प्राक्कथन

राष्ट्रीय प्रतिदर्श सर्वेक्षण (एनएसएस) के अखिल भारत ऋण एवं निवेश सर्वेक्षण (एआईडीआईएस) परिसम्पत्तियों के स्टॉक, ऋणग्रस्तता की घटनाओं, पूंजी निर्माण के विभिन्न संकेतकों तथा ग्रामीण/शहरी अर्थव्यवस्था के अन्य संकेतकों संबंधी आंकड़ों के प्रमुख स्रोत हैं । इन्हें विभिन्न सरकारी संगठनों, शिक्षाविदों, शोधकर्ताओं और विद्वानों द्वारा योजना, नीति-निर्माण और निर्णय लेने तथा आगामी विश्लेषात्मक अध्ययनों के लिए इनपुट के रूप में प्रयोग में लाया जाता है ।

राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय (एनएसएसओ) ने जनवरी-दिसम्बर 2013 के दौरान किए गए वर्तमान 70वें दौर के सर्वेक्षण से पूर्व अपने 26वें दौर (जुलाई 1971-जून 1972), 37वें दौर (जनवरी-दिसम्बर 1982), 48वें दौर (जनवरी-दिसम्बर 1992), तथा 59वें दौर (जनवरी-दिसम्बर 2003), में अखिल भारत ऋण और निवेश सर्वेक्षण किया । वर्तमान अखिल भारत ऋण एवं निवेश सर्वेक्षण में, परिवारों की परिसम्पतियों और देयताओं संबंधी सूचना दिनांक 30 जून 2012 की स्थिति के अनुसार एकत्र की गई । अधिकांश राज्य सरकारों ने भी समान प्रतिदर्श आधार पर इस सर्वेक्षण में भाग लिया । परिसम्पतियों और देयताओं पर सूचना के अलावा, आवासीय भवनों, कृषि व्यापार तथा गैर-कृषि व्यापार जैसे विभिन्न शीर्षों के अन्तर्गत कृषि वर्ष 2012-2013 के दौरान परिवारों द्वारा किए गए पूंजीगत व्यय पर भी सूचना एकत्र की गई ।

अखिल भारत ऋण एवं निवेश सर्वेक्षण के इस दौर में एनएसएसओ द्वारा एकत्र केन्द्रीय प्रतिदर्श आंकड़ों के आधार पर, भारतीय परिवारों की परिसम्पतियों और ऋणग्रस्तता के महत्वपूर्ण संकेतकों को देने वाले *भारत में ऋण और निवेश के प्रमुख संकेतक* तथा इकाई स्तरीय आंकड़े दिसम्बर 2014 में जारी किए गए । *परिसम्पतियों और देयताओं* पर वर्तमान रिपोर्ट चार रिपोर्टों की श्रृंखला में प्रथम है । इस रिपोर्ट में तीन अध्याय तथा तीन परिशिष्ट हैं । अध्याय एक में इस रिपोर्ट की प्रस्तावना है तथा अध्याय दो में इस सर्वेक्षण के लिए प्रयुक्त बुनियादी अवधारणाओं और परिभाषाओं का वर्णन किया गया है । अध्याय तीन में सर्वेक्षण आंकड़ों से प्राप्त परिवार की परिसम्पतियों और देयताओं के मुख्य निष्कर्षों पर चर्चा की गई है ।

सर्वेक्षण अभिकल्प तथा अनुसंधान प्रभाग (एसडीआरडी) ने सर्वेक्षण के साधन विकसित करने तथा इस रिपोर्ट को तैयार करने का कार्य किया है । केन्द्रीय प्रतिदर्श के संबंध में सर्वेक्षण का क्षेत्र कार्य क्षेत्र संकार्य प्रभाग (एफओडी) द्वारा किया गया है । जबकि आंकड़ा विधायन तथा सारणीयन का कार्य समंक विधायन प्रभाग (डीपीडी) द्वारा किया गया है । समन्वय एवं प्रकाशन प्रभाग (सीपीडी) ने सर्वेक्षण संबंधी विभिन्न कार्यकलापों के समन्वयन का कार्य किया है ।

मैं, सर्वेक्षण के विभिन्न चरणों में अपना बहुमूल्य मार्गदर्शन प्रदान करने हेतु, राष्ट्रीय प्रतिदर्श सर्वेक्षण के 70वें दौर के कार्य दल और राष्ट्रीय सांख्यिकीय आयोग (एनएससी) के अध्यक्ष और सदस्यों का अत्यंत आभारी हूँ । मैं इस रिपोर्ट को तैयार करने में शामिल एनएसएसओ के विभिन्न प्रभागों के अधिकारियों द्वारा किये गये प्रयासों की भी सराहना करता हूँ ।

मैं आशा करता हूँ कि यह रिपोर्ट योजनाकारों, नीति-निर्माताओं, शिक्षाविदों और शोधकर्ताओं के लिए उपयोगी सिद्ध होगी । इस रिपोर्ट की विषयवस्तु, कलेवर, कवरेज अथवा रिपोर्ट के किसी अन्य पहलू में सुधार के लिए सुझावों का स्वागत है ।

(समीरन मल्लिक)

Preface

The All-India Debt and Investment Surveys (AIDIS) of the National Sample Survey (NSS) are the primary source of data on various indicators of stock of assets, incidence of indebtedness, capital formation and other indicators of rural/urban economy. These are used for planning, policy formulation and decision support and as input for further analytical studies by various Government organizations, academicians, researchers and scholars.

National Sample Survey Office (NSSO) undertook All-India Debt and Investment Survey (AIDIS) in its 26th round (July 1971-June 1972), 37th round (January-December 1982), 48th round (January-December 1992) and 59th round (January-December 2003) prior to the present 70th round survey carried out during January-December 2013. In the present AIDIS, information on the assets and liabilities of the households was collected as on 30th June 2012. Most of the State Governments also participated in this survey on a matching sample basis. Besides information on assets and liabilities, the information was also collected on the amount of capital expenditure incurred by the households during the Agricultural Year 2012-2013 under different heads, like residential buildings, farm business and non-farm business.

Based on the Central Sample data collected by NSSO in this round of AIDIS, the *Key Indicators of Debt and Investment in India*, giving the important indicators of assets and indebtedness of Indian households and the unit level data were released in December 2014. The present report *Household Assets and Liabilities* is the first in the series of four reports. This report contains three chapters and three appendices. Chapter One gives an introduction to the report and Chapter Two describes the basic concepts and definitions used for the survey. Chapter Three discusses the main findings on household assets and liabilities obtained from the survey data.

The Survey Design and Research Division (SDRD) undertook the development of survey instruments and the preparation of this document. Field work of the survey was carried out by the Field Operations Division (FOD) in respect of central sample. The data processing and tabulation work was done by the Data Processing Division (DPD). The Coordination and Publication Division (CPD) coordinated various activities pertaining to the survey.

I am grateful to the Chairman and Members of the Working Group for NSS 70th round and National Statistical Commission (NSC) for providing their valuable guidance at various stages of the survey. I would also like to appreciate efforts made by the officers of the different Divisions of NSSO involved in preparation of this document.

I am sure that the report will be useful to planners, policy makers, academicians and researchers. Suggestions for improvement in content, layout and other aspects of this document will be highly appreciated.

$RSAI_{indicator}$	Ratio of indicator at State to All-India

Chapter One
Introduction

1.1 The Report in Perspective

1.1.1 The National Sample Survey Office (NSSO) conducts nationwide socio-economic surveys as part of its "rounds", each round normally of a year's duration. The NSS surveys are conducted through household interviews on a random sample of households selected through a scientific design and cover practically the entire geographical area of the country.

1.1.2 The All-India Debt and Investment Survey (AIDIS) is generally conducted as one of the main enquiries of an NSS round at decenial intervals. This provides a series of AIDIS's. The present report provides the results of AIDIS which was carried out as a part of the 70th round survey of NSSO during January to December 2013. This was the seventh such survey conducted at the all-India level. The present report is the first in the series of four reports of this AIDIS.

1.1.3 The main objective of the AIDIS is to generate reliable estimates on assets, liabilities and capital expenditure of the household sector. At present, the decennially conducted AIDIS is the only nation-wide enquiry providing data on these aspects of Indian households (assets, indebtedness and capital expenditure). In the 70th round, information on assets and liabilities of the households as on 30.6.12, amount of capital expenditure incurred by the household during the agricultural year 2012 – 13 (July 2012 – June 2013), cash borrowings and repayments made by the household, sale and loss of assets of the household during the agricultural year 2012 – 13 was collected through the Debt and Investment Schedule (Schedule 18.2). The present report contains the survey results of the 70th round on value and composition of the household assets as also extent of indebtedness and amount of cash loans as on 30th June 2012.

1.2 Background

1.2.1 The Reserve Bank of India (RBI) conducted the "All India Rural Credit Survey", for the first time during November 1951 to August 1952, in 75 selected districts spread all over the country. The main objective of this survey was to study two aspects, namely, (i) the demand for credit from rural families and (ii) the supply of credit by credit agencies – both institutional and non-institutional. The data were collected mainly for formulating the banking policies. Information on assets, economic activities, particulars of credit operations and the incidence of indebtedness in the rural India was collected in the survey to assess the

demand for rural credit. Further, data on the extent and mode of operations of different credit agencies were collected to examine the supply side of credit.

1.2.2 The first Rural Credit Survey was followed by a similar survey in 1961-62 by the RBI. The scope of the survey was extended to include capital expenditure in the household sector and other associated indicators of the rural economy. The second survey thus came to be known as the "All-India Rural Debt and Investment Survey".

1.2.3 The responsibility of conducting the third such survey was given to NSSO, the then National Sample Survey Organisation. This organisation undertook the All-India Debt and Investment Survey (AIDIS) covering both rural and urban areas, in its 26th round ('71-'72), 37th round ('81-'82), 48th round ('92) and 59th round ('03), prior to the 70th round ('13). The objectives of the AIDIS remain the same as those of the earlier surveys, namely, to obtain quantitative information on the stock of assets, incidence of indebtedness, capital formation and other indicators for the rural/urban economy which will be of value in developing the credit structure in particular, and also to obtain other allied information required in the field of planning and development. Since the survey was in the nature of a repeat survey of the 59th round, it was considered necessary to plan the survey in such a way as to ensure comparability of some estimates with those of earlier rounds as far as practicable.

1.3 Comparability with previous round survey

1.3.1 After a critical review of the concepts and definitions followed in the AIDIS of NSS 59th Round with respect to the changed scenario of the country, some changes were made in the procedure of valuation of assets for the 70th Round:

a. Values of *land & building* as on 30.06.2012 were recorded in the 70th round as per their normative/guideline values, whereas in the 59th round they were recorded 'as reported by the informant'.

b. The value of the shares and debentures owned *on the date of survey* was evaluated as per the market price prevailing on the date of survey, if the said shares/debentures had been purchased before the reference date, i.e. 30.06.12. On the other hand, if the shares, etc., were acquired during the reference period, then the purchase/sale price was recorded under 'acquisition' or under 'disposal', as the case might be. If they had been acquired during the reference period by ways other than purchase, then the market price prevailing on the date of survey was recorded. In cases where it was not possible to ascertain the prevailing market price of a share, the paid-up value of the shares (if acquired other than by way of purchase) or the value paid by the household (if they had been purchased) was recorded.

c. In case of certificates, annuity schemes, the amount paid at the time of purchase was recorded. In case of deposits, the face value was recorded. In case of insurance premium, total of the premium paid up to the reference date was considered. Moreover, for contributions to provident fund, etc., total contribution plus interest earned was recorded. In case of Unit Linked Insurance plans (ULIP), the valuation

was obtained as product of number of units and net asset value (NAV) of the unit. In previous round, however, value of financial assets on the date of survey and disposal and acquisition during reference date to date of survey had been recorded, and finally value as on reference date had been derived.

1.3.2 In the 70th round, unlike the previous round, direct question on the value of asset excluding shares/debentures etc., as on 30.06.2012 was asked. In 59th round asset data as on reference date was derived from the data as on the date of survey and the data on transactions during the reference date to the date of survey.

1.3.3 Household durables were not considered as assets in this round (as valuation of durable goods as on any date is difficult to obtain; and some information regarding durable assets are available from Household Consumer Expenditure Survey).

1.3.4 Bullion and ornaments were collected but kept outside the purview of assets. (In the 59th round all household durables including bullion and ornaments were part of asset)

1.3.5 Assets and liabilities of household enterprises were recorded only if the enterprise was fully owned by the household, and not a partnership involving members of different households.

1.3.6 The estimates on assets and liabilities for Telangana are available for the first time from the 70th round survey. It may be noted that, estimates shown for the state of Andhra Pradesh relate to the newly formed state of that name. However, for the earlier rounds, estimates shown for Andhra Pradesh correspond to the erstwhile state boundaries that existed before the new state was carved out.

1.3.7 Due to the change in coverage and difference in concepts and definitions followed in the two rounds in respect of some important parameters, the results of AIDIS 2013 (NSS 70th round) are not strictly comparable with the results of AIDIS 2003 (NSS 59th round). While making any comparison of results of AIDIS 2013 with those of AIDIS 2003, these differences should be taken into consideration.

1.4 Reports of the 70th round AIDIS

1.4.1 The results of the NSS 70th round survey on debt and investment are planned for release in four reports based on comprehensive tabulation of subject parameters and indicators in various cross-classifications generated from the central sample data[1] . The titles of these reports are:

1 Household Assets and Liabilities in India (as on 30.06.2012)

2 Household Indebtedness in India (as on 30.06.2012)

3 Household Asset Holding and Indebtedness of Social Groups in India (as on 30.06.2012)

4 Household Capital Expenditure in India during 01.07.2012 to 30.6.2013

[1] See paragraph 1.8.6.1

1.5 Contents of this document

1.5.1 This report contains three chapters and three appendices. The present chapter, Chapter One gives an introduction to the report, and Chapter Two describes the basic concepts and definitions used for the survey. Chapter 3 discusses the main findings on household assets and liabilities obtained from the survey data. Appendix A of the report contains tables providing estimates of various items of assets and liabilities for all states. Appendix B gives details of the sample design and estimation procedure followed and Appendix C consists of the schedules of enquiry (Schedule 18.2, visit 1 and visit 2) that were canvassed in the surveyed households.

1.5.2 Chapter Three summarises the major findings of the survey and discusses the salient features relating to assets and cash liabilities of the households as on 30.06.12. The observations are mainly confined to all-India estimates and are followed by an examination of the disparities in ownership of assets and incidence of indebtedness across selected states and their rural-urban sectors. The estimates for the smaller States and Union Territories (UTs) have not been presented separately as the sample sizes for the smaller states and UTs may not be adequate for getting estimates of desired accuracy – at least for measuring change or inter-state difference. The estimates for those states and UTs are presented in the Appendix A. Information on kind loan (collected as on date of survey) is not analysed in this report.

1.5.2.1 Appendix A of the report contains tables providing estimates of various items of assets as also of the total assets and liabilities of the households as on 30.06.2012 at the state and all-India level separately for rural and urban areas. As such, for this report, liabilities denote cash loans outstanding as on 30.6.2012, which is hereafter referred to, in brief, as debts of households. The term 'indebted households' also stands for the same.

1.5.2.2 All the estimates presented in this report are based on the central sample data only and also based on combined estimate of the two sub-samples. It would be worthwhile to mention here that the cell figures in any of these detailed tables, when added up, may not exactly equal the figure shown against the 'total' column (or line) due to (i) rounding off and/or (ii) the presence of non-response cases.

1.5.3 The indicators presented in this report are –

Assets	(i) Average value of asset of household by decile class of household assets, by selected states; share of components of assets in the total value of assets for for households, ratio of household assets of states to all India ($RSAI_{AVA}$), for decile class of household assets, by selected states,
Indebtedness	(ii) Incidence of Indebtedness and Average Amount of Debt of household, for decile class of household assets, by selected states, change in household indebtedness
Debt-Asset ratio	(v) Debt-Asset ratio for decile class of household assets, selected states, change in Debt asset Ratio, ratio of debt to financial assets
Financial inclusion and Owning bullion and ornaments	
Inequality in asset distribution	

1.6 Schedules of enquiry

1.6.1 The survey period of the 70th round was from January to December 2013. The required information was collected from a set of sample households through two visits to each household (*see Appendix C for detailed schedule*). On considerations of operational necessity, the survey period of the first visit was fixed as seven months from January to July 2013 and the survey period of the second visit of five months duration from August to December 2013.

1.6.2 In each visit, the liability position of the household was ascertained with reference to a fixed reference date which was the same for all sample households, viz., the 30th of June, 2012 for the first visit and the 30th of June, 2013 in the second visit. The assets position of the household on the other hand, was ascertained only in the first visit, with reference to a fixed reference date, viz., the 30th of June, 2012.

1.6.3 Broadly, the following information was collected in this round from each household:

1. the assets (***owned***) of the household as on 30th June 2012, classified into (a) physical assets and (b) financial assets
2. the liabilities of the household as on 30th June 2012 in visit 1 and as on 30th June 2013 in visit 2
3. the amount of capital expenditure incurred (on all *transactions*) by the household during July 2012 - June 2013 on (a) residential plots, houses or buildings, (b) farm business and (c) non-farm business.

1.7 Scope and coverage

1.7.1 *Geographical coverage:* This survey covered the whole of the Indian Union.

1.7.2 *Population coverage:* The following rules were adhered to determine population coverage:

1. Floating population, i.e., persons without any normal residence, was excluded. But persons residing in open space, roadside shelter, under a bridge, etc., more or less regularly in the same place were covered.
2. Foreign nationals were excluded, as well as their domestic servants, if by definition the latter belonged to the foreign national's household (see Chapter 2 for definition of household).
3. Persons residing in barracks of military and paramilitary forces (like police, BSF etc.) were kept outside the survey coverage. However, the civilian population residing in their neighbourhood, including the family quarters of service personnel, was covered.
4. Orphanages, rescue homes, ashrams and vagrant houses were outside the survey coverage. However, the persons staying in old age homes, the students staying in ashram/hostels and the residential staff (other than monks/nuns) of these ashrams

were covered. Although orphans living in orphanages were excluded, the persons looking after them and staying there were covered. Convicted prisoners undergoing sentence were outside the coverage of the survey.

1.8 Conceptual framework

1.8.1 Reference period: All the estimates of assets and liabilities presented in this report are for a fixed reference date, viz. 30.06.2012. These are entirely based on the data collected during the first visit from the sample households. The position of assets (except shares and debentures) and liabilities of sample households as on 30.06.2012 was obtained directly from the informant unlike in the previous round where it had been derived from the data on the date of survey and the data on transactions during the period from the reference date to the date of survey.

1.8.2 The estimates of number of households presented in this report are based on data with a moving reference point, from 01.01.2013 to 31.07.2013, which spans a period of seven months. These estimates, therefore, may be taken to represent the number of households existing as on 15.04.2013, the mid-point of the seven-month period. The estimates for assets and liabilities for the 70th round are obtained as on 30.06.2012 and the average value of assets and liabilities are obtained by considering the number of households obtained from Visit I data. For this report only Visit I data were used.

1.8.3 The important classificatory characters used for tabulation are household type/major household type and household asset holding class.

1.8.4 In the 70th round, unlike the previous round, direct question were asked to ascertain the value of assets as on 30.06.2012 excluding the case of shares/debentures etc.. In case of indebtedness of the household, it was felt in this round that items like (i) 'interest accrued' during a particular period of time (ii) 'interest' outstanding as on date of survey are difficult to report, and hence the following items were recorded inclusive of interest in both Visit 1 and Visit 2.

a. amount 'repaid' during a particular period
b. amount 'written off 'during a particular period
c. amount 'outstanding' of the total loan amount as on date of survey

1.8.5 Sample design

1.8.5.1 A stratified multi-stage design was adopted for the 70th round survey. The first stage units (FSU) were the census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. The ultimate stage units (USU) were households in both the sectors. In case of large FSUs, one intermediate stage of sampling was the selection of two hamlet-groups (hgs)/sub-blocks (sbs) from each rural/ urban FSU.

1.8.5.2 For the rural sector, the list of 2001 census villages updated by excluding the villages urbanised and including the towns de-urbanised after 2001 census (henceforth the

term 'village' would mean Panchayat wards for Kerala) constituted the sampling frame. For the urban sector, the latest updated list of UFS blocks (2007-12) was considered as the sampling frame.

Table.T1: Number of villages/blocks surveyed and number of households surveyed for Schedule 18.2 Visit 1 and 2: NSS 70th round, Central sample

State/UT	no. of fsu's (villages/blocks) surveyed		no. of sample households					
			Visit 1			Visit 2		
	rural	urban	rural	urban	rural+urban	rural	urban	rural+urban

1.8.6 Sample size

1.8.6.1 *First-stage units*: For rural India, the number of villages surveyed in the Central sample (surveyed by NSSO) was 4,529 and the number of urban blocks surveyed was 3,507. This document is based on the estimates obtained from the Central sample only.

1.8.6.2 *Second-stage units*: Stratification of households was done on the basis of indebtedness (to institutional agencies or non- institutional agencies or neither) of a particular household. For the AIDIS, from each sample village and urban block, 14 households were surveyed. The sampling design and estimation procedure is presented in detail in Appendix B of this document. The total number of households in which Schedule 18.2 was canvassed, was 62,135 in rural India and 48,665 in urban India in Visit 1 and 61,650 in rural India and 46,771 in urban India in Visit 2.

1.8.6.3 Table T1 above shows the numbers of villages and urban blocks surveyed, and also the numbers of rural and urban sample households in each visit, for each State and Union Territory. Number of households surveyed in visit 2 is lower than those surveyed in visit 1 for many States/UT as some of the households could not be surveyed in visit 2 due to some reason or other.

Chapter Two
Concepts & Definitions

2.1 Basic Concepts

2.1.1 Household: A group of person normally living together and taking food from a common kitchen constitutes a household. The word "normally" means that temporary visitors are excluded but temporary stay-aways are included. Thus, a son or daughter residing in a hostel for studies is excluded from the household of his/her parents, but a resident employee or resident domestic servant or paying guest (but not just a tenant in the house) is included in the employer/host's household. "Living together" is usually given more importance than "sharing food from a common kitchen" in drawing the boundaries of a household in case the two criteria are in conflict; however, in the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to space shortage, the household formed by such a person's family members is taken to include that person also. Each inmate of a mess, hotel, boarding and lodging house, hostel, etc., is considered as a single-member household except that a family living in a hotel (say) is considered as one household only; the same applies to residential staff of such establishments. Under-trial prisoners in jails and indoor patients of hospitals, nursing homes, etc., are considered as members of the households to which they last belonged.

2.1.2 Household size: The size of a household is the total number of persons in the household.

2.1.3 Household Type: The household type, based on the means of livelihood of a household, was decided on the basis of the sources of the household's income during the 365 days preceding the date of survey. For this purpose, only the household's income (net income and not gross income) from economic activities was considered; but the incomes of servants and paying guests were not taken into account.

In rural areas, a household will belong to any one of the following six household types:

self-employed in agriculture
self-employed in non-agriculture
regular wage/salary earning
casual labour in agriculture
casual labour in non-agriculture
Others

a) Self-employed in agriculture/non-agriculture: Persons who operate their own farm or non-farm enterprises or are engaged independently in a profession or trade on own-

account or with one or a few partners are deemed to be self-employed in household enterprises. The essential feature of the self-employed is that they have autonomy (i.e., how, where and when to produce) and economic independence (i.e., market, scale of operation and money) for carrying out their operation. The remuneration of the self-employed consists of a non-separable combination of two parts: a reward for their labour and profit of their enterprise. The combined remuneration is given by the revenue from sale of output produced by self-employed persons minus the cost of purchased inputs in production.

b) Regular wage/salaried household: Persons working in farm or non-farm enterprises not ran by their own households and, in return, got salary or wages on a regular basis (i.e. not on daily basis or on periodic renewal of work contract) were treated as regular salaried/wage employees. An urban household reported that its major source of income during the 365 days preceding the date of survey was regular wage/salaried employment of members were treated as a 'regular wage/ salaried' households.

c) Casual labour household in agriculture/non-agriculture: Persons working in farm or non-farm enterprises not ran by their own households and, in return, got wages under terms of daily or periodic work contract were treated as casual wage labourers. An urban household reported that major source of its income during the 365 days preceding the date of survey was casual wage employment of members was treated as a 'casual labour' household.

d) *Others*: All households not falling in any of these above were considered as 'Others'.

2.1.4 Occupational classification of rural households: The rural households were initially classified into two types, namely, cultivator and non-cultivator households.

(i) *Cultivator households*: All rural households operating at least 0.002 hectare of land during the 365 days preceding the date of survey were treated as 'cultivator households'.

(ii) *Non-cultivator households:* All rural households operating no land or land less than 0.002 hectare were considered to be non-cultivator households.

2.1.5 Household type of urban households: In urban areas, each household was first categorised in one of the four groups self-employed, regular wage/ salaried employee, casual labour and 'others' as per the definitions given below :

self-employed
regular wage/salary earning
casual labour
others

(i) *Self-employed*: Persons engaged in the farm or non-farm enterprises of their households were called self-employed workers. In urban areas, a household was

considered self-employed, if the major source of its income during the 365 days preceding the date of survey was self-employment of its members.

(ii) *Other urban household*: All the remaining urban households were treated as 'other' households.

2.1.6 Major Occupational type: The term refers to *cultivator* and *non-cultivator* (i.e. other than cultivator) households for the rural areas. For the urban areas, *self-employed* and *other* households are the two major household types.

2.1.7 Household assets: Household assets represented all that were owned by the household and had money value. This included physical assets like land, buildings, livestock, agricultural machinery and implements, non-farm business equipment, all transport equipment, and financial assets like dues receivable on loans advanced in cash or in kind, shares in companies and cooperative societies, banks, etc., national saving certificates and the like, deposits in companies, banks, post offices and with individuals. The AIDIS does not include crops standing in the fields and stock of commodities held by the household in the household assets.

2.1.8 Liabilities: All claims against a household held by others were considered liabilities of the household. Thus all loans payable by the household to others, irrespective of whether they were cash loans or kind loans were deemed as liabilities of the households. Unpaid bills of grocers, doctors, lawyers, etc., were also considered liabilities of the household. Different kinds of liabilities are defined below.

(i) *Cash loans*: All loans taken in cash were considered to be cash loans, irrespective of whether those loans were repaid or proposed to be repaid in cash or in kind. Cash loans, generally, covered borrowings at specific rates of interest for specific periods of time. However, if a loan was taken even at 'nil' rate of interest from relatives and friends, it was considered to be a cash loan. The loans may be taken against a security or without any security. Dues payable by the household owing to purchase of goods under a hire-purchase scheme were treated as cash loans.

(ii) *Kind loans*: All loans taken in kind (except the cases of hire-purchase) irrespective of whether those were already repaid or yet to be repaid in cash or in kind were considered to be kind loans payable.

Assessment of the value of land: In this survey, value of land acquired prior to 30th June 2012 by the household through inheritance or otherwise was recorded on normative basis. Normative/guideline values of land (as on 30.06.12) were recorded in consultation with Patwaris (or equivalent) in the rural areas and the Registrar's office in the urban areas. For specific notional guidelines on valuation of 'Land outside the village', the value reported by the household was taken as the deemed 'notional value' for all practical purposes.

2.1.9 Valuation of assets In the first visit, information was collected on assets (***owned***) and liabilities as on 30th June 2012. The basis for valuation of assets is detailed below. However, for the purpose of estimation of capital formation, all actual expenses incurred on all *transactions* during the reference period (i.e. between 01.07.2012 and 30.06.2013) were recorded separately and were collected in both visits.

The following points may be noted:

a. Values of land & building as on 30.06.12 were reported as per their normative/guideline values. The local FOD officials consulted Patwaris (or equivalent) in the rural areas and the Registrar's office in the urban areas to obtain them.

b. In case of inability of respondents to report the value as on 30.06.12 of other physical assets like livestock, agricultural implements, non-farm equipment and transport equipment, knowledgeable local persons were contacted to assess these values.

c. Assets and liabilities of household enterprises were recorded only if the enterprise was fully owned by the household, and not a partnership involving members of different households.

d. The value of the shares and debentures owned *on the date of survey* were evaluated as per the market price prevailing on the date of survey, if the said shares/debentures were acquired before the reference date, i.e. 30.06.12. On the other hand, if the shares, etc. were acquired during the reference period by way of purchase, then the purchase price was recorded under 'acquisition' or under 'disposal', as the case may be. If they were acquired during the reference period by ways other than purchase, then the market price prevailing on the date of survey was recorded. In cases where it was not possible to ascertain the prevailing market price of a share, the paid-up value of the shares (if acquired other than by way of purchase) or the value paid by the household (if they are purchased) was recorded.

e. In case of certificates, annuity schemes, the amount paid at the time of purchase was entered. In case of deposits, the face value was entered. In case of insurance premium, total of the premium paid upto reference date was considered. Moreover, for contributions to provident fund, etc., total contribution plus interest earned was entered. In case of Unit Linked Insurance plans (ULIP), the valuation was obtained as product of number of units and net asset value (NAV) of the unit.

2.1.10 Farm business: Farm business comprised household economic activities like cultivation, including cultivation of plantation and orchard crops, and processing of produce on the farm, e.g. paddy hulling and *gur* making. Although *gur* making is a manufacturing activity, this was covered under farm business only when such activity was carried out in the farm by indigenous method. Farm business also included activities ancillary to agriculture, like livestock raising, poultry, fishing, dairy farm activities, bee keeping and other allied

activities coming under Tabulation Categories A and B of the National Industrial Classification 2008.

2.1.11 Non-farm business: Non-farm business was defined as all household economic activities other than those covered in the farm business. This cover manufacturing, mining & quarrying, trade, hotel & restaurant, transport, construction, repairing and other services. For the purpose of this survey, non-farm business were excluded when such activities were carried out in non-household enterprises. Non-farm business enterprises, which were registered under section 2m(i) or 2m(ii) and section 85 of Factories Act, 1948 and *Bidi* and Cigar manufacturing establishments registered under *Bidi* and Cigar Workers (condition of employment) Act, 1966 were kept outside the coverage of the survey.

2.1.12 Enterprise: An enterprise was defined as an undertaking which was engaged in the production and/or distribution of some goods and/or services meant mainly for the purpose of sale, whether fully or partly. An enterprise may be owned and operated by a single household or by several households jointly, or by an institutional body.

2.1.13 Household enterprise: A household enterprise was defined as one which was run by one or more members of a household or run jointly by two or more households on partnership basis irrespective of whether the enterprise was located in the premises of the household(s) or not. In other words, *all proprietary and partnership enterprises were household enterprises*.

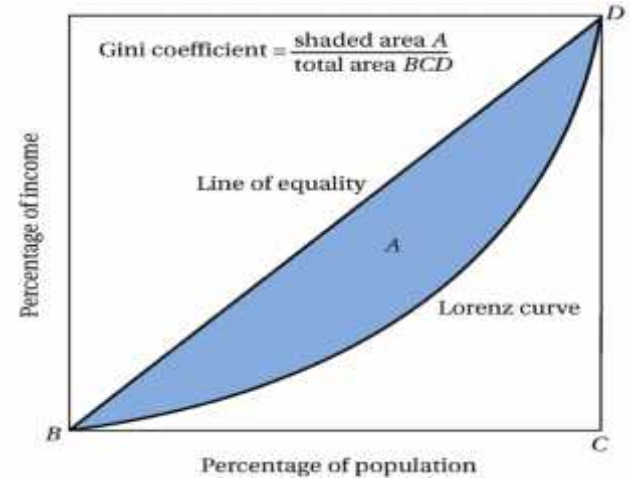

2.1.14 Non-household enterprise: Non-household enterprises were defined as those which were institutional, i.e., owned and run by the public sector (Central or State Government, local governments, government undertakings, etc.), corporate sector, co-operative societies, other types of societies, institutions, associations, trusts, etc.

2.1.15 Non-agricultural enterprises: All the enterprises covered under NIC-2008, 2–digit codes 05 to 99 were considered as non-agricultural enterprises.

2.1.16 Household asset holding class: This refers to the 10 decile classes of the Rural/Urban ALL-INDIA distribution (estimated distribution) of HOUSEHOLDS by asset holding size. In the tables, the different decile classes are referred to simply as 1 (lowest decile class), 2, 3, … 9, 10.

Thus, for example, the words “decile class 2” (or “10-20%”) in a table for the State PUNJAB, RURAL sector, means households of the rural Punjab falling in the second (second lowest) decile class of the estimated ALL-INDIA distribution of RURAL households by asset holding size. The 10 household asset holding classes were demarcated separately for each sector based on visit 1 data by examining the distribution of sample households over the asset holding classes for all-India after data on visit 1 schedules were entered and validated.

2.1.17 Gini's Coefficient: This is a measure of inequality of a distribution. It is defined as a ratio of *the area between the Lorenz curve of the distribution and the line of equality*; and *the area under the line of equality.* The Gini coefficient, should lie between 0 to 1 and is often used as a measure of income inequality. Here, 0 corresponds to perfect income equality (i.e. everyone has the same income) and 1 corresponds to perfect income inequality (i.e. one person has all the income, while everyone else has zero income). The Gini coefficient can also be used to measure wealth inequality.

Calculation of Gini's Coefficient:

Let X be a non-negative random variable with probability density function $f(x)$ and distribution function $F(x)$.

$$F(x) = P[X \le x] = \int_0^x f(x)dx$$

$$\mu = E(X) = \int_0^\infty xf(x)dx$$

Let $F_1(x) = \int_0^x yf(y)dy \Big/ \int_0^\infty xf(x)dx = \int_0^x yf(y)dy \Big/ \mu$

Then as x increases from 0 to ∞, $F(x)$ and $F_1(x)$ increase from 0 to 1. The relationship between F and F_1 gives the equation of the Lorenz curve, where $F_1=F_1(F)$.

Chapter Three

Summary of Findings

3.0 Introduction

3.0.1 This chapter summarises the major findings of the survey and discusses the salient features relating to assets and cash liabilities of the households as on 30th June, 2012. In India, Debt and Investment Surveys of NSSO, often called all-India Debt and Investment Survey (AIDISs), are the principal sources of data on assets, liabilities and capital expenditure of the household sector. As mentioned earlier, this survey is done once in ten years by NSSO. The present report pertains to the results obtained from the seventh AIDIS conducted by the NSSO in its 70th round during January – December, 2013. The report contains the results on value and composition of household along with the extent of indebtedness of the households and amount of debt per household as on 30th June, 2012.

3.0.2 The observations summarised in this chapter are mainly confined to all-India estimates followed by an examination of the disparities in ownership of assets and incidence of indebtedness across the selected states and its rural-urban sectors. The estimates for the smaller States and Union Territories (UTs) have not been presented separately. The reason is that the sample sizes for the smaller states and UTs may not be adequate for getting a sufficiently reliable estimate – at least for measuring change or inter-state comparison. The estimates for those states and UTs have, however, been given in the Appendix (Appendix A). The discussion starts with observation of the assets (average value of asset) of the households for the different household types. The variations in household asset holdings over various correlates like decile class of asset holding also have been discussed. Composition of different household asset holdings, as well as possession of rural and urban land by the households has been taken up for discussion. Discussion on household indebtedness, amount of debt per household in terms of cash dues for decile class of asset holding and debt-asset ratio of the households as on 30.6.2012have been taken up subsequently and finally the chapter concludes with a discussion on inequality in distribution of assets.

3.0.3 To have an idea of the change of household asset holdings and indebtedness over the years since 1991, the results of the earlier surveys of the NSSO on Debt and Investment, viz. 48th (1991) and 59th (2002) rounds are also presented in this report. The estimates for assets and liabilities for the 48th and 59th round were obtained as on 30.06.1991, 30.06.2002 respectively, and the corresponding estimates for the 70thround have been obtained as on 30.06.2012. In the 70th round, estimates for the number of households have been obtained from the data of first visit (collected during January – July, 2013) only, and therefore, the

estimates refer to the mid-point of the survey period of Visit 1, i.e. 15.04.2013. But to indicate a uniform reference period for the estimates of a round, in the summary tables of this chapter, the reference periods for the 48th, 59thand 70throunds are stated as 1991,2002and 2012 respectively.

3.0.4 For the purpose of report, the selectedstates (which are relatively large in terms of population) are: Andhra Pradesh, Assam, Bihar, Chhattisgarh, Gujarat, Haryana, Jharkhand, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Odisha, Punjab, Rajasthan, Tamil Nadu, Telangana, Uttar Pradesh, and West Bengal. However, the estimates for all-India presented in the statement tables of this chapter as well as other tables of the report are based on the data of all the states and union territories. .

3.0.5 The states of Chhattisgarh, Jharkhand,Uttarakhandand Telangana have emerged in the recent past out of the partition of erstwhile Madhya Pradesh, Bihar and Uttar Pradesh, and Andhra Pradesh respectively. The estimates on assets and liabilities for Chhattisgarh, Jharkhand and Uttarakhand are available for the first time from the 59th round survey and for Telangana from the 70th round survey. Therefore, while presenting comparable figures with the earlier rounds at the state level, figures for these new states are shown as '-'. It may be noted that for the earlier rounds, estimates shown for the states of Madhya Pradesh, Bihar and Uttar Pradesh and Andhra Pradesh correspond to the erstwhile state boundaries that existed before the new states were carved out.

3.1 Indicators at a glance: all-India level Assets and liabilities

3.1.1 Information on both physical and financial assets owned by the households as on 30.06.2012 was collected in the 70th round survey on Debt and Investment along with outstanding amount of indebtedness of indebted households. Proportion of households owning some asset as well as proportion of household reporting indebtedness can be directly arrived at from this survey. Moreover, some basic indicators such as(i) average value of assets (AVA), (ii) average amount of debt (AOD), (iii) incidence of indebtedness and (iv) debt asset ratio (DAR) at all-India level, which were attained from this survey are shown in the statement 3.1 separately for rural and urban sector.

> Assets like land, buildings, livestock, agricultural implements & machinery, non-farm business equipment, transport equipment were considered under physical assets, while cash and kind dues receivable and shares, deposits, etc., were considered under financial assets. Average value of all these assets owned per households is named as **AVA**.

3.1.2 Statement 3.1 gives, along with AVAs, the percentage of households reporting ownership of some assets. It is seen that 98.3% of rural households and 93.5% of urban households reported owning some kind of physical or financial assets. Wide variation in AVA is observed between the rural and urban areas. A rural household, on an average, owned assets of Rs. 10 lakh, which was less than half of assets owned by the urban household (Rs. 23 lakh).

Statement 3.1: Important indicators of asset and liabilities of India as on 30.06.2012

indicators	rural	urban
(1)	(2)	(3)
% of households owning assets	98.3	93.5
Incidence of Indebtedness (%)	31.4	22.4
Average Value of Assets (` 000) per household	1007	2285
Average Amount of Debt (`) per household	32522	84625
Average Amount of Debt (`) per indebted household	103457	378238
Debt-Asset Ratio (%)	3.2	3.7

Ref: Table 1R/U, Appendix A

The percentage of the indebted households is named as incidence of indebtedness (**IOI)**

3.1.3 The percentage of indebted households, representing incidence of indebtedness (IOI) and average amount of debt (AOD) per household as on 30.06.2012 for rural and urban areas of India are presented in Statement 3.1. The results show that the IOI was about 31.4 % among the rural households and 22.4% among the urban households. The AOD per household was less in the rural sector than in the urban, the values being Rs. 32522 and Rs. 84625, respectively.

The 'debt-asset' ratio(**DAR)**is defined as the average amount of debt (AOD) outstanding on a given date for a group of households expressed as a percentage of the average amount of assets (AVA) owned by them on that given date. Reference date is 30.06.2012

3.1.4 It may be seen from Statement 3.1 that as on 30.06.2012, the 'debt-asset' ratio at the all-India level was found to be 3.7% for the urban areas and 3.2% for the rural India.

3.2 Average Asset Holdings in Different Household Types

3.2.1 The household type is determined on the basis of the income earned by the household from different sources during the 365 days preceding the date of survey. Details of the classifications are given in Chapter 2.

The household type is determined on the basis of the income earned by the household from different sources during the 365 days preceding the date of survey.

3.2.2 Statement 3.2 gives, proportion of households owning assets along with AVAs for each household type in rural and urban area separately for ‘male-headed’ and ‘female-headed’ households.

Statement 3.2 : Percentage of householdsowning assets , average value of assets(Rs.) per household as on 30.06.12 by household type and sex of head of household

household type	sex of head of household					
	male		female		all	
	% of households in the type	avg. value of assets per household (₹000)	% of households in the type	avg. value ofassets per household (₹000)	% of households in the type	avg. value of assets per household (₹000)
(1)	(2)	(3)	(4)	(6)	(7)	(8)
						Rural
self-empl. in agri.	44.5	1606	28.4	1255	42.3	1574
self-empl. in non-agri.	11.9	931	7.7	906	11.3	929
regular wage/salaried	10.3	994	9.2	889	10.1	981
casual labour in agri.	16.0	312	16.6	259	16.0	304
casual labour in non-agri.	14.0	372	9.4	399	13.3	375
others	3.4	687	28.7	454	6.9	554
all	**100.0**	**1053**	**100.0**	**719**	**100.0**	**1007**
estd.no. of hhs (00)	*1347815*			*213572*		*1561387*
						Urban
self-employed	33.8	3697	16.4	3104	31.4	3653
regular wage/salaried	41.8	1980	32.6	1850	40.5	1965
casual labour	15.0	611	13.6	510	14.8	598
others	9.4	2250	37.4	1407	13.4	1916
all	**100.0**	**2380**	**100.0**	**1708**	**100.0**	**2285**
estd. no. of hhs (00)	*718571*		*118678*		*837249*	

3.2.3 Wide variation in AVA is observed between the household types in both rural and urban areas. As expected, households with household type *casual labour* both in rural and urban area were having lower AVA than *self employed* or *regular wage/salaried* household irrespective of the sex of head of household. AVA was less for all female-headed households in rural and urban area, with an exception for the household type *casual labour in non-agriculture* in rural sector.

3.2.4 It shows that among female-headed households there was relatively higher percentage of 'others' category of household type in both rural and urban sectors. These households were presumably remittance recipients, pensioners and rentiers etc.

3.3 Average Asset Across Decile Classes of Household Asset Holding

3.3.1 If all rural households in India were ranked by value of asset holdings, the bottom 10% of households may be referred to as the lowest decile class, the next 10% as the second decile class, and so on up to the top 10% which is called the 10^{th} or top decile class. In this document estimates of various characteristics are presented separately for households in the ten decile classes. Decile classes are defined separately for rural and urban households at all-India level.

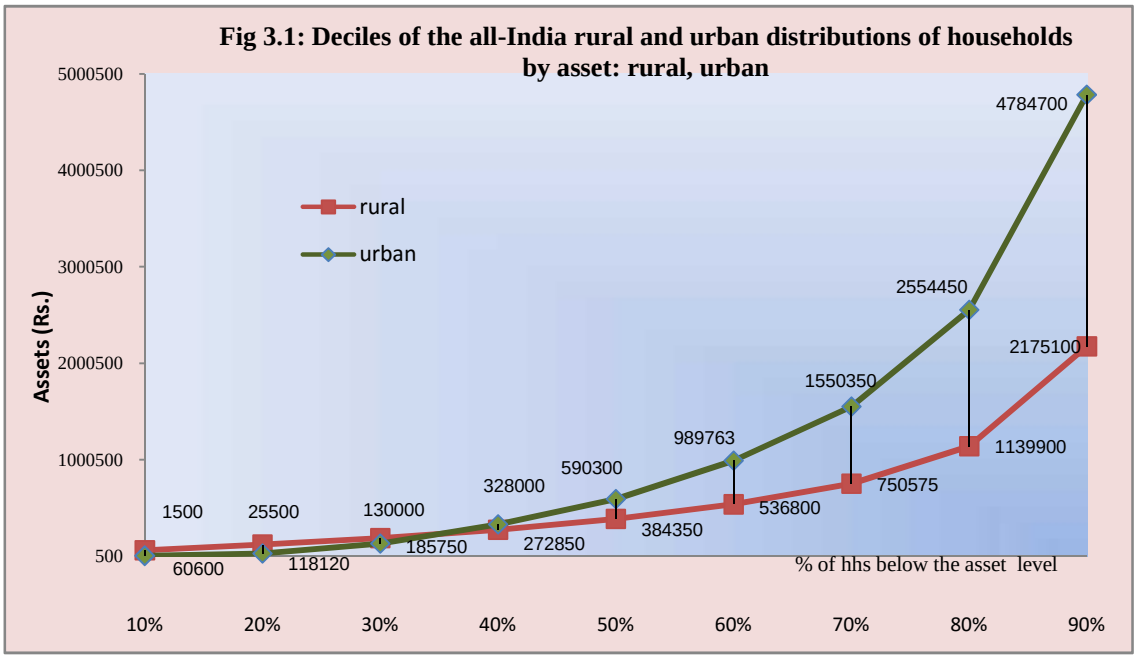

3.3.2 In some subsequent tables, the different decile classes (for details refer page B-3 of Appendix B) are referred to simply as 1 (lowest decile class), 2, 3, … 9, 10. Thus, for example, the words "decile class 2" (or "10-20%") in a table for a particular state at a particular sector, say 'rural' sector, means rural households of that state falling in the second (second lowest) decile class of the estimated all-India distribution of rural households by asset holding size. The rural and urban asset distributions can themselves be depicted through the 9 deciles representing the 10%, 20%, ..., 90% points of the distribution; this is done for all-India in Fig.3.1.

Statement 3.3: Average value of assets (Rs.) across decile classes of household asset holding: all-India

decile class of household assetholding	rural		urban	
	upper limit (₹)	average value of assets (₹)	upper limit (₹)	average value of assets (₹)
(1)	(2)	(3)	(4)	(5)
1	60600	25071	1500	291
2	118120	89593	25500	9565
3	185750	151460	130000	67428
4	272850	227415	328000	224760
5	384350	325385	590300	447719
6	536800	454192	989763	777591
7	750575	635506	1550350	1248347
8	1139900	922870	2554450	2001390
9	2175100	1548889	4784700	3513327
10	-	5689385	-	14559978
all	-	**1006985**	-	**2285135**

3.3.3 Average value of assets as on 30th June 2012 was estimated as approximately Rs. 10.07 lakh in rural India and Rs.22.85 lakh in urban India. This may be noted in this connection that for the first four decile classes AVA of rural area were higher than its respective urban counterpart. For the first three deciles these differences were substantially higher.However, for higher decile classes the situation was just reversed. The spreading of AVA among urban decile classes (from lowest to the top decile class) is much wider compared to the rural classes.

3.3.4 The lowest 10% of India's rural households (in terms of total assets) had an average asset value of Rs.25071. The lowest 10% of the urban households had an average asset value of Rs.291 implying that poorest (in terms of asset) urban population is owning very little asset (as durables are not considered as physical asset in this round). The top 10% of rural households, ranked by assets, had an average asset of Rs.57 lakh. The top 10% of the urban population on the other hand had an average asset of Rs. 146 lakh.

3.4 Inter-State Comparison of Average Value of Assets

3.4.1 Statement 3.4 shows the AVAs as on 30.06.2012along with the state to all-India ratio of AVA (RSAI $_{AVA}$) in 18 selected states.

RSAI $_{AVA}$ for a state is defined as ratio of Average Value of Assets (AVA) for that state to the all-India AVA; Thus RSAI $_{AVA}$= AVA of the state/ AVA at all-India

3.4.2 *In rural areas*: A state-wise analysis of AVA shows that it was the highest in Haryana (Rs. 46.17 lakh), followed by Punjab (Rs. 42.95 lakh), and Kerala (27.30 lakh). Odisha had the lowest AVA with Rs. 2.81 lakh per household preceded by West Bengal (Rs. 4.07 lakh), Andhra Pradesh (Rs. 4.12 lakh), and Assam (Rs. 5.03 lakh).

3.4.3 *In urban areas*: The states that reported very high AVA were Maharashtra (Rs. 43.37 lakh), Kerala (Rs. 40.24 lakh), and Haryana (Rs. 36.78 lakh). Incidentally, AVA per household of rural Haryana was also very high (46.17 lakh). Punjab, which was in second high position in the rural areas, reported lower urban AVA of Rs. 26.38 lakh. 5Odisha reported lowest ownership of assets (Rs. 7.87lakh), preceded by Jharkhand (Rs. 9.73lakh), and Andhra Pradesh (Rs. 9.91 lakh each).

3.4.4 This is also important to mention here that inter-state differential in AVA is higher in rural area than its urban counterpart.

3.4.5 Alternatively, when ratio of state to all-India is analysed it is seen that in the rural sector in 7 states out of 18, the ratio was more than 1 and for only three cases it was more than

double of the all-India AVA. Very low ratio (less than half of all-India AVA) was seen for only 4 states. For 12 states among 18 states the ratio ranges from 0.5 to 2.

Statement 3.4: Average value of assets (AVA) (Rs.) per household by household category in rural and urban areas of selected states

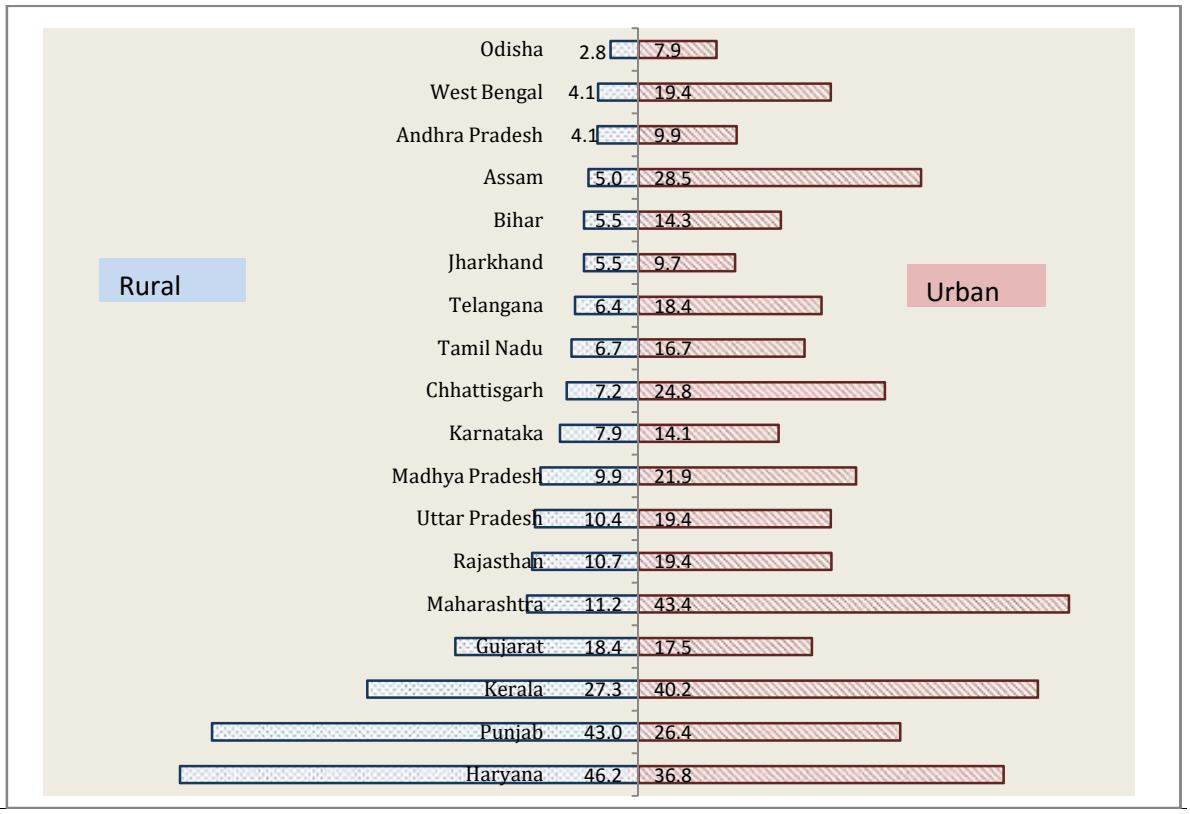

State	average value of assets (AVA) (₹) per household and state to all-India ratio			
	rural		urban	
	AVA (₹ 000)	RSAI $_{AVA}$	AVA (₹ 000)	RSAI $_{AVA}$
(1)	(2)	(3)	(4)	(5)
Andhra Pradesh	412	0.41	991	0.43
Assam	503	0.50	2848	1.25
Bihar	548	0.54	1435	0.63
Chhattisgarh	723	0.72	2482	1.09
Gujarat	1843	1.83	1748	0.77
Haryana	4617	4.58	3678	1.61
Jharkhand	549	0.55	973	0.43
Karnataka	791	0.79	1412	0.62
Kerala	2730	2.71	4024	1.76
Madhya Pradesh	985	0.98	2192	0.96
Maharashtra	1123	1.12	4337	1.90
Odisha	281	0.28	787	0.34
Punjab	4295	4.27	2638	1.15
Rajasthan	1069	1.06	1943	0.85
Tamil Nadu	673	0.67	1674	0.73
Telangana	638	0.63	1843	0.81
Uttar Pradesh	1042	1.03	1938	0.85
West Bengal	407	0.40	1937	0.85
all-India	1007	1.00	2285	1.00

Ref: Table 1R/U, Appendix A

3.4.6 In urban sector less dispersed situation is evident when ratio of state to all-India is analysed. It is seen that in the urban sector only in 6 states out of 18, the ratio was more than 1 (that is state AVA was more than all-India AVA). But these ratios were ranged between 1 to 2. Very low ratio (less than half of all-India AVA) was seen for only 3 states. For 15 states among 18 states the ratio ranges from 0.5 to 2.

3.4.7 Fig 3.2 shows average value of assets (in lakh) as on 30.06.2012 in 18 selected states for both rural and urban sector, where AVA of rural sector was arranged from lower to higher.

Fig 3.2: Average value of assets (in lakh) as on 30.06.2012 in 18 selected states: rural, urban

3.5 Changes in Ratio of Average Value of Assets (AVA) of State to Corresponding AVA at all-India level

3.5.1 It is already mentioned that the definition and method of collection of value of asset of a household have undergone several changes. Most importantly, the values of *land & building* as on 30.06.2012 were recorded in the 70th round as per their normative/guideline values, whereas in the previous rounds these were recorded 'as reported by the informant'. Value of durable asset including bullion and ornaments was included in the asset value in the previous rounds whereas in 70th round it was kept outside the purview of assets (*see 1.3.1 to 1.3.5 Chapter 1* for details). Thus, instead of direct comparison the extent of scattering is presented in the statement 3.5 on the basis of the derived ratio of state AVA to corresponding all-India AVA for selected states ($RSAI_{AVA}$). Moreover, the value of durable goods and bullion and ornament were netted out from the estimates of AVA of AIDIS 1991 and 2002. It may be worth mentioning in this connection that in 1991 percentage share of household durables[1] (including bullion and ornament) was 5.9% in rural area and 11.6% in urban area. Corresponding figures for 2002 was 5.1% and 8.4%.

3.5.2 It may be seen that in rural area there is very little change in the relative position (ranking) of the states in respect of AVA during the two decades. Punjab, Haryana, Kerala

[1] See Report 500: *Household Assets and Liabilities as on 30.06.2002*

have maintained their high AVAs and on the other hand, Orissa, Andhra Pradesh, Assam, West Bengal were found with low AVAs in all the periods.

3.5.3 In rural areas, states like Punjab and Haryana which are traditionally developed in agriculture along with Kerala have shown significant upward growth in terms of this RSAI while some other states like Uttar Pradesh, Karnataka and Rajasthan have shown downward movement. It may be noted in this connection that for AP, Assam, Bihar, Odisha and West Bengal RSAI were less than 1 for these three AIDIS and the ratio is showing a descending tendency over time.

3.5.4 In urban areas, this statement shows similar features as for that in the rural areas. High AVA was recorded for Maharashtra, Kerala, Haryana Punjab (first three positions) for all these three AIDIS rounds. The situation of the states in respect AVA in the urban areas did not change much during the two decades, except in the case of Assam and Chhattisgarh which has shown significant upward movement in terms of AVA. In Rajasthan, UP and Gujarat notable fall in RASI is observed.

Statement 3.5 State to all-India ratio of AVA (RSAI $_{AVA}$) for selected states during 1991(48th round), 2002 (59th round) and 2012(70th round)

State	RSAI $_{AVA}$					
	rural			urban		
	1991	2002	2012	1991	2002	2012
(1)	(2)	(3)	(4)	(6)	(7)	(8)

all-India	**1.00**	**1.00**	**1.00**	**1.00**	**1.00**	**1.00**

3.6 Composition of Household Asset Holdings

3.6.1 The information on value of assets, physical or financial, as collected under 'assets' are grouped in broad category like (i) land and building, (ii) livestock and poultry, (iii) machinery and equipment and (iv) financial assets and shown in Statement 3.6 for occupational categories of rural and urban India (*Ref: Table 7R/U, Appendix A).*

Statement 3.6: Percentage share of different components of assets in the total value of assets for each occupational category of households: all-India

broad type of assets	% share over broad typeof assets by households classified by					
	rural			urban		
	cultivator	non-cultivator	all	self-employed	others	all
(1)	(2)	(3)	(4)	(5)	(6)	(7)
land & building	94.2	91.1	93.7	93.6	90.0	91.8
livestock & poultry	1.7	0.9	1.6	0.1	0.1	0.1
machinery& equip[#].	2.6	4.1	2.8	3.9	2.7	3.3
financial assets[*]	1.5	3.9	1.9	2.3	7.3	4.8
all	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**

 # includes agriculture machinery & equip., non-farm business equip., all transport equipment
****** include amount receivable, value of shares and debentures held and all deposits with bank, non-banking companies, MFI, SHG, PF etc., insurance excl. bullion and ornaments*

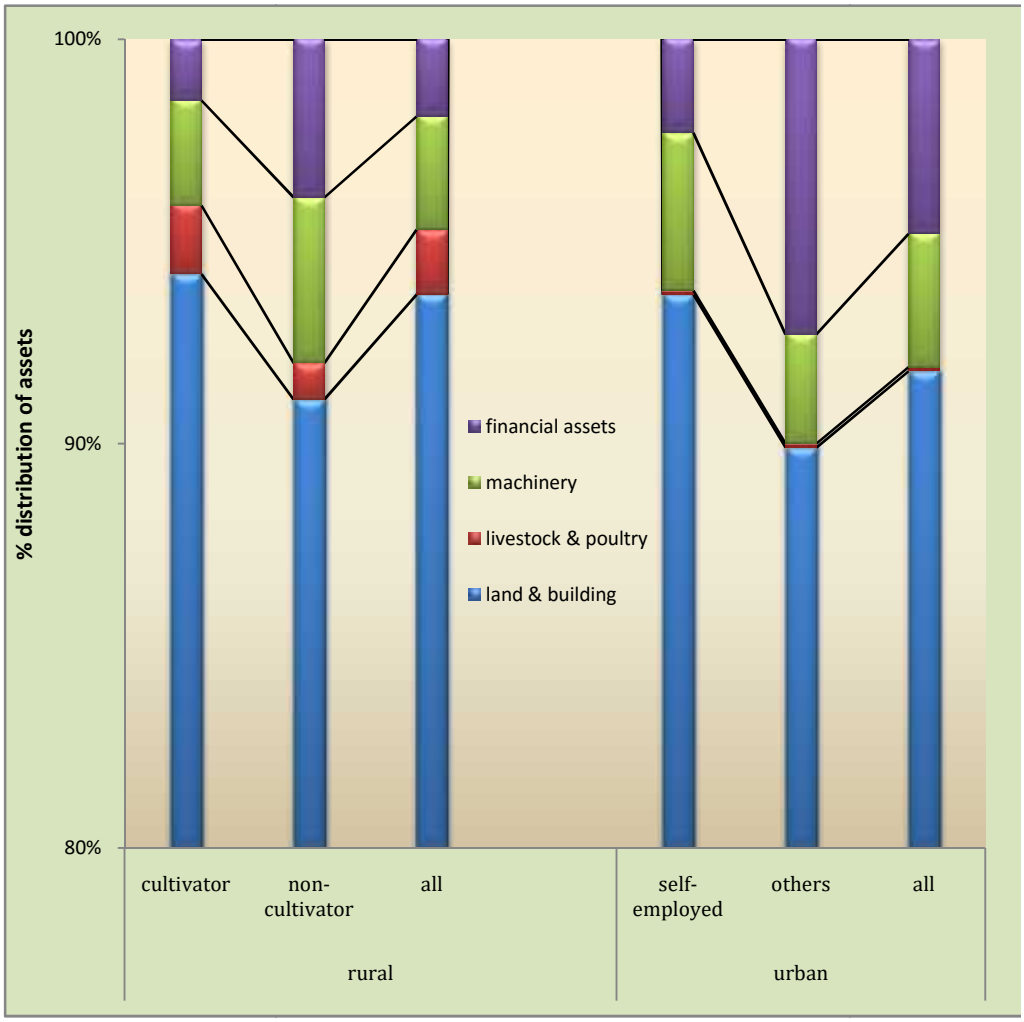

Financial Assets includes amount receivable, value of shares and debentures held and all deposits with bank, non-banking companies, MFI, SHG, PF etc., insurance

3.6.2 Land and building together, in the rural areas, clearly formed the predominant component of assets – jointly holding around 94% share in the total value of assets at the national level. Rest of share was contributed by combining all other assets like livestock (1.6%), machinery and equipment (3%) and financial assets (2%). In the urban areas also, 92%share in the total value of assets at the national level was observed in land and building together. As expected, share of livestock was insignificant in urban area. On the contrary, the share of financial asset is much higher (5%), and share of machinery and equipment was around 3%, similar to rural sector.

3.6.3 The share of other items of assets rarely exceeded 5% even when the occupational categories are considered separately. In the urban areas, about 7% share in the total value of assets was held in the form of *financial asset* for the *others* households.

3.6.4 Fig. 3.3 shows the percentage shares of different components of assets in the total value of assets at all-India level for rural and urban households respectively.

Fig. 3.3: Percentage share of different components of assets in the total value of assets: rural, urban

3.6.5 *State-wise Composition*: The distribution of value of assets over the main items of assets (*land, building and others*) is given in Statement 3.7 for rural and urban areas of 18selected states. It is seen that land and building together, clearly formed the major component of assets. In rural area the share of other items of assets exceeded 10% only in Assam and Odisha.

3.6.6 It is, however, observed together with the statement 3.4 that in the states (like Haryana, Punjab, Gujarat) with high AVA, much higher proportion of land asset is also noticed. This may be primarily contributed by the extent of land (owned) by the households as well as high land price. On the contrary, in states with low AVA (like Andhra, Assam, West Bengal) a comparatively lower percentage for land is recorded. In urban area, the share of other items of assets exceeded 10% in 7 out of 18 selected states; maximum share was recorded in Odisha (26%) where lowest AVA is recorded. Moreover, Maharashtra was the only state, where in urban area share of building was more than that of land.

3.6.7 In Appendix A, the break-up of value of assets by different items of asset and proportion of households (per 1000) reporting those items is given in Table 6R/U and Table 7R/U for all States/UTs for the rural and urban sector respectively.

Statement 3.7: Percentage shares of land, building and other assets in total assets of households as on 30.6.12

States	% share of assets for							
	rural				urban			
	land	building	others	all	land	building	others	all
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
Andhra Pradesh	51.1	39.8	9.1	100	50.4	36.8	12.8	100

Ref: Table 7R/U, Appendix A

3.6.8 *Change in percentage share over three decades*: It would be of interest to study the relative importance of different items of assets over the two decades. However, it has to be kept in mind that the definition and method of collection of value of asset of a household have undergone several changes (s*ee 1.3.1 to 1.3.5 Chapter 1* for details). The percentage shares of different items in the total assets derived from the present survey data along with those obtained from the earlier surveys in 1991 and 2002 for the rural and urban sector are presented for all-India in Statement 3.8A. The percentage shares of items for the earlier rounds have been suitably modified excluding the value of durable goods including bullion and ornaments.

3.6.9 Land and building have remained the most important components of assets owned by rural as well as urban households. In the rural areas, the percentage of the value of *land* and *building* to the value of total assets varied in between 87 to 94 per cent during three AIDIS surveys (1991 to 2012) for all occupational types. The corresponding range for *land* and *building* in the urban areas was 80 to 94 per cent during the similar NSS rounds.

Statement 3.8A: Percentage share of different items of assets in total household assets by occupational category of households during 1991, 2002 and 2012

occupational type	year	% share of different items of assets in household assets							
		land	building	other assets					all
				livestock & poultry	machinery & equip.#	shares etc.	deposits* etc.	amount receivable	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
		rural							
cultivator	1991	71.3	20.2	3.6	4.0	0.1	0.8	0.0	100
	2002	71.0	20.9	2.4	3.9	0.1	1.6	0.1	100
	2012	76.5	17.7	1.7	2.6	0.1	1.3	0.1	100

	2002	42.5	46.0	1.4	3.8	0.2	5.9	0.2	100
	2012	50.3	40.8	0.9	4.1	0.0	3.5	0.3	100
all	1991	68.3	22.7	3.6	4.0	0.1	1.3	0.1	100
	2002	66.6	24.8	2.2	3.9	0.1	2.3	0.1	100
	2012	72.6	21.1	1.6	2.8	0.1	1.7	0.1	100
		urban							
self-employed	1991	40.1	45.5	0.7	8.3	1.3	3.2	0.8	100
	2002	45.8	40.1	0.3	8.6	0.2	4.5	0.5	100
	2012	47.5	46.2	0.1	3.9	0.1	1.9	0.4	100
others	1991	40.1	43.8	0.3	3.0	0.9	11.8	0.2	100
	2002	38.5	42.4	0.1	3.5	0.8	14.6	0.1	100
	2012	46.4	43.6	0.1	2.7	0.3	6.8	0.2	100
all	1991	40.2	44.5	0.5	5.4	1.1	7.9	0.5	100
	2002	42.1	41.3	0.2	6.0	0.5	9.7	0.3	100
	2012	46.9	44.9	0.1	3.3	0.2	4.3	0.3	100

** includes amount receivable and all deposits like government deposits, NSC, KVP, saving bonds, post office deposits, other small savings schemes etc, deposits with bank, non-banking companies, MFI, SHG, PF etc., insurance excl. bullion and ornaments*

 # includes agriculture machinery & equip., non-farm business equip., all transport equipment

3.6.10 No noticeable change in relative position of land, building or other items of assets in the total value of assets is visible. But the share of land has increased considerably during this last decade possibly due to price escalation of land both in urban and rural area. The share of *other assets* in the total value of assets appeared to have reduced during the last two decades. Fall in contribution of *shares* in 70th round as compared to the earlier AIDIS rounds can be noted. The decline of share of *deposit* in 70th round from the 48th and 59th round AIDIS is clearly shown.

3.6.11 It may be worth mentioning in this connection that in 1991 percentage share of household durables[2] (including bullion and ornament) was 5.9% in rural area and 11.6% in urban area. Corresponding figures for 2002 was 5.1% and 8.4%.

[2] See Report 500 *Household Assets and Liabilities as on 30.06.2002*

Statement 3.8B: Percentage of households reporting different items of assets during 1991, 2002 and 2012 at rural and urban India

assets	%. of households reporting in					
	rural			urban		
	1991	2002	2012	1991	2002	2012

** inclusive of durable goods* *Ref: Table 6R/U, Appendix A*

3.6.12. Statement 3.8B shows Percentage of households reporting different items of assets for last three AIDIS rounds**.** In rural area percentage of households reporting land as well as building has gone up marginally in successive rounds whereas in the urban area, there was considerably high increase from 48th round to 59th round but little decrease from 59th to 70th round. Percentage of households possessing 'Farm business equipment' is showing decreasing trend, but 'transport equipment' is having increasing trend in both rural and urban area.

3.7 Possession of Rural and Urban Land by Decile Class of Household Asset Holding

3.7.1 Proportion of households reporting rural and urban land along with average area of rural and urban land possessed by each household asset holding class separately for reporting households and all households is presented in the statement 3.9R and 3.9U.

3.7.2 For the first time in the AIDIS of 70th round, area and value of land possessed by the rural households in the urban area and similarly area and value of land possessed by the urban households in the rural area were recorded. It is clearly evident from this table 3.9Rand 3.9U that 94% rural households were having land in rural and only 1% owned some land in urban areas also whereas in urban area, 57% households had land in urban area and as high as 15% had land in rural area. From 8thdecile class onwards this proportion was more than 20%.

Statement 3.9R: Proportion of rural households reporting rural and urban land, average area of rural and urban land in each household asset holding class

3.7.3 The urban households, on the other hand, households belonging to first decile class of asset holding did not report any ownership of land both in rural and urban area. Rest was having some rural land in their possession. As expected, households in the highest decile class owned the largest area in both urban and rural area.

Statement 3.9U: Proportion of urban households reporting rural and urban land, average area of rural and urban land in each household asset holding class

household asset holding class	rural land			urban land		
	average area (ha.)	avg. area (ha.) per reporting hhs	%. of hhs reporting	avg. area (ha.)	average area (ha.) per reporting hhs	%. of hhs reporting

all	**0.148**	**0.993**	**14.9**	**0.043**	**0.075**	**57.4**

3.7.4 It may be noted that from second decile onwards urban households are having some land both in rural and urban area. As expected, area possessed by the households (both in urban and rural area) is showing increasing trend when one moves from lower to higher decile classes, and in the 10th decile class it is more than 2 ha in rural area and 0.2 ha in urban area.

3.8 Incidence of Indebtedness (IOI) and Average Amount of Debt (AOD)

3.8.1 This report also deals with some basic estimates of the indebtedness of households.In the 70th round survey, a household was considered to be indebted if the household had any cash loan outstanding on 30.06.2012. It may be noted that like most NSS estimates, these are based on information collected through the interview method and hence, in fact, refer to 'reported indebtedness'.

3.8.2 In statement 3.10, the average amount of outstanding amount per household and per indebted household along with average holding of financial assets per householdare presented.

3.8.3 In rural sector, average amount of debt (AOD) was found to be Rs. 32522 as opposed to reported amount of financial assets of approximately Rs.18674 on an average. At the same time more than Rs. one lakh (Rs.103457) AOD per indebted household was also observed.

3.8.4 In urban India, however, at the all-India level, the AOD per households was found to be Rs. 84625. Amount of financial asset hold by the urban household was Rs.109884. AOD per indebted household was about Rs. 3.8 lakh, which was roughly 4.5 times of the AOD.

Statement 3.10: AOD, AOD per indebted households and average holding of financial asset for rural and urban households: all-India

sector	average value of financial assets per households(₹)	AOD per household (₹)	AOD per indebted household (₹)
(1)	(2)	(3)	(4)
rural	18674	32522	103457
urban	109884	84625	378238

Ref: Table 1R/U, Appendix A

3.9 IOI and AOD across Asset Holding Classes

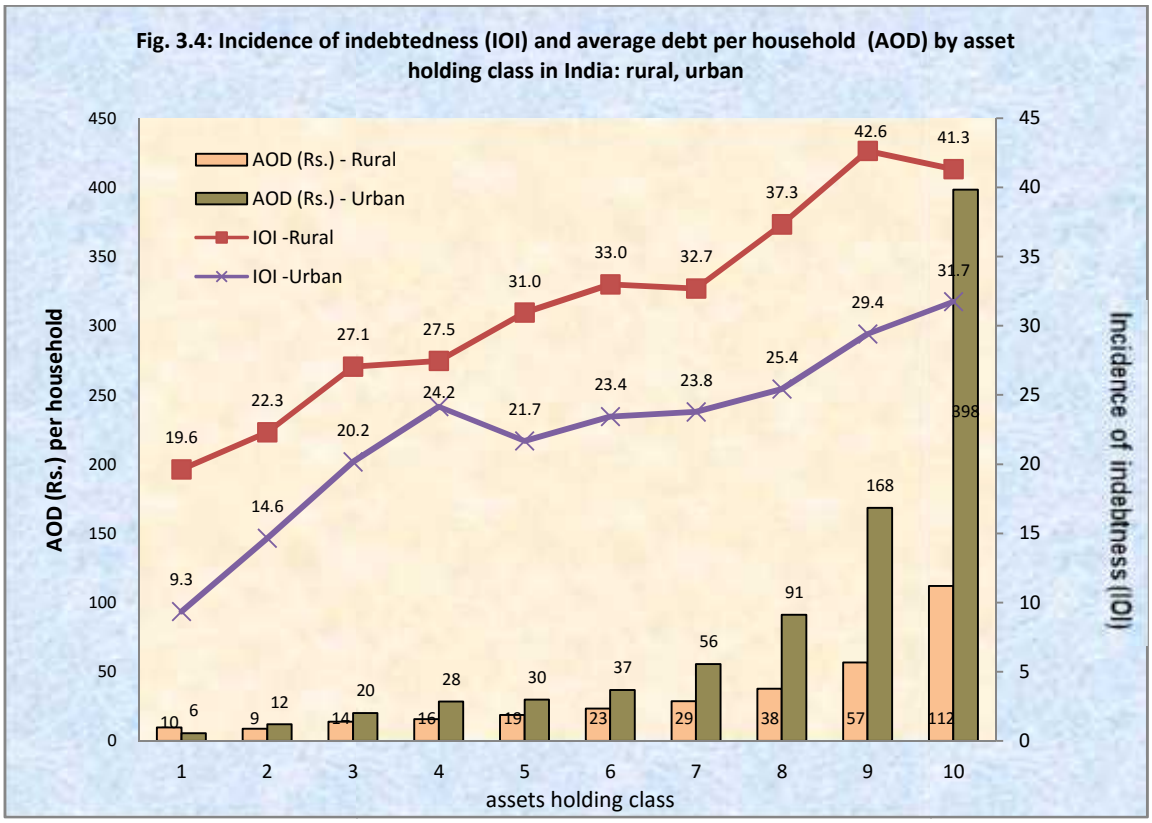

3.9.1 The percentage of indebted households and average amount of debt per household as on 30.06.2012 for each asset holding class are presented in Statement 3.11 separately for rural and urban India.

Statement 3.11: Incidence of indebtedness (IOI) and average debt per household (AOD) by asset holding class: all-India

decile class of hh asset holding	rural			urban		
	IOI (%)	AOD per household (₹)	AOD per indebted household (₹)	IOI (%)	AOD per household (₹)	AOD per indebted household (₹)
(1)	(2)	(3)	(4)	(5)	(6)	(7)
01	19.62	9705	49478	9.34	5587	59808
02	22.30	8819	39554	14.63	11934	81587
03	27.05	13811	51053	20.16	20075	99572
04	27.46	15673	57077	24.16	28430	117662
05	30.95	18800	60746	21.67	29915	138076

09	42.64	56658	132867	29.41	168470	572822
10	41.32	111884	270747	31.74	398457	1255405
all	**31.44**	**32522**	**103457**	**22.37**	**84625**	**378238**

Ref: Table 1R/U, Appendix A

3.9.2 Fig. 3.4 shows the IOI and AOD per households by asset holding class at all-India level for rural and urban households respectively. Axis for AOD is shown in the left hand axis whereas the axis for IOI is shown in the right hand axis.

3.9.3 It is seen that both in rural and urban areas, IOI increased as one moves from lower to higher decile classes. However, a marginal drop is noted in a couple of classes. IOI is seen to range within 20% to 43% over the decile classes in rural India whereas in urban India it varied within a range from 9% to 32%.

3.9.4 Predictably, AOD is seen to increase more or less steadily as one moves from lower to higher decile classes for both the sectors. AOD of a household belonging to the highest asset holding class was about 12 times that of a household in the lowest asset holding class in the rural sector. This ratio was even much higher for urban areas. The AOD per indebted household of the top decile class was 5.5 times of bottom decile class in rural India and 21 times in urban India

3.10 Temporal Changes in Household Indebtedness

3.10.1 Statement 3.12 below shows estimates of all-India AOD from three AIDIS including the 70th round survey.

3.10.2 For rural India, real AOD (measured using a price deflator with 1986-87=100 as base) is seen to have grown about five times from Rs.1115 in 1991 to Rs. 5402 in 2012 – a huge increase over 20 years.

3.10.3 In urban India also there has been similar high growth in real AOD (obtained using a deflator with base 1982=100) – from Rs. 1791 in 1991 to Rs. 9229 in 2012. Over the 10-year period since 2002, the real rural AOD at 2012 has been about 2 times of the rural AOD at 2002 and during the similar time duration the in urban area 3.5 times increase is witnessed.

Statement 3.12: Growth in AOD at current and constant prices since 1991, all-India

characteristics	year		
	1991	2002	2012
(1)	(2)	(3)	(4)
AOD: rural (Rs.): current prices	1906	7539	32522
Price deflator for rural sector*	171	307	602
AOD: rural (Rs.) 1986-87 prices	1115	2456	5402
AOD: urban (Rs.): current prices	3618	11771	84625
Price deflator for urban sector*	202	445	917
AOD: urban (Rs.) at 1982 prices	1791	2645	9229

**Price deflators for the years have been computed, with the help of CPI-AL for the rural sector and CPI-IW for the urban sector with suitable linking factor*

3.11 IOI and AOD across States

3.11.1 *IOI and AOD in different States*: IOI along with the state to all-India ratio of AOD per household (RSAI $_{AOD}$) state to all-India ratio of AOD per indebted household in 18 selected

states for different occupational categories of rural households are presented in Statement 3.13R and 3.13U for the major states for rural and urban area respectively.

RSAI $_{AOD}$ for a state is defined as ratio of Average Amount of Debt for that state to the all-India average; Thus RSAI $_{AOD}$= AOD of the state/ AOD at all-India

Statement 3.13R: IOI, RSAI$_{AOD}$ (per household) and RSAI$_{AOD}$ (per indebted household) by household category for selected states: rural

State	cultivator			non-cultivator			all		
	IOI	RSAI$_{AOD}$	RSAI$_{AOD}$ (indebted hh$^{\#}$)	IOI	RSAI$_{AOD}$	RSAI$_{AOD}$ (indebted hh$^{\#}$)	IOI	RSAI$_{AOD}$	RSAI$_{AOD}$ (indebted hh$^{\#}$)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
Andhra Pradesh	62.8	2.3	1.3	47.1	1.5	0.8	54.1	1.8	1.0
Assam	9.3	0.1	0.4	11.6	0.3	0.7	10.1	0.2	0.5

Ref: Table 1R/U, Appendix A *#: AOD per indebted household*

3.11.2 From the statement 3.13R a wide variation in both IOI, over the occupational categories and states is observed. The IOI was high (40% or more) in the southern five states (Kerala, Andhra Pradesh, Tamil Nadu, Telangana and Karnataka) in rural India for all occupational categories except the *non-cultivator* category of Tamil Nadu while in all categories of Assam and *non-cultivator* category of Chhattisgarh and Jharkhand low IOI (15% or less) were recorded. In rural sector Telangana was the most indebted state as reported in 70th round AIDIS. Statement 3.13U shows that IOI for urban households varied

widely, over the occupational categories and states. Both for rural and urban households, indebtedness were high in southern states.

3.11.3 It distinctly reveals higher incidence of indebtedness among the urban households in the five southern states (Kerala, Andhra Pradesh, Tamil Nadu, Telangana and Karnataka). IOI for all other states was except Rajasthan less than the national level incidence.

3.11.4 Among the *self-employed*, 13 states (Kerala, Karnataka, Maharashtra, Odisha, Rajasthan, Assam, MP, UP, Bihar, Jharkhand, Chhattisgarh, West Bengal and Gujarat) varied within ± 50% around all-India figure of self-employed category. On the other hand for *others* all states were within ± 50% range except Kerala, Andhra Pradesh and Tamil Nadu.

3.11.5 In rural area, RSA_{AOD} widely ranged among 0.1 to 4.5. For cultivator category the range was 0.1 to 4.4 while for non cultivator and for aggregate level it was 0.2 to 4.5. For all the cases maximum ratio was identified in Kerala. Although IOI was higher for southern states, AOD per indebted household was highest for Kerala, closely followed by Punjab. $RSAI_{AOD}$ (per indebted households) for eight states including other southern states were close to all India and for rest states it was much below the national average.

Statement 3.13U: IOI, $RSAI_{AOD}$ (per household) and $RSAI_{AOD}$ (per indebted household) by household category for selected states: urban

State	self employed			others			all		
	IOI	$RSAI_{AOD}$	$RSAI_{AOD}$ (indebted hh#)	IOI	$RSAI_{AOD}$	$RSAI_{AOD}$ (indebted hh#)	IOI	$RSAI_{AOD}$	$RSAI_{AOD}$ (indebted hh#)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
Andhra Pradesh	51.3	1.8	0.9	35.9	1.0	0.6	39.8	1.3	0.7
Assam	22.4	0.4	0.5	15.6	0.4	0.6	17.6	0.4	0.6
Bihar	15.7	0.3	0.4	12.1	0.2	0.4	13.2	0.3	0.4
Chhattisgarh	12	0.5	1.0	11.6	0.2	0.4	11.8	0.3	0.6
Gujarat	20.1	0.8	0.9	19.1	0.9	1.0	19.4	0.8	1.0
Haryana	14.4	1.7	2.9	11.9	1.3	2.3	12.5	1.4	2.5
Jharkhand	17.6	0.2	0.3	9.1	0.2	0.5	11.6	0.2	0.4

West Bengal	18.7	0.4	0.5	12.6	0.4	0.7	14.7	0.4	0.6
all-India	**24.7**	**1.0**	**1.0**	**21.3**	**1.0**	**1.0**	**22.4**	**1.0**	**1.0**

Ref: Table 1R/U, Appendix A #: AOD per indebted household

3.11.6 In urban area, RSA_{AOD} varied among 0.2 to 2.1. In self-employed category the upper range was 2.8, and for *others* the same was 1.8. The range of RSA_{AOD} for indebted household was 0.4 to 2.5, while the same for self employed category was as high as 0.3 to 3.5. In urban area $RSAI_{AOD}$ per indebted households is highest for Haryana followed by Odisha. In self-employed category highest $RSAI_{AOD}$ (as high as 3.5 times of national average) was observed for Odisha.

3.12 Temporal Changes in IOI in Selected States

3.12.1 The estimates of IOI obtained from the AIDIS-2012 along with AIDIS-1991 and AIDIS-2002 are given in Statement 3.14 for both rural and urban areas of the selected states. The estimates show that in the rural area the IOI increased steadily (more than 5 percentage points) during the period AIDIS (2002) to AIDIS (2012) in states like, Kerala, Andhra Pradesh, Karnataka, Tamil Nadu, Bihar, Uttar Pradesh and Punjab. IOI remained the same as in 2002 for Odisha. The IOI dropped during same period in Gujarat, Haryana and Madhya Pradesh and Chhattisgarh.

Statement 3.14: Incidence of Indebtedness (IOI)(%)in rural and urban areas of selected states in 1991, 2002 and 2012

State	incidence of indebtedness (IOI) (%)					
	rural			urban		
	1991	2002	2012	1991	2002	2012
(1)	(2)	(3)	(4)	(5)	(6)	(7)
Andhra Pradesh	35	42	54	31	30	40
Assam	6	8	10	6	6	18
Bihar	16	22	29	8	10	13
Chhattisgarh	-	20	14	-	13	12
Gujarat	17	28	26	22	21	19
Haryana	28	27	24	10	16	13
Jharkhand	-	12	18	-	7	12
Karnataka	28	31	46	20	19	27
Kerala	31	39	50	32	37	47
Madhya Pradesh	21	26	25	14	18	15
Maharashtra	22	28	31	21	16	19
Odisha	23	26	26	15	19	19
Punjab	25	26	33	14	13	18
Rajasthan	30	34	37	14	17	23
Tamil Nadu	30	31	40	25	26	35
Telangana	-	-	59	-	-	31
Uttar Pradesh	19	23	30	14	13	19
West Bengal	26	22	24	17	17	15
all-India	**23**	**27**	**31**	**19**	**18**	**22**

3.12.2 Comparing the estimates of percentage of indebted urban households obtained from last three AIDIS (1991,2002 and 2012) it is seen that among the 18selected states, 5 states

(Chhattisgarh, Gujarat, Haryana, Madhya Pradesh and West Bengal) showed decreasing trends during the similar periods.

3.12.3 This may be commented in this regard that the southern states, which have relatively high IOI in rural areas currently also had high IOI previous years as well and this 'indebtedness' in southern states has also increased much faster than average.

3.12.4 Assam, where the lowest IOI in 70th round was recorded in rural area, also had the lowest IOI during 1991 and 2002 as well. Similar is the case for other states (like Chhattisgarh, Jharkhand, West Bengal) where relatively low (with reference to all-India IOI) are observed; low IOI was observed in earlier rounds as well. Thus this indebtedness may be looked as a phenomenon of access, availability as well as circumstantial demand within a region.

3.12.5 There are significant differences in the rate and pattern of change between rural and urban areas. IOI is consistently and in most cases lower in urban areas; and the increase is also smaller overall. This generalized feature coexists with considerable inter-state variation. In southern states the increase is markedly higher; among others some don't show a consistent trend; while some showed a decline.

3.13 Debt-Asset Ratio (DAR)

3.13.1 At any point of time, the outstanding debt of a household is potentially a charge upon its assets - whether or not these are mortgaged or hypothecated to a person or an agency. For a given group of households, a question naturally arises – how was the debt outstanding for them related to their assets on any given date? A study of the 'debt-asset' ratio is likely to provide an answer to such a query. The 'debt-asset' ratio is defined as the average amount of debt outstanding on a given date for a group of households expressed as a percentage of the average value of assets owned by them on the given date. Thus, this ratio reflects the burden of debt on any particular group of households on a given date i.e. 30.06.2012.

3.13.2 It may be seen from Statement 3.15 that as on 30.06.2012, the 'debt-asset' ratio at the all-India level was found to be 3.7% for the urban areas and 3.2% for the rural India.

The 'debt-asset' ratio is defined as AOD as percentage of respective AVA
DAR = (AOD ×100)/AVA on a given date for a particular group of households

3.13.3 The financial asset can be assumed, to be converted into cash in a short time, with little or no loss in value and hence can be termed as liquid assets. Thus the ratio of AOD as percentage of respective average value of liquid asset of a group of household as on 30.06.2012 reveals an additional insight of the debt burden. From 70thround AIDIS the ratio of debt to average amount of financial asset (%) for rural sector was 174 and the same for urban sector was 77.

Statement 3.15: Important indicators of debt-asset of India as on 30.06.2012

indicators	rural	urban
(1)	(2)	(3)
Incidence of Indebtedness (%)	31.4	22.4
Debt-Asset Ratio (%)	3.2	3.7
Ratio of Debt to average amount of financial asset (%)	174.2	77.0

3.13.3 *Debt-Asset Ratio across Asset Holding Classes*: The 'debt-asset' ratio, as seen in Statement 3.16, decreased almost monotonically with the increase in assets in rural India. The ratio was 39% for the lowest decile class and reduced to 2% for the top decile class in the rural sector.

3.13.4 In urban sector 'debt-asset ratio' for the bottom decile class was as high as 1920% implying the fact that in urban area debt burden for the lowest class was extremely high. The 'debt-asset' ratio for the second lowest class was also high (125%) but it was more than 93% drop from the first decile class. From the third decile class onwards decrease in DAR was regular with the increase in decile class (except 9thdecile class, which showed a small increase over 8thdecile class); finally dipping at 2.74% for the top decile class.

Statement 3.16: Average amount of debt (AOD) and debt-asset ratio (DAR) by household asset holding class: all-India

decile class of hh asset holding	rural			urban		
	AVA (₹)	AOD (₹)	debt-asset ratio (%)	AVA (₹)	AOD (₹)	debt-asset ratio (%)
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1	25071	9705	38.71	291	5587	1920.28

3.13.4 *Debt-asset Ratio in States:* Following statement 3.17 (*Ref: Table 1R/U, Appendix A*) depicts the Debt-asset Ratio (DAR) in major states for occupational categories of households. It is observed that DAR varied widely over the occupational categories and states. While Haryana recorded the lowest and Andhra Pradesh recorded the highest DAR in rural area, Assam reported to have the lowest and Odisha recorded the highest DAR in urban area.

Statement 3.17: Debt-asset ratio (%) of the households for different occupational categories of households as on 30.6.2012

State	rural			urban		
	cultivator	non-cultivator	all	self-employed	others	all
(1)	(2)	(3)	(4)	(5)	(6)	(7)
Andhra Pradesh	12.8	17.8	14.1	11.4	10.2	10.7

3.14 Temporal Changes in Debt-Asset ratio

3.14.1 *Changes in Debt-asset Ratio in States*: Statement 3.18 shows the changes in debt-asset ratio (DAR) during, 1991 to 2012 by selected states for both rural and urban sector. However, it has to be kept in mind that the definition and method of collection of value of asset of a household have undergone several changes (*see 1.3.1 to 1.3.5 Chapter 1* for details).

3.14.2 Statement 3.18 reveals that in the rural areas, debt asset ratio (DAR) had a rise from 1991 to 2002 for all states except West Bengal and rate of increase was very high for Andhra Pradesh, Bihar, Gujarat, Kerala and Madhya Pradesh. Scenario is different from 2002 to 2012.

3.14.3 It is important to note in this connection that all five southern states, Rajasthan, and Odisha high debt asset ratio (higher than national DAR) was recorded for all three AIDIS. Madhya Pradesh and Maharashtra was also in this list for the year 1991 and 20022 as well. All these states other than Andhra Pradesh, Karnataka and Odisha, showed decreasing rate; for Kerala and Madhya Pradesh the extent of decline was more. Among rest of the states, rise of DAR was highest in Assam followed by West Bengal.

3.14.4 In urban area, debt asset ratio (DAR) of 2002 were higher than that of 1991 for all states except Assam, Bihar, Karnataka, Punjab, Tamil Nadu and Uttar Pradesh and rate of

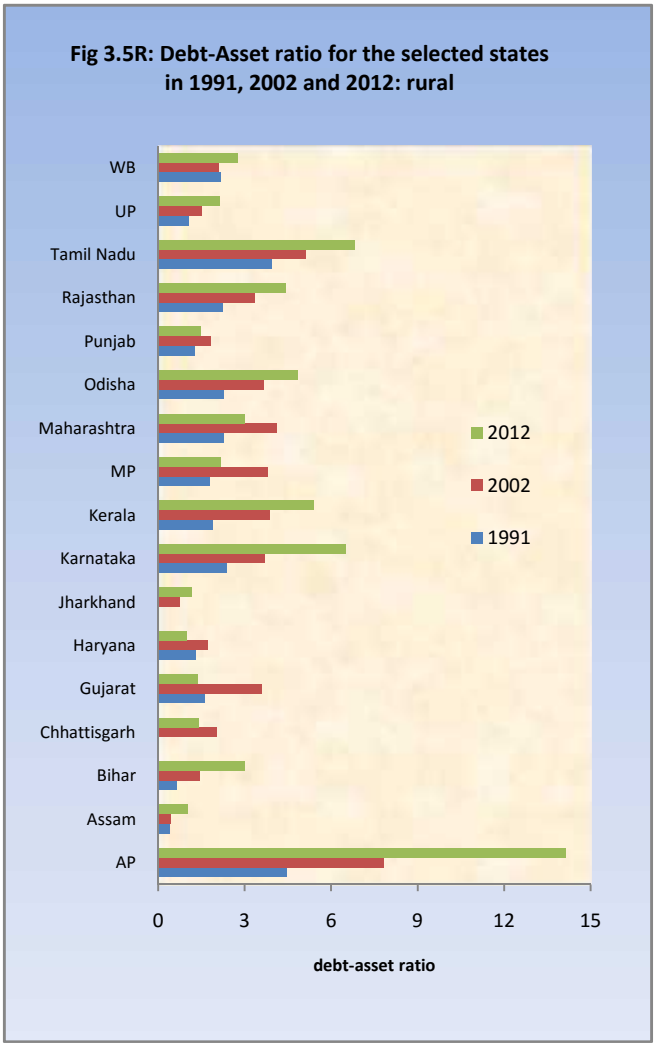

increase was very high for Andhra Pradesh, Bihar, Gujarat, Kerala and Madhya Pradesh. Extent of decadal increase of DAR was not as high as rural sector.

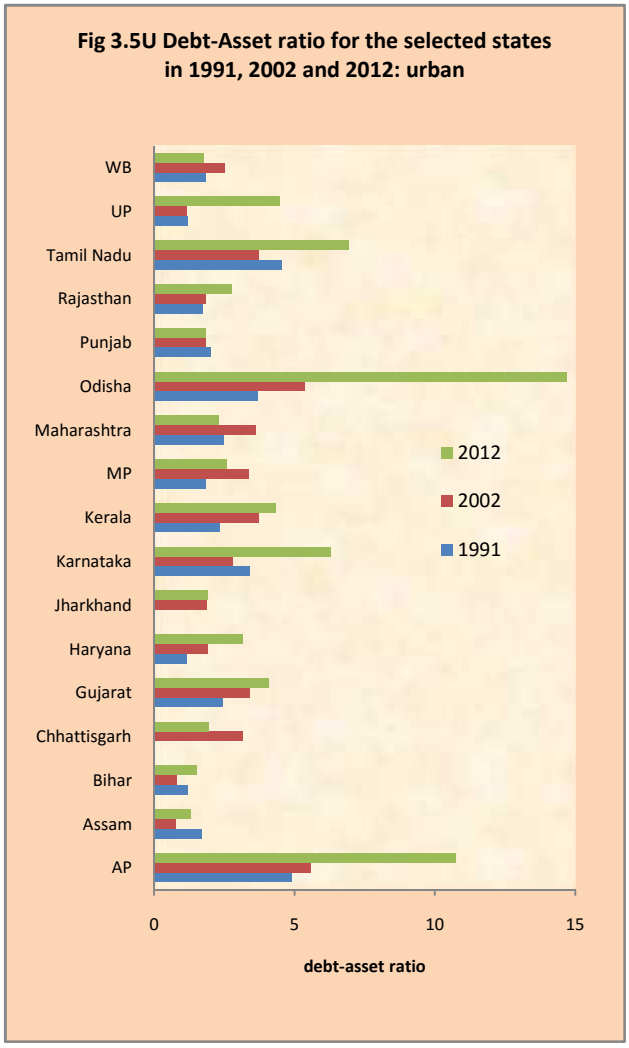

Statement 3.18: Debt-asset ratio (%) for the selected states of India during 1991, 2002 and 2012

State	debt-asset ratio (%)					
	rural			urban		
	1991	2002	2012	1991	2002	2012
(1)	(2)	(3)	(4)	(5)	(6)	(7)
Andhra Pradesh	4.48	7.84	14.14	4.92	5.58	10.73
Assam	0.42	0.44	1.04	1.70	0.77	1.29
Bihar	0.65	1.45	2.99	1.22	0.81	1.53
Chhattisgarh	-	2.05	1.40	-	3.15	1.93
Gujarat	1.63	3.60	1.39	2.45	3.42	4.10
Haryana	1.30	1.73	1.00	1.16	1.92	3.17
Jharkhand	-	0.74	1.17	-	1.88	1.90
Karnataka	2.37	3.70	6.50	3.39	2.79	6.29
Kerala	1.89	3.86	5.40	2.34	3.73	4.33
Madhya Pradesh	1.79	3.80	2.16	1.85	3.38	2.60
Maharashtra	2.30	4.11	3.02	2.48	3.62	2.29

Tamil Nadu	3.96	5.13	6.81	4.55	3.71	6.95
Telangana	-	-	7.95	-	-	8.58
Uttar Pradesh	1.07	1.53	2.13	1.22	1.16	4.49
West Bengal	2.17	2.10	2.76	1.83	2.51	1.77
all-India	**1.78**	**2.84**	**3.23**	**2.51**	**2.82**	**3.70**

3.14.5 In 2012 highest DAR was recorded for Odisha (14.7%) followed by Andhra Pradesh (11%) and Telangana (9%). DAR for Gujarat, Kerala, UP, Karnataka, Tamil Nadu, Telangana, Andhra Pradesh, Odisha were more than the national DAR. Among them Andhra Pradesh, Karnataka, Odisha, Tamil Nadu and UP had higher rate of increase, for Karnataka and UP the extent of growth was very high.

3.14.6 The following Fig. 3.5R/U shows selected state-wise Debt-Asset ratio for rural and urban areas for the last three NSS rounds (48th, 59th and 70throunds).

3.15 Financial Inclusion of households and Owning of Bullion and Ornaments

3.15.1For the first time in the AIDIS of 70th round information was collected from households whether they have any bank/post office/other deposit account in order to evaluate the financial inclusion of the households. Statement 3.19 shows the Proportion of households having bank account, Post Office account and any other deposit accountin selected states for both rural and urban sector.

3.15.2 In rural area, 69% households had at least one bank account in the name of household member. At the same time 14% households had at least one post office account in the name of household member and only 9% had other types of deposit account. In rural sector11 states had higher proportion of bank account than the national level proportion, Kerala being the top of this list with 90% households. In fact, proportion of households having bank account of all the states varied within ±40% around all-India figure.

Statement 3.19: Proportion of households having (i) bank account (ii) P.O. account and (iii) other deposit account: rural, urban

State	rural			urban		
	percentage of households having					
	bank account#	P.O. account#	other deposit account#	bank account#	P.O. account#	other deposit account#
(1)	(2)	(3)	(4)	(5)	(6)	(7)
Andhra Pradesh	75.1	22.8	29.7	81.8	13.4	25.1
Assam	58.6	19.3	6.7	78.9	18.2	10.1
Bihar	42.1	7.1	1.9	65.4	11.6	2.2

Telangana	73.7	21.6	5.3	82.3	4.0	1.1
Uttar Pradesh	77.9	3.9	0.5	76.0	9.4	1.1
West Bengal	53.6	22.7	18.7	73.9	21.9	22.8
all-India	**68.8**	**14.0**	**9.2**	**79.5**	**12.4**	**10.8**

Ref: Table 10R/U, Appendix A *# on date of survey*

3.15.3 As expected, urban sector showed higher proportion (80%) of households having at least one bank account in the name of household member than rural area. Only 12% urban household had post office account, and 11% had other types of deposit accounts. Kerala, for urban sector also showed the highest proportion (91%) of households with back account. In urban sector 13 states had less proportion of bank account than the national level proportion. Actually, proportion households having bank account of all the states varied within ±20% around all-India figure.

3.15.4It has already mentioned that Bullion and ornaments were kept outside the purview of assets. In the previous rounds bullion and ornaments were part of durable asset. In AIDIS of 70th round information value of bullion or ornament owned as on 30.06.2012 was collected from households but was not included in the asset. Statement 3.20shows the proportion of household having bullion & ornaments along with the state to all-India ratio of average value of bullion & ornaments in selected states for both rural and urban sector.

Statement 3.20 Percentage of households reporting having bullion & ornaments and state to all-India ratio of average value of bullion & ornaments

State	% of household reporting having bullion & ornaments		$RSAI_{BO}$	
	rural	urban	rural	urban
(1)	(2)	(3)	(4)	(5)
Andhra Pradesh	82.0	81.1	1.41	1.09
Assam	82.9	87.7	0.49	0.68
Bihar	53.6	53.6	0.22	0.21
Chhattisgarh	77.6	82.7	0.39	1.09
Gujarat	85.4	75.4	1.77	0.80
Haryana	87.6	67.2	1.33	0.89
Jharkhand	82.0	80.8	0.19	0.36
Karnataka	94.0	87.8	1.38	1.12
Kerala	89.0	91.3	4.05	3.04
Madhya Pradesh	83.8	86.2	0.51	0.62
Maharashtra	87.9	84.7	0.72	0.62
Odisha	83.0	82.7	0.55	0.61
Punjab	66.5	68.6	0.89	0.67
Rajasthan	82.6	82.6	1.35	0.94
Tamil Nadu	91.6	89.4	2.72	2.18
Telangana	90.0	87.7	1.35	1.51
Uttar Pradesh	88.7	80.4	0.62	0.48
West Bengal	78.9	75.8	0.34	0.47
all-India	**82.2**	**81.1**	**1.00**	**1.00**

Ref: Table 8R/U, Appendix A

3.15.5 In rural area, 82% households had reported ownership of some bullion and ornaments, whereas in urban area 81% reported the same. In rural sector 6 states had less proportion than the national level proportion whereas in urban sector 7 states had less proportion. Bihar, Jharkhand, Punjab and West Bengal are common for both the list.

3.15.6In fact, proportion households having bullion and ornament of all the states except Bihar and Punjab varied within ±15% around all-India figure in rural sector. In the same way, in urban sector, all states other than Bihar and Punjab and Haryana fall with ± 15% range of national level.

$RSAI_{BO}$ for a state is defined as ratio of average value of bullion and ornaments for that state to the all-India average; $RSAI_{BO}$ = Average value of bullion and ornaments held by the households of the state/ Average value of bullion and ornaments held by all households

3.15.7 It is revealed from Statement 3.20 that Kerala, for both urban and rural sector held highest amount bullion and ornaments followed by Tamil Nadu. These values of $RSAI_{BO}$ are more dispersed in rural sector than urban sector.

3.16 Inequality in Distribution of Assets: all-India and States

3.16.1 Attempt has been made to compute Gini's Coefficients based on the average per capita asset value from the present survey separately from rural and urban sector and for each state.

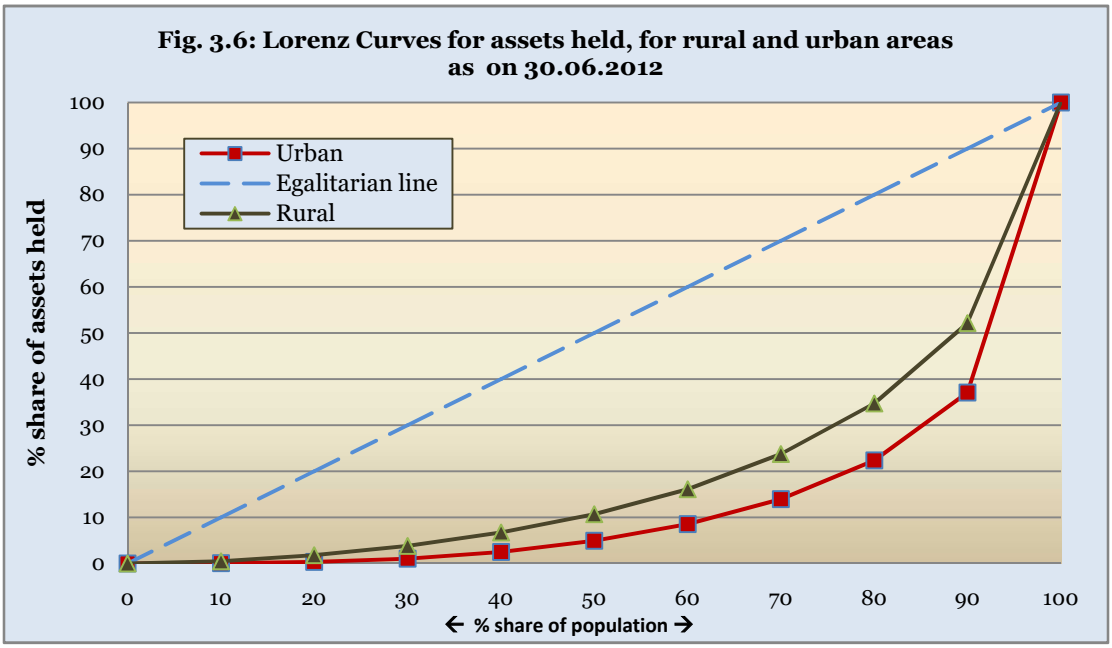

Statement 3.21: Percentage share of assets in different decile classes of assets holding

decile class of assets holding	% share of assets	
	rural	urban
(1)	(2)	(3)
01	0.49	0.03
02	1.28	0.27
03	2.02	0.75
04	2.90	1.44
05	3.96	2.38
06	5.47	3.65
07	7.62	5.41
08	11.01	8.39
09	17.41	14.78
10	47.86	62.90

3.16.2Statement 3.21 gives the share of assets in different decile classes of asset holding at each all-India rural and urban.

3.16.3It is also revealed as shown in the Statement 3.22 that Gini's Coefficient of distribution of asset is more in urban area than rural area at all-India level. Lorenz curves for the distribution based on data of average per capita asset value are shown in Fig. 3.6.

Fig. 3.6: Lorenz Curves for assets held, for rural and urban areas as on 30.06.2012

3.16.4*Within-State inequality:*Gini's Coefficients of the distributions of average per capita asset value have been computed for the rural and urban sectors of each State/UT. Statement 3.22 shows Gini's Coefficients of the rural and urban areas for selected states. For purposes of comparison of inequality in terms of asset, the ratio of State average value of assetto the all-India AVA is also shown alongside for each state for rural and urban sector.

3.16.5Among the selected states, Gini's coefficient ranges from 0.50 to 0.74 in the rural sector and from 0.62 to 0.78 in the urban sector. It may be seen that in urban area inequality was more than rural area. In rural India, the Gini's Coefficients for Odisha is the lowest followed by Assam. This may be mentioned in this connection that Odisha is having the least AVA among selected states, and Assam is also considered to be State with low AVA (*Ref. Statement 3.4*).

3.16.6 In the urban sector, however, the scenario was little different. Gini's Coefficient for Jharkhand was the lowest followed by Kerala. It is interesting to note that, although Jharkhand was a state with low AVA, but $RSAI_{AVA}$of Kerala was the second highest among the 18 selected states.

Statement 3.22: Gini's Coefficient of State-level asset distribution and rank of State by average asset

Rural			Urban		
State	Gini's Coefficient of asset	$RSAI_{AVA}$	State	Gini's Coefficient of asset	$RSAI_{AVA}$
(1)	(2)	(3)	(4)	(5)	(6)
Odisha	0.499	0.28	Jharkhand	0.615	0.43
Assam	0.522	0.50	Kerala	0.622	1.76
Karnataka	0.534	0.79	Bihar	0.634	0.63
Telangana	0.534	0.63	Rajasthan	0.639	0.85
Jharkhand	0.541	0.55	Odisha	0.666	0.34
West Bengal	0.546	0.40	Gujarat	0.667	0.77
Uttar Pradesh	0.550	0.86	Chhattisgarh	0.669	0.65
Chhattisgarh	0.559	0.72	Punjab	0.686	1.15
Rajasthan	0.560	1.06	Uttar Pradesh	0.690	1.21
Tamil Nadu	0.572	0.67	Assam	0.707	1.25

Appendix B

Note on Sample Design and Estimation Procedure

Note on Sample Design and Estimation Procedure

1. Introduction

1.1 The National Sample Survey (NSS), set up by the Government of India in 1950 to collect socio-economic data employing scientific sampling methods, started its 70th round from 1st January 2013. The survey continued till 31st December 2013.

1.2 **Subject Coverage**: The 70th round (January 2013 - December 2013) of NSS was earmarked for surveys on land and livestock holdings, debt and investment and situation assessment survey of agricultural households. The last survey on these subjects was conducted in 59th round of NSS (January 2003 - December 2003).

2. Outline of Survey Programme

2.1 **Geographical coverage**: This survey covered the whole of the Indian Union.

2.2 **Visits 1 & 2**: Each sample FSU was visited twice during this round. Since the workload of the first visit (i.e. visit 1) was more, the first visit continued till the end of July 2013. Thus, period of the first visit was January – July 2013 and that of the second visit (i.e. visit 2) was August – December 2013.

The listing schedule (sch 0.0) was canvassed only in the first visit. Schedules 18.1, 18.2 and 33 were canvassed in independent sets of sample households. Each sample household was visited twice. Visit 1 and visit 2 schedules were canvassed in the same set of sample households during first and second visit respectively. Contents of the schedules for the two visits were not same since the information relate to two different seasons.

2.3 **Sub-rounds:** The survey period of the round was divided into two sub-rounds. Sub-round one consisted of the first half of the survey period of each visit i.e. 1st Jan -15thApril 2013 for visit 1 and 1st August – 15th October 2013 for visit 2 while sub-round two consisted of the remaining period of the respective visits. Thus, each sub-round was of three and a half months duration for visit 1 and two and a half months for visit 2.

In each of these two sub-rounds equal number of sample villages/ blocks (FSUs) were allotted for survey with a view to ensuring uniform spread of sample FSUs over the entire survey period. Attempt was made to survey each of the FSUs during the sub-round to which it was allotted. Because of the arduous field conditions, this restriction was not strictly enforced in Andaman and Nicobar Islands, Lakshadweep and rural areas of Arunachal Pradesh and Nagaland.

The villages/blocks visited in the first sub-round of first visit were revisited during the first sub-round of the second visit. Similarly, villages/blocks of sub-round 2 of visit 1 were revisited in sub-round 2 of visit 2.

2.4 **Schedules of enquiry**: During this round, the following schedules of enquiry were canvassed:

Schedule 0.0	:	list of households
Schedule 18.1	:	land and livestock holdings (rural only)
Schedule 18.2	:	debt and investment
Schedule 33	:	situation assessment survey of agricultural households (rural only)

3. **Sample Design**

3.1 **Outline of sample design:** A stratified multi-stage design was adopted for the 70th round survey. The first stage units (FSU) were the census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. The ultimate stage units (USU) were households in both the sectors. In case of large FSUs, one intermediate stage of sampling was the selection of two hamlet-groups (hgs)/sub-blocks (sbs) from each rural/ urban FSU.

3.2 **Sampling Frame for First Stage Units:** *For the rural sector,* the list of 2001 census villages updated by excluding the villages urbanised and including the towns de-urbanised after 2001 census (henceforth the term 'village' would mean Panchayat wards for Kerala) constituted the sampling frame. *For the urban sector,* the latest updated list of UFS blocks (2007-12) was considered as the sampling frame.

3.3 **Stratification:**

(a) Stratum had been formed at district level. Within each district of a State/ UT, generally speaking, two basic strata were formed: i) rural stratum comprising of all rural areas of the district and (ii) urban stratum comprising all the urban areas of the district. However, within the urban areas of a district, if there were one or more towns with population 10 lakhs or more as per population census 2011 in a district, each of them formed a separate basic stratum and the remaining urban areas of the district was considered as another basic stratum.

(b) However, a special stratum in the rural sector only was formed at State/UT level before district- strata were formed in case of each of the following 20 States/UTs: Andaman & Nicobar Islands, Andhra Pradesh, Assam, Bihar, Chhattisgarh, Delhi, Goa, Gujarat, Haryana, Jharkhand, Karnataka, Lakshadweep, Madhya Pradesh, Maharashtra, Odisha, Punjab, Rajasthan, Tamil Nadu,

Uttar Pradesh and West Bengal. This stratum comprised all the villages of the State with population less than 50 as per census 2001.

(c) In case of rural sectors of Nagaland one special stratum was formed within the State consisting of all the interior and inaccessible villages. Similarly, for Andaman & Nicobar Islands, one more special stratum had been formed within the UT consisting of all inaccessible villages. Thus for Andaman & Nicobar Islands, two special strata had been formed at the UT level:

(i) special stratum 1 comprising all the interior and inaccessible villages
(ii) special stratum 2 containing all the villages, other than those in special stratum 1, having population less than 50 as per census 2001.

3.4 **Sub-stratification:**

Rural sector: Different sub-stratifications were done for 'hilly' States and other States. Ten (10) States were considered as hilly States. They were: Jammu & Kashmir, Himachal Pradesh, Uttarakhand, Sikkim, Meghalaya, Tripura, Mizoram, Manipur, Nagaland and Arunachal Pradesh.

(a) sub-stratification for hilly States: If 'r' was the sample size allocated for a rural stratum, the number of sub-strata formed was 'r/2'. The villages within a district as per frame were first arranged in ascending order of population. Then sub-strata 1 to 'r/2' was demarcated in such a way that each sub-stratum comprised a group of villages of the arranged frame and had more or less equal population.

(b) sub-stratification for other States (non-hilly States except Kerala): The villages within a district as per frame were first arranged in ascending order of *proportion of irrigated area in the cultivated area of the village*. Then sub-strata 1 to 'r/2' was demarcated in such a way that each sub-stratum comprised a group of villages of the arranged frame and had more or less equal *cultivated area*. The information on irrigated area and cultivated area was obtained from the village directory of census 2001.

(c) sub-stratification for Kerala: Although Kerala is a non-hilly State but because of non-availability of information on irrigation at FSU (Panchayat Ward) level, sub-stratification by proportion of irrigated area was not possible. Hence the procedure for sub-stratification was same as that of hilly States in case of Kerala.

Urban sector: There was no sub-stratification for the strata of million plus cities. For other strata, each district was divided into 2 sub-strata as follows:

sub-stratum 1: all towns of the district with population less than 50000 as per census 2011
sub-stratum 2: remaining non-million plus towns of the district

3.5 **Total sample size (FSUs):** 8042 FSUs were allocated for the central sample at all-India level.

3.6 **Allocation of total sample to States and UTs:** The total number of sample FSUs were allocated to the States and UTs in proportion to population as per census 2011 subject to a minimum sample allocation to each State/ UT. While doing so, the resource availability in terms of number of field investigators as well as comparability with previous round of survey on the same subjects was also kept in view.

3.7 **Allocation of State/ UT level sample to rural and urban sectors:** State/ UT level sample size was allocated between two sectors in proportion to population as per *census 2011* with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu etc. did not exceed the rural sample size. A minimum of 16 FSUs (minimum 8 each for rural and urban sector separately) were allocated to each state/ UT.

3.8 **Allocation to strata:** Within each sector of a State/ UT, the respective sample size was allocated to the different strata in proportion to the population as per census 2011. Allocations at stratum level were adjusted to multiples of 2 with a minimum sample size of 2.

For special stratum formed in the rural areas of 20 States/UTs, as discussed in para 3.3 (b), 2 FSUs were allocated to each.

For special stratum 1 in the rural areas of Nagaland and Andaman & Nicobar Islands, 4 and 2 FSUs were allocated respectively.

3.9 **Allocation to sub-strata:**

3.9.1 **Rural**: Allocation was 2 for each sub-stratum.

3.9.2 **Urban**: Stratum allocations were distributed among the two sub-strata in proportion to the number of FSUs in the sub-strata. Minimum allocation for each sub-stratum was 2.

3.10 **Selection of FSUs:**

For the rural sector, from each stratum x sub-stratum, required number of sample villages were selected by Simple Random Sampling Without Replacement (SRSWOR) procedure.

For the urban sector, FSUs were selected by using Simple Random Sampling Without Replacement (SRSWOR) from each stratum x sub-stratum.

Both rural and urban samples were drawn in the form of two independent sub-samples and equal number of samples were allocated among the two sub rounds.

3.11 **Formation and selection of hamlet-groups/sub-blocks:** In case hamlet-groups/ sub-blocks were formed in the sample FSU, the same was done by more or less equalizing population. While doing so, it was ensured that the hamlet-groups/sub-blocks formed were clearly identifiable in terms of physical landmarks.

Two hamlet-groups (hg)/ sub-blocks (sb) were selected from a large FSU wherever hamlet-groups/ sub-blocks were formed in the following manner – one hg/sb with maximum percentage share of population was always selected and termed as hg/sb 1; one more hg/ sb was selected from the remaining hg's/ sb's by simple random sampling (SRS) and termed as hg/ sb 2. Listing and selection of the households was done independently in the two selected hamlet-groups/ sub-blocks.

3.12 **Formation of second stage strata and allocation of households**

3.12.1 **Schedule 18.1: Land & Livestock Holdings Survey (LHS) (rural only):**

Four SSS were formed for schedule 18.1 based on four land possessed codes. SSS number was same as the land possessed code.

Each household was given a land possessed code according to the following criteria:

land possessed code	**criterion:** area of the land possessed by the household as on the date of survey
1	less than 0.005 hectare
2	equal to or more than 0.005 hectare but less than 1.000 hectare
3	equal to or more than 1.000 hectare but less than 2.000 hectares
4	equal to or more than 2.000 hectares

3.12.2 **Schedule 33: Situation Assessment Survey of Agricultural Households (SAS) (rural only):**

Only 'agricultural households' were considered for this schedule. The agricultural households were divided into four SSS based on land possessed codes similar to LHS second stage strata.

3.12.3 **Schedule 18.2**: **Debt and Investment Survey (AIDIS):**

Three SSS were formed both in rural and urban sector: (i) households indebted either to institutional agencies only or to both institutional and non-institutional agencies, (ii) households indebted to non-institutional agencies only and (iii) households without any indebtedness.

3.12.4 **Allocation and selection of sample households:** The total number of households surveyed in an FSU is given below for each schedule type:

Two households were selected from each SSS for schedule 18.1 and 33. In case of hamlet group formation, one household was selected from each hg × SSS for schedule 18.1 and 33. For schedule 18.2, the number of sample households were 6, 4 and 4 from SSS 1, 2 and 3 respectively. In case of hamlet group/sub-block formation, the number of sample households were 3, 2 and 2 from each (hg/sb) x SSS for schedule 18.2. The number of SSS, allocations and sampling scheme by schedule type are illustrated in the following table.

schedule type	**number of SSS**	number of sample households surveyed		
		rural	**urban**	**sampling scheme within each SSS**
18.1	4	8 (2 households from each SSS)	----	SRSWOR
18.2	3	14 (SSS1 = 6, SSS2 = 4, SSS3 = 4)	14 (SSS1 = 6, SSS2 = 4, SSS3 = 4)	
33	4	8 (2 households from each SSS)	----	

3.12.5 **Selection of households:** From each SSS the sample households for each of the schedules were selected by SRSWOR.

4. **Estimation Procedure**

4.1 **Notations:**

s = subscript for s-th stratum
t = subscript for t-th sub-stratum
m = subscript for sub-sample (m =1, 2)
i = subscript for i-th FSU [village (panchayat ward)/ block]
d = subscript for a hamlet-group/ sub-block (d = 1, 2)
j = subscript for j-th second stage stratum in an FSU/ hg/sb
k = subscript for k-th sample household under a particular second stage stratum within an FSU/ hg/sb
D = total number of hg's/ sb's formed in the sample FSU
D* = (D – 1) for FSUs with D > 1
N = total number of FSUs in any rural/urban sub-stratum
n = number of sample FSUs surveyed including 'uninhabited' and 'zero cases' but excluding casualty for a particular sub-sample and sub-stratum.
H = total number of households listed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU
h = number of households surveyed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU
x, y = observed value of characteristics *x*, *y* under estimation
$\hat{X}$, $\hat{Y}$ = estimate of population total X, Y for the characteristics *x*, *y*

Under the above symbols,

$y_{stmidjk}$ = observed value of the characteristic y for the k-th household in the j-th second stage stratum of the d-th hg/ sb (d = 1, 2) of the i-th FSU belonging to the m-th sub-sample for the t-th sub-stratum of s-th stratum.

However, for ease of understanding, a few symbols are suppressed in following paragraphs where they are obvious.

4.2 **Formulae for Estimation of Aggregates for a particular sub-sample and stratum – sub-stratum:**

4.2.1 Schedules 18.2:

4.2.1.1 **Rural/Urban:**

(i) For j-th second stage stratum:

$$\hat{Y}_j = \frac{N}{n_j}\left[\sum_{i=1}^{n_j}\left\{\frac{H_{i1j}}{h_{i1j}}\sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^{*}\left(\frac{H_{i2j}}{h_{i2j}}\sum_{k=1}^{h_{i2j}} y_{i2jk}\right)\right.\right.$$

(ii) For all second-stage strata combined:

$$\hat{Y} = \sum_{j} \hat{Y}_j$$

Note: Value of j for this schedule is as follows:

for sch. 18.2, j = 1, 2 or 3

4.2.1.2 *Estimates in respect of joint operational holdings*: In the case of joint operational holdings operated by the sample household jointly with other household(s), the value of a characteristic of the operational holding is first multiplied by the percentage share of land of the sample household(s) and then the higher estimates are built up.

4.3 **Overall Estimate for Aggregates for a sub-stratum**:

Overall estimate for aggregates for a sub-stratum ($\hat{Y}_{st}$) based on two sub-samples is obtained as:

$$\hat{Y}_{st} = \frac{1}{2}\sum_{m=1}^{2} \hat{Y}_{stm}$$

4.4 **Overall Estimate for Aggregates for a stratum**:

Overall estimate for a stratum ($\hat{Y}_s$) is obtained as

$$\hat{Y}_s = \sum_t \hat{Y}_{st}$$

4.5 **Overall Estimate of Aggregates at State/UT/all-India level**:

The overall estimate $\hat{Y}$ at the State/ UT/ all-India level is obtained by summing the stratum estimates $\hat{Y}_s$ over all strata belonging to the State/ UT/ all-India.

4.6 **Estimates of Ratios**:

Let $\hat{Y}$ and $\hat{X}$ be the overall estimates of the aggregates Y and X for two characteristics *y* and *x* respectively at the State/ UT/ all-India level.

Then the combined ratio estimate $(\hat{R})$ of the ratio $(R = \frac{Y}{X})$ is obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}.$$

4.7 **Estimates of Error**: The estimated variances of the above estimates are as follows:

4.7.1 **For aggregate** $\hat{Y}$: $\hat{Var}(\hat{Y}) = \sum_s \hat{Var}(\hat{Y}_s) = \sum_s \sum_t \hat{Var}(\hat{Y}_{st})$ where $\hat{Var}(\hat{Y}_{st})$ is given by

$\hat{Var}[\hat{Y}_{st}] = \frac{1}{4}[\hat{Y}_{st1} - \hat{Y}_{st2}]^2$, where $\hat{Y}_{st1}$ and $\hat{Y}_{st2}$ are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum‘s’ and sub-stratum‘t’.

4.7.2 **For ratio** $\hat{R}$:

$\hat{MSE}(\hat{R}) = \sum_s \sum_t \hat{MSE}_{st}(\hat{R})$ where $\hat{MSE}_{st}(\hat{R})$ is given by

$$\hat{MSE}_{st}(\hat{R}) = \frac{1}{4\hat{X}^2}\left\{[\hat{Y}_{st1} - \hat{Y}_{st2}]^2 + \hat{R}^2[\hat{X}_{st1} - \hat{X}_{st2}]^2 - 2\hat{R}[\hat{Y}_{st1} - \hat{Y}_{st2}][\hat{X}_{st1} - \hat{X}_{st2}]\right\}$$

4.7.3 **Estimates of Relative Standard Error (RSE)**:

$$\widehat{RSE}(\hat{Y}) = \frac{\sqrt{\widehat{Var}(\hat{Y})}}{\hat{Y}} \times 100$$

$$\widehat{RSE}(\hat{R}) = \frac{\sqrt{\widehat{MSE}(\hat{R})}}{\hat{R}} \times 100$$

5. **Multipliers**:

5(a) Two sets of multipliers are obtained:

(i) For visit 1 only
(ii) For visit 2 only

Hence, household multiplier is equal to:

(i) visit 1 multiplier for all estimation based only on the visit 1 households
(ii) visit 2 multiplier for all estimation based only on the visit 2 households
(iii) visit 2 multiplier for generating combined estimates based on the common set of households of visit 1 and visit 2.

5(b) The formulae for multipliers at stratum/sub-stratum/second-stage stratum for a sub-sample and schedule type are given below:

sch type	sector	formula for multipliers	
		hg / sb 1	hg / sb 2
18.2	rural / urban	$\frac{N_{st}}{n_{stmj}} \times \frac{H_{stmi1j}}{h_{stmi1j}}$	$\frac{N_{st}}{n_{stmj}} \times D^{*}_{stmi} \times \frac{H_{stmi2j}}{h_{stmi2j}}$
	(j = 1, 2, 3)		

Note: (i) For estimating any characteristic for any domain not specifically considered in sample design, indicator variable is used.

(ii) Multipliers are computed on the basis of information available in the listing schedule irrespective of any misclassification observed between the listing schedule and detailed enquiry schedule.

(iii) For estimating number of villages possessing a characteristic, D^{*}_{stmi} = 0 in the relevant multipliers and there is only one multiplier for the village.

Appendix C

Schedule 18.2
(Visit 1 and Visit 2)

RURAL		*
URBAN		

GOVERNMENT OF INDIA
NATIONAL SAMPLE SURVEY OFFICE
SOCIO-ECONOMIC SURVEY
SEVENTIETH ROUND : JANUARY TO DECEMBER 2013
HOUSEHOLD SCHEDULE 18.2 : DEBT AND INVESTMENT

CENTRAL		*
STATE		

* *tick mark (Ě) may be put in the appropriate place.*

VISIT NUMBER – 1

[0] descriptive identification of sample household	
1. state/u.t.:	5. hamlet name:
2. district:	6. investigator unit /block:
3. tehsil/town:*	7. name of head of household:
4. village name:	8. name of informant:

[1] identification of sample household

item no.	item	code	item no.	item	code
1.	srl. no. of sample village/block		12.	FOD sub-region	
2.	round number	7 0	13.	sample hg/sb number	
3.	schedule number	1 8 2	14.	second-stage stratum number	
4.	sample (*central-1, state-2*)		15.	sample household number	
5.	sector (*rural-1, urban-2*)		16.	**visit number**	**1**
6.	NSS region		17.	serial number of informant # (as in column 1 of block 4)	
7.	district				
8.	stratum		18.	response code	
9.	sub-stratum		19.	survey code	
10.	sub-round		20.	reason for substitution of original household	
11.	sub-sample				

Codes for Block 1

item 18: ***response code***: informant: *co-operative and capable -1, co-operative but not capable -2, busy -3, reluctant -4, others -9.*

item 19: ***survey code***: *original -1, substitute -2, casualty -3.*

item 20: ***reason for substitution of original household***: *informant busy -1, members away from home -2, informant non-cooperative -3, others -9.*

 # if the informant is not a household member, code 99 will be recorded.

[2] particulars of field operations

srl. no.	item		field investigator (FI)/ asstt. superintending officer(ASO)	field officer (FO)/ superintending officer (SO)
