz.* tea, coffee, rubber, areca nut, cashew nut and cocoa are obtained from the respective commodity boards. The area and production of opium is obtained from Central Bureau of Narcotics. However, in the case of sugarcane, production excluding the quantity converted into gur by the cane growers is taken and output of gur is evaluated separately. Also, for some State/UT specific crops, DES of the concerned State/UT provides the area and production of such crops.
- b) Some exceptions: -
- i. Data sources of coconut and sunhemp: Though data on production and area of cereals, pulses, oilseeds, sugars and fibres are taken from MoAgFW, the same for coconut (belongs to oilseeds) and sunhemp (belongs to fibres) are taken from the DES of respective State/UT.
 - ii. Data source for indigo, dyes and tanning material, drugs and narcotics: Data on production and area of these crops are obtained from the respective State/UT DES.
 - iii. Data source of condiments & spices, and fruits & vegetables: Data on production and area of most of these crops are obtained from HSD, MoAgFW except for

selected crops, viz. banana, potato, sweet potato, tapioca and onion. Data on production and area of these crops are obtained from respective State/UT DES.

- iv. Area and production data of guar seed and mulberry are obtained from respective State/UT DES. Production of fodder and grass is estimated from Land Use Statistics (LUS) provided by the MoAgFW as well as respective DES. Production data of mushroom is obtained from HSD and DES.
 - v. The value per hectare of by-products is estimated from the Cost of Cultivation Studies (CCS) results published by MoAgFW. Total output is calculated by multiplying with area under corresponding crop.
- c) For evaluation purpose of these crops, the producers' prices known as Farm Harvest Price (FHP) correspond to average FHP ruling in the nearest primary markets during the peak arrival periods, which is normally within 2 months after the crop is harvested. The same is furnished by the respective State/UT DES to NAD.
 - d) In the 2011-12 series, estimates of output of crops such as cowpea, rajma, val, batna and choula (earlier covered in 'other pulses'), beans, bitter gourd, bottle gourd, capsicum, carrot, cucumber, muskmelon, radish, parmal, pumpkin and water melon (earlier covered in 'other vegetables'), anola/amla, ber, custard apple, kiwi, passion fruit, peach, plum, pomegranate and strawberry (earlier covered in 'other fruits') at individual crop level.
 - e) The output data provided by the Tea Board pertains to the production of processed tea, which falls outside the scope of the agriculture sector. Since output of raw tea leaves is relevant for inclusion in the crop sector, it is necessary to derive this from the available data. Based on Techno-Economic Surveys, the Tea Board has established a normative ratio of 4.44 for conversion of raw tea leaves to processed tea. Therefore. production of raw tea leaves is estimated as 4.44 times the production of processed tea.
 - f) Value of output of toddy is estimated from NSS Household Consumption Survey, 2011-12 which provides monthly per capita quantity and value of consumption for toddy in each State/UT separately for rural and urban areas. Production of toddy is estimated by multiplying per capita consumption of toddy with projected rural and urban population.

- g) Evaluation of production under kitchen garden (i.e. Foreyard/ Backyard Farming) is done on the basis of the ratio of total area under kitchen garden to the total rural area operated at all India level (0.21%) as observed in 1991-92. This ratio has been obtained from NSS Report 'Operational Land Holdings in India, 1991-92 Salient Features', published on the basis of 48th round of NSS Land and Livestock Holding Survey, 1991-92. This ratio of total area under kitchen garden to the total rural area operated has been assumed to be constant for the subsequent years as no data under kitchen garden was compiled during Land and Livestock Holding Surveys in subsequent NSS Rounds. This norm i.e. '0.21% of net area sown' has been used for estimating area under kitchen garden for the new series. The estimates of value of output on account of production of crops in kitchen garden are made using these area estimates and the value per hectare of fruits and vegetable crops.
- h) Direct production estimates of 'other crops' and 'non-food crops not classified elsewhere' are not available. The estimates of output for these crops are obtained by applying an appropriate average value of yield per hectare to the total area under these crops.
- i) The rates used for estimating production of fodder are on the basis of the study conducted in 2004-05 by the Socio-Economic Research Centre (SERC), New Delhi. The yield of cultivated Green Fodder has been estimated as under:
- 50 tonnes / hectare for irrigated land
 - 25 tonnes / hectare for un-irrigated land
- j) Grass is estimated on the basis of the combined area under permanent pasture, culturable waste, land under miscellaneous tree crops, fallow lands and net area sown (using the appropriate weights for different types of areas), which is based on NSS 1955-56 report. Fodder and grass are evaluated at producers' prices received from respective State/UT DES.
- k) Conversion of sugarcane into gur is an activity undertaken by the agriculturists. The total sugarcane production is divided into two parts viz. (i) sugarcane utilized as such and (ii) sugarcane converted into gur. While the former is evaluated at sugarcane prices, the latter is evaluated at corresponding gur prices. As the estimates of gur production are not

directly available, the same are worked out using information on quantity of sugarcane used for various purposes. The information on utilization of sugarcane as seed, for chewing, juice making etc., is gathered from the State Agricultural Departments, Directorate of Marketing and Inspection and the CCS. The quantity of sugarcane crushed by the factories for the manufacture of crystal sugar is obtained from the Directorate of Sugar & Vegetable Oils under Department of Food and Public Distribution, Government of India. The consumption of sugarcane for the production of Khandsari, Bura etc., is estimated separately for the registered and unregistered establishments from ASI and NSSO respectively. Out of the total sugarcane, the quantity of sugarcane left over after allowing for the above uses is assumed to have been converted into gur.

- l) The conversion rates from sugarcane to gur are taken from benchmark study. Bagasse obtained as a by-product during conversion of sugarcane into gur is estimated as 35% of gur production as estimated by SERC.
- m) For the purpose of this publication, the crops which do not have significant contributions in the respective groups are clubbed under 'Other' sub-group of the corresponding group. Data on these crops is available from LUS. Such information is obtained through MoAgFW and respective State/UT DES.

2.2 Valuation of output of livestock

2.2.1 For estimating value of output from livestock, the livestock products are divided into 7 broad groups *viz.* (i) milk, (ii) meat, (iii) eggs, (iv) wool and hair, (v) dung, (vi) silk worm cocoons & honey, and (vii) increment in livestock.

2.2.2 The main source of data for production estimates of milk, egg, meat is Integrated Sample Survey (ISS), conducted by DAHD, and Livestock Census. The output of milk comprises milk consumed or sold in liquid form, ghee, butter and lassi produced by the producer households. In some States/UTs, namely Mizoram, Sikkim, Dadra & Nagar Haveli and Delhi; goat and buffalo milk are not estimated by DAHD. For a few other smaller States/UTs, either production of goat milk or production of buffalo milk is not available. Production of milk in such cases is estimated by using yield rate prevalent in the neighbouring States and the production so estimated is added to the production estimated

by DAHD. Production of camel milk is also estimated by using the yield per camel in Gujarat, Haryana and Rajasthan.

2.2.3 Meat group comprises of meat (including edible offal & glands and poultry meat), meat products (fats, heads, legs etc.) and meat by-products comprising hides (cattle and buffalo hide), skins (goat and sheep skin) and other products like guts, blood, bones, horns, hoofs etc. The estimates of meat products and meat by-products are based on the number of slaughtered animals and fallen animals, wherever applicable and the corresponding yield rates. In the 2011-12 series, the ratio of meat and meat by-products to total meat produced in terms of value and quantity for each species of livestock as estimated by NRCM, Hyderabad has been used in estimation of value of total output of meat. The ratio (in percentages) of meat products & meat by-products to total meat as per NRCM study for cattle, buffalo, goat, sheep and pig are as follows: Cattle- 16.0%; Buffalo- 14.49%; Goat- 21.59%; Sheep- 23.05%; and Pig- 9.4%.

2.2.4 Estimation of production of 'wool and hair' from camel and pig not covered under ISS is based on yield rate of hair from camel provided by SERC and yield rates of pig bristles from type study conducted by CSO in 2004-05. Currently, average yield rate of hair from single humped camel is 800 gm./animal/year and that of a double humped camel is 3.0 kg/animal/year. Average yield rates of pig bristles are estimated as 155 gm./animal/year.

2.2.5 The estimates of production of dung are prepared on the basis of information on population and evacuation rates supplied by DAHD. For the States/UTs, where estimates are not available, the rates pertaining to the adjoining States along with the annual estimated animal population are used for arriving at the dung production estimates. Dung is used as manure as well as fuel. The utilization rates of dung for (i) dung used as manure and (ii) dung used as fuel is supplied by DAHD. In 2011-12 series, the value of evacuation/droplet from goat and sheep has been estimated by using results of a joint study by Central Institute for Research on Goats and National Centre for Agricultural Economics and Policy Research on 'Positive Environmental Externalities of Livestock in Mixed Farming Systems of India' published in year 2013. The evacuation rate, as per this study, for goat is 0.3 kg per day and for sheep is 0.8 kg per day. The value of droplets is estimated using the prices of dung and grouped with the estimates of dung.

2.2.6 The annual production estimates of silk worm cocoons by types (viz. mulberry, tassar, eri and muga) and honey are obtained from Central Silk Board and HSD respectively.

2.2.7 The annual net increase in the livestock population in each State/UT is estimated separately for each category of livestock on the basis of the projected population. The population has been projected on the basis of growth rates observed between two Livestock Censuses i.e. ILC 2003 and ILC 2012 for the years 2011-12 to 2016-17 and ILC 2012 and ILC 2019 for the years 2017-18 onwards. For any particular State/UT, if the calculation-based increment is negative, then it was estimated as 'zero'.

2.2.8 Evaluation of Livestock production is done by multiplying the quantities of production by the corresponding producers' prices. The state-wise prices are worked out as the simple average of all available price observations of the Livestock products.

2.3 Valuation of output of forestry and logging

2.3.1 The data on production and prices of industrial wood and non-timber forest products as well as on prices of fuelwood are supplied by the SFDs. The data on production of industrial wood generally relates to the quantities sold/auctioned at the assembling centres by the SFDs. In the case of minor forest products, the information on their production is generally not available. However, information is built up on the basis of royalty received (in value terms) from those authorized to exploit these minor forest products from the forests. The value of non-timber forest products could be the royalty figures or the economic value derived from the royalty figures. The estimates of production of fuelwood are prepared on the basis of quinquennial consumer expenditure surveys of NSSO.

2.3.2 The estimates of value of output at current prices of industrial wood are prepared by multiplying the category-wise production figures with their respective average annual prices (at the assembling centres), both of which are supplied by the SFDs. However, this information relates only to authorized produce of Government forests. In addition to the production of industrial wood from these Government forests, there would be (i) authorized (but unrecorded) and unauthorized removals of timber from reserved/protected forests and (ii) unrecorded production from private owned forests and

non-traditional forest areas (e.g. trees in village common fields, ridges, canal sides, road sides, fruit trees no longer productive etc.). The authorized removals are those done by the right-holders staying in the periphery of natural forests and are generally not recorded in the official records of production. In order to account for the production of industrial wood, a norm of 10% of recorded production (as reported by the SFDs) is adopted. However, it has been observed that there is a considerable production of wood from social forests and other plantations outside forests. Therefore, in the 2004-05 series, data on industrial wood produced from TOF has been included in the output estimates of forestry sector, in consultation with the Ministry of Environment, Forest and Climate Change. The data on output of industrial wood from TOF has been provided by FSI. Further, volume of wood from TOF has been estimated using potential production of Timber as estimated by FSI and the annual linear growth rate has been applied to extrapolate for the subsequent years.

2.3.3 Data on quantity and producers' prices of most of NTFP are available from the SFDs. Latest share of fodder from forest has been updated using ISFR 2013 and WPI for cattle feed.

2.3.4 The quantity/output of fuelwood is estimated through consumption approach, as reliable estimates on production of fuelwood are not directly available. Data on prices are available from respective State/UT DES. The estimated production of fuelwood is based on three components, namely (i) household fuelwood consumption, (ii) agricultural by-products i.e. straw and sticks used as fuelwood (this amount is to be subtracted from the total consumption of fuelwood by the households, as it is already accounted for in the agriculture sector as by-products) and (iii) fuelwood consumed by industries, religious and other social rituals. The estimated value of output of fuelwood is based on (a) the estimation of fuelwood consumption as available from the Quinquennial Surveys of Consumer Expenditure, conducted in the NSS 68th Round (2011-12), (b) subtracting from the household total consumption of fuelwood estimated from NSS data, the actual estimates of value of output of agricultural products, namely cotton sticks, arhar sticks, jute sticks, sesamum sticks, rapeseed sticks, sunflower sticks, castor sticks and bagasse (this gives the total firewood consumption from forest sources) and (c) estimating afresh the consumption of firewood used for industries, religious and other social rituals to arrive

at a ratio. In the current series, the ratio of consumption of firewood used for industries, religious and other social rituals to total firewood consumption is 7.64%.

2.4 Valuation of output of fishing and aquaculture

2.4.1 Data on estimated landings of marine fish, prices and value of fish catch are directly obtained from the concerned State/UT Department of Fisheries (SDF) of maritime States/UTs. For estimation of marine fish production, almost all maritime States/UTs follow statistical sampling design. The produce of prawns is separately valued.

2.4.2 The data supplied by the most of the SDFs include production from subsistence fishing. For remaining States/UTs, subsistence fishing is estimated at 12.5% of inland fish production. This ratio has been arrived at on the basis of type studies conducted by a few State Governments.

2.4.3 Most maritime States/UTs resort to allied activities of fish curing, which include salting and sun-drying of fish. The data on quantities and prices of fish let-in (raw fish going into salting, sun-drying and frozen purposes) and fish let-out (the resultant salted, sun-dried and frozen fish) is also available from the SDFs.

2.4.4 For estimating value of output, the average annual auction prices of marine fish (species-wise) collected by the SDFs at the landing centres and the inland fish prices reported by the SDFs from the assembling centres, are used.

2.5 The users may refer for further details on the methodology of estimation cited in the NSO publication entitled 'National Accounts Statistics, Sources and Methods, 2012' and 'Changes in Methodology in the New Series on National Accounts (Base Year 2011-12)'.

2.6 The value of output in respect of 138 crops or crop sub-groups, 7 livestock groups, 3 forestry groups and 2 fisheries groups have been presented in this brochure. For each group, information on State-wise value of output for 2011-12 to 2023-24 is given in the form of two statements. The first statement contains information at current prices followed by a statement containing the information at constant (2011-12) prices.

2.7 The users of this brochure may take into note the following points while analysing the information:

2.7.1 It may be recalled that the price data for all the items of output are supplied by the concerned State/UT DES. In certain cases, when the State DES is unable to get the prices of certain items in a year, base year prices are usually quoted by the States. As a result, the Statements presented here contain few items where the values at both current and constant prices are identical for some of the years.

2.7.2 Where output of items is computed using residual approach, there is a possibility of negative value of production of such items. In such cases, value of output has been estimated as 'zero'.

2.7.3 At all India level as-well-as at State/UT level, there are few crops *viz.* nutmeg, moong, turmeric, garlic, mango, lemon, pear, pomegranate, watermelon, rubber, guar seed etc., where the current price estimates of value of output are less than those at constant prices due to higher prices in 2011-12.

2.7.4 In the Statements published in this report, Jammu & Kashmir represents combined data for the UTs of Jammu & Kashmir and Ladakh.

3. Salient Features and Summary Results

3.1 Agriculture and allied sector accounts for 17.8% of India's GVA at current prices during 2023-24. The sector's GVA rose from ₹1,502 thousand crore in 2011-12 to ₹4,878 thousand crore in 2023-24, growing by over 225% during the same period. Despite the strong absolute growth, its relative contribution to overall GVA has declined due to faster growth in non-agricultural sectors. While agriculture continues to grow and remains critical for employment and rural livelihoods, the economy is increasingly driven by industry and services. This trend underscores the need for agricultural modernization and diversification to ensure rural growth keeps pace with broader economic progress. At all India level, total cropped area has increased by 66.1 percent in 2021-22 as compared to 1950-51 (131.89 million hectares in 1950-51 to 219.15 million hectares in 2021-22).³

Table 1: Share of agriculture and allied sectors in total GVA at current prices⁴
(₹ '000 Crore)

Year	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22	2022-23	2023-24
% share	18.5	18.2	18.6	18.2	17.7	18.0	18.3	17.6	18.3	20.4	18.9	18.1	17.8

Figure 2: Comparison of GVA of agriculture and allied sectors with non-agricultural sectors at current prices

3.2 Value of output of Agriculture and allied sectors at constant (2011-12) prices

3.2.1 Table 2 below presents the GVO at constant (2011-12) prices of the four main sub-sectors, viz. crop, livestock, forestry & logging and fishing & aquaculture of agriculture and allied sectors. The overall GVO from the agriculture and allied sector in India has shown steady growth from ₹1,908 thousand crore in 2011–12 to ₹2,949 thousand crore in 2023–24, marking an overall increase of approximately 54.6%. In spite of being the largest contributor in agriculture and allied sectors, a decline in the contribution of crop sub-sector has been observed from 62.4% in 2011-12 to 54.1% in 2023-24 (Figure 3). Livestock GVO nearly doubled, from ₹488 thousand crore to ₹919 thousand crore making it one of the fastest-growing components of the sector. ‘Forestry and Logging’ sector has displayed moderate but consistent growth from ₹149 thousand crore to ₹227 thousand crore during 2011-12 to 2023-24. ‘Fishing and aquaculture’ sub-sector is becoming increasingly important within India's agricultural GVA due to its high growth rate, export potential, and employment generation and its contribution has significantly increased from 4.2% in 2011-12 to 7.0% in 2023-24. While the crop sector remains the backbone of Indian agriculture, livestock and fishing sectors have become increasingly significant contributors, showing robust and sustained growth. The data highlights a gradual diversification within the agricultural economy, reflecting changing demand patterns, policy support, and technological improvements.

Table 2: Value of output at constant (2011-12) prices (₹ '000 crore)

Item	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22	2022-23	2023-24
Crop	1191	1199	1257	1228	1207	1278	1332	1318	1386	1435	1477	1573	1,595

Figure 3: Shares (%) of crop, livestock, forestry and fishing in total GVO of Agriculture and allied sectors at constant prices

3.3 Value of output of crop sector at constant (2011-12) prices

Figure 4: Share (%) of different crop groups in GVO of Crop sector in 2011-12 and 2023-24 (at constant prices)

Note: Other includes indigo, dyes & tanning material, drugs & narcotics, floriculture and kitchen garden

3.3.1 Being the major contributor in Agriculture and allied sectors with around 54%, crop group wise share of GVO in total crop sector is presented in Figure 4 for the years 2011-12 and 2023-24. Total list of crops is divided into the following 13 groups, namely, (i) cereals, (ii) pulses, (iii) oilseeds, (iv) sugars, (v) fibres, (vi) indigo, dyes and tanning materials, (vii) drugs and narcotics, (viii) condiments and spices, (ix) fruits and vegetables, (x) floriculture, (xi) other crops, (xii) by-products and (xiii) crops produced in kitchen garden. Table 3 shows the GVO of these groups of crops at constant (2011-12) prices.

3.3.2 Figure 4 shows that ‘cereals’ and ‘fruits & vegetables’ are the two groups which together accounted for around 52% in total GVO of the crop sector for the year 2023-24. GVO of cereals at ₹427.6 thousand crore is the highest among all groups in 2023-24, followed by ‘fruits and vegetables’ with ₹410.0 thousand crore & Oilseeds with ₹139.2 thousand crores.

3.3.3 Share of ‘spices and condiments’ has increased from 3.9% in 2011-12 to 5.9% in 2023-24, suggesting rising domestic and export demand for spices, possibly aided by improved processing and branding. Share of GVO of a few crop-groups, viz., ‘fibres’, ‘by-products’ and ‘cereals’ have marginally reduced in 2023-24 compared to 2011-12. Table 3 presents the GVO of crop sector for all the years of the 2011-12 series of National Accounts. The data reveals a structural shift in Indian agriculture scenario, from traditional staples like cereals toward high-

value crops such as fruits, vegetables, and spices. This transition reflects technological shift, changing consumer preferences, market opportunities, and policy orientation toward nutritional security and export potential.

Table 3: GVO of different groups of crops at constant (2011-12) prices & percentage share of each group of crops in 2011-12 and 2023-24

(₹ '000 Crore)

3.3.4 Value of output of cereals at constant (2011-12) prices

3.3.4.1 The total GVO of cereals in India increased steadily from ₹336.4 thousand crore in 2011–12 to ₹427.6 thousand crore in 2023–24, reflecting continued importance of cereals in Indian agriculture. However, within this group, the relative contributions of individual cereals have shifted notably over time. Table 4 below presents the GVO of key crops in cereals group. GVO of Paddy was recorded the highest in the group at ₹224.7 thousand crores in FY 2023-24, followed by that of wheat at ₹141 thousand crores. Together both the items contributed almost 85% of the total output in cereals group. Share of paddy has grown by around 2% while that of wheat has declined by the same margin in 2023-24 as compared to 2011-12. Maize showed strong growth, with its share rising from 7.0% to 9.3% and GVO increasing from ₹23.5 to ₹39.6 thousand crore during 2011-12 to 2023-24. Contribution of coarse cereals, like bajra

and jowar, to total cereal GVO has reduced over the years despite minor fluctuations in their absolute value.

Table 4: Value of output of top 5 cereals at constant (2011-12) prices

Item	GVO (₹ '000 crore)												
	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22	2022-23	2023-24

Total cereals	336.4	330.5	340.0	325.9	325.6	347.2	356.8	363.3	377.6	394.1	398.3	419.3	427.6

Figure 5: Share of value of output of top 3 cereals at constant (2011-12) prices

3.3.4.2 State/UT wise output of cereals for top 5 States based on share in GVO at constant prices in 2023-24 have been presented in Table 5 below. These five States comprise almost 52% of the total value of output of cereals. The maximum output was recorded by Uttar Pradesh with a share of around 17% in total output of cereals in the country, followed by Madhya Pradesh and Punjab in FY 2023-24. Comparing the percentage share in FY 2011-12 and 2023-24, output of cereals in Madhya Pradesh has increased by 480 basis points. Despite being the largest contributor in absolute terms throughout the period, share of Uttar Pradesh declined significantly from 18.6% in 2011-12 to 17.2% in 2023-24. Decline in percentage share is also observed in case of Punjab and Haryana from 2011-12 to 2023-24. GVO of cereal group for Telangana has almost tripled, rising from ₹10.5 thousand crore to ₹30.4 thousand crore. The data reveals minor restructuring in cereal production across Indian States. While traditional leaders like, Uttar Pradesh and Punjab retain large shares, States like Madhya Pradesh and Telangana have made significant gains.

Table 5: Value of output of cereals at constant (2011-12) prices: Top 5 States in 2023-24

State	GVO (₹ '000 crore)												
	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22	2022-23	2023-24
Uttar Pradesh	62.6	63.0	62.9	50.0	53.8	62.1	63.7	68.3	69.9	72.3	69.3	70.9	73.6

Figures 6.1 and 6.2: Share (%) of top five States for value of output of cereals at constant (2011-12) prices in 2011-12 and 2023-24

3.3.5 Value of output of ‘fruits & vegetables’ and floriculture at constant (2011-12) prices

3.3.5.1 There has been a steady growth in the output of ‘fruits & vegetables’ ranging from ₹270.1 thousand crore in FY 2011-12 to ₹410.0 thousand crore in FY 2023-24 at constant (2011-12) prices as presented in Table 6. Though the share of vegetables has decreased marginally from 56.5% to 55.0% during the period 2011-12 to 2023-24, it remains the major contributor in this group. Floriculture experienced significant growth, nearly doubling from ₹17.4 thousand crore in 2011–12 to ₹28.1 thousand crore in 2023–24, reflecting rising commercial interest and diversification in horticulture.

3.3.5.2 In the fruits group, Banana became the top contributor with its GVO share increasing from 9.3% to 11.5%, corresponding to value of output of ₹25.0 thousand crore to ₹47.0 thousand crore from 2011-12 to 2023-24. Mango maintained a consistently strong presence,

with a marginal decrease in share from 12.5% to 11.2%, and a GVO increase from ₹33.7 thousand crore to ₹46.1 thousand crore. Banana and Mango together accounted for approximately 50% of the GVO of total fruit group. Pomegranate recorded substantial growth, with GVO rising from ₹2.1 thousand crore to ₹9.2 thousand crore, and share increasing by 150 basis points. Orange had a modest increase in value, but a small rise in share from 3.3% to 3.8%. Output value of lemon has increased nearly threefold, with its share rising from 1.8% to 3.0%.

3.3.5.3 Share of GVO of potato is highest with ₹37.2 thousand crores in the vegetables group, followed by onion, tomato, brinjal and cauliflower in FY 2023-24. Value of output of onion grew from ₹13.6 thousand crore to ₹27.4 thousand crore, with corresponding share increasing from 5.0% to 6.7% during the period 2011-12 to 2023-24. Tomato, brinjal and cauliflower saw stable growth, though with a small drop in relative share. In the total GVO of the vegetables group, potato, onion and tomato together accounted for around 39% in FY 2023-24. Share of remaining vegetables maintained almost the same during this period.

3.3.5.4 The composition of State-wise contributions to the GVO for ‘fruits and vegetables’ and floriculture has changed noticeably from 2011–12 to 2023–24, indicating shifts in production dynamics and regional agricultural growth. Table 7 below lists the top States contributing the maximum share of ‘fruits and vegetables’ and floriculture in India in FY 2023-24. Uttar Pradesh reported the highest share in this group for 2023-24 at 11.8%, followed by West Bengal and Madhya Pradesh at 11.1% each. Uttar Pradesh experienced a substantial rise in its share of national ‘fruits and vegetables’ and floriculture output from 7.2% in 2011–12 to 11.8% in 2023–24. The State’s GVO steadily rose, more than doubling from ₹20.6 thousand crore in 2011–12 to ₹51.7 thousand crore in 2023–24. West Bengal’s share declined slightly from 13.9% to 11.1%, despite an overall increase in absolute GVO from ₹40.1 thousand crore to ₹48.8 thousand crore. Madhya Pradesh saw one of the most notable growth trajectories, increasing from 6.3% in 2011–12 to 11.1% in 2023–24. GVO for this group in Madhya Pradesh nearly tripled over the period, indicating both area expansion and increase in production. The contribution of Maharashtra and Tamil Nadu to GVO of this group in 2023–24 is broadly consistent with their shares in 2011–12. The reconfiguration in the inter-state contribution of value of output of ‘fruits and vegetables’ and floriculture group highlights changing patterns in State-level diversification in the horticulture sector.

Table 7: Value of output of fruits and vegetables and floriculture at constant (2011-12) prices: top States in 2023-24

State	GVO (₹ '000 crore)												
	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22	2022-23	2023-24

3.3.6 Value of output of oilseeds at constant (2011-12) prices

3.3.6.1 The total GVO of oilseeds rose steadily from ₹106.7 thousand crore in 2011–12 to ₹139.2 thousand crore in 2023–24. GVO of oilseeds from 2011-12 to 2023-24 and their percentage share are given in Table 8 and Figure 9 respectively. The composition of GVO within the oilseeds group has experienced notable shifts over the period from 2011–12 to 2023–24. Rapeseed and mustard emerged as the dominant contributor in FY 2023–24, accounting for around 30% of the total oilseeds output value. This marks a significant rise of 9.5 percentage points from 20.9% in 2011–12. In contrast, shares of soyabean and castor declined by 520 and 360 basis points respectively in 2023–24 as compared to 2011-12.

Table 8: Value of output of top 5 oilseeds at constant (2011-12) prices

Item	GVO (₹ '000 crore)												
	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22	2022-23	2023-24

Figure 9: Comparison of percentage share of value of output for top 5 oilseeds at constant (2011-12) prices between 2011-12 and 2023-24

3.3.6.2 Top 3 States, namely Rajasthan, Gujarat and Madhya Pradesh contributed more than 50% in the all India output of oilseeds in 2023-24 as can be seen from Figure 10.2. The highest amount of growth was shown by the State of Rajasthan taking its percentage share in the overall contribution of oilseeds from 17% in 2011-12 to 21.9% in 2023-24. Marginal decline in share was seen in Madhya Pradesh, Maharashtra and Tamil Nadu in 2023-24 as compared to the base year. Table 9 below gives the value of output of oilseeds for the entire series for top five States in 2023-24.

Table 9: Value of output of oilseeds at constant (2011-12) prices: top 5 States in 2023-24

States	GVO (₹ '000 crore)

Figures 10.1 and 10.2: Share (%) of top five States for value of output of oilseeds at constant (2011-12) prices in 2011-12 and 2023-24

3.3.7 Value of output of pulses at constant (2011-12) prices

3.3.7.1 The total GVO of pulses rose steadily from ₹52.2 thousand crore in 2011–12 to ₹74.6 thousand crore in 2023–24, reflecting both production increase and growing price trend as depicted in Table 10. Gram has the highest share contributing nearly 43% in 2023-24 out of the total GVO of pulses group. Share of moong has increased significantly by 310 basis points during 2011-12 to 2023-24. GVO of moong has increased to ₹10.9 thousand crore in 2023-24 from ₹6 thousand crore in 2011-12. Arhar and Urd share dropped marginally since 2011-12, although holding a significant share of around 26% in the overall value of output of pulses in 2023-24.

Table 10: Value of output of top 5 pulses at constant (2011-12) prices

Item	% share 2011-12	GVO (₹ '000 crore)													% share 2023-24
		2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22	2022-23	2023-24

Figure 11: Value of output of pulses at constant (2011-12) prices

3.3.7.2 Madhya Pradesh with 22.5% share in GVO in FY 2023-24 maintained its top position in the pulses production as can be seen from Table 11 presenting value of output of pulses during 2011-12 and 2023-24 for the top five States as per 2023-24. Uttar Pradesh and Rajasthan reported a marginal decline in their respective share as compared to the year 2011-12. GVO of pulses group for Maharashtra has increased from ₹6.9 thousand crore in 2011-12 to ₹11.6 thousand crore in 2023-24, with an improved share of 15.6%. Top three States of Madhya Pradesh, Maharashtra and Uttar Pradesh together account for almost 50% of the value of pulses in the country in 2023-24.

3.3.8 Value of output of fibres at constant (2011-12) prices

3.3.8.1 The output of fibres has significantly reduced since 2011-12, from almost ₹82 thousand crore to ₹74.5 thousand crore in 2023-24 as given in Table 12. Kapas (cotton) remains dominant throughout the period, with its share fluctuating but ending slightly higher at 94.8% in 2023–24 from 94.5% in 2011–12. Jute saw a slight decline, ending at 4.9% in 2023–24, down by 0.2% in comparison to 2011–12.

Table 12: Value of output of fibres at constant (2011-12) prices

Item	% share 2011-12	GVO (₹ '000 crore)													% share 2023-24
		2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22	2022-23	2023-24

3.3.8.2 Table 13 presents top 5 States with share in value of output of fibres in FY 2023-24. Although Gujarat reported the highest output for the year 2023-24, its share has substantially declined from 40.3% to 33.4% since the base year. Both Maharashtra and Telangana had shown a significant increase by around 4% in 2023-24 as compared to 2011-12.

Table 13: Value of output of fibres at constant (2011-12) prices: Top 5 States in 2023-24

3.3.9 Value of output of 'Condiments & spices' at constant (2011-12) prices

3.3.9.1 The output of 'condiments & spices' has doubled over the entire duration, rising from ₹46.4 thousand crore in FY 2011-12 to ₹94.7 thousand crore in FY 2023-24, measured at constant (2011-12) prices as presented in Table 14. In the condiments & spices group, Chillies had the maximum share with ₹21 thousand crores in 2023-24. Arecanut grew steadily, peaking at 16.6%, showing strong market demand. Approximately 50% of the GVO for the 'condiments & spices' group was collectively accounted for by Chillies, Arecanut, and Cumin in 2023-24. The output of dry ginger has witnessed a remarkable surge, rising from ₹2.9 thousand crore in FY 2011-12 to ₹11 thousand crore in FY 2023-24, at constant (2011-12) prices.

Figure 14: Change in percentage share of output for top 5 condiments & spices at constant (2011-12) prices between 2011-12 and 2023-24

3.3.9.2 Value of output of 'condiments & spices' for top 5 States in 2023-24 is given in Table 15. Share of Madhya Pradesh (19.2%) made a dramatic leap becoming the top contributor in this group, while Karnataka and Gujarat followed with 16.6% and 15.5%, respectively. Madhya Pradesh experienced a substantial rise in its share of national 'condiments and spices' output. Its contribution increased from 3.8% in 2011-12 to 19.2% in 2023-24 with GVO increasing from ₹1.8 thousand crore in 2011-12 to ₹18.2 thousand crore in 2023-24. More than 50% of the total contribution comes collectively from Madhya Pradesh, Karnataka, and Gujarat. Share of Andhra Pradesh and Telangana has shown insignificant changes in 2023-24. Though the GVO of Kerala remains almost stable over the period, its share in the total GVO has declined from 9.0% (2011-12) to 5.1% (2023-24).

3.3.10 Value of output of sugars at constant (2011-12) prices

3.4.10.1 Table 16 displays value of output of sugar crops during 2011-12 to 2023-24. Sugarcane maintained a dominant position, though its share declined slightly from 79.1% in 2011-12 to 75% in 2023-24. Value of output of Gur (jaggery) rose from 20.5% to 24.8%, reflecting increased value-added production in this group.

Table 16: Value of output of sugar crops at constant (2011-12) prices

Item	GVO (₹ '000 crore)												
	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22	2022-23	2023-24

Figure 16: Share of value of output of Sugar Crops at constant (2011-12) prices

3.3.10.2 State of Uttar Pradesh alone accounted for almost 55% of value of output of sugar crops in 2023-24, thereby strengthening its lead in the national board as can be seen from Table 17 presenting value of output of sugar crops for top 5 States in 2023-24 for the entire series. Despite certain fluctuations, Maharashtra maintained its share at around 18.4%. Tamil Nadu has shown a major decline of 7.7% in the GVO of sugar crops since the base year. Shares of Bihar and Gujarat remained stable during the period of reference.

Table 17: Value of output of sugar crops at constant (2011-12) prices: Top States in 2023-24

3.4 Value of output of livestock sector at constant (2011-12) prices

3.4.1 Livestock sector has witnessed a significant boom during the last decade with total value of livestock products spanning from ₹487.8 thousand crore to ₹919.3 thousand crore as can be seen from Table 18. An astounding growth of around 88% in the value of total outputs has been recorded by this sector. Milk remains the backbone of the livestock sector with highest share of almost 66%, though its share fell slightly, suggesting faster growth in other segments. Meat is the fastest-growing component, increasing its share from 19.7% to 24.1% and GVO by 130%. With its share remaining relatively constant, value of eggs grew modestly during the period under consideration. Other livestock products (wool, hides, silk etc.) saw relative decline, indicating a shift in economic importance. The livestock sector has grown at a faster rate, outpacing several crop categories.

Table 18: Value of output of livestock products at constant (2011-12) prices

item	% share 2011-12	GVO (₹ '000 crore)													% share 2023-24
		2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22	2022-23	2023-24	
Milk group	67.2	327.8	339.2	352.2	374.3	396.7	421.7	449.2	478.6	505.1	534.1	564.2	584.0	605.9	65.9

Figure 17: Comparison of percentage share of output of livestock products at constant (2011-12) prices during 2011-12 and 2023-24

3.4.2 The composition of State-wise contributions to the GVO of livestock sector has broadly remained similar during the past decade. However, shift in the absolute value is indicating towards shifts in production dynamics and regional growth. Table 19 below lists the top five States in 2023-24 based on the value of output of livestock sector in India. Uttar Pradesh, although still the top producer by absolute value, has lost share, from 14.9% to 12.7%. Tamil Nadu showed the highest relative growth among major States with approximately 2.5 times increase in GVO and a gain of 2.2 percentage points in share. A hike of around 200 basis points has been reported by Rajasthan in total value of livestock products as compared to 2011-12. Andhra Pradesh and Maharashtra maintained stability with modest growth.

Table 19: Value of output of livestock at constant (2011-12) prices: Top 5 States in 2023-24

State	GVO (₹ '000 crore)												
	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22	2022-23	2023-24

All India	487.8	508.1	531.0	562.0	595.2	641.2	671.2	717.1	760.3	799.3	842.2	878.3	919.3

Figures 18.1 and 18.2: Share (%) of top five States for value of output of livestock at constant (2011-12) prices in 2011-12 and 2023-24

3.5 Value of output of 'forestry and logging' at constant (2011-12) prices

3.5.1 There has been a steady growth in the output of forestry sector ranging from ₹148.7 thousand crore in FY 2011-12 to ₹227.5 thousand crore in FY 2023-24 at constant (2011-12) prices as presented in Table 20. Industrial wood became the dominant item with share hike from 49.9% to 70.2%. GVO of industrial wood (from forest and trees outside forest) has more than doubled from ₹74.3 thousand crore in 2011-12 to ₹159.6 thousand crore in 2023-24. Decline observed in value of firewood over the years from 32.3% to 18.3% reflects rural electrification, LPG adoption, and urbanization. Non-timber forest products also witnessed slight decline in GVO over the period. Even though share of forestry in overall agriculture and allied sector GVO is comparatively insignificant, this sector provides rural employment, offers climate co-benefits, supports industries like furniture, bioenergy etc.

Table 20: Value of output of forest products at constant (2011-12) prices

item	GVO (₹ '000 crore)												
	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22	2022-23	2023-24

Figure 19: Comparison of percentage share of output of forestry & logging at constant (2011-12) prices during 2011-12 and 2023-24

3.5.2 State/UT wise output of forestry sector for top producing States based on share in GVO at constant prices in 2011-12 and 2023-24 have been presented in Table 21 below. The maximum output was recorded by Maharashtra with a share of 16.5% in total output of forestry products in the country, followed by Rajasthan and Uttar Pradesh in FY 2023-24. GVO of Maharashtra has more than doubled from ₹18.1 thousand crore in 2011-12 to ₹37.6 thousand crore in 2023-24. It is observed that Odisha and Madhya Pradesh are also expanding their forestry output while Rajasthan and Uttar Pradesh have witnessed minor decline in total output value over the years.

Table 21: Value of output of forestry and logging at constant (2011-12) prices: Top 5 States in 2023-24

State	GVO (₹ '000 crore)												
	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22	2022-23	2023-24

Figures 20.1 and 20.2: Share (%) of top five States for output of forestry and logging at constant (2011-12) prices in 2011-12 and 2023-24

3.6 Value of output of ‘fishing and aquaculture’ at constant (2011-12) prices

3.6.1 Fishing and aquaculture sector displays an ever-increasing trend in the value of output since 2011-12. GVO of this sector has more than doubled during this period. This sector contributes to the allied segment of agriculture sector, alongside livestock and ‘forestry & logging’. Performance of this sector outpaces other allied sectors with an increase of over 158% since the base year. Marine fishing has nearly caught up with inland fishing in GVO share. However, in absolute terms, value of inland fish has more than doubled from ₹46.2 thousand crore in 2011-12 to ₹103.9 thousand crore in 2023-24, while the same for marine fish has almost tripled during the same period rising from ₹33.9 thousand crore to ₹103.3 thousand crore as given in Table 22. It may be noted that output of marine fishing includes entire output of prawn, be it inland or marine. Growth in marine output can be attributed to deep-sea fishing expedition, export led demand, investments in cold storage and marine infrastructure.

Table 22: Value of output of fishing and aquaculture based on constant (2011-12) prices

Figure 21: Comparison of percentage share of output for fishing and aquaculture product at constant (2011-12) prices between 2011-12 and 2023-24

3.6.2 The composition of State-wise contributions to the GVO for ‘fishing and aquaculture’ has remained mostly similar during 2011–12 to 2023–24, but with major shifts in value of production in the leading States. Table 23 below lists the top States contributing the maximum

share of fishing activities in India in 2023-24. Andhra Pradesh dominates the sector in 2023–24 with a massive 39.1% share, mostly due to export-oriented shrimp farming, infrastructure support and inland aquaculture expansion. Value of GVO for Andhra Pradesh has increased from ₹14.2 thousand crore in 2011-12 to ₹81.1 thousand crore in 2023-24 witnessing an increase of over 470% during this period. Share of West Bengal has declined by 10 percentage points shifting it to the second major producing State in the country as per the latest estimates of 2023-24. Odisha experienced modest growth while the other major fish producing States have recorded minor decline over the years.

Table 23: Value of output of fishing and aquaculture at constant (2011-12) prices: Top 5 States in 2023-24

State	GVO (₹ '000 crore)
