ACKNOWLEDGEMENT

The report was prepared and finalised by Salil Kumar Sanyal. Sunil Kumar Sinha, G. Venkateswarlu and S. C. Basu Roy were associated in the work relating to the preparation of the report.

Supervision of computing, punching and machine tabulation was entrusted to H. B. Chowdhury, S. Palit, A. K. Chowdhury, R. Roy, S. N. Das, N. K. De, B. L. Banerjee and F. M. Rao.

The design of the survey was prepared by the Indian Statistical Institute.

The primary data were collected by the Directorate of the National Sample Survey, Government of India in all the states except West Bengal where the Indian Statistical Institute collected the relevant data.

**THE NATIONAL SAMPLE SURVEY
SIXTEENTH ROUND : JULY 1960—JUNE 1961**

NUMBER 159

TABLES WITH NOTES ON SOME ASPECTS OF LAND HOLDINGS IN RURAL INDIA

*This report entitled "Tables with Notes on Some Aspects of Land Holdings in Rural India, Sixteenth Round : July 1960—June 1961" was prepared by the Indian Statistical Institute, Calcutta. The views contained in the report are not necessarily those of the Government of India.**

CHAPTER ONE

INTRODUCTION

1.1 With a view to obtain internationally comparable agricultural statistics, the World Food and Agriculture Organisation (FAO) had initiated the Programmes of World Agricultural Census 1950 and 1960. The Government of India participated in both the programmes. The land holdings enquiry in the sixteenth round (July 1960—June 1961), was the second extensive survey on landholdings carried out by the National Sample Survey, the first one being in the eighth round (July 1954—June 1955). This survey, besides covering the requirements of the FAO was also geared to fulfill the national needs relating to the data on structure of land ownership.

1.2 The feature of agricultural operational holdings in rural India, constituting the basic requirements of the FAO, have already been brought out in an earlier report¹. In this report the pattern of distribution of household ownership holdings and the structure of land ownership have been presented. Besides, some additional information on agricultural operational holdings e. g. area under different crops joint holdings, etc. are also given.

1.3 Altogether 3798 villages were planned to be surveyed under a scheme of two independent and interpenetrating net-work of samples, each providing valid estimate for any characteristics. In effect, however, 3755 villages could be surveyed. The details of the stratified two-stage sampling procedure followed, are given in Appendix I.

1.4 The survey started in July 1960 and continued upto August 1961². The reference period for the collection of data pertaining to an operational holding related to the agricultural year July 1959 to June 1960. The information on livestock and agricultural implements owned by the household were collected as on the date of enquiry. The survey was extended to the whole of rural India excluding Andaman and Nicobar Islands, Laccadive and Amindivi islands, Ladakh district of Jammu & Kashmir and the North East Frontier Agency.

1.5 As usual, the field work was carried out by the Directorate of the National Sample Survey, Government of India in all the states and union territories except in West Bengal. The Indian Statistical Institute was responsible for the sampling design adopted in the survey. It also undertook the investigation work for West Bengal and the processing and tabulation of the data.

1.6 A summary of the main findings of the survey as regards the household ownership holdings is presented in chapter two. The concepts, definitions and the sampling design are given in Appendix I. The results at national level have been given in Appendix II in two independent and interpenetrating sub-samples as well as by combining the two sample estimates. Some of the important results have however, been presented at the state level also. A facsimile each of the Schedule of enquiry (6.1 and 6.2) is appended at the end of the report (Appendix III).

*The draft report (No. D. 172) was first submitted by the Indian Statistical Institute, Calcutta, to the Government of India in May, 1967. It was revised subsequently and resubmitted in April 1969.

¹NSS Report No. 113 : Tables with Notes on Agricultural Holdings in Rural India.

²The survey had to be extended upto August 1961 to accommodate the ad-hoc post census surveys (population and livestock) which were taken up during the sixteenth round of the NSS.

CHAPTER TWO
SUMMARY OF RESULTS

2.1 In an earlier report¹, different aspects of agricultural holdings were presented. The main emphasis in this chapter is therefore, on the household ownership holdings. Various features of land ownership have been discussed. Besides, other important findings as regards land operated in rural India which could not be given in the earlier report are dealt with in this chapter. All the results given in this chapter² relate to the total sample. The estimates relating to the different sub-samples have however, been given in Appendix II. It may also be mentioned that wherever possible, the corresponding estimates relating to the seventeenth round have also been quoted from another report³ for comparative purposes.

2.2 *Size distribution of household ownership holdings.*—About 70 millions of rural households owned an estimated area of 311 million acres. The distribution of households and area over different scales of holding sizes [Table (2.1)] reveals that 45 percent of the households each owning less than an acre together owned a meagre 1.6 percent of the total area. Three-fourths of the rural households owned less than 5 acre each and their contribution towards the total area was only 19 percent. On the other hand, a few households (0.7 percent) owned 12.4 percent of total area.

TABLE (2.1) : CUMULATIVE PERCENTAGE DISTRIBUTION OF THE NUMBER OF HOUSEHOLDS AND AREA OWNED BY THEM BY SIZE OF HOUSEHOLD OWNERSHIP HOLDING : 16TH AND 17TH ROUNDS OF NSS

16th round : July 1960—June 1961

17th round : September 1961—June 1962

size of ownership holding (acres)	16th round		17th round	
	cumulative percentage of		cumulative percentage of	
	number of households	area owned	number of households	area owned

1. below 0.50	39.00	0.57	37.90	0.54
2. below 1.00	45.28	1.58	44.21	1.59
3. below 2.50	60.59	7.32	60.06	7.59
4. below 5.00	75.52	19.38	75.22	19.99
5. below 7.50	83.34	30.07	83.51	31.56
6. below 10.00	87.87	38.84	88.08	40.53
7. below 15.00	92.90	52.49	93.17	54.50
8. below 20.00	95.43	62.23	95.64	64.16
9. below 25.00	96.93	69.72	97.15	71.76
10. below 30.00	97.79	74.95	98.01	77.09
11. below 50.00	99.29	87.58	99.40	88.87
12. all sizes	100.00	100.00	100.00	100.00
13. estimated number of households (000)	69912		72,466	
14. estimated area owned (000 acres)		311,277		317,861
15. no. of sample villages		3,755		3,486
16. no. of sample households		44,377		53,13

¹NSS Report No. 113 : Tables with notes on agricultural holdings in rural India, 16th round.

²The aggregate estimates given in this chapter differ from those given in the appendix but the ratio estimates remain unaltered in most of the cases (*vide* para 2.16).

³NSS Report No. 144 : Tables with notes on some aspects of land holdings in rural areas, 17th round.

Some Aspects of Land Holdings in Rural India

2.2.1 The results of a similar survey carried out in the seventeenth round also bring out the same uneven distribution of land owned.

2.3 *Average size of household ownership holding.*—The average size of ownership holdings for those households which owned 0.005 acre or more has been presented in Table (2.2) for different States. It will be seen that Kerala, West Bengal and Madras had on an average very small household ownership holdings (1.96, 2.62 and 2.61 acres respectively) whereas land owning households in Rajasthan, Gujarat, Maharashtra and Madhya Pradesh had on an average large holdings (11.24, 9.35, 9.42 and 9.09 acres respectively). In whole of rural India the land owning households owned on an average a holding of 5.12 acres. This average would decrease if the landless households were considered.

TABLE (2.2) : AVERAGE SIZE OF HOUSEHOLD OWNERSHIP HOLDINGS, PERCENTAGE OF HOUSEHOLDS OWNING NO LAND AND PERCENTAGE OF AREA LEASED OUT FOR DIFFERENT STATES, 16TH AND 17TH ROUNDS OF NSS

16th round—July 1960—June 1961

17th round—September 1961—July 1962

17. all-India	5.12	4.97	13.04	11.68	9.89	9.44	9.04	7.03	5.48	4.43

2.4 *Landless households.*—The percentage of landless households varied widely between the States. Kerala had the largest proportion of landless households (32%). In Assam and Gujarat also this proportion was quite high (29 percent and 24 percent respectively). On the other hand, in Uttar Pradesh only 3 percent of the households were not owning any land. In whole of rural India 13 percent of the households did not own any land.

2.5 The households which neither owned nor operated any land constituted about 10 percent of the total households. It is interesting to note that Kerala which reported 32 percent landless households had only 17 percent which neither owned nor operated any land which indicates that more than 50 percent of these landless households might have taken land on lease. 23 percent of the households in Assam and Gujarat neither owned nor operated land.

¹Averages relate to the land owning households i.e., those households who owned 0.005 acre or more.

National Sample Survey

2.6 *Leasing out of land.*—Table (2.2) also gives the extent of area owned for different States as well as the proportions of land owning households leasing out their land. The feature of leasing out of land was most marked in Punjab, where 24 percent of the households had leased out some of the land, the percentages of owned area leased out amounting to 21 percent. The owned area leased out was negligible in Gujarat but varied from 4 to 9 percent in most of the States. 9 percent of the households in whole of rural India had leased out some land which constituted 5 percent of the total area owned.

2.7 The survey results obtained from the 16th round compare well with those from the 17th round at all India level. The agreement between the rounds at the State level is good for some items. For those States where the estimates for a characteristic fall apart as between the rounds, it would be worth having the idea of the margin of uncertainty from the sub-sample-wise estimates given in the Appendix II of this report and corresponding estimates from the other report giving 17th round results.

2.8 *Types of ownership.*—It will be seen from Table (4) of Appendix II that 95 per cent of the total area owned was held directly from Government, 80 percent with the right to transfer title and 15 percent without having this right of transferring title. The remaining 5 percent of area owned was held from persons other than Government.

2.9 About 88 percent of the households (owning 0.005 acre or more of land) reported some land under forests and non-agricultural uses. The area owned by such households constituted 86 percent of the total area owned by all land owning households. The area under forests and non-agricultural uses was only about 6 percent of the area owned by households reporting area under forests and non-agricultural uses (*vide* Table 9, Appendix II).

2.10 *Households possessing agricultural holdings.*—It will be seen from Table (19) Appendix II that 28 percent of the households in rural India did not operate any land. About 70 percent possessed one operational holding and 2 percent had two or more operational holdings, the shares claimed of area operated being 95 and 5 percent respectively.

2.11 *Entirely owned holdings¹.*—Out of 50 million households operating land 0.005 acre or more, 72 percent reported agricultural holdings which were entirely owned, 4 percent reported entirely leased in² holdings and 24 percent possessed holdings comprised of both owned and leased in land. More than three-fourths of the total operated area was claimed by households reporting entirely owned land, 22 percent by households having mixed holdings and 2 percent only by households reporting entirely leased in holdings [*vide* Table (18), Appendix II].

2.12 *Gross area sown by size of holding.*—In this survey, utilisation particulars *e.g.*, area under rice, jowar, etc. were collected for each of the plot in the holding. If a plot was sown for more than one season, utilisation of the plot was recorded for each of the seasons separately. The gross area sown as regards a holding was the sum of the area under all the crops for all the seasons cropped.

2.12.1 It is interesting to note (Table 21, Appendix II) that the total gross area sown expressed as percentage to operated area decreased with the increasing holding size. The average gross area sown per reporting holding was 6.83 acres (Table 22, Appendix II).

2.13 *Area under crops.*—It can be observed from the tables provided in the appendix II [Tables (23), (24) and (29)] that 62 percent of the agricultural holdings reported area under rice and the area under rice was 26 percent of the total operated area, the average area per reporting holding being 2.77 acres. About one-third of the holdings reported area under wheat, claiming one-tenth of the operated area, the average area per reporting holding being about 2 acres. The total area commanded by the cash crops namely, sugarcane, cotton, jute and groundnut was one-tenth of the total area operated.

2.14 *Joint operational holdings.*—The jointly operated holdings in rural India constituted only 4 percent of the total holdings. The individually operated holdings (96 percent) accounted for 96 percent of the total operated area. [*vide* Table (31), Appendix II].

2.15 In the preceding summary, the distributions by size classes of holdings could not be discussed for all the items. The detailed distributions are, however, available in the appendix for further analysis of the data.

2.16 It may be noted that mainly on the consideration of resources available for the survey, the sampling design for the Union Territories was so oriented as to throw up only one estimate of the items of enquiry for each of the Union Territories. The sample villages of Delhi and Tripura were assigned to sub-sample 1 while those of Himachal Pradesh and Manipur to sub-sample 2. In this report, as in the previous one also, the sub-sample 1 estimates against Union Territories relate to Delhi and Tripura only and

¹entirely owned holdings have been obtained by subtracting the mixed holdings from the holdings reporting owned area.

²entirely leased-in holdings have been obtained by subtracting the mixed holdings from the holdings reporting leased in area.

Some Aspects of Land Holdings in Rural India

sub-sample 2 estimates correspond to Himachal Pradesh and Manipur. The combined estimates (totals) against "Union Territories" as given in Tables (1·16), (6·16) & (10·16) in Appendix II are one-half of the actual estimates of the four Union Territories taken together. The ratio estimates presented in Tables (2·16), (6·16) & (10·16) are not affected. Thus at all India level, Himachal Pradesh and Manipur are not covered in sub-sample 1 estimates while Delhi and Tripura are excluded from the coverage of sub-sample 2 estimates. The combined estimates of totals for all India include one-half of the estimates of the four Union Territories taken together. In this chapter however, the estimates are adjusted properly by substituting the actual estimates of the Union Territories. Since the contribution of Union Territories in regard to all-India estimates is negligibly small, the estimates (ratios) at all-India presented in this report are not expected to be affected to any appreciable extent.

APPENDIX I

CONCEPTS, DEFINITIONS AND SAMPLING DESIGN

1. The concepts and definitions adopted in the survey are given in the following paragraphs.

2. *Household*.—A group of persons who usually lived together and took their meals from a common kitchen constituted a household. Whether a person satisfying the criterion of common messing would be considered as a member of the household or not was left to the judgement of the head of the household. Temporary absentees who were considered by the head of the household as members of the household were enumerated while persons like domestic servants, private tutors, paying guests, etc., were not considered as members of the household.

3. *Ownership of land*.—A plot of land was considered to be owned by the household if the right of permanent heritable possession with or without the right to transfer the title was vested in a member/members of the household. Land owned by a household might be leased out to another household without losing the ownership right. In case of a plot owned jointly with other households, only the household's share of land was taken into account.

4. *Classification of land owned or held in owner-like possession*.—The land owned or held in owner-like possession by the households was classified as follows :

- (a) land held directly from Government under a grant, lease or assignment with—
 - (i) right of permanent, heritable and transferable possession; and
 - (ii) right of permanent and heritable possession but without the right to transfer the title; and
- (b) land held from persons other than Government with—
 - (i) right of permanent, heritable and transferable possession; and
 - (ii) right of permanent and heritable possession but without the right to transfer the title.

4.1 In classifying land owned by households under categories "from Government" and "from others", the nature of ownership *as on the date of survey* was ascertained. If a plot owned by the household was held *directly* from the Government on the date of survey irrespective of whether it was acquired from the Government or not, the plot was considered to be owned and held from the Government. Lands owned and held from intermediaries on the date of survey were grouped under the category "from others".

5. *Operational holding*.—An operational holding was constituted by all lands used *wholly or partly* for agricultural production and was operated by the persons, alone or with the assistance of others, without regard to title, size or location. The holding might consist of one or more parcels of land provided they were situated in the same State and came under the purview of the same technical unit. Thus an operational holding was considered as one operated by a "person" and constituting one technical unit. A "person" in the definition refers to a single household or a number of households operating jointly. By technical unit was understood, in the context of agricultural operations, a unit with more or less independent technical resources etc., covering items like land, implements, livestock etc. Hence, in the determination of an operational holding, the importance of identifying the "person" who operated and the technical unit or units under each such "person" was emphasised. In cases where more than one "person" operating land had used more or less the same technical resources, the number of operational holdings was considered to be the same as the number of such "persons" though the technical units constituting the operational holdings were more or less identical. On the other hand, number of technical units was taken as the basis for determining the number of operational holdings in cases where under the same "person" there were more than one technical unit. A holding constituted by lands put to non-agricultural uses *only* or used *exclusively* as pastures or for livestock raising or production of livestock products and/or pisciculture was excluded from the scope of the survey.

6. *Agricultural production*.—Agricultural production included the growing of field crops, fruits, grapes, nuts, seeds, tree nurseries (except those of forest trees), bulbs, vegetables, and flowers, both in open and under glass; production of coffee, tea, cocoa, rubber, the forest production in parcels of land which formed part of the enumeration holding and the production of livestock and livestock products, poultry and poultry products, honey, rabbits, fur-bearing animals, silk-worm cocoons, etc. on land forming part of the enumeration holding.

Some Aspects of Land Holdings in Rural India

6.1 For the purpose of the survey, a household was considered to possess at least one operational holding if it had undertaken some agricultural production individually or jointly with other households during the reference period. The operational holding might be constituted by land owned as well as land rented in by the management of the holding.

7. *Area rented in.*—Area leased in by a tenant (other than the tenant who was treated as an owner by virtue of owner-like possession) who had the possession over the land without the right of ownership constituted area rented in by the tenant. The tenant household might take land on lease under one or more terms of lease. The different terms of lease, on which the information was collected are as follows :

- (i) area rented in for a fixed amount of money,
- (ii) area rented in for a fixed amount of produce,
- (iii) area rented in for a share of produce,
- (iv) area for which the rent was paid partly in one and partly in other forms mentioned above,
- (v) area held on condition of rendering services either to the village community or to the Government or to an individual (also includes cases where labourers on plantation etc. are given some land for cultivation without permanent rights) and
- (vi) area held free of rent.

8. *Individual and joint operational holding.*—An operational holding managed by persons belonging to one household was treated as an individual holding while that managed jointly by persons belonging to different households was considered to be a joint holding. When a household operated a holding jointly with other households, the details in respect of all land under the possession of the management were collected from the household. Thus the plots possessed by the partner households were also included in the holding provided they came under the joint management. For joint holdings, due consideration was given to the number of households participating in the management for obtaining the estimates of any characteristic relating to the joint holding¹.

9. *Land utilisation.*—The area under an operational holding was classified into 9 groups according to the utilisation of land. The groups are indicated below :

- (i) *Net area sown.*—This consists of net area sown with crops and orchards counting area sown more than once in the same year, only once.
- (ii) *Miscellaneous tree crops, groves etc.*—Under this class is included all culturable land which is not included under "net area sown" but is put to some agricultural use. Lands under casurina trees, thatching grasses, bamboo bushes and other groves for fuel etc., which do not come under orchards are included under this category.
- (iii) *Pastures and grazing land.*—These cover all grazing lands irrespective of whether they are permanent pastures and meadows or not. Grazing lands within forest area are also included under this category.
- (iv) *Current fallows.*—This class comprises of cropped areas which are kept fallow during the current year (reference year July 1960 to June 1961 was taken as the current year). For example, if any seedling area in the reference year July 1960 to June 1961 was not cropped again in the same reference year, it was treated as current fallow.
- (v) *Other fallows.*—All lands which were taken up for cultivation but are temporarily out of cultivation for a period not less than one year and not more than five years covering the agricultural year 1960-61 are classed under this category.
- (vi) *Culturable wastes.*—These include land available for cultivation but not taken up for cultivation or abandoned after a few years for one reason or other. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. These may be assessed or unassessed and may lie in isolated blocks or within cultivated holdings. Land once cultivated but not cultivated for five consecutive years ending with the agricultural year 1959-60 was included under this category.
- (vii) *Land put to non-agricultural uses.*—This stands for all lands occupied by buildings, paths, etc., or under water (e. g. tanks, canals, etc.) and lands put to uses other than agricultural production.

¹refer to the "Estimation procedure" given at the end of this chapter.

National Sample Survey

(viii) *Barren and unculturable land*.—Land which cannot be brought under cultivation unless at a high cost is classed as unculturable, whether such land is in isolated blocks or within cultivated holdings.

(ix) *Forests*.—These included all actually forested area on the lands classed or administered as forests under any legal enactment dealing with forests, whether State-owned or private. If any portion of such land is not actually wooded but put to some agricultural use, that portion is excluded.

10. *Parcels*.—An operational holding might be comprised of several parcels. For the purpose of the survey, a parcel was defined as all land entirely surrounded by land of other holdings or by land not forming part of any holding. A parcel might consist of one or more cadastral units, plots or fields.

11. *Permanent or attached farm workers*.—Workers employed by the management of the operational holdings who were more or less in continuous employment and under some sort of contract with employers during the period of employment are considered as permanent or attached farm workers.

12. *Irrigation*.—Irrigation is considered to denote the practice of providing land with water other than rain by artificial means for crop production. Net irrigated area represented the area irrigated from different sources, counting area irrigated more than once during the reference period, only once.

13. *Drainage*.—By drainage is meant the process of removal of excess water from the surface of the land and from the surface soil for the purpose of making non-producing wet lands productive and producing wet lands more productive. However, natural drainage, that is, automatic outflow of excess water from the fields by virtue of the position of the fields was not taken into account.

14. *Household operational holding*.—The household operational holding was constituted by lands coming under the purview of the different operational holdings possessed by the household. If the household had individual operational holdings only, the sum of the areas of each holding constituted the household operational holding. When the household possessed only joint operational holdings, household operational holding was derived by taking the sum of the household's share of area from each of the joint holdings, the share being determined on the assumption that each co-partner household had equal amount of area. In case a household had both individual and joint holdings, the sum of the areas of all the individual holdings together with the household's share of area from each of the joint operational holdings constituted the household operational holding. Thus for households possessing only one individual operational holding, household operational holding and operational holding were identical.

15.1 *Sampling Design*.—The design adopted for the land holding enquiry was a stratified two-stage one, where villages were the first-stage sampling units and households, the second-stage sampling units. Considering the available investigator strength and also other factors concerning the sampling design, it was planned to survey altogether 3798 villages for this enquiry.

15.2 *Allocation of sample villages to different states*.—The allocation of the total number of sample villages to the different states was worked out on a joint consideration of rural population (census 1951) and area under food crops in respective states. While allotting the villages to various states, the number of investigators available in each State was also taken into account and final allocations were then rounded off to multiples of 18.

15.3 *Formation of regions*.—Within each State, in consultation with the Ministry of Food and Agricultural and the State Statistical Bureaus, regions were formed by grouping contiguous districts having similar crop-patterns and population densities. Altogether 48 such regions were formed in the whole of India.

15.4 *Allocation of sample villages to different regions within a State*.—The total number of sample villages allotted to a State was further distributed among the different regions of the State in multiples of 18, and in proportion to their rural populations.

15.5 *Stratification within a region*.—Strata within a region were formed by grouping contiguous tehsils fairly homogeneous with respect to population densities in such manner that the rural populations of the strata were more or less equal and the number of strata formed in a region was one-eighteenth of the allocation to that region. The total number of strata in whole of India was 211.

15.6 *Selection of investigation zones for large strata*.—To facilitate the investigation work in a stratum having a very large area, two or more investigation zones each comprising groups of contiguous tehsils and of approximately equal areas were formed in it and two such zones were selected with probability proportional to the number of villages in the zones and with replacement.

Some Aspects of Land Holdings in Rural India

15.7 *Selection of villages.*—In each stratum, 2 sub-samples of 9 villages each were selected circular systematically with independent random starts after arranging the tehsils in order of their geographical nearness. In strata where investigation zones were formed, a sample of 9 villages was drawn systematically from each selected investigation zone and these two samples constituted two sub-samples for the stratum. In case, where, the same investigation zone was selected twice, both the sub-samples of 9 villages each were selected independently from that investigation zone. The frame used for the selection was the list of villages as per the census 1951.

15.8 *Selection of hamlet groups in large sample villages.*—In the case of a large village, the workload was reduced by forming a specified number of hamlet groups of approximately equal population and confining the survey to one hamlet group selected with equal probability.

15.9 *Programme of work.*—The survey period was partitioned into 3 sub-rounds of 4 months each. In each stratum, two investigators were posted and each of them was entrusted with the work of surveying an independent sub-sample of 9 villages, three in each sub-round. Thus in each sub-round, two independent and interpenetrating network of samples of villages were surveyed by two different parties of investigators.

15.10 *Sample size within a village.*—It was planned to survey 135 households¹ from 9 villages selected for a sub-sample within each stratum. The total number of households to be surveyed was allocated to 9 villages in proportion to their rural population (census 1951).

15.11 *Stratification of households within the sample village and allocation to these strata.*—Before selecting the households in the sample villages, all households in each sample village were classified into three groups (termed as second-stage strata) depending on the land possessed by each household. For generating second-stage strata, all households were classified first into the following 10 size classes of land possessed.

Class	area possessed by households (0.00 acre)
1	upto 0.99
2	1.00— 2.49
3	2.50— 4.99
4	5.00— 7.49
5	7.50— 9.99
6	10.00—14.99
7	15.00—19.99
8	20.00—29.99
9	30.00—49.99
10	50.00 & above

The households falling in the first size class, i.e. those possessing land less than 1 acre constituted the first "second-stage stratum", the first half of the remaining households arranged in size classes 2 to 10 formed the second "second-stage stratum" and the rest of households (the other half) constituted the third "second-stage stratum". The total number of households² to be surveyed in a village was allocated to the three second stage strata in proportion to the number of size classes represented in each stratum, so as to give greater weights to strata 2 and 3 than to stratum 1. A circular systematic sample of the allocated number of households was drawn from each stratum within a village.

15.12 *Canvassing schedules 6.1 and 6.2* :—The sample households in each village were contacted for canvassing both schedules 6.1 and 6.2. While one schedule 6.1 was used for each sample household, one schedule 6.2 was used for each operational holding (individual or joint) of each sample household.

¹to accommodate post-census surveys (population and livestock) in 1961, the sample size (in respect of households) in one-third of the villages surveyed in the third sub-round was reduced to one-third of that previously planned which meant an overall reduction of about 20 percent in the number of sample households.

²in some villages, the total number of households to be surveyed was enhanced to cover the following cases :—

- (i) If the number of households allocated for survey was less than the number of second-stage strata, one household was sampled from each second-stage stratum.
- (ii) If the allocation to any second-stage stratum had been zero and there was at least one household in it, then one household was sampled from that stratum.

National Sample Survey

16.1 *Estimation procedure.*—The stratum estimate of total for any characteristic for a particular sub-sample is given by —

$$\frac{A}{T} = \frac{N_s}{n_s} \sum_{i=1}^{n_s} f_{s,i} D_{s,i} \sum_{r=1}^3 \frac{H_{s,i}^{(r)}}{h_{s,i}^{(r)}} \sum_{j=1}^{h_{s,i}^{(r)}} x_{sij}^{(r)}$$

where

$x_{sij}^{(r)}$ = value of the characteristic for the j th household¹ of r th second-stage stratum in i th village of the s th stratum.

$h_{s,i}^{(r)}$ = number of households surveyed from the r th second-stage stratum in i th village of the s th stratum.

$H_{s,i}^{(r)}$ = total number of households in the r th second-stage stratum in i th village of s th stratum.

$f_{s,i}$ = the adjustment factor for revenue village which is as follows.

= 1 when surveyed revenue village coincides with the sampled census village.

= r , when the surveyed revenue village is one of r revenue villages which are wholly contained in the sampled census village.

= $\frac{1}{r}$, when the surveyed revenue village contains wholly r census villages one of which is the sampled census village.

$D_{s,i}$ = the number of hamlet groups formed in the i th village of s th stratum.

n_s = the number of villages surveyed in the s th stratum.

N_s = the total number of villages in the s th stratum.

16.2 For any character for a sub-sample, the state estimate was built up by adding the estimates of all the strata of the state and all-India estimate was obtained by summing the state estimates. The combined estimate was obtained by taking the arithmetic mean of the sub-sample estimates.

¹In case of a character relating to an operational holding X_{sij} corresponded to the sum of the values of the characteristic for the different operational holdings of the j th household in i th village of the s th stratum. For a joint operational holding the value of the characteristic was divided by the number of households participating in the joint holding before taking the sum.

APPENDIX II
STATISTICAL TABLES

List of Tables

Characteristics of household ownership holding size distribution

APPENDIX III
FACSIMILE OF THE SCHEDULES OF INVESTIGATION

[7] land utilisation during the agricultural year 1959-60

(8)	area sown (acres 0-100)													area by utilisation (acres 0-100)														
	season code ¹	rice	jowar	bajra	maize	ragi	wheat	barley	gram	sugarcane	cotton	jute	groundnut	other crops		total area sown	oil area sown	misc. tree crops, groves, etc.	pastures and grazing land	current fallow	other fallows	culturable waste	under non-agricultural uses	barren or otherwise unculturable land	forest			
	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	name	area		(14)									(15)	(16)	(17)
(total)														x														

season codes 1=rain (August to October)-1; winter (November to January)-2; spring (February to April)-3; summer (May to July)-4; perennial (throughout the year)-5.

Sch. 6.2—4

[8] attached farm workers

1. major agricultural season for the operational holding during 1959-60													
2. number of attached farm workers during the major season													
[9] particulars of chemical manure used in the operational holding during 1959-60						[10] particulars of plots possessed by operational holding during minor part of 1959-60 only							
serial no.	chemical fertiliser		quantity used (acres 0-00)	value (Rs. 0-00)	serial no. of plot	location code	survey no.	area of plot (acres 0-00)	source (records-1, interview-2)	percent possessed	area possessed (acres 0-00)	how possessed code ¹	number of months possessed
	name	code											
(9)	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)
total													

[11] particulars of irrigation and land utilisation : 1957-58 to 1959-60

serial no. of plot as in col. (9) of bl. 6	area possessed (acres 0-00)	if irrigated						change in irrigation over previous year (code) ²		utilisation particulars of area possessed						
		1959-60		1958-59		1957-58		1959-60	1958-59	1959-60		1958-59		1957-58		
		area (acres 0-00)	source ³	area (acres 0-00)	source ³	area (acres 0-00)	source ³	1959-60	1958-59	utilisation code ⁴	area (acres 0-00)	utilisation code ⁴	area (acres 0-00)	utilisation code ⁴		
(9)	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)	(15)	
total																

¹how possessed code (block 10, col. 7) : codes 8 to 18 correspond to description in cols. 8 to 18 of block 6.
²source of irrigation (block 11, cols. 3, 5 and 7) : For codes, see footnote 2 to block 6.
³change in irrigation code (block 11, cols. 8 and 9) : change in area but not in source—1, change in source but not in area—2, change in area and source—3, no change in area or source (irrigated)—4, unirrigated—5.
⁴utilisation code (block 11, cols. 10, 12 and 14) : The column numbers in block 7 (cols. 2 to 23 except cols. 15, 16 and 17) would be the code numbers corresponding to each utilisation stated in column headings, other crops would be coded as 14.

NATIONAL SAMPLE SURVEY REPORTS ALREADY PUBLISHED

- No. 1 General Report No. 1 on the First Round (October 1950-March 1951)
- 2 Tables with Notes on the Second Round (April-June-1951)
- 3 Tables with Notes on the Third Round (August-November 1951)
- 4 Special Report on the Survey of Persons in the "Live-Register" of Delhi Employments Exchange (August-September 1951)
- 5 Technical Paper on Some Aspects of the Development of the Sample Design
- 6 Survey of Faridabad Township (March-April 1954)
- 7 Couple Fertility (Second Round : April-June, 1951 and Fourth Round : April-September 1952)
- 8 Report on Preliminary Survey of Urban Unemployment (September 1953)
- 9 Report on the Sample Survey of Displaced Persons in the Urban Areas of the Bombay State (July-September 1953)
- 10 First Report on Land Holdings, Rural Sector (Eighth Round : July 1954-March 1955)
- 11 Report on Sample Survey of Manufacturing Industries, 1949-1950
- 12 A Technical Note on Age Grouping, October, 1958
- 13 Report on Household Transport Operations (Seventh Round : October 1953-March 1954)
- 14 Report on Some Characteristics of the Economically Active Population (Fourth to Seventh Rounds : April 1952-March 1954)
- 15 Report on Sample Survey of Manufacturing Industries, 1951
- 16 Preliminary Report on Employment and Unemployment (Ninth Round : May-November 1955)
- 17 Report on Sample Survey of Employment in Calcutta (1953)
- 18 Tables with Notes on Consumer Expenditure (Fourth Round : April-September 1952)
- 19 Report on Small Scale Manufacture : Household Enterprises smaller than Registered Factories (Seventh Round : October 1953-March 1954)
- 20 Report on Pattern of Consumer Expenditure (Second to Seventh Rounds : April 1951-March 1954)
- 21 Household Small Scale Manufacturing Establishments smaller than those covered by Industries (Development & Regulations) Act, 1951 (Ninth Round : May-November 1955)
- 22 Report on Sample Survey of Manufacturing Industries, 1952
- 23 Report on Sample Survey of Manufacturing Industries, 1953
- 24 Report on Household Retail Trade (Seventh to Ninth Rounds : October 1953-November 1955)
- 25 Sample Verification of Livestock Census : 1956
- 26 A Preliminary Report on Housing Condition (Seventh Round : October 1953-March 1954)
- 27 Technical Records of Sample Design, Instructions to Field Workers and List of Sample Villages and Urban Blocks, (Ninth Round : May-November 1955)
- 28 Report on Sample Survey of Manufacturing Industries, 1954 (1)
- 29 Notes on Some Results of the Land Utilisation Survey (Tenth Round : December 1955-May 1956)
- 30 Report on Land Holdings (2) : Operational Holdings in Rural India (Eighth Round : July 1954-April 1955)
- 31 Tables with Notes on Household Transport Operation (Eighth to Tenth Rounds : July 1954-May 1956)
- 32(I) Some Aspects of Costs of Cultivation of Paddy, Wheat, Jowar and Bajra (Fifth to Seventh Rounds : 1951-1952 and 1952-1953)
- 32(II) Some Aspects of Costs of Cultivation of Barley, Maize, Ragi, Gram, Small Millets, Groundnut, Cotton and Jute (Fifth to Seventh Rounds : 1951-52 and 1952-53)
- 32(III) Some Aspects of Costs of Cultivation of Minor Cereals, Pulses, Sugarcane, Oil Seeds, Potato, Spices and Tobacco (Fifth to Seventh Rounds : 1951-52 and 1952-53)
- 33 Tables with Notes on Wages, Employment, Income and Indebtedness of Agricultural Labour Households in Rural Areas (Eleventh and Twelfth Rounds: August 1956-August 1957)
- 34 Tables with Notes on Employment and Unemployment (Tenth Round : December 1955-May 1956)
- 35 Tables with Notes on Livestock Products (Fifth to Seventh Rounds : April 1952-March 1954)
- 36 Report on Land Holdings (3) : Some Aspects of Ownership Holdings (Eighth Round : July 1954-April 1955)
- 37 Survey of Book Readers' Preference in India (Thirteenth Round : September 1957-May 1958)
- 38 Some Results of the Land Utilisation Survey and Crop-cutting Experiments (Thirteenth Round : September 1957-May 1958)
- 39 Tables with Notes on Consumer Expenditure (Eighth Round : July 1954-March 1955)
- 40 Tables with Notes on Consumer Expenditure (Ninth Round : May-November 1955)
- 41 Household Retail Trade (Tenth Round : December 1955-May 1956)
- 42 Report on Small Scale Manufacture : Household Enterprises smaller than Registered Factories (Seventh to Eighth Rounds : October 1953-April 1955)
- 43 Tables with Notes on Small Scale Manufacture : Household Enterprises smaller than Registered Factories (Ninth and Tenth Rounds : May 1955-May 1956)
- 44 A Note on Profession and Services (Fourth to Eighth Rounds : April 1952-April 1955)
- 45 Report on Indian Villages : A Study of Some Social and Economic Aspects (Tenth to Twelfth Rounds : December 1955-August 1957)
- 46 Tables with Notes on Consumer Expenditure of Agricultural Labour Households in Rural Area (Eleventh and Twelfth Rounds : August 1956-August 1957)
- 47 Tables with Notes on Consumer Expenditure (Tenth Round : December 1955-May 1956)
- 48 Preliminary Estimates of Birth and Death Rates and of the Rate of Growth of Population (Fourteenth Round : July 1958-July 1959)

- 49 Report on Morbidity (Seventh Round : October 1953-March 1954 and Eleventh to Thirteenth Rounds : August 1956-May 1958)
- 50 Tables with Notes on Housing Condition (Tenth Round : December 1955-May 1956)
- 51 Tables with Notes on Housing Condition (Eleventh Round : August 1956-January 1957)
- 52 Tables with Notes on Employment and Unemployment (Eleventh and Twelfth Rounds : August 1956-August 1957)
- 53 Tables with Notes on Internal Migration (Ninth, Eleventh, Twelfth and Thirteenth Rounds : May 1955-May 1958)
- 54 Vital Rates (Seventh Round : October 1953-March 1954)
- 55 Report on Sample Survey of Manufacturing Industries, 1954(2) : Exploratory Survey of Scheduled Industries.
- 56 Report on Sample Survey of Manufacturing Industries, 1955 (1) : Survey of Scheduled Industries
- 57 Report on Sample Survey of Manufacturing Industries, 1955(2)
- 58 Report on Sample Survey of Manufacturing Industries, 1956 (1) : Survey of Scheduled Industries
- 59 Tables with Notes on Pattern of Household Ownership and Possession of Land in Rural Areas, 1950-51 to 1953-54 (Eighth Round : July 1954-April 1955)
- 60 Tables with Notes on Farming Condition and Practices in Rural Areas 1953-54 (Eighth Round : July 1954-April 1955)
- 61 Notes on the Results of the Land Utilisation Survey and Crop-cutting Experiments (Eleventh Round : August 1956-February 1957)
- 62 Supplementary Report on Employment and Unemployment (Ninth Round : May-November 1955)
- 63 Tables with Notes on Employment and Unemployment in Urban Areas (Thirteenth Round : September 1957-May 1958)
- 64 Indian Villages : A Study of Some Social and Economic Aspects (Thirteenth Round : September 1957-May 1958)
- 65 Tables with Notes on Animal Husbandry (Eleventh Round : August 1956-January 1957)
- 66 Report on Land Holdings (4) : Rural Sector, States (Eighth Round : July 1954-April 1955)
- 67 Tables with Notes on Housing Condition (Twelfth Round : March-August 1957)
- 68 Tables with Notes on Rural Indebtedness (Eighth Round : July 1954-April 1955)
- 69 Notes on the Results of the Land Utilisation Survey and Crop-cutting Experiments (Twelfth Round : March-August 1957)
- 70 Technical Paper on Sample Design (Fourteenth Round : July 1958-June 1959)
- 71 Consumer Expenditure by Levels of Household Expenditure (Thirteenth Round : September 1957-May 1958)
- 72 Tables with Notes on Milk Production (Twelfth Round : March-August 1957)
- 73 Some Results of the Land Utilisation Survey and Crop-cutting Experiments (Fourteenth Round : July 1958-June 1959)
- 74 Report on Land Holdings (5), Rural Sector (Some Aspects of Operational Holdings—Population Zones and All India) (Eighth Round : July 1954-April 1955)
- 75 Report on Sample Survey of Manufacturing Industries 1956 (2)
- 76 Fertility and Mortality Rates in India (Fourteenth Round : July 1958-June 1959)
- 77 Tables with Notes on Consumer Expenditure (Eleventh Round : August 1956-February 1957)
- 78 Tables with Notes on Consumer Expenditure (Twelfth Round : March-August 1957)
- 79 Some Results of the Land Utilisation Survey and Crop-cutting Experiments (Fifteenth Round : July 1959-June 1960)
- 80 Tables with Notes on Consumer Expenditure (Thirteenth Round : September 1957-May 1958)
- 81 Report on Land Holdings : Urban Sector (Eighth Round : July 1954-April 1955)
- 82 Tables with Notes on Some Aspects of Cost of Cultivation of Paddy, Wheat, Barley, Maize, Millets, Pulses, Oil Seeds and Vegetables, Urban India (Fifth to Seventh Rounds : 1951-1953)
- 83 Report on Sample Survey of Manufacturing Industries, 1957(1)
- 84 Tables with Notes on Sample Survey of Manufacturing Industries : Survey of Scheduled Industries 1957(3)
- 85 Tables with Notes on Employment and Unemployment in Urban Areas, (Fourteenth Round : July 1958-June 1959)
- 86 Tables with Notes on Sample Survey of Manufacturing Industries, 1957(2)
- 87 Tables with Notes on Average Budget of Agricultural Labour Households in Rural Areas (Eleventh and Twelfth Rounds : August 1956-August 1957)
- 88 Tables with Notes on Household Receipts and Disbursements in Rural and Urban Areas (Fourteenth Round : July 1958-June 1959)
- 89 Tables with Notes on Dwelling Habits of Occupants of the Two-room Government Residences in New Delhi, July 1960.
- 90 Tables with Notes of Survey of Scheduled Industries, 1958 : Sample Survey of Manufacturing Industries
- 91 Tables with Notes on the Annual Survey of Industries, 1959 : Sample Sector, Summary Results
- 92 Some Results of Land Utilisation Survey and Crop-cutting Experiments (Sixteenth Round : July 1960-June 1961)
- 93 Tables with Notes on Sample Survey of Manufacturing Industries 1958, Factory Establishments : Summary Results
- 94 Tables with Notes on Small Scale Manufacture : Rural and Urban (Household Enterprises smaller than the Registered factories) (Fourteenth Round : July 1958-June 1959)
- 95 Tables with Notes on Household Indebtedness (Sixteenth Round : July 1960-June 1961)
- 96 Tables with Notes on the Annual Survey of Industries, 1960 : Sample Sector, Summary Results
- 97 Tables with Notes on Capital Formation (Fifteenth Round—Rural : July 1959-June 1960)
Tables with Notes on Consumer Expenditure (Preliminary) (Fifteenth Round : July 1959-June 1960)
- 99 Tables with Notes on Household Non-Registered Trade (Fifteenth Round : July 1959-June 1960)
- 100 Tables with Notes on Rural Employment and Unemployment (Fourteenth Round : July 1958-June 1959)
Tables with Notes on Consumer Expenditure (Preliminary) (Sixteenth Round : July 1960-June 1961)
Tables with Notes on Consumer Expenditure (Fourteenth Round : July 1958-June 1959)

- 103 Tables with Notes on Urban Labour Force (Sixteenth Round : July 1960-June 1961)
- 104 Tables with Notes on Consumer Expenditure (Fifteenth Round : July 1959-June 1960)
- 105 Tables with Notes on Household Non-Mechanised Transport and Utilisation of working Animals (Fifteenth Round : July 1959-June 1960)
- 106 Tables with Notes on Land Utilisation Survey and Crop-cutting Experiments (Seventeenth Round : July 1961-June 1962)
- 107 Tables with Notes on Consumer Expenditure (Eleventh and Twelfth Rounds : August 1956-August 1957)
- 108 Report on the Type Study on Consumption and Disposal of Cereals and Capital Formation by Households : 1959-60
- 109 Tables with Notes on Indian Villages (Fourteenth Round : July 1958-June 1959)
- 110 Tables with Notes on Rates of Birth, Death and Growth of Rural Population (Fifteenth Round : July 1959-June 1960)
- 111 Tables with Notes on Sample Survey of Manufacturing Industries : 1958 : Factory Establishments : Detailed Results
- 112 Tables with Notes on Land Utilisation Survey and Crop-Cutting Experiments (Eighteenth Round : July 1962-June 1963)
- 113 Tables with Notes on Agricultural Holdings in Rural India (Sixteenth Round : July 1960-June 1961)
- 114 Tables with Notes on Employment and Unemployment in Rural Areas (Sixteenth Round : July 1960-June 1961)
- 115 Tables with Notes on disposal of cereals by producer households in rural areas (Fifteenth Round : July 1959-June 1960)
- 116 Tables with Notes on Family Planning (Sixteenth Round : July 1960-June 1961)
- 117 Tables with Notes on Enquiry of Physically Handicapped Persons (Sixteenth Round : July 1960-August 1961)
- 118 Tables with Notes on the Annual Survey of Industries, 1961 : Sample Sector : Summary Results
