A NOTE ON SURVEY ON GENERAL INFORMATION ON ELECTRIFICATION IN RURAL AREAS, NSS, THIRTYFIRST ROUND

1. INTRODUCTION

A survey on the use of power (electricity/diesel) in rural areas was conducted in the thirtyfirst round of the National Sample Survey (NSS) in the agricultural year July 1976 to June 1977. The survey covered the whole of rural India excepting the States of Nagaland and Sikkim; district Ladakh of Jammu & Kashmir; tehsils Pal and Samni of district Surguja and tehsils Bijapur, Danteware, Konta and Naryanpur of district Bastar of Madhya Pradesh; tehsils Rajura, Sironcha and Gadh-Chiroli of district Chandrapur and tehsil Melghat of district Amravati of Maharashtra and Union Territories of Andaman & Nicobar Islands, Arunachal Pradesh, Chandigarh, Dadra & Nagar Haveli, Lakshadweep and Mizoram.

2. SAMPLE DESIGN

The basic design was a stratified two-stage one with villages as first-stage units and households as second-stage units. The list of 1971 census villages was used as the sampling frame for the selection of sample villages. A total of 8472 sample villages was selected for survey; out of which 8461 villages were actually surveyed and the remaining 11 samples became casualty. The sample villages were drawn in the form of two independent sub-samples to keep provision for calculation of errors and four independent sub-rounds to get proper seasonal representation of the data collected during the year.

3. STRATIFICATION

Each State/Union Territory was divided into a number of regions by grouping contiguous districts (tehsils in Gujarat) having similar crop-pattern, density of population in rural areas and other socio-economic and topographical features. The country was divided into a total of 64 regions and each region was divided into a number of strata. In general, each district was treated as a stratum. However, larger districts, having 1971 census rural population of 1.5 million or more, were divided into a number of strata, depending on their 1971 census rural population count, by grouping contiguous tehsils having similar characteristics.

4. ALLOCATION

The all-India sample size of 8472 villages was distributed to different States and Union Territories

taking into consideration the respective strength of field staff available to conduct the survey. The total number allocated for a State or Union Territory was further allocated to its constituent regions in proportion to the respective total irrigated area of the region. This was done in consideration of another major enquiry, namely, a Survey on the use of irrigation conducted in the same set of sample villages alongwith the enquiry on the use of power. Lastly, the number allocated for a region was distributed over its constituent strata in proportion to 1971 census rural population of the strata.

5. SELECTION OF VILLAGES

Within each stratum, sample villages were selected with probability proportional to population and with replacement. Unit of selection was the census village. In cases where the census villages could not be uniquely identified, the corresponding revenue villages were surveyed. Sample villages with large population were divided into a number of hamlet-groups having nearly equal population and the survey was confined to one of the hamlet-groups selected at random.

6. INFORMATION COLLECTED

Information on electrification for the sample villages was collected from official records of local offices of the State Electricity Board or the concerned Authority and recorded in the village schedule 3.2 (general information on electrification). Data on length of H.T. and L.T. lines from transformer to village and within village, number of service connections by category of connection number of pending applications for service connection and capacity of transformer, if located in the village, etc., were collected.

Estimates generated from the enquiry Schedule 3.2 are presented in this report for different States and all-India.*

7. CONCEPTS AND DEFINITIONS

Concepts and definitions adopted for important items in the survey and given below.

*Results for Himachal Pradesh are not presented in the report for the present.

Village electrified :

A village was considered as electrified only, if there was at least one service connection (including street light) available to it. A village having a transformer or sub-station located within the village but without any service connection to it was not considered as electrified. Also villages which were having electricity/power not from a general grid but generated by a local auto-generator were not considered as electrified.

Category of service connection :

Different categories of service connections were defined as :

(a) *Domestic*

Domestic category related to the service connection provided for use of electricity for light, fan, radio, domestic appliances like beater, iron, etc., for domestic consumption only.

(b) *Agricultural*

Agricultural category related to the use of electricity for running the pump sets for irrigation of land for production of crops only.

(c) *Industrial/commercial*

Industrial/commercial category related to the use of electricity for industrial/commercial purposes.

8. ESTIMATION

Denoting by $\hat{Y}$ the estimate a character for a State/Union territory and using the notations:—

r : Subscript for r -th region of a State/Union territory

s : subscript for s -th stratum

i : subscript for i -th surveyed village/hemlet-group

f : adjustment factor for surveying revenue village

m : number of surveyed villages

p : village population (used for selection)

P : total rural population (used for selection)

y : value of a characteristic

$\hat{Y}$ was estimated as :

$$\hat{Y} = \sum_r \sum_s \frac{P_{rs}}{m_{rs}} \sum_{i=1}^{m_{rs}} \frac{y_{rsi}}{f_{rsi} P_{rsi}}$$

where $\sum_s$ denotes summation over all the strata in r -th region and $\sum_r$ denotes summation over all the regions in the State/Union territory.

9. SUMMARY OF RESULTS

.1 *Number of villages electrified :*

The results of the survey showed that about 1.98 lakh villages in the country were electrified as against 4.28 lakh of villages which were not electrified. In other words about 31 percent of the villages in the country could be electrified upto the date of the survey. It is also seen that of the villages which could not be electrified 11.7 percent (which is about 8 percent of all villages) were still under electrification scheme and for the remaining 88.3 percent of the villages not electrified (which is about 60 percent of all villages) there did not exist any such scheme. Among the villages under electrification scheme, work for electrification was initiated in only 34.3 percent cases. Again among those villages which were not under electrification scheme, the scheme of electrification was under preparation in 4.2 percent cases.

.2 *Period since electrified :*

Among the villages electrified it is seen that about 41 percent were electrified before 8 years or more, 24 percent before a period between 5 to less than 8 years and the remaining 35 percent before a period less than 5 years.

.3 *Total capacity of transformer :*

Total capacity of transformer installed to electrify 1.98 lakh of villages was about 22 millions KVA. In about 1.36 lakh of villages electrified, the transformers were located within the villages and were not servicing in distributing electricity to any area located outside the village, as against about 0.25 lakh of electrified villages which were servicing other villages also other than the villages within which the transformers were located and the remaining 0.37 lakh villages had no transformer located within the villages and were served by transformers located within other villages.

.4 *Average number of service connection :*

In all about 109 lakh connections were given to all villages which are electrified in the country. It is seen from Table (A) that on an average 54 connections were made per village in the country. The villages which were electrified and were supplying electricity to other villages which did not have any transformer located within them, had 72 connections on an average. These villages, i. e., those which had no transformers located within them and were receiving the energy from other villages, were found to have about 11 connections per village. Number of connections per village which had transformers located within the

village but did not serve any other village was about 62.

TABLE A

AVERAGE NUMBER OF CONNECTIONS BY TYPE OF VILLAGE ELECTRIFIED

type	number		no. of connections per village
	village (000)	connections (lakh)	
(1)	(2)	(3)	(4)
villages serving other villages	25.3	18.3	72
villages served by other village	36.5	3.9	11
villages served by themselves and not serving any other village	135.8	87.2	62
all type	197.6	109.4	54

.5 Length of electric lines:

Total length of electric lines installed for electrifying villages is shown in Table B. These electric lines were classified into two categories, viz., high tension lines and low tension lines. It is seen that a little more than 20 thousand kilometers of high tension electric lines and about 47 thousand kilometers of low tension electric lines were used to connect villages which had no transformer within the village, with transformer located outside the village. Again about 248 thousand kilometers of high tension electric lines and 1457 thousand kilometers of low tension electric lines were used to provide service connections within the villages.

TABLE B
TOTAL LENGTH OF ELECTRIC LINES IN KILOMETERS BY CATEGORIES OF ELECTRIC LINES : ALL INDIA

category	length of electric lines in km.	
	transformer (outside the village) to village	within village (to provide service connection)
(1)	(2)	(3)
high tension	20331	248202
low tension	47488	1457200

.6 Number of service connection

The Table C below shows that about 109.4 lakh of connections were provided in villages electrified so far, having a total connected load of 350.6 lakh kilowatts. It is also seen that in all about 785 thousand applications for obtaining connection were pending. Estimated total load for these pending connections were 25.8 lakh of kilowatts.

TABLE C

Note 1 : —column (2) indicates estimated number of villages found serving other villages also from the transformers located within itself and column (3) indicates estimated number of other villages so serviced.

2 : —column (4) indicates service connections in the villages which were served by transformers located outside the village.

3 : —columns (5) and (6) indicate service connections in the villages which were serving other villages also from the transformers located within itself.

5 : —Dash(—) indicates zero (0).

A NOTE ON SOME SELECTED IMPORTANT RESULTS OF THE SECOND QUINQUENNIAL SURVEY (NSS 32ND ROUND) ON EMPLOYMENT AND UNEMPLOYMENT FOR THE DIFFERENT STATES

INTRODUCTION

The second country wide quinquennial survey on Employment and Unemployment was carried out by the National Sample Survey Organisation (NSSO) in its 32nd round survey operations (July 1977—June 1978). Provisional estimates of two key indicators of employment and unemployment obtained through manual tabulation of selected items of data collected in this survey for the population of age 15-59 years have been released for all India and the different States/Union Territories in the NSSO Journal¹. Detailed results for all India and some important summary results for all-India and States/Union Territories with brief notes have also been released². The results based on detailed tabulation of data relating to the various States/Union Territories are being progressively released in the NSSO mimeographed report-series numbered 298/1, 298/2, etc. In this document 10 tables giving estimates of some basic items of information on both the household characteristics and the employment-unemployment characteristics of population collected in the survey are presented separately for the States of Assam, Delhi, Himachal Pradesh, Jammu & Kashmir and Karnataka. Results of Kerala, Madhya Pradesh, Rajasthan and Uttar Pradesh. Andhra Pradesh, Maharashtra, Bihar, Gujarat, Haryana, Punjab, Tamil Nadu & West Bengal has already been released³.

The details of sampling design, survey coverage estimation procedure and salient features of the conceptual frame and data collection procedure adopted in the survey are given in the Report² containing the all-India results. A brief summary of the scope and coverage of the survey, the concepts, definitions etc., is given below.

GEOGRAPHICAL COVERAGE

The survey covered the whole area of the Indian Union excepting Sikkim, Andaman & Nicobar

Islands, Lakshadweep, Dadra and Nagar Haveli, Ladakh District of Jammu and Kashmir, rural areas of Pal and Samri Tehsils of district Bastar of Madhya Pradesh, rural areas of Rajura, Sironcha and Gadchiroli Tehsils of district Chandrapur and Nelghat tehsil of district Amaravati of Maharashtra and rural areas of Chandigarh, Mizoram and Nagaland.

SAMPLING DESIGN AND SAMPLE SIZE

A stratified two-stage sampling design was adopted in the survey with census villages and urban blocks (Urban Frame Survey Blocks formed by NSSO) as the first stage units respectively for the rural and urban areas and households as the second stage units. But in the rural areas of the North Eastern States the first stage units were clusters of villages. Altogether 8820 villages and 4940 urban blocks were selected as the first stage units. In each of the selected first stage units, 12 households were selected as second stage units (for the rural areas of North Eastern Region, 24 households were selected from each cluster of villages).

SURVEY PERIOD AND SUB-ROUND FORMATION

The survey was started in July 1977 and was completed in June 1978. The entire survey period of one year was divided into four sub-rounds of three months each coinciding approximately with the four agricultural seasons. The four sub-round periods were : July—September 1977, October—December 1977, January—March 1978 and April—June 1978. The sample villages and blocks were distributed over the four sub-rounds in equal numbers so as to provide valid estimates for each of the sub-rounds.

ESTIMATION PROCEDURE

In order to reduce work-load at the tabulation stage and to provide estimates at the regional level, the following estimation procedure was adopted :

$$Y = y \times \frac{P}{\text{---}} \text{ where,}$$

¹"Employment-Unemployment situation in India during the seventies", *Sarvekshana*, Vol. III, No. 3.

²Report on the Second Quinquennial Survey on Employment and Unemployment (all India), *Sarvekshana*, Vol. V, Nos. 1-2, July—October 1981.

³*Sarvekshana*, Vol. VI, Nos. 1-2, July-Oct. 1982

- Y = estimated rural/urban total of a characteristic for any region for any sub-round/all sub-rounds
- γ = rural/urban sample total of the characteristic for the region for the sub-round/all sub-rounds
- P = projected rural/urban population of the region for January 1978 and
- p = total sample persons in the sample villages/blocks of the region surveyed in the sub-round/all sub-rounds.

The estimation was done separately for the rural and urban areas.

The values of 'P' have been arrived at using 'Estimates (provisional) based on Expert Committee projections tentatively revised in the light of 1971 Census data' [Source : Bulletin on Food Statistics, 25th Issue (1975), Table 1.2.] The estimates given in this set of projections relate to 1st July of each year. To centre them at 1 January 78 (the mid-point of the survey period covered by the 32nd round), the averages of the projected population figures for 1977 and 1978 have been used.

At the time of the preparation of this document, 1981 Census population tables have become available for each State and Union Territory, with break-down by residence status (rural/urban) and sex. Using these provisional figures and the corresponding population totals of 1971 Census, revised estimates of population as on 1 January 78 have been obtained by interpolation (assuming an exponential growth rate between the two censal time points) independently for males and females residing in urban and rural areas of each State. To make the estimates presented

here conform to the revised estimates, adjustment factors have been computed for each population group as the ratio of the revised estimates of population to the corresponding estimates given in the report. These ratios are given in the Table A. Each aggregate estimate may be multiplied by its corresponding adjustment factor (i.e. that of the population group to which it belongs) to obtain a revised estimate of aggregate.

Ratios (rates, percentages, etc.) involving distribution of any one State/Union Territory $\times$ residence status $\times$ sex group are unaffected by this adjustment. However, any ratio or proportion involving aggregation of more than one group will have to be built up by first computing the aggregate of its numerator and denominator separately by addition of relevant adjusted aggregates.

SALIENT FEATURES OF THE CONCEPTUAL FRAME AND DATA COLLECTION PROCEDURE

The main objective of the survey was to measure in quantitative terms, the nature and extent of employment and unemployment at disaggregated levels. To achieve this objective, the attempt in the survey was to classify the population as belonging to different activity categories, independently, by using three different approaches, namely, (i) the usual status approach, (ii) the current weekly status approach and (iii) the current day status approach. Persons distributed according to the various activity categories were further classified by several meaningful correlates, such as age, sex, general and technical education, industry, occupation, etc. The different activity categories, adopted for the purpose were as under :

DESCRIPTION OF THE ACTIVITY CATEGORY*

	CATEGORY CODE
Working with an employer under obligation but work not specifically compensated by any wage/salary	01-04
Worked (self-employed) in household enterprises	11
Worked as helper in household enterprises	21
Worked as regular salaried/wage employee	31
Worked as casual wage labour in public works	41
Worked as casual wage labour in other types of work	51
Did not work though there was work in household enterprise	61
Did not work but had regular salaried/wage employment	71
Sought work	81
Did not seek but was available for work	82
Attended educational institutions	91
Attended domestic duties only	92
Attended domestic duties and was also engaged in free collection of goods (vegetables, roots, fire-wood, cattle feed, etc.) sewing, tailoring, weaving, etc., for household use	93
Too young to work/to attend school/to seek employment	94
Old and disabled	95
Rentiers, pensioners, remittance recipients, etc.	96
Beggars, prostitutes, etc.	97
Others	98
Did not work due to temporary sickness (for casual workers only)	99

*The activity category codes, 61, 71, 82 and 99 were used only for current status approach.

Persons assigned any one of the activities listed under the category codes 01 to 71 were treated as 'working' (or employed). Persons assigned activity category codes 81 or 82 were treated as 'seeking and/or available for work' (or unemployed). The remaining persons i.e. the persons assigned any of the activity category codes 91 to 99 were treated as 'not available for work' (or not in labour force). The data on activity particulars of the persons were, however, tabulated only for population of age 5 years and above.

CLASSIFICATION ACCORDING TO USUAL STATUS APPROACH

For classification of population into various activity categories according to usual status, persons were first classified into three major activity status groups namely, 'working', 'seeking and/or available for work' and 'not available for work' on the basis of a 'major-time-spent' criterion with reference to the period of 365 days preceding the date of survey. Accordingly, one was categorised as 'working' if he was reported to be engaged for a relatively long time during the reference period in one or more of the gainful activities (category codes 01-51), 'seeking and/or available for work' if one was reported to be either 'seeking or available for work' (category code 81) for a relatively long time during the same reference period and 'not available for work' if one was reported to be not available for work during a relatively long time of the reference period. Within each of these three broad groups of categories, the detailed activity status categories were then determined by again using the 'major-time-spent' criterion.

CLASSIFICATION ACCORDING TO CURRENT WEEKLY STATUS APPROACH

For classification of person according to current weekly status, he or she had to be assigned a unique activity status with reference to a period of seven days preceding the date of survey. For a person pursuing more than one activity during the week, his/her unique status was decided by adopting a priority cum-major time rule under the priority rule, the status of 'working' got priority over the status of 'not working but seeking/available for work' which in turn got priority over the status of 'not working and not seeking/available for work'. For a person classified under the first or the last category

his/her detailed activity status was determined by major-time-spent criterion, i.e. the detailed activity on which major time was spent was considered his/her current weekly status. Further, if a person has worked for one hour on any one day of the week he was considered 'working'. A person who had not worked during the week but was available for work even for one hour on any one day of the week was considered 'seeking and/or available for the work'. Others constituted the category 'not available for work' (or not in labour force). Each person was thus assigned a unique activity status for the week. Aggregate of persons under the different activity status provided the distribution of persons by activity on an average in a week of the survey period of one year.

CLASSIFICATION ACCORDING TO CURRENT DAY STATUS APPROACH

In adopting the current day status approach attempt was made to account for two major activities pursued by a person on each day of the seven days, reference week allocating 'half-day' to each activity. The unit of classification according to this approach, was thus half-day though data were collected for all the seven days of the reference week. In assigning the activity status on a day, a person was considered 'working' (or employed) for the entire day if he/she had worked 4 hours or more on the day, and assigned the one or two (as the case may be) work activities (01-71) to which he/she devoted the working time. But if the work was done for one hour or more but less than 4 hours, he/she was considered 'working' (or employed) for half-day and 'seeking/available for work' (or unemployed) or 'not available for work' (or not in labour force) for the other half of the day depending on whether he/she was seeking/available for work or not on the day. On the other hand, a person was not engaged in any gainful work even for one hour on the day but was seeking or available for work for four hours or more, he/she was considered 'unemployed' for the entire day. But if the reported availability for work was for less than four hours only, he/she was considered 'unemployed' for half-day and 'not in labour force' for the other half of the day. A person who neither was having any gainful work to do nor was available for work even for half of the day was considered 'not available for work' (or not in labour force) for the entire day and assigned the one or two of the non-gainful activity statuses which he/she had during the day. The aggregate of person-days so classified under the different activity

categories for all the seven days of the week divided by seven gave the distribution of persons (strictly speaking, person-days) by activity category on an average on a day of the survey period of one year.

PROBING QUESTIONS

In order to understand the complex dimensions of the work pattern, the extent of under utilisation and the nature of reported preferences for additional work, etc., among those classified as employed according to usual status, the types of work desired, efforts made to get work, etc., for those classified as 'unemployed students, persons engaged in domestic duties, etc., some relevant probing questions were put to the above categories of persons to elicit the required information. These probing questions apart, a second set of probing questions were also canvassed in this round exclusively for those classified according to usual status as engaged in domestic duties with a view to eliciting information on the reasons for their usual attachment in household chores, whether they would report as available for work, if work was provided at their residences etc.

ACTIVITY CATEGORY 93

It is known that a part of the total working time—of the women—particularly rural women usually engaged in household duties is spent of certain activities to meet household needs. These activities are considered gainful if the goods or services produced as a result of such work are essentially for sale it was generally felt that information on this aspect of participation in household activities of persons, mostly women, classified according to usual status as 'engaged in domestic duties' could not be obtained from the NSS. In the 32nd round survey, therefore, attempt was made to sub-divide persons who usually remain engaged in domestic duties into two sub-categories, namely, (i) engaged exclusively in domestic duties and (ii) engaged in domestic duties as well as in the activities like free collection of goods etc., listed above. The adoption of this new activity sub-category for those engaged in household chores was intended to identify separately those who along with their domestic duties also carry out the above activities from those who carry out only domestic duties.

DESCRIPTION OF THE TABLES PRESENTED

It is already mentioned that estimates of some basic items of information pertaining to household characteristics and the activity characteristics of the population for 4 States are presented. The

relevant results are presented in 10 different tables. A brief description of these tables is given below :

Table 1 : The distributions of rural and urban households by household type and household monthly per-capita expenditure are presented in this table. The survey households in the rural areas were categorised under five different types. They are :

- (i) households self-employed in agricultural occupations
- (ii) households self-employed in non-agricultural occupations
- (iii) agricultural labour households
- (iv) non-agricultural labour households
- (v) other households

For the urban areas, only two different household types were considered, namely :

- (i) self-employed households
- (ii) other households

Table 2 : The distribution of the rural and urban households by household monthly per-capita expenditure and the principal household industry, the household industry being considered as the source from which major income of the household was derived during the 365 days preceding the date of survey are presented in Table 2. Here only nine broad industrial categories have been considered. They are : agricultural, mining & quarrying, manufacturing, electricity, gas & water, construction, trade, transport, services and others.

Table 3 : The distribution of the rural and urban households by household monthly per-capita expenditure and the proportion of persons economically active to total persons are given in Table 3. The employed and unemployed together constitute the economically active population.

Table 4 : In Table 4 are presented the estimates of (i) total number of households (ii) total persons (iii) total economically active persons (iv) average household size and (v) average number of economically active persons per household for each household monthly per capita expenditure class. The estimates of 'persons' and 'economically active persons' are presented separately for each sex.

Table 5 : In Table 5 are presented the distributions of males and females of age 5 years and above by age group and usual activity status. In this table, the population has been shown as distributed between five age-groups, such as, 5-14, 15-29, 30-44, 45-59 and

60 & above. The usual activity status categorise are given in terms of codes in columns (1) and (2) of the table. It is already indicated that the usual status of a person is determined on the basis of a 'major time or a 'relatively long time' spent criterion with reference to a period of 365 days preceding the date of survey. It may be noted that according to this criterion, some of the persons categorised 'not working' may be still pursuing some gainful activities (quite likely, marginally) during the reference period of 365 days. But such of gainful activity pursued in a subsidiary capacity has not been considered in working out the distributions presented in Table 5.

Table 6 : This table gives the distribution of males and females of age 5 years and above by usual activity status taking also into consideration the subsidiary gainful status of those categorised as 'not working' during the reference year according to 'major time-spent' criterion. The distribution are presented cross classified by age-group and the activity status.

Table 7 : In Table 7 are presented the distribution of males and females of age 5 years and above categorised 'working' according to 'usual status' classification by two digit major group of the industrial classification. The estimates for both the rural and urban areas are presented in the same table.

Note : Marginal totals between tables may not in all cases exactly agree in view of rounding of errors.

Table 8R & 8U : The distributions of male and females of age 5 years and above categorised 'usually working' by specified groups of 'occupation' are presented in Table 8R for rural areas and Table 8U for urban areas. It may be noted that the occupation groups considered are different for the urban and rural areas as occupation pattern in rural areas is known to be different from that in the urban areas.

Table 9 : The distributions of males and females of age 5 years and above by their current weekly activity and age-group are presented in Table 9. The estimates given represent the average weekly situation obtaining for persons over the reference period of 365 days preceding the date of survey.

Table 10 : The activity situation obtaining for persons on an average day over the reference period of 365 days preceding the date of survey is presented in this table. The estimates represent the number of person days of persons of age 5 years and above occupied in various activities on an average day over the reference period of 365 days preceding the date of survey cross classified by different age-groups. These estimates are presented separately for males and females.

TABLE A : ESTIMATES OF POPULATION PRESENTED IN THIS DOCUMENT, PROJECTED POPULATION AS ON 1 JANUARY 1978 AND ADJUSTMENT FACTORS

ACTIVITY (USUAL AND CURRENT) STATUS CODES USED IN TABLES 5, 6, 9 and 10.

A. STATUS

worked with an employee under obligation but work not specifically compensated by any wage/salary	01—04
worked (self-employed) in household enterprise	11
worked as helper in household enterprise	21
worked as regular salaried/wage employee	31
worked as casual wage labour in public works	41
worked as casual wage labour in other types of work	51
did not work though there was work in household enterprise (for current status only)	61
did not work but had regular salaried/wage employment (for current status only)	71
sought work (for current status only)	81
did not work but was seeking and/or available for work (for usual status only)	81
did not seek but was available for work (for current status only)	82
attended educational institutions	91
attended domestic duties only	92
attended domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed, etc.), sewing, tailoring, weaving etc. for household use	93
too young to work/to attend school/to seek employment	94
old and disabled	95
rentiers, pensioners, remittance recipients, etc.	96
beggars, prostitutes, etc.	97
others	98
casual workers who did not work due to temporary sickness (for current status only)	99

B. INDUSTRY (Division)

agriculture, hunting, forestry & fishing	0
mining and quarrying	1
manufacturing	2 or 3
electricity, gas and water	4
construction	5
wholesale and retail trade and restaurant & hotels	6
transport, storage and communication	7
financing, insurance, real estate and business services	8
community, social and personal services	9

TABLES OF THE CURRENT STATE OF THE COUNTRY IN 1845

(Issue No. 20)

SURVEY IN PROGRESS

1. Population, birth and deaths enumeration and reenumeration, NSS 39th round (January 1984 to June 1984)

Central Sample :
sample villages— 6684
sample blocks— 1870

SRS samples :
villages— 192
blocks— 96

2. Collection of rural retail prices, NSS 39th round

Sample villages 419

TABULATION IN PROGRESS

1. Unorganised manufacture, NSS 33rd round (July 1978—June 1979)

States & all-India estimates :
detailed tables

2. Survey on non-directory non-manufacturing own-account enterprises, NSS 34th round (July 1979—June 1980)

States and all-India estimates :
on non-directory trade

3. Social consumption of health, education, family-planning and public distribution, NSS 35th round (July 1980 to June 1981)

States and all-India estimates :
detailed tables

4. Land holdings & livestock holdings and debt & investment survey, NSS 37th round (January 1982—December 1982)

States and all-India estimates :
detailed tables on land-holding and debt and investments

5. Socio-economic surveys : employment & unemployment and consumer expenditure, NSS 38th round (January—December 1983)

States and all-India estimates :
(i) employment & unemployment
(ii) consumer expenditure

1. Some selected results of the second quinquennial survey on employment & unemployment,
NSS 32nd round (July 1977—June 1978)

States—

- (1) Arunachal Pradesh
- (2) Goa, Daman & Diu
- (3) Manipur
- (4) Meghalaya
- (5) Orissa
- (6) Pondicherry
- (7) Tripura,
- (8) Chandigarh

1888-1889

ग्रामीण क्षेत्रों में विद्युतीकरण पर सामान्य जानकारी सम्बन्धी सर्वेक्षण : रा० प्र० सर्वे 31वाँ दौर (जुलाई 1976—जून 1977)

1. प्रस्तावना

ग्रामीण क्षेत्रों में शक्ति (विजली/डीजल) के इस्तैमाल सम्बन्धी एक सर्वेक्षण जुलाई 1976 से जून 1977 के कृषि वर्ष में राष्ट्रीय प्रति-दर्श सर्वेक्षण के 31वें दौर के अन्तर्गत चलाया गया। सर्वेक्षण की व्याप्ति निम्नलिखित को छोड़कर सम्पूर्ण ग्रामीण भारत है। अपवाद वाले क्षेत्र नागालैण्ड एवं सिक्किम राज्य, जम्मू एवं कश्मीर का लद्दाख का जिला मध्य प्रदेश के सरगुजा जिले की तहसील पाल तथा समरी और बस्तर जिले की तहसील बीजापुर, दंतवारे, कोन्टा एवं नारायणपुर, महाराष्ट्र के चन्द्रपुर जिले की तहसील राजपुर, सिरोंच तथा गधचिरोली और अमरावती जिले की तहसील मेलघाट एवं अण्डेमान और निकोबार द्वीप समूह, अरुणाचल प्रदेश, चण्डीगढ़, दादर और नागर हवेली, लक्षद्वीप और मिजोरम के संघ शासित क्षेत्र हैं।

2. प्रतिदर्श अभिकल्प

आधार अभिकल्प को दो चरणों में एक प्रथम स्तर इकाइयों के रूप में गांवों के साथ तथा द्वितीय स्तर इकाइयों के रूप में परिवारों के साथ स्तरीकृत किया गया। प्रतिदर्श गांवों के चयन के लिए गणना गांवों की 1971 की सूची का प्रयोग प्रतिचयन ढांचे के रूप में किया गया। सर्वेक्षण के लिए कुल 8472 प्रतिदर्श गांवों का चयन किया गया जिसमें से 8461 गांवों का वास्तव में सर्वेक्षण किया गया तथा बकाया 11 प्रतिदर्श गांवों को अ-सर्वेक्षित छोड़ देना पड़ा। वर्ष के दौरान त्रुटियों की परिणता के लिए प्रावधान करने के लिए दो स्वतन्त्र उप-प्रतिदर्श के रूप में तथा संग्रहीत आंकड़ों के उचित सामयिक प्रतिनिधित्व प्राप्त करने हेतु चार स्वतन्त्र उपदौरों के प्रतिदर्श गांवों को चुना गया।

3. स्तरीकरण

प्रत्येक राज्य/संघ शासित क्षेत्र का जिनकी सीमायें आपस में लगी हों ऐसे जिलों (गुजरात में तहसील) के समूहीकरण द्वारा और जिनके फसल प्रतिमान, ग्रामीण क्षेत्रों में जनसंख्या का घनत्व तथा अन्य समाजार्थिक और स्थलाकृति रूपरेखा समान हों को अनेक क्षेत्रों में विभाजित किया गया। पूरे देश को कुल 64 क्षेत्रों में बांटा गया तथा प्रत्येक क्षेत्र को अनेक स्तरों में बांटा गया। आमतौर पर प्रत्येक जिले को संस्तर के रूप में माना गया। तो भी बड़े जिलों को 1971 की जनगणना के अनुसार जिनकी ग्रामीण जनसंख्या 1.5 लाख या उससे अधिक थी उनको 1971 की जनगणना पर निर्भर करते हुए ग्रामीण जनसंख्या की गिनती, आपस में लगी हुई तहसीलें जिनकी विशेषतायें समान हैं, उनका समूह बना कर अनेक स्तरों में बांटा गया।

4. आबंटन

सर्वेक्षण को चलाने के लिए उपलब्ध क्षेत्रीय कर्मचारियों की सम्बन्धित संख्या को ध्यान में रखते हुए 8472 गांवों के अखिल भारतीय प्रतिदर्श आकार विभिन्न राज्यों तथा संघशासित क्षेत्रों में बांटे गये। क्षेत्र से सम्बन्धित कुल सींचे गये क्षेत्र के अनुपात में राज्य या संघ शासित क्षेत्र के लिए आबंटित कुल संख्या को आगे क्षेत्रीय घटकों में आबंटित किया गया। यह अन्य प्रमुख जांच को ध्यान में रखकर अर्थात् सिंचाई के प्रयोग सम्बन्धी सर्वेक्षण जो प्रतिदर्श गांवों के उसी सेट में चलाये गये थे को शक्ति के प्रयोग सम्बन्धी जांच के साथ चलाया गया। अन्त में क्षेत्र के लिए आबंटित संख्या स्तर के ग्रामीण जनसंख्या की 1971 की जनगणना के अनुपात में स्तरों के घटक के बीच बांटा गया।

5. गांवों का चयन

प्रत्येक संस्तरों के बीच प्रतिदर्श गांवों का चयन जनसंख्या तथा उसके प्रतिस्थापन की अनुपातित समझावना को ध्यान में रख कर किया गया। चयन की इकाई गणना गांव थी। ऐसे मामलों में जहां गणना गांवों को असमान रूप से पहचान नहीं की जा सकी वहां राजस्व गांवों का सर्वेक्षण किया गया। बड़ी जनसंख्या वाले प्रतिदर्श गांवों का विभाजन ऐसे अनेक खेड़ा गांवों के लिए जिनकी जनसंख्या लगभग बराबर थी, में किया गया तथा सर्वेक्षण को यादृच्छिक रूप से चुने गये एक खेड़ा समूह तक सीमित रखा गया।

6. संगृहीत जानकारी

प्रतिदर्श गांवों के लिए विद्युतीकरण सम्बन्धी जानकारी राज्य विजली बोर्ड के स्थानीय कार्यालयों या सम्बन्धित प्राधिकारियों के सरकारी रिकार्ड से इकट्ठी की गई तथा ग्रामीण अनुसूची 3.2 में रिकार्ड की गई (विद्युतीकरण सम्बन्धी सामान्य सूचना)। ट्रांसफार्मर से गांव तथा गांव में ही उच्च दाब तथा निम्न दाब की लाइनों की लम्बाई, संयोजन की श्रेणी द्वारा सेवा संयोजन सम्बन्धी संख्या, सेवा संयोजन के लिए बकाया अनुप्रयोगों की संख्या, तथा गांवों में यदि लगाये गये हों तो ऐसे ट्रांसफार्मरों की क्षमता इत्यादि सम्बन्धी जानकारी इकट्ठी की गई।

पूछताछ अनुसूची 3.2 से तैयार किये गये अनुमानों को विभिन्न राज्यों तथा समस्त भारत के लिए इस रिपोर्ट में दर्शाया गया है।

—इस समय हिमाचल प्रदेश से सम्बन्धित परिणाम इस रिपोर्ट में नहीं दर्शाये गये हैं।

7. संकल्पनायें तथा परिभाषायें

सर्वेक्षण में महत्वपूर्ण मदों के लिए अपनायी गयी संकल्पनाओं तथा परिभाषाओं को नीचे दिया गया है :—

विद्युतीकृत गांव : कोई गांव जहां कम से कम एक सेवा संयोजन (सड़क की बत्ती सहित) हो, विद्युतीकृत गांव माना गया है। कोई गांव जहां परिणामित (ट्रांसफार्म) अथवा सब-स्टेशन भी है किन्तु सेवा संयोजन नहीं है तो उस गांव को विद्युतीकृत गांव नहीं माना गया है। वे गांव, जिनमें सामान्य तारों के जाल (ग्रिड) से बिजली प्राप्त नहीं होती किन्तु किसी स्थानीय स्वजनित (आटोजेनेरेटर) से बिजली तैयार की जाती है उसे भी विद्युतीकरण कृत गांव नहीं माना गया है।

सेवा-संयोजन-प्रवर्ग : सेवा संयोजनों के प्रवर्ग निम्नलिखित रूप से परिभाषित किये गये हैं :—

(क) **घरेलू :** घरेलू प्रवर्ग का सम्बन्ध उस सेवा संयोजन से है जो केवल घरेलू उपभोग के लिए बिजली, पंखा, रेडियो, घरेलू उपकरण जैसे हीटर, इस्त्री आदि के प्रयोग हेतु बिजली दी गयी है।

(ख) **कृषिगत :** कृषिगत प्रवर्ग का सम्बन्ध केवल कृषि उत्पादन हेतु भूमि की सिंचाई के लिए पम्प-सेट चलाने के लिए प्रयोग में लाई गई बिजली से है।

(ग) **औद्योगिक/वाणिज्यिक :** औद्योगिक/वाणिज्यिक प्रवर्ग का सम्बन्ध औद्योगिक/वाणिज्यिक उद्देश्यों की पूर्ति हेतु प्रयोग में लाई गयी बिजली है।

8. आकलन

राज्य/संघ शासित क्षेत्र की विशेषताओं के अनुमान $\hat{y}$ द्वारा इंगित करते हुए निम्नलिखित संकेत प्रयोग किये गये हैं :—

r : लघु अंश r -th किसी राज्य/संघ शासित प्रदेश का क्षेत्र।

s : लघु अंश s -th स्तर।

i : लघुअंश i -th सर्वेक्षित ग्राम/खेड़ा समूह।

f : सर्वेक्षण किये जा रहे रजस्व ग्राम हेतु समायोजन घटक।

m : सर्वेक्षित गांवों की संख्या।

p : ग्रामीण जनसंख्या (चयन हेतु प्रयुक्त)।

p : कुल ग्रामी जनसंख्या (यथोपरि)

y : किसी विशेषता का मूल्य।

$\hat{y}$: को निम्न प्रकार से आकलित किया गया है :—

$$\hat{y} = \sum_r \sum_s \frac{Prs}{m_{rs}} \sum_{i=1}^{m_{rs}} \frac{y_{rsi}}{f_{rsi} Prs}$$

जहां $\sum_s r$ -th क्षेत्र में समग्र स्तर का जोड़ इंगित करता है और $\sum_r$ राज्य/संघ शासित प्रदेश में सभी क्षेत्रों के जोड़ इंगित करता है।

9. संक्षिप्त परिणाम

1. विद्युतीकृत गांवों की संख्या

सर्वेक्षण के परिणामों से परिलक्षित होता है कि देश में 4.28 लाख गांवों जो विद्युतीकृत नहीं थे, उनकी तुलना में लगभग 1.98 लाख गांव विद्युतीकृत थे। अन्य शब्दों में देश में लगभग 31 प्रतिशत गांव सर्वेक्षण की तिथि तक विद्युतीकृत किये जा सकते हैं। यह भी परिलक्षित होता है कि जिन 11.7 प्रतिशत गांवों को विद्युतीकृत नहीं किया जा सका (जो सभी गांवों का लगभग 8 प्रतिशत है) उन्हें अभी विद्युतीकरण स्कीम के अन्तर्गत रखा हुआ है उनके लिए अभी ऐसी कोई स्कीम नहीं है (जो सभी गांवों का 60 प्रतिशत के लगभग हैं) विद्युतीकरण स्कीम के अन्तर्गत गांवों के बीच विद्युतीकरण का कार्य केवल 34.3 प्रतिशत मामलों में आरम्भ किया गया है। विद्युतीकरण स्कीम के अन्तर्गत जो गांव सम्मिलित नहीं किये गये थे उन 4.2 प्रतिशत मामलों के लिए विद्युतीकरण की स्कीम तैयार की जा रही थी।

2. **जब से विद्युतीकृत किये हैं वह अवधि :** विद्युतीकृत गांवों के बीच यह देखा गया है कि लगभग 41 प्रतिशत 8 वर्ष की अवधि से पहले या अधिक। 24 प्रतिशत 5 वर्ष के बीच और 8 वर्ष से कम अवधि से पहले और शेष 35 प्रतिशत पांच वर्ष से कम अवधि में विद्युतीकृत कर दिये गये।

3. परिणामित्र (ट्रांसफार्मर) की कुल क्षमता 1.98 लाख गांवों को विद्युतीकृत करने के लिए संस्थापित परिणामित्र की कुल क्षमता लगभग 2 करोड़ 20 लाख के० वी० ए० थी। विद्युतीकृत लगभग 1.36 लाख गांवों में परिणामित्र गांव के भीतर है अवस्थित थे और गांव के बाहर स्थित किसी भी क्षेत्र को बिजली वितरित करने में अपनी सेवाएं नहीं प्रदान कर रहे थे, इसके विपरीत 0.25 लाख विद्युतीकृत गांव जो कि अन्य गांवों को अपनी सेवाएं प्रदान कर रहे थे जिनके भीतर बिजली नहीं लगी थी और शेष 0.37 लाख गांवों में उनके भीतर परिणामित्र अवस्थित नहीं थे और दूसरे गांव में ये अवस्थित परिणामित्रों की सहायता से अपना कार्य कर रहे थे।

4. सेवा संयोजनों की औसत संख्या : देश के समस्त विद्युतीकृत गांवों में कुल मिलाकर 109 लाख संयोजन दिये गये। नीचे दी गई सारणी (क) में पाया गया कि देश में प्रति गांव औसत रूप से 54 संयोजन किये गये। गांव जिनका विद्युतीकरण हो चुका तथा जो अन्य गांवों में बिजली की आपूर्ति कर रहे थे उनके पास औसत रूप से 72 संयोजन के जिनमें कोई भी परिणामित्र (ट्रांसफार्मर) अवस्थित नहीं था। ये गांव, जिनमें कोई परिणामित्र (ट्रांसफार्मर) अवस्थित नहीं थे तथा अन्य गांवों से ऊर्जा प्राप्त कर रहे थे उनमें प्रति गांव लगभग 11 संयोजन पाये गये। प्रति गांव उन संयोजनों की संख्या लगभग 62 थी जिनमें परिणामित्र (ट्रांसफार्मर) थे किन्तु अन्य गांवों की सेवा नहीं कर रहे थे।

सारणी (क) : विद्युतीकृत गांव के प्रकार के अनुसार संयोजनों की औसत संख्या

प्रकार	गांव (000)	संयोजन (लाख)	प्रति गांव संयोजनों की संख्या
(1)	(2)	(3)	(4)
वे गांव जो दूसरे गांवों की सेवा कर रहे हैं।	25.3	18.3	72
दूसरे गांव से सेवा पाने वाले गांव	36.5	3.9	11
अपनी सेवा स्वयं करने वाले गांव तथा किसी दूसरे गांव की सेवा नहीं कर रहे हैं।	135.8	87.2	62
सभी प्रकार के गांव	197.6	109.4	54

5. बिजली की लाइनों की लम्बाई : विद्युतीकृत गांवों के लिए संस्थापित बिजली की लाइनों की कुल लम्बाई नीचे सारणी (ख) में दर्शायी गई है। बिजली की ये लाइनें दो श्रेणियों में विभाजित की गई हैं अर्थात् उच्च तनाव लाइनें एवं निम्न तनाव लाइनें यह देखा गा है कि उच्च तनाव वाली विद्युत लाइनों का 20 हजार किलोमीटर से कुछ अधिक तथा निम्न तनाव वाली लगभग 47 हजार किलो मीटर विद्युत लाइनें उन गांवों को जोड़ने के लिए प्रयोग में लाई गई जिन गांवों में कोई परिणामित्र (ट्रांसफार्मर) नहीं है अथवा परिणामित्र (ट्रांसफार्मर) गांव से बाहर अवस्थित है। दुबारा उच्च तनाव वाली लगभग 248 हजार किलोमीटर विद्युत लाइनें तथा निम्न तनाव वाली 1457 हजार किलोमीटर विद्युत लाइनें गांवों से ; सेवा संयोजन हेतु प्रयोग में लाई गई हैं।

सारणी (ख) : विद्युत लाइनों के वर्गों के अनुसार किलोमीटरों में विद्युत लाइनों की कुल लम्बाई: अखिल भारत

प्रवर्ग	गांव के लिए (गांव से बाहर) परिणामित्र (ट्रांसफार्मर)	गांवों के भीतर (सेवा संयोजन प्रदान करने हेतु)
(1)	(2)	(3)
उच्च तनाव	20331	248202
निम्न तनाव	47488	1457200

सारणी (ग) वर्तमान सेवा संयोजनों तथा अनिर्णीत आवेदन पत्रों की अनुमानित संख्या और प्रयोगों की प्रकृति के अनुसार किलोवाट में तदनुरूप भार : अखिल भारत

प्रयोग की प्रकृति	वर्तमान सेवा संयोजन		अनिर्णीत आवेदन पत्र	
	संयोजनों की संख्या	संयोजित भार (कि० वा०)	संख्या	अनुमानित भार
(1)	(2)	(3)	(4)	(5)
1. कृषि	2856013	16703053	392864	1791269
2. उच्च तनाव औद्योगिक	106295	2928522	929	36584
3. निम्न तनाव औद्योगिक	387695	4814300	28462	267779
4. घरेलू	6475221	8415472	332332	405133
5. वाणिज्यिक	1110509	2195697	30148	79268
6. जोड़	10935733	35057044	784735	2580033

6. सेवा संयोजन की संख्या : नीचे दी गई सारणी (ग) दर्शाती है कि अब तक के विद्युतीकृत गांवों में लगभग 109.4 लाख संयोजन प्रदान किये गये जिनका कुल संयोजित भार 350.6 लाख किलोवाट है। यह भी देखा गया कि संयोजन प्राप्त करने के लिए कुल मिलाकर लगभग 785 हजार आवेदन पत्र लंबित पड़े हैं। इन विचाराधीन संयोजनों के लिए अनुमानित कुल भार 25.8 लाख किलोवाट था।

विभिन्न राज्यों के रोजगार तथा बेरोजगारी विषयक दूसरे पंचवर्षीय सर्वेक्षण (रा० प्र० सर्वे 32 वां दौर) के कुछ चुने हुए महत्वपूर्ण परिणाम ।

प्रस्तावना

राष्ट्रीय प्रतिदर्श सर्वेक्षण संगठन ने सर्वेक्षण के 32वें दौर (जुलाई 1977—जून—1978) में रोजगार तथा बेरोजगारी विषयक दूसरा पंचवर्षीय सर्वेक्षण आरम्भ किया। 15 से 59 वर्ष की आयु वाली जनसंख्या के इस सर्वेक्षण में संगृहीत आंकड़ों की चुनी हुई मदों के हस्त सारणीयन के माध्यम से प्राप्त रोजगार और बेरोजगारी के दो महत्वपूर्ण संकेतकों के अनंतिम अनुमान समस्त भारत, और विभिन्न राज्यों/संघ शासित क्षेत्रों के लिए राष्ट्रीय प्रतिदर्श सर्वेक्षण संगठन की पत्रिका में प्रकाशित किये गये। समस्त भारत से संबंधित विस्तृत परिणाम और समस्त भारत तथा राज्यों/संघ शासित क्षेत्रों के कुछ महत्वपूर्ण संक्षिप्त परिणामों के साथ सारांश टिप्पणियों को भी प्रकाशित किया गया।

1. विभिन्न राज्यों/संघ शासित क्षेत्रों से संबंधित आंकड़ों में विस्तृत पर सारणीयन आधारित परिणाम रा० प्र० सर्वे० संगठन की मिनिग्रेफ रिपोर्ट की अंकमाला 298/1 298/2 आदि में क्रमिक आधार पर प्रकाशित किये जा रहे हैं, और अब तक 10 राज्यों के परिणाम प्रकाशित किये गये हैं। इस प्रलेख में सर्वेक्षण में संगृहीत जनसंख्या संबंधी आंकड़ों से परिवारिक विशेषताओं और रोजगार तथा बेरोजगारी संबंधी विशेषताओं दोनों से संबंधित सूचना की कुछ आधारभूत मदों के अनुमान दर्शाने वाली 5 सारणियां आसाम, दिल्ली, हिमाचल प्रदेश, जम्मू तथा काश्मीर और कर्नाटक राज्यों के लिए अलग-अलग प्रस्तुत की गयी है।

2. सर्वेक्षण में अपनाये गये प्रतिचयन अभिकल्प, सर्वेक्षण की व्याप्ति, आकलन कार्य विधि और संकलनात्मक संरचना के मुख्य मुख्य अंगों के व्यौरे और आंकड़ा संग्रहण की कार्यविधि इस रिपोर्ट में दी गई जिसमें समस्त भारत के परिणाम संघारित हैं। सर्वेक्षण का विषय-क्षेत्र और व्याप्ति संबंधी संक्षिप्त सार संकल्पनाएं, परिभाषाएं आदि नीचे दी गई हैं।

3. **भौगोलिक व्याप्ति :** सर्वेक्षण में सिक्किम, अण्डमान व निकोबार द्वीप समूह, लक्षद्वीप, दादरा व नागर हवेली, जम्मू व काश्मीर का लद्दाख जिला, मध्य प्रदेश के बस्तर जिले की पाल और समरी तहसीलों के ग्रामीण क्षेत्र, महाराष्ट्र के चन्द्रपुर जिले की राजुरा, सिराँचा और गढ़ चिरोली तहसीलें तथा अमरावती जिले की नीलघाट तहसील के ग्रामीण क्षेत्रों और चंडीगढ़, मिजोरम तथा नागालैंड के ग्रामीण क्षेत्रों को छोड़कर भारत संघ का समस्त क्षेत्रफल सम्मिलित है।

4. **प्रतिचयन अभिकल्प एवं प्रतिदर्श आकार :**—सर्वेक्षण एक स्तरीकृत दो चरण वाला प्रतिचयन अभिकल्प अपनाया गया जिसमें गणना गांवों और शहरी खण्डों (रा० प्र० सर्वे० संगठन द्वारा निर्मित शहरी ढांचा—सर्वेक्षण खंड) को ग्रामीण एवं शहरी क्षेत्रों के लिए प्रथम चरण की इकाई माना गया है और परिवारों को दूसरे चरण की इकाई।

किन्तु उत्तर पूर्वी राज्यों के ग्रामीण क्षेत्रों में ग्राम-समूहों प्रथम चरण की इकाई थे। कुल मिलाकर 8820 गांव और 4940 शहरी खंड प्रथम चरण की इकाई के रूप में चुने गये। चुनी गयी प्रथम चरण की इकाइयों से संबंधी 12 परिवारों को दूसरे चरण की इकाइयों के रूप में चुना गया है। (उत्तर—पूर्वी क्षेत्र के ग्रामीण क्षेत्रों में से 24 परिवार प्रत्येक ग्राम—समूह से चुने गये)।

5. **सर्वेक्षण अवधि और उपदौर तैयार करना :**—यह सर्वेक्षण जुलाई 1977 में आरम्भ हुआ और जून 1978 में पूरा कर लिया गया। सम्पूर्ण सर्वेक्षण की एक वर्ष की अवधि को तीन-तीन महीनों के चार उपदौरों में बांटा गया और प्रत्येक दौर में लगभग चार कृषि मौसम सम्मिलित किये गये। चारों उपदौरों की अवधियां थी जुलाई से सितम्बर, 1977, अक्टूबर से दिसम्बर 1977, जनवरी से मार्च, 1978 और अप्रैल से जून 1978। प्रतिदर्श गांवों और खंडों को बराबर संख्या वाले चार उपदौरों में बांट दिया गया ताकि प्रत्येक उप-दौर के लिए वैध अनुमान प्रस्तुत किये जा सकें।

6. **आकलन कार्यविधि :** सारणीयन स्तर पर कार्य भार कम करने और क्षेत्रीय स्तर पर अनुमान प्रस्तुत करने के लिए निम्नलिखित आकलन कार्यविधि अपनायी गयी :

$$y = yx \frac{p}{p}$$

$$y =$$

$$p =$$

$$p =$$

जहां

किसी उपदौर/सभी उपदौरों के लिए क्षेत्र

की ग्रामीण/शहरी कुल विशेषताओं को अनुमानित करता है।

उपदौर सभी उपदौरों के क्षेत्र के ग्रामीण शहरी प्रतिदर्श की कुल विशेषताएं दर्शाता है।

जनवरी 1978 के लिए क्षेत्र की प्रक्षेपित ग्रामीण/शहरी जनसंख्या और

उप-दौर सभी X_1 उपदौरों में सर्वेक्षित क्षेत्र के प्रतिदर्श ग्रामों/खण्डों में कुल प्रतिदर्श व्यक्तियों की संख्या दर्शाता है।

1. सातवें दशक में भारत में रोजगार—बेरोजगारी की दशा सर्वेक्षण, खण्ड III सं० 3।

2. रोजगार तथा बेरोजगारी विषयक दूसरे पंचवर्षीय सर्वेक्षण की रिपोर्ट (समस्त भारत) सर्वेक्षण खंड—

ग्रामीण और शहरी क्षेत्रों के लिए अलग-अलग अनुमान तैयार किये गये ।

P के मूल्य विशेषज्ञ समिति प्रक्षेपणों पर आधारित अनुमानों (अनन्तिम) को प्रयोग में लाते हुए तैयार किये गये हैं, जिन्हें 1971 की जनगणना के आंकड़ों को ध्यान में रखते हुए अस्थायी रूप में संशोधित किया गया है । (स्रोत :—खाद्य सांख्यिकी संबंधी विवरणिका 25वां अंक (1975) सारणी 1.2 प्रक्षेपणों के इस कुलक (समूह) में दिये गये अनुमानों का सम्बन्ध प्रत्येक वर्ष के प्रथम जुलाई से है । उन्हें 1-1-1978 (32वां दौर में समिश्रित सर्वेक्षण अवधि का मध्य काल) पर केन्द्रित करने के लिए वर्ष 1977 और 1978 के लिए प्रक्षेपित जनसंख्या सम्बन्धी आंकड़ों का काम में लाया गया है ।

इस प्रलेख को तैयार करते समय प्रत्येक राज्य तथा संघ राज्य क्षेत्र के लिए निवास स्थिति (ग्रामीण) (शहरी) तथा स्त्री-पुरुष के अनुसार विभाजन सहित 1981 की जनगणना को जनसंख्या सारणियां उपलब्ध हो गई हैं । इन अनन्तिम आंकड़ों तथा 1971 की जनगणना के तदनुरूप जनसंख्या के जोड़ों का प्रयोग करते हुए प्रत्येक राज्य के ग्रामीण तथा शहरी क्षेत्रों में रहने वाले पुरुषों तथा महिलाओं के लिए स्वतन्त्र रूप से अन्तर्वेशन द्वारा 1-1-1978 की स्थिति सूचित करने वाले जनसंख्या के संशोधित अनुमान (दो जनगणना अवधियों के बीच चर छाताकी वृद्धि पर) प्राप्त किये गये हैं यहां प्रस्तुत किये गये अनुमानों को संशोधित अनुमानों के अनुरूप बनाने के लिए प्रत्येक जनसंख्या समूहों के लिए (समायोजन) कारण तथ्य परिकलित किये गये हैं जैसा कि रिपोर्ट में तदनुरूप अनुमान की तुलना में जनसंख्या के संशोधित अनुमान का अनुपात दिया गया है । इन अनुपातों को नीचे दी गई सारणी में दर्शाया गया है । समाहार के संशोधित अनुमान प्राप्त करने के लिए प्रत्येक समाहार अनुमान को तदनुरूप समंजन कारण घटक (अर्थात् इससे सम्बद्ध जनसंख्या समूह) से गुणा करना चाहिए । किसी राज्य/संघ शासित क्षेत्र आवास स्थिति स्त्री-पुरुष समूह के विभाजित वाले अनुपात (दर, प्रतिशतताएं आदि) इस समायोजन से अप्रभावित हैं ।

तथापि एक से अधिक समूह के समाहारकरण वाले अनुपात अथवा तुलनात्मक अंश को संगत समायोजित समाहारों के अलग-अलग जोड़ द्वारा इसे हर और अंश को समाहारों के प्रथम परिकलन के माध्यम से तैयार करना होगा ।

7. संकलनात्मक ढांचे तथा आंकड़ा संग्रहण कार्य विधि के मुख्य अभिलक्षण :—सर्वेक्षण का मुख्य उद्देश्य विसमोहित स्तरों पर रोजगार तथा बेरोजगारी के स्वरूप तथा सीमा विस्तार की माप करना है । इस उद्देश्य के प्राप्ति के लिए तीन अलग-अलग दृष्टिकोण अर्थात् (1) सामान्य स्थिति दृष्टिकोण (2) वर्तमान साप्ताहिक कार्य स्थिति दृष्टिकोण तथा (3) वर्तमान दैनिक कार्य स्थिति दृष्टिकोण का स्वतंत्र रूप से प्रयोग करते हुए विभिन्न कार्यकलाप प्रवर्गों से सम्बन्धित जनसंख्या को वर्गीकृत करने का प्रयास किया गया है :—

विभिन्न कार्यकलाप प्रवर्गों के अनुसार विभाजित किये गये व्यक्तियों को आयु, स्त्री-पुरुष, सामान्य तथा तकनीकी शिक्षा, उद्योग, व्यवसाय आदि जैसे कुछ सार्वक सह-सम्बन्धों द्वारा आगे और अधिक वर्गीकृत किया गया । इस उद्देश्य से अपनाये गये विभिन्न कार्य-कलाप प्रवर्ग थे जिन्हें नीचे दर्शाया गया है ।

कार्यकलाप प्रवर्ग का विवरण

प्रवर्ग संकेत

नियोला के अधीन नादयता के अनुसार कार्य करना किन्तु कार्य के लिए कोई विशेष रूप से मजदूरी/वितन के रूप में परिश्रमिक न देना	01—4
पारिवारिक उद्योगों में (स्वनिर्भोजित) कार्य किया	11
पारिवारिक उद्यमों में सहायक के रूप में कार्य किया	21
नियमित वेतन भोगी/मजदूर के रूप में कार्य किया	31
सार्वजनिक निर्माण कार्यों में आकस्मिक मजदूर के रूप में कार्य किया	41
अन्य प्रकार के कार्यों या निर्माण कार्य में आकस्मिक मजदूर के रूप में कार्य किया	51
कार्य नहीं किया गया यद्यपि पारिवारिक उद्यमों में कार्य उपलब्ध था	61
कार्य नहीं किया किन्तु नियमित वेतन/मजदूरी पर रोजगार रथी	71
काम की तलाश में था	81
कार्य के लिए उपलब्ध था किन्तु कार्य नहीं ढूँढ सका	82
शैक्षिक संस्थाओं में पढ़ता रहा	91
केवल घरेलू कार्य किया	92
घरेलू कार्य तथा वस्तुओं का मुफ्त संकलन (साग-सब्जीकंद—मूल, जलाने की लकड़ी, पशुचारा आदि) सिलाई दर्जी-गीरी, बुनाई आदि या पारिवारिक उपयोग के कार्यों में भी लगा हुआ था	93

	प्रवर्ग संकेत
इतना छोटा था कि कार्य नहीं कर सकता/स्कूल नहीं जा सकता था / कार्य नहीं ढूँढ सकता था	94
वृद्ध एवं विकलांग	95
किराये पर जीने वाला, पेंशन भोगी, भेजे हुए धन प्राप्त करनेवाले आदि	96
भिखारी, वेश्यायें आदि	97
अन्य	98
अस्थायी बीमारी के कारण कार्य नहीं किया (केवल आकस्मिक मजदूरों के लिए)	99

कार्य-कलाप प्रवर्ग संकेत 61, 71 और 99 केवल वर्तमान कार्य स्थिति दृष्टिकोण के लिए प्रयोग किया गया है।

प्रवर्ग संकेत 01 से 71 के अन्तर्गत सूचीबद्ध किसी एक कार्यकलाप के लिए लगाये गये व्यक्तियों को कार्यरत (या नियोजित) माना गया है। प्रवर्ग संकेत 81 या 82 के कार्यकलाप के लिए लगाये गये व्यक्तियों को कार्य ढूँढ रहे और कार्यकलाप प्रवर्ग संकेत 61, 71 और 99 केवल वर्तमान कार्यस्थिति दृष्टिकोण के लिये प्रयोग किया गया है या कार्य के लिए उपलब्ध (या बेरोजगार) माना गया है।

शेष व्यक्ति अर्थात् प्रवर्ग संकेत 91 से 99 में से किसी एक कार्यकलाप के लिए लगाये व्यक्ति को "कार्य के लिए उपलब्ध नहीं" (अथवा श्रमिक बल में नहीं) माना गया है। तथापि व्यक्तियों के कार्यकलाप संबंधी व्यौरों के आंकड़ों 5 वर्ष और उससे अधिक आयु की जनसंख्या के लिए सारणीबद्ध किये गये हैं।

8. सामान्य कार्यस्थिति दृष्टिकोण के अनुसार वर्गीकरण :—सामान्य दशा के अनुसार विभिन्न कार्यकलाप प्रवर्गों में जनसंख्या के वर्गीकरण हेतु व्यक्तियों को सर्वेक्षण की तारीख से पूर्व 365 दिनों की अवधि के संदर्भ में "अधिकांश व्यतीत समय के मानदण्ड के आधार पर" कार्यरत, 1 कार्य ढूँढ रहे और/या कार्य के लिए उपलब्ध, तथा कार्य के लिए उपलब्ध नहीं हैं, नामक तीन महत्वपूर्ण कार्य-कलाप स्थिति समूहों में वर्गीकृत किया गया है। तदनुसार—किसी व्यक्ति को "कार्यरत" के रूप में प्रवर्गीकृत किया गया है, यदि उसमें एक या एक से अधिक लाभकारी कार्यकलाप में संदर्भ अवधि के दौरान लम्बे समय तक कार्यरत रहने की सूचना दी है। (प्रवर्ग संकेत 01—51), कार्य ढूँढ रहे और या कार्य के लिए उपलब्ध" यदि उसने संदर्भ अवधि के दौरान लम्बे समय से कार्य ढूँढ रहे या कार्य के लिए उपलब्ध" होने की सूचना दी है, संकेत प्रवर्ग 81 या 82 और" कार्य के लिए उपलब्ध नहीं" यदि उस ने संदर्भ अवधि की संबंधित लम्बी अवधि के दौरान कार्य के लिए उपलब्ध न होने की सूचना दी हो। प्रवर्ग के इन तीनों विस्तृत समूहों में से प्रत्येक समूह में विस्तृत कार्यकलाप स्थिति संबंधी प्रवर्गों का "अधिकांश व्यतीत समय मानदण्ड" का पुनः प्रयोग करके निर्धारित किया है।

9. वर्तमान साप्ताहिक कार्यस्थिति दृष्टिकोण के अनुसार वर्गीकरण :—वर्तमान साप्ताहिक कार्य स्थिति के अनुसार किसी व्यक्ति के वर्गीकरण के लिए उस स्त्री या पुरुष को सर्वेक्षण की तारीख से सात दिन पूर्व की अवधि में एक खास किस्म का कार्य सौंपा जाना आवश्यक है। कोई व्यक्ति जो सप्ताह के दौरान एक से अधिक कार्यकलाप में अपने आप को लगाता है उसके कार्य विशेष का निर्धारण प्राथमिकता एवं अधिकांश समय नियम को अपना कर किया गया है। प्राथमिकता नियम के अधीन "कार्यरत व्यक्ति" की स्थिति "कार्यरत नहीं किन्तु कार्य ढूँढ रहा है। कार्य के लिए उपलब्ध है" ऐसे व्यक्ति से कहीं अच्छी है और आगे यह स्थिति "कार्यरत नहीं और कार्य नहीं ढूँढ रहा है। कार्य के लिए उपलब्ध नहीं है" ऐसे व्यक्ति से अच्छी है। प्रथम अथवा अंतिम प्रवर्ग के अधीन वर्गीकृत व्यक्ति के बारे में उसकी (चाहे वह स्त्री है या पुरुष) विस्तृत कार्यकलाप स्थिति का निर्धारण अधिकांश समय लगाया गया, मापदंड द्वारा किया गया है अर्थात् वह विस्तृत कार्यकलाप जिसमें उसका अधिकांश समय व्यतीत हुआ है, यहीं उसका (उस स्त्री या पुरुष) वर्तमान साप्ताहिक कार्यस्थिति है। इसके अतिरिक्त यदि किसी व्यक्ति से सप्ताह के किसी एक दिन भी कार्य किया है तो ऐसे 'कार्यरत' माना गया है। एक व्यक्ति जिसने सप्ताह के दौरान कोई काम नहीं किया किन्तु कार्य के लिए एक घंटे अथवा एक दिन भी उपलब्ध था उसे "कार्य ढूँढता और अथवा कार्य के लिए उपलब्ध" माना गया है। अन्य व्यक्तियों को "कार्य के लिए उपलब्ध नहीं (अथवा श्रमिक बल में नहीं)" प्रवर्ग में रखा गया है। इस प्रकार प्रत्येक व्यक्ति को सप्ताह के लिए किसी खास कार्यकलाप स्थिति में लगाया गया है। विभिन्न कार्यकलाप स्थिति के अधीन व्यक्तियों के समूह (सप्ताह) से एक वर्ष की सर्वेक्षण अवधि के एक सप्ताह में औसत रूप से कार्यकलाप के अनुसार व्यक्तियों को विभाजित किया गया है।

10. वर्तमान दैनिक कार्य स्थिति संबंधी दृष्टिकोण के अनुसार वर्गीकरण :—वर्तमान दैनिक कार्यस्थिति संबंधी दृष्टिकोण अपनाने में, संदर्भ सप्ताह के सात दिनों में से प्रत्येक दिन दो महत्वपूर्ण कार्यकलाप करने वाले किसी व्यक्ति के प्रत्येक कार्यकलाप के लिए छूट देने का प्रयास किया गया जिसमें प्रत्येक कार्यकलाप के लिए आधा दिन नियत किया गया है। इस प्रकार इस दृष्टिकोण के अनुसार वर्गीकरण की इकाई आधा दिन मानी गयी है यद्यपि संदर्भ सप्ताह के सभी सात दिनों के लिए आंकड़े संगृहीत किये गये हैं। किसी भी दिन कोई कार्यकलाप स्थिति सौंपते समय किसी व्यक्ति को 'कार्यरत' (नियोजित) पूरे दिन समझा गया है यदि उस पुरुष या स्त्री ने उस 4 घंटे का अधिक काम किया और उसे एक या दो (जैसा भी मामला हो) कार्यकलाप (01—71) सौंपा

गया जिसमें उस व्यक्ति ने अपना समय लगाया। किन्तु, यदि वह कार्य एक घंटा या एक से अधिक घंटे परन्तु चार घंटों से कम किया है तो उन्हें आधे दिन के लिए 'कार्यरत' (या नियोजित) माना गया है और बाकी आधे दिन के लिए 'कार्य ढूँढ़ रहे/कार्य के लिए उपलब्ध (बेरोजगार)' अथवा 'कार्य के लिए उपलब्ध नहीं है' (अथवा श्रमिक बल में नहीं) इस बात पर निर्भर करता है कि क्या वह उसी दिन कार्य ढूँढ़ रही/रही है/ कार्य के लिए उपलब्ध है।

दूसरी ओर यदि कोई व्यक्ति उस दिन में एक घंटे के लिए भी किसी लाभदायक कार्य में कार्यरत नहीं है, किन्तु चार या चार से अधिक घंटों के लिए कार्य ढूँढ़ रहा है या कार्य के लिए उपलब्ध है, उसे पूरे दिन के लिए बेरोजगार माना गया है। किन्तु यदि कार्य के लिए केवल चार घंटों से कम उपलब्ध होने की सूचना दी गयी है तो उसे आधे दिन के लिए 'बेरोजगार' माना गया है और दिन के दूसरे आधे दिन के लिए श्रमिक बल में नहीं माना गया है। यदि कोई व्यक्ति जो न तो किसी लाभकारी कार्य में लगा है और न ही काम के लिए आधे दिन के लिए भी उपलब्ध है, उसे पूरे दिन के लिए 'कार्य के लिए उपलब्ध नहीं' (अथवा श्रमिक बल में नहीं) माना गया है और एक या दो अलाभकारी कार्यकलाप स्थिति के अंतर्गत रखा गया है जिसे वह दिन के दौरान करता/करती है। सप्ताह के सभी सात दिनों के लिए विभिन्न कार्यकलाप प्रवर्गों के अंतर्गत इस प्रकार वर्गीकृत सभी श्रमदिवसों को सात से भाग देकर, एक वर्ष की सर्वेक्षण अवधि के एक दिन का, कार्यकलाप प्रवर्ग के औसत से व्यक्तियों का विभाजन (जिसे दृढ़तापूर्वक श्रम दिवस कहा जा सकता है) दर्शाया गया है।

11. जांच पड़ताल संबंधी प्रश्न :—कार्य प्रतिमान के जटिल आयाम (विस्तार) को समझने के लिए 'बेरोजगारों', छात्रों, घरेलू कार्यों में लगे हुए व्यक्तियों के रूप में वर्गीकृत लोगों के लिए सामान्य कार्यस्थिति, अपेक्षित कार्य के प्रकार, कार्य पाने के लिए किये गये प्रयास के अनुसार 'नियोजित' के रूप में वर्गीकृत व्यक्तियों के बीच अतिरिक्त कार्य आदि के लिए प्रतिवेदित अधिमान्यताओं की प्रकृति तथा अल्प उपयोग की सीमा के बारे में अपेक्षित जानकारी प्राप्त करने के लिए उपर्युक्त प्रवर्ग के व्यक्तियों से कुछ जांच पड़ताल संबंधी प्रश्न किये गये। इन जांच पड़ताल संबंधी प्रश्नों के अतिरिक्त इस दौर में जांच पड़ताल संबंधी प्रश्नावली का एक दूसरा सेट एक मात्र उन व्यक्तियों के लिए तैयार किया गया है जो घरेलू कार्यों में लगे हुए व्यक्तियों के रूप में सामान्य कार्य स्थिति के अनुसार वर्गीकृत किये गये हैं जिसका उद्देश्य इन कारणों के बारे में जानकारी प्राप्त करना है जिससे ये घरेलू नीरस कार्यों से संलग्न हैं भले ही वे कार्य के लिए उपलब्ध हों यदि उस कार्य की व्यवस्था उनके घरों पर की जाती है।

12. कार्यकलाप प्रवर्ग 93 :—यह ज्ञात है कि घरेलू कार्यों में लगी हुई स्त्रियों विशेष रूप से ग्रामीण स्त्रियों का कुल कार्यकारी समय का एक अंश ऐसे कार्यों में व्यतीत होता है जो पारिवारिक आवश्यकताओं को पूरा करने के लिए अपेक्षित है। इस कार्यकलाप को लाभकारी माना जाता है यदि उनके द्वारा उत्पादित माल या सेवाएं विक्रय के लिए प्रयुक्त होती हैं। सामान्यतः इस बात का अनुभव किया गया है कि व्यक्तियों, अधिकांश रूप से स्त्रियों के पारिवारिक कार्यकलाप में सहभागिता के इस पहलू से संबंधित जानकारी, जिसे सामान्य कार्य स्थिति के अनुसार "घरेलू कार्यों में लगे हुए" के रूप में वर्गीकृत किया गया है उसे राष्ट्रीय प्रतिदर्श सर्वेक्षणों से प्राप्त नहीं किया जा सका है। इसलिए सर्वेक्षण के 32वें दौर में उन व्यक्तियों को जो प्रधानता घरेलू कार्यों में लगे हुए हैं, दो भागों में उपविभाजित करने का प्रयास किया गया है अर्थात् (1) एक मात्र घरेलू कार्यों में लगे हुए स्वतंत्र रूप से मछली पकड़ने और छोटे मोटे शिकार जैसे कार्यकलाप के साथ साथ घरेलू कार्यों में लगे हुए जैसा कि पहले सूचीबद्ध किया गया है। घरेलू कार्यों में लगे हुए व्यक्तियों के बारे में इस नवीन कार्यकलाप प्रवर्ग को अपनाने का उद्देश्य केवल घरेलू कार्य करने वाले व्यक्तियों की तुलना में उन व्यक्तियों को अलग से पहचानना है जो अपने घरेलू कार्यों के साथ साथ उपर्युक्त कार्य भी करते हैं।

प्रस्तुत की गई सारणियों का विवरण :—इस बात का पहले ही उल्लेख किया गया है कि 12 राज्यों के लिए जनसंख्या की पारिवारिक विशेषताओं और कार्यकलाप संबंधी विशेषताओं से संबंधित सूचना की कुछ मूलभूत मदों के अनुमान यहां दर्शाये गये हैं। संबंधित परिणाम दस अलग अलग सारणियों में दर्शाये गये हैं। इन सारणियों का एक संक्षिप्त विवरण नीचे दिया जा रहा है।

सारणी (1) :—इस सारणी में, पारिवारिक आकार प्रकार के अनुसार ग्रामीण और शहरी परिवारों का विभाजन और परिवार के प्रति व्यक्ति का मासिक व्यय दर्शाया गया है। ग्रामीण क्षेत्रों में सर्वेक्षण के पारिवारिक को पांच विभिन्न प्रवर्गों के अंतर्गत वर्गीकृत किया गया है। ये प्रवर्ग निम्नलिखित हैं :—

- (क) कृषि व्यवसायों में स्वनियोजित परिवार।
- (ख) गैर खेतिहर व्यवसाय में स्वनियोजित परिवार।
- (ग) कृषि मजदूरों के परिवार।
- (घ) गैर खेतिहर मजदूरों के परिवार।
- (ङ) अन्य परिवार।

शहरी क्षेत्रों के लिए केवल दो अलग अलग प्रकार के परिवारों पर विचार किया गया है। जो निम्नलिखित हैं।

(क) स्वनियोजित परिवार।

(ख) अन्य परिवार।

सारणी (2) :— परिवार के प्रतिव्यक्ति प्रतिमास व्यय तथा प्रमुख पारिवारिक उद्योग के अनुसार ग्रामीण तथा शहरी परिवारों का विभाजन सारणी (2) में दर्शाया गया है इसमें पारिवारिक उद्योग को एक साधन माना गया है जिससे सर्वेक्षण की तारीख से आरम्भ करके 365 दिनों के दौरान परिवार को प्रमुख आमदनी हुई है। यहां केवल नौ बृहद् औद्योगिक प्रवर्गों पर विचार किया गया है। ये प्रवर्ग हैं : कृषि, खनन तथा उत्खनन, विनिर्माणकारी कार्य, विद्युत, गैस एवं जल, निर्माण कार्य, व्यापार, परिवहन, सेवायें तथा अन्य।

सारणी (3) :—परिवार के प्रति व्यक्ति मासिक व्यय के अनुसार ग्रामीण तथा शहरी परिवारों का विभाजन तथा कुल व्यक्तियों की तुलना में आर्थिक दृष्टि से सक्रियाशील व्यक्तियों का अनुपात सारणी (3) में दर्शाया गया है। रोजगार प्राप्त तथा बेरोजगारों को मिलाकर आर्थिक दृष्टि से क्रियाशील व्यक्तियों की जनसंख्या का अनुमान लगाया गया है।

सारणी (4) :—सारणी 4 में (i) परिवारों की कुल संख्या (ii) कुल व्यक्ति (iii) कुल आर्थिक दृष्टि से क्रियाशील व्यक्ति (iv) परिवार का औसत आकार, और (v) प्रत्येक परिवार के प्रति व्यक्ति मासिक व्यय श्रेणी के प्रति परिवार के आर्थिक दृष्टि से क्रियाशील व्यक्तियों की औसत संख्या के अनुमान दर्शाये गये हैं। 'व्यक्तियों' तथा 'आर्थिक दृष्टि से क्रियाशील व्यक्तियों' के अनुमान स्त्रियों और पुरुषों के लिए अलग अलग दर्शाये गये हैं।

सारणी (5) :—सारणी (5) में आयु समूह के अनुसार पांच वर्ष की आयु वाले और उनसे अधिक आयु समूह के स्त्री और पुरुषों का विभाजन और सामान्य कार्यकलाप स्थिति को दर्शाया गया है। इस सारणी में जनसंख्या को 5-14, 15-29, 30-44, 45-59 और 60 तथा इससे अधिक पांच आयु समूहों में विभाजित करके दर्शाया गया है। सामान्य कार्यकलाप स्थिति प्रवर्गों को केवल सारणी के स्तम्भ (1) और (2) में दर्शाया गया है। यह पहले ही कहा जा चुका है कि किसी व्यक्ति की सामान्य कार्य स्थिति का निर्धारण 'अधिकांश समय' अथवा सर्वेक्षण की तारीख से आरम्भ करके 365 दिनों की संदर्भ अवधि सहित बनाये गये मापदंड 'संबंधित दीर्घकाल' के आधार पर किया गया है। इस बात का भी ध्यान रखा जाए कि इस माप दंड के अनुसार कुछ व्यक्ति जो, 'बेरोजगार' प्रवर्ग में रखे गये थे, अभी भी 365 दिनों की संदर्भावधि के दौरान किसी लाभकारी कार्यकलाप में नियोजित हैं। इस प्रकार का अनुसरण लाभकारी कार्यकलाप की गौण क्षमता पर ध्यान नहीं दिया गया ताकि सारणी (5) में दर्शाये गये विभाजन को स्पष्ट किया जा सके।

सारणी (6) :—इस सारणी में सामान्य कार्यकलाप स्थिति के अनुसार 5 वर्ष और अधिक आयु के स्त्री और पुरुषों का विभाजन दर्शाया गया है जिसमें अधिकांश व्यतीत किये गये समय मापदंड के अनुसार संदर्भावधि के दौरान 'बेरोजगार' के रूप में प्रवर्गीकृत व्यक्तियों की गौण लाभकारी स्थिति पर भी विचार किया जा रहा है। विभाजनों के आयु समूह तथा कार्यकलाप स्थिति के अनुसार दोहरे रूप से वर्गीकृत करके दर्शाया गया है।

सारणी (7) :—सारणी (7) में 5 वर्ष और उससे अधिक उम्र के पुरुषों और स्त्रियों का वर्गीकरण प्रस्तुत किया गया है जिन्हें औद्योगिक वर्गीकरण के दो अंक प्रमुख समूह द्वारा "सामान्य कार्य स्थिति" वर्गीकरण के अनुसार 'कार्यरत' प्रवर्गित किया गया है। ग्रामीण तथा शहरी दोनों क्षेत्रों के लिए अनुमान उसी सारणी में प्रस्तुत किये गये हैं।

सारणी (8) :—(ग्रामीण व शहरी) 5 वर्ष और उससे अधिक आयु वाले स्त्रियों और पुरुषों का विभाजन जिन्हें विशिष्ट समूहों के व्यवसाय के अनुसार सामान्यतः कार्यरत प्रवर्गित किया गया है उन्हें ग्रामीण क्षेत्रों के लिए सारणी-8 ग्रामीण, और शहरी क्षेत्रों के लिए सारणी 8 शहरी में दर्शाया गया है। इस बात पर ध्यान दिया जाए कि यहां पर दर्शाये गये व्यवसाय समूह ग्रामीण और शहरी क्षेत्रों के लिए अलग अलग हैं क्योंकि ग्रामीण क्षेत्रों में व्यवसाय प्रतिमान शहरी क्षेत्रों के व्यवसाय प्रतिमान से भिन्न हैं। 5 वर्ष और उससे अधिक की आयु वाले पुरुषों और स्त्रियों का विभाजन उनके वर्तमान साप्ताहिक कार्यकलाप तथा आयु वर्ग के आयु समूह के अनुसार सारणी 9 में प्रस्तुत किया गया है। दिये गये अनुमान सर्वेक्षण की तारीख से 365 दिनों की संदर्भावधि की तुलना में व्यक्तियों के बारे में औसत साप्ताहिक कार्य स्थिति का प्रतिनिधित्व करते हैं।

सारणी (10) :—इस सारणी में सर्वेक्षण की तारीख से पूर्व 365 दिनों की संदर्भावधि की तुलना में औसत रूप से उक्त व्यक्तियों के लिए कार्यकलाप स्थिति दर्शायी गई है। ये अनुमान विभिन्न आयु समूहों के अनुसार दोहरे रूप से वर्गीकृत सर्वेक्षण की तारीख से पूर्व 365 दिनों की संदर्भावधि की तुलना में औसत दिवस से संबंधित विभिन्न कार्यकलाप में लगे हुए 5 वर्ष और उससे अधिक आयु वाले व्यक्तियों के कार्य दिवसों की संख्या का प्रतिनिधित्व करते हैं। ये अनुमान पुरुषों और महिलाओं के लिए अलग अलग प्रस्तुत किये गये हैं।

इस प्रलेख में दर्शायी गयी जनसंख्या संबंधी अनुमान, 1-1-1978 को प्रक्षेपित जनसंख्या तथा समायोजन घटक
