Note of Caution

Being the scanned copy of old NSS report, this document may suffer from following limitations -

- i. Poor Quality of the Scanned images.
- ii. Page(s) missing in between.
- iii. Improper sequencing/arrangement.

ACKNOWLEDGEMENT

The data were collected by the Directorate of National Sample Survey except in West Bengal and Bombay City, where the fieldwork was done by the Indian Statistical Institute. The data were processed in the Indian Statistical Institute under the general supervision of Hari Bhajan Chowdhury in computing, Rajen Roy in punching and Amiya Kumar Das Gupta and Nalini Kanta De in machine tabulation.

The report was prepared by Deb Kumar Bose, Jibon Krishna Aikat, K. Sankaranarayanan and Subhendu Narain Ghosh.

TENTH ROUND : DECEMBER 1955-MAY 1956

NUMBER 47

TABLES WITH NOTES ON CONSUMER EXPENDITURE

*This report entitled 'Tables with Notes on Consumer Expenditure' was prepared by the Indian Statistical Institute, Calcutta and is being published in the form in which it was submitted to the Government of India and Government are not responsible for the views expressed in the report.**

CHAPTER ONE

INTRODUCTION

1.1. The set of tables presented here have been prepared from the information on household consumer expenditure collected from about 3000 sample households in the 10th round of the National Sample Survey. The field work of this round extended over a period of approximately six months from December 1955 to May 1956. The previous round of the survey, i.e. the ninth round, was conducted during the period of May 1955 to November 1955. The two rounds cover between them a period of twelve months. The geographical coverage of the survey was the entire rural as well as urban areas of Indian Union excluding, however, Andaman and Nicobar Islands, and Part B Tribal Areas of Assam.

1.2. Information on complete account of household receipts and disbursements during the reference period was also collected in this round from all the sample households selected for consumer expenditure enquiry. The tables presented here relate to consumer expenditure only and do not include any results on receipt and disbursement accounts.

1.3. Data were collected by investigators from the members of the sample households by personal interviews. Usually the head of the household supplied the information. The responsibility for the field work rested with the Directorate of the National Sample Survey in all States except West Bengal and Bombay City where the collection of data was done by the Indian Statistical Institute. Processing work and tabulation of data were done in the Indian Statistical Institute.

* The draft report (No. D. 45) was submitted to the Government of India in December 1959.

National Sample Survey

1.4. The estimates are presented by two independent and interpenetrating sub-samples in all the tables. The combined estimates by merging the two sub-samples are also presented. The estimates are given by the population zones (pre-reorganisation set up) and for all-India separately for rural and urban sectors and also for the cities of Bombay, Calcutta, Delhi and Madras.

1.5. The items of consumption have been merged into 12 convenient groups in pursuance of the model followed in the earlier rounds. The estimates are presented for 12 groups of monthly per capita expenditure classes similar to the earlier rounds.

1.6. An account of the sample design of the survey is given in Chapter Two. Some of the concepts and definitions followed in the survey are explained in Chapter Three. A brief note on the method of estimation appears in Appendix A. Some special tables for All India and North-West India are given in Appendix B for comparison with the results of seventh and earlier rounds. Facsimile of the schedule canvassed is given in Appendix C.

CHAPTER TWO

SCOPE AND DESIGN OF THE SURVEY

2.1. The whole of Indian Union with the exception of the Andaman and Nicobar islands and Part B Tribal Areas of Assam was included within the scope of National Sample Survey in its tenth round. As in other rounds, separate sampling procedures were adopted for the rural and the urban sectors.

2.2. The entire rural area was divided into 266 geographically contiguous areas constituting the 'strata'. Each such stratum was formed by one or more geographically contiguous districts within the same 'natural division'¹. A total of 1624 sample villages were allocated to the different strata in proportion to their respective non-agricultural population, but the allocated number was adjusted to multiples of 4 in each stratum. This was done with an idea of getting four independent and interpenetrating sub-sample estimates for the country or for any region within it. The sample units were drawn from each 'stratum' in two stages. In the first stage, the sample villages were selected with probability proportional to their population (as per 1951 Population Census) and with replacement. In the second stage, one sample household was chosen at random from a sample village and the data on income and expenditure were collected.

2.3. The urban sector was divided into a relatively smaller number (94) of strata. Towns with a population of three hundred thousand or more and capitals of Part A and Part B States² (with the exception of Shillong, the capital of Assam, the population of which was comparatively low) each formed a separate stratum. The rest of the urban areas within a 'natural division' formed an independent stratum. Calcutta city, however, was divided into eight strata. In the State of Jammu and Kashmir, the city of Srinagar and the town of Jammu were treated as separate strata. A total of 1328 sample blocks were allocated to the different strata so formed. The sample blocks were allocated to these strata in exactly similar way as the villages were allocated. A statement showing the number of villages and blocks allocated to different states and zones is given below.

¹ A 'natural division' is either a group of contiguous districts within a state or an entire state itself (Census of India, Paper No. 2, 1952).

² The states mentioned in this report refer to the set-up prior to the states reorganisation in 1956.

National Sample Survey

TABLE (2.1) : NUMBER OF SAMPLE VILLAGES AND BLOCKS ALLOTTED BY STATES AND ZONES IN RURAL AND URBAN AREAS

| states and population zones | number of sample units allotted for survey | |
|-----------------------------|--|--------|
| | villages | blocks |
| (1) | (2) | (3) |
| 1. Uttar Pradesh | 280 | 132 |
| 2. North India | 280 | 132 |
| 3. Bihar | 192 | 36 |
| 4. Orissa | 72 | 8 |
| 5. West Bengal | 96 | 208 |
| 6. Assam | 48 | 10 |
| 7. Manipur | 4 | 2 |
| 8. Tripura | 4 | — |
| 9. East India | 416 | 264 |
| 10. Andhra | 88 | 40 |
| 11. Madras | 140 | 248 |
| 12. Mysore | 48 | 38 |
| 13. Travancore-Cochin | 48 | 56 |
| 14. Coerg | 4 | 2 |
| 15. South India | 328 | 384 |
| 16. Bombay | 120 | 176 |
| 17. Saurashtra | 12 | 18 |
| 18. Kutch | 4 | 2 |
| 19. West India | 136 | 196 |
| 20. Madhya Pradesh | 96 | 40 |
| 21. Madhya Bharat | 36 | 22 |
| 22. Hyderabad | 80 | 52 |
| 23. Bhopal | 4 | 2 |
| 24. Vindhya Pradesh | 16 | 4 |
| 25. Central India | 232 | 120 |
| 26. Rajasthan | 68 | 36 |
| 27. Punjab | 56 | 36 |
| 28. PEPUSU | 16 | 10 |
| 29. Jammu and Kashmir | 80 | 108 |
| 30. Ajmer | 4 | 4 |
| 31. Delhi | 4 | 36 |
| 32. Himachal Pradesh | 4 | 2 |
| 33. North-West India | 232 | 232 |
| 34. all India | 1624 | 1328 |

2.4. In each stratum, in the first stage, two (or four) systematic samples of blocks (constructed on the basis of 1951 Population Census Enumeration blocks) were selected with independent random starts. In the second stage, one sample household was selected at random from each sample block for collection of data.

CHAPTER THREE

CONCEPTS AND DEFINITIONS

3.1. The concepts and definitions generally followed in the consumer expenditure enquiry of NSS are summarised below.

3.2. *Household* : A household is a group of persons usually living together and taking principal meals from a common kitchen. A boarding house, a hostel or a hotel is treated as a cluster of households, where each individual boarder (with his dependents or guests) forms a separate household. Households maintained and fed directly by Government such as those in prisons, police-quarters, cantonments, hospitals, asylums and relief camps are, however, excluded from the scope of NSS.

3.3. *Household member* : Any person who takes principal meals with the household for at least 16 days (not necessarily continuous) within a period of 30 days preceding the date of survey is considered to be a member of the household. Such a person may be the head of the household, or a relation or protegee of the head, or an employee or a guest of the household.

3.4. *Household size* : The number of members (as defined above) in a household gives the household size.

3.5. *Consumer expenditure* : Consumer expenditure comprises of all expenditure incurred by the household exclusively on domestic account including consumption out of home-grown produce, gifts, loan, etc. The expenditures on household enterprises are excluded. While consumption out of transfer receipts is included, transfer payments of all kinds made by the household, namely, loans, gifts, charities, monetary as well as in kind, like grain loans, are excluded. Expenditures on purchase and construction of houses are considered to be expenses on capital account and hence excluded from consumer expenditure; but the expenses towards maintenance of building are included in the consumer expenditure of the household. Consumption out of home grown produce is evaluated at ex-farm rates and does not therefore include transport and other distributive service charges which a retailer normally includes in his selling price. Consumption out of gifts and charities as well as articles acquired through barter exchanges are evaluated at prevailing retail rates.

For collection of data from sample households monetary value of food articles consumed during the reference period was taken to present consumer expenditure on food articles during the period. For non-food articles in general, monetary value of articles acquired during the reference period represented consumer expenditure on the articles during the period.

CHAPTER FOUR

DESCRIPTION OF TABLES

4.1. The tables showing detailed figures for different items are appended at the end of this chapter. The figures in the tables have been given in two places of decimal for the purpose of arithmetic calculations. There is, however, no suggestion that the figures are correct to this order of accuracy.

4.2. In the rural sector, the estimates are given for six population zones separately and the rural areas of India as a whole. The States have been arranged into six Population Zones on the lines of a memorandum issued in 1951 from the office of the Registrar General, Ministry of Home Affairs, Government of India. The Zones so formed are :

| <i>Population Zones</i> | <i>States</i> |
|-------------------------|---|
| 1. North India | Uttar Pradesh |
| 2. East India | Bihar, Orissa, West Bengal, Assam (excluding Part B Tribal Areas), Manipur and Tripura, (Andaman and Nicobar Islands not included in this survey) |
| 3. South India | Andhra, Madras, Mysore, Travancore Cochin and Coorg |
| 4. West India | Bombay, Saurashtra and Kutch |
| 5. Central India | Madhya Pradesh, Madhya Bharat, Hyderabad, Bhopal and Vindhya Pradesh |
| 6. North-West India | Rajasthan, PEPSU, Ajmer, Delhi, Punjab, Bilaspur, Himachal Pradesh and Jammu and Kashmir |

4.3. In the urban sector, the tables are presented for the six Population Zones, the urban areas of India as a whole and for the four big cities of Calcutta, Bombay, Delhi and Madras separately.

4.4. The tables are arranged in the following order :

| <i>Description of Tables</i> | <i>Table number</i> |
|---|---------------------|
| RURAL | |
| 1. Distribution of sample villages, households and persons, etc. | 1.10-1.50 |
| 2. Consumer expenditure by items of consumption and by monthly per capita expenditure classes—zones and all India separately | 1.60-1.66 |

Consumer Expenditure

| | <i>Description of Tables</i> | <i>Table number</i> |
|----|--|---------------------|
| 3. | Percentage of consumer expenditure by items of consumption and by monthly per capita expenditure classes—zones and all India separately | 1.70-1.76 |
| 4. | Consumer expenditure in zones and all India by monthly per capita expenditure classes for individual items separately | 1.8.1-1.8.15 |
| 5. | Index tables on selected items for zones and all India ... | 1.9.1-1.9.4 |

URBAN

| | | |
|----|--|--------------|
| 1. | Distribution of sample blocks, households and persons, etc. | 2.10-2.50 |
| 2. | Consumer expenditure by items of consumption and by monthly per capita expenditure classes—zones and all India separately | 2.60-2.66 |
| 3. | Percentage of consumer expenditure by items of consumption and by monthly per capita expenditure classes—zones and all India separately | 2.70-2.76 |
| 4. | Consumer expenditure in zones and all India by monthly per capita expenditure classes for individual items separately | 2.8.1-2.8.15 |
| 5. | Index tables on selected items for zones and all India ... | 2.9.1-2.9.4 |

CITIES (*Bombay, Calcutta, Delhi and Madras*)

| | | |
|----|---|-----------|
| 1. | Distribution of sample blocks, households and persons, etc. | 3.10-3.50 |
| 2. | Consumer expenditure by items of consumption and by monthly per capita expenditure classes—cities ... | 3.60-3.61 |
| 3. | Percentage of consumer expenditure by items of consumption and by monthly per capita expenditure classes—cities | 3.70-3.71 |
| 4. | Index table on selected items for different cities ... | 3.90 |

4.5. The following system has been followed in the numbering of the tables. The lefthand-most digits stand for the sector to which the tables belong—1 for rural, 2 for urban and 3 for cities (four big cities only). The digits following the first point from left stand for the nature of information. The digits in the extreme right, wherever they appear, refer to individual items.

National Sample Survey

4.6. The estimates are given by monthly per capita expenditure classes in rupees, grouped in ascending order of magnitude. The expenditure classes were merged into 12 groups as follows :

| <i>serial number</i> | <i>monthly per capita expenditure classes in rupees</i> |
|--------------------------|---|
| 1. | 0—8 |
| 2. | 8—11 |
| 3. | 11—13 |
| 4. | 13—15 |
| 5. | 15—18 |
| 6. | 18—21 |
| 7. | 21—24 |
| 8. | 24—28 |
| 9. | 28—34 |
| 10. | 34—43 |
| 11. | 43—55 |
| 12. | 55 and above |

The groups 0-8, 8-11, etc. stand for 'less than 8', '8 to less than 11', and so on.

4.7. The broad classes into which the individual items of consumption have been grouped together are given below with the constituent items listed under each :

1. *Foodgrains* : cereals, namely rice, wheat, jowar, bajra, maize, barley, small millets, ragi, Bengal gram and their products and substitutes for cereals like tapioca, pea, etc.
2. *Milk and milk products* : liquid milk (cow, buffalo, goat and others), ghee (cow and buffalo), butter, dahi, ghol, khoa, chhana, and other milk products if any.
3. *Edible oil* : mustard oil, cocoanut oil, gingelly oil, groundnut oil, vanaspati, etc. used as food.
4. *Meat, egg and fish* : all items of meat, fish and eggs.
5. *Sugar* : sugar, gur (cane and others), sugar candy and others.
6. *Salt* : sea salt, rock and other salts.
7. *Other food items* : pulses and products, vegetables, fruits and nuts, spices and beverages and refreshments.
8. *Clothing* : all items of clothing—cotton (mill-made, handloom and khaddar), silk and woollen, including items of bedding and upholstery.
9. *Fuel and light* : this includes items of fuel and lighting like, coal, coke, electricity, etc. consumed in the household.
10. *Rent* : comprising of all rents paid for items in domestic use.
11. *Taxes* : comprising of only those taxes which are paid for enjoyment of consumer benefits.
12. *Miscellaneous* : includes all other non-food items like pan, tobacco, drugs and intoxicants, toilets, sundry goods, amusement, education, conveyance, ceremonials, services and durable and semi-durable goods, including repair and maintenance of residential houses.

LIST OF TABLES
RURAL

| TABLE | | PAGE |
|--------|---|------|
| 1.10 : | Distribution of sample villages and households allotted and surveyed by states and population zones in rural areas | 15 |
| 1.20 : | Distribution of sample households by monthly per capita expenditure classes and by population zones in rural areas | 16 |
| 1.30 : | Percentage distribution of estimated number of households by monthly per capita expenditure classes and by population zones in rural areas | 17 |
| 1.40 : | Percentage distribution of estimated number of persons by monthly per capita expenditure classes and by population zones in rural areas | 18 |
| 1.50 : | Average number of persons per household by monthly per capita expenditure classes and by population zones in rural areas | 19 |
| 1.60 : | Consumer expenditure in rupees per person for a period of 30 days by items of consumption and by monthly per capita expenditure classes in rural areas : All India | 20 |
| 1.61 : | Consumer expenditure in rupees per person for a period of 30 days by items of consumption and by monthly per capita expenditure classes in rural areas : Zone—North India | 22 |
| 1.62 : | Consumer expenditure in rupees per person for a period of 30 days by items of consumption and by monthly per capita expenditure classes in rural areas : Zone—East India | 24 |
| 1.63 : | Consumer expenditure in rupees per person for a period of 30 days by items of consumption and by monthly per capita expenditure classes in rural areas : Zone—South India | 26 |

APPENDIX A

METHOD OF ESTIMATION

1. The estimates presented are, in general, estimates of ratios like per person expenditure on different items of consumption by monthly per capita expenditure classes or expenditure on different items of consumption expressed as a percentage of total expenditure by monthly per capita expenditure classes. These estimates have been arrived at from estimates of the two variates involved respectively in the numerator and the denominator of the ratio in question.

2. In the rural sector in each ultimate stratum four or a multiple of four villages were selected with replacement with probability proportional to village population. Also in the urban sector two (or four) independent systematic samples of blocks were selected in each stratum. For the purpose of tabulation and presentation of results considering the order of selection of villages and systematic samples of blocks in each ultimate stratum, the sample households pertaining to the sample villages and sample blocks were classified into two equal groups—one group constituting sub-sample 1 and the other, sub-sample 2.

3. In a particular region (stratum or group of strata defining a state, zone or all India) and a particular expenditure class, let there be n_1 and n_2 sample households pertaining respectively to sub-samples 1 and 2. Let the multipliers (or weights for purpose of estimation) of the n_1 and n_2 sample households be respectively $M_{11}, M_{12}, \dots, M_{1n_1}$ and M_{21}, \dots, M_{2n_2} . Let the number of persons and expenditure on item z in the n_1 and n_2 sample households be respectively

$$h_{11}, z_{11}; h_{12}, z_{12}; \dots; h_{1n_1}, z_{1n_1},$$

and

$$h_{21}, z_{21}; h_{22}, z_{22}; \dots; h_{2n_2}, z_{2n_2}.$$

Then per person expenditure on item z for that region and that expenditure class was estimated as :

$$\text{sub-sample 1 : } \frac{\sum_j z_{1j} M_{1j}}{\sum_j h_{1j} M_{1j}}$$

$$\text{sub-sample 2 : } \frac{\sum_j z_{2j} M_{2j}}{\sum_j h_{2j} M_{2j}}$$

$$\text{sub-sample comb. : } \frac{\sum_j z_{1j} M_{1j} + \sum_j z_{2j} M_{2j}}{\sum_j h_{1j} M_{1j} + \sum_j h_{2j} M_{2j}}$$

The multipliers (or weights) for purpose of estimation were defined as under :

In the rural sector in a particular stratum and particular sub-sample let k be the number of first-stage units (here villages) selected with replacement with probability proportional to some measure of the size (here population) of the units. Let P_1, P_2, \dots, P_k be the sizes of the 1st, 2nd, ... k th selected village. Let the number of

National Sample Survey

households in the i th selected village be N_i ($i=1, 2, \dots, k$). Since in each selected village only one household was selected, the multiplier M for the sample household in the j th selected village was defined as

$$M = \frac{1}{k} \cdot \frac{N_j P}{P_j}$$

where P =summation of sizes of all villages in the stratum.

In the urban sector in a particular stratum and a particular sub-sample let k be the number of systematic samples of blocks selected out of B blocks. Let the number of blocks in any systematic sample of blocks be b . Let the number of households in the b blocks of the i th systematic sample be,

$$N_{1(i)}, N_{2(i)}, N_{3(i)}, \dots, N_{b(i)}.$$

Since in each sample block only one household was selected, and blocks were selected "after completing the cycle" the multiplier M for the sample household selected in the j th block of the i th systematic sample was defined as

$$M = \frac{1}{k} \cdot \frac{B}{b} \cdot N_{j(i)}.$$

Similarly estimates of other ratios were obtained.

APPENDIX B

TABLES OF ALL INDIA AND NORTH WEST INDIA, EXCLUDING
JAMMU AND KASHMIR

Consumer expenditure survey was not conducted in Jammu and Kashmir in the first seven rounds of the National Sample Survey and therefore the all-India and North-West zone tables on these rounds of National Sample Survey did not contain figures for Jammu and Kashmir. For the sake of direct comparison with the results of the 7th and earlier rounds, a set of tables have been prepared giving results of the 10th round for the area of India covered by the first seven rounds of the National Sample Survey. These tables are appended here. They differ from the tables No. 1.60, 1.66, 1.70, 1.76, 2.60, 2.66, 2.70 and 2.76 given in the main body of tables in that they do not include information for Jammu and Kashmir.

Consumer Expenditure
