THE NATIONAL SAMPLE SURVEY

SEVENTEENTH ROUND
SEPTEMBER 1961—JULY 1962

NUMBER 162

TABLES WITH NOTES
ON
SOME FEATURES OF LAND HOLDINGS IN RURAL AREAS

Issued by
THE CABINET SECRETARIAT : GOVERNMENT OF INDIA

ACKNOWLEDGEMENT

The report was finalised by Salil Kumar Sanyal, Sunil Kumar Sinha, J. C. Das, G. Venkataswarlu and M. S. Murthy were associated in the work relating to the preparation of the report.

Supervision of computing, punching and machine tabulation was entrusted to H. B. Chowdhury, S. Palit, A. K. Chowdhury, R. Roy, S. N. Das, K. C. Poddar, B. L. Banerjee and F. M. Rao.

The design of the survey was prepared by the Indian Statistical Institute.

The primary data were collected by the Directorate of the National Sample Survey, Government of India, in all the states except in West Bengal where the Indian Statistical Institute collected the relevant data.

THE NATIONAL SAMPLE SURVEY

SEVENTEETH ROUND : SEPTEMBER 1961—JULY 1962

NUMBER 162

TABLE WITH NOTES ON SOME FEATURES OF LAND HOLDINGS IN RURAL AREAS

*This report entitled "Tables with Notes on Some Features of Land Holdings in Rural Areas, Seventeenth Round, September 1961—July 1962" was prepared by the Indian Statistical Institute, Calcutta. The views contained in the report are not necessarily those of the Government of India.**

CHAPTER ONE

INTRODUCTION

1.1. In response to the World Food and Agricultural Organisation's (FAO) programme of Agricultural Census (1960), the land holdings enquiry was carried out by the National Sample Survey (NSS) in its sixteenth round (July 1960—June 1961). The survey was continued in the seventeenth round (September 1961—July 1962) also with a view to obtaining dependable estimates at the regional level by pooling the data of both the rounds. The important findings as obtained from the seventeenth round data have been presented in previous report¹. Some other results covering various aspects of land holdings especially the characteristics of the household holdings (ownership and operational) and area under different crops in agricultural holdings have been given in this report.

1.2. The sampling design, the concepts and definitions and the items of enquiry were the same as in the sixteenth round. It may be recalled here that an inter-departmental committee on Agricultural Census (1960) consisting of the Planning Commission, the Central Statistical Organisation, the Indian Council of Agricultural Research, the Ministry of Food and Agriculture, the Ministry of Community Development and the Directorate of National Sample Survey was set up by the Government of India to finalise the concepts and definitions adopted in the survey, taking into account the recommendations from FAO. It may be mentioned that FAO was mainly interested in the data on agricultural holdings while over and above these, the data on the structure of land ownership were required to fulfil the national needs.

1.3. The survey was carried out in the whole of India excluding Andaman and Nicobar Islands, Laccadive, Minicoy and Amindivi Islands, Ladakh district of Jammu & Kashmir, North East Frontier Agency and some inaccessible areas of Manipur.

1.4. The survey started in September 1961 and ended in July 1962. The total period was split up into six sub-rounds of eight weeks each.

1.5. Altogether 3888 villages were planned to be surveyed under a scheme of three independent and interpenetrating net-work of samples, each of which could provide valid estimates of the characteristics. It may be mentioned that in effect, however, 3486 villages could be surveyed. This was mainly due to the delay in the recruitment of additional investigators, entrusted with the work of surveying the sample villages of the third sub-sample. Where as in most of the states some villages, generally, those belonging to sub-round 1 of sub-sample 3 could not be surveyed, in Orissa the sample villages of sub-sample 3 could not be surveyed. It may also be noted that mainly on the considerations of availability of the investigating staff, the sampling design was so oriented as to permit only one sample in Delhi (sub-sample 1 only) and two sub-samples in Himachal Pradesh (sub-samples 2 and 3) instead of three sub-samples.

1.6. The results of the survey have been presented for each of the three sub-samples and also by combining the three sub-samples in Appendix II. The divergence between the sub-sample estimates provides some idea about the margin of uncertainty of the estimates. In chapter Two, the important results have been summarised. For ready reference, the concepts, definitions and the sampling design have been given in Appendix I.

*The draft report (No. D176) was first submitted by the Indian Statistical Institute, Calcutta, to the Government of India in July 1967. It was revised subsequently and resubmitted in April 1969.

¹NSS Report No. 144

CHAPTER TWO SUMMARY OF RESULTS

2.1. Some of the important findings of the survey have been given in earlier reports¹. In this chapter other features of land ownership and operation, mostly relating to household holdings, have been discussed at the national level. The information on ownership types, livestock owned by the household operational holdings, land under crops in agricultural holdings, individual and joint holdings etc. are given in Appendix II by size of holdings and for the three independent sub-samples and also the combined sample. The estimates discussed in this chapter are based on the total sample. The relevant estimates relating to the sixteenth round have been quoted from another report² for comparative purposes.

2.2. *Types of ownership.*—It will be seen from Table (2.1) that about 96 percent of 318 million acres of owned area was held from Government, about 82 percent having the right to transfer the title and 14 percent without this right.

TABLE (2.1) : PERCENTAGE OF TOTAL AREA OWNED UNDER DIFFERENT OWNERSHIP TYPES AND PERCENTAGE OF HOUSEHOLDS REPORTING SOME LAND UNDER FORESTS AND NON-AGRICULTURAL USES, 16TH AND 17TH ROUNDS.

16th round : July 1960—June 1961

17th round : September 1961—July 1962

item	16th round	17th round
(1)	(2)	(3)
1. percentage of total area owned :		
1.1 from government	95.20	95.93
1.1.1 with right to transfer title	80.11	81.64
1.1.2 without right to transfer title	15.09	14.29
1.2 from others	4.80	4.07
2. percentage of land owning households reporting some land under forests and non-agricultural uses	87.64	93.66
3. percentage of area owned by households in (2) to total area owned	86.23	91.94
4. percentage of area under forests and non-agricultural uses to area owned by households in (2)	5.61	5.57
5. estimated area owned (000 acres)	311277	317861
6. estimated number of land owning households (000)	60796	64000

2.3 Out of the 64 million land owning households (*i.e.* those owning 0.005 acre or more), 94 percent reported some land either under forests or under non-agricultural uses or both, the area owned by such households accounting for 92 percent of the total area owned. However, the area under forests and non-agricultural uses was only 5.6 percent of the area owned by these households (*i.e.* those reporting forests and non-agricultural uses).

2.4 *Household operational holding.*—The survey results revealed that about 72.5 million rural households together operated an area of 330 million acres. The concept of a household operational holding is explained in Appendix I. 27 percent of the households did not operate any land, 69 percent possessed one operational holding and the rest possessed two or more holdings.

¹NSS Draft Report No. 140 : Tables with notes on some aspects of land holdings in rural areas, seventeenth round.
 NSS Draft Report No. 146 : Tables with notes on agricultural holdings in rural areas, seventeenth round.

²NSS Report No. 159 : Tables with notes on some aspects of land holdings in rural India, sixteenth round.

TABLE (2.2) : PERCENTAGE OF HOUSEHOLDS POSSESSING ONE OPERATIONAL HOLDING
 PERCENTAGE OF HOUSEHOLDS REPORTING OPERATED AREA UNDER
 DIFFERENT CATEGORIES AND PERCENTAGE SHARES OF AREA UNDER
 THESE CATEGORIES ; 16TH AND 17TH ROUNDS.

16th round : July 1960—June 1961

17th round : September 1961—July 1962

item	16th round	17th round
(1)	(2)	(3)
percentage of households		
1. not operating any land	27.79	26.86
2. possessing one operational holding	69.82	68.79
3. percentage of operating households ¹ reporting operated area under categories		
3.1 entirely owned	71.60	76.12
3.2 entirely leased in	4.28	4.09
3.3 both owned and leased in	24.12	19.79
4. percentage of area operated by households		
4.1 reporting area entirely owned	75.60	81.12
4.2 reporting area entirely leased in	1.94	1.54
4.3 reporting area both owned & leased in	22.46	17.34
5. estimated number of households (000)	69912	72466
6. estimated area operated (000 acres)	326161	329585
7. estimated number of households (000) operating land ¹	50188	53436

2.4.1 *Households reporting operated area as entirely owned.*—Out of the 53 million households operating 0.005 acre or more, 76 per cent reported operated area as entirely owned. About one-fifth of these households reported mixed type of operated area *i.e.* both owned and leased in. Only 4 per cent of the households reported operated area as entirely leased in. The table (12) in Appendix II gives in detail the percentage of households reporting the operated area under different categories and the corresponding shares of area operated for each size class of household operational holding.

2.5 *Gross area sown by size of holding.*—The gross area sown as regards an agricultural (operational holding was the sum of the area under all crops for all the seasons cropped. An interesting feature revealed by the survey (*vide* Table (15), Appendix II) is that the percentage of gross area sown when expressed as the total operated area for a size class decreased in general, for increasing holding size, similar to that revealed by the sixteenth round survey. The average gross area sown per reporting holding was 6.74 acres against 6.88 acres obtained in the sixteenth round survey.

2.6 *Area under crops.*—It can be observed from the table provided in Appendix II Table (17) that 64 per cent of the holdings reported area under rice, 31 per cent under wheat and 21 to 22 per cent each under maize and jowar. It may be noted that an agricultural holding could report more than one crop and hence the sum of the percentages in Table (17), Appendix II for a size class will exceed 100. In Table (2.3), the percentages of operated area under different crops and the averages per reporting holding are presented for both the sixteenth and seventeenth rounds.

¹household operating either no land or land less than 0.005 acre are excluded from this estimate.

TABLE (2.3) : PERCENTAGE OF OPERATED AREA UNDER DIFFERENT CROPS AND AVERAGE AREA UNDER CROPS PER REPORTING HOLDING : 16TH AND 17TH ROUNDS

16th round : July 1960—June 1961

17th round : September 1961—July 1962

crops	percentage of operated area under different crops		average area (0.00 acres) under different crops per reporting holding	
	16th round	17th round	16th round	17th round
(1)	(2)	(3)	(4)	(5)
1. rice	25.67	26.13	2.77	2.66
2. jowar	11.93	12.29	3.36	3.66
3. bajra	7.60	7.28	3.34	3.40
4. maize	3.91	3.56	1.08	1.09
5. ragi	1.86	2.12	1.16	1.33
6. wheat	9.89	9.12	1.99	1.93
7. barley	2.32	2.39	0.78	0.93
8. gram	5.75	4.48	1.72	1.58
9. sugarcane	1.72	2.00	0.94	1.12
10. cotton	4.21	5.02	3.86	4.30
11. jute	0.66	0.69	1.10	1.22
12. groundnut	3.68	4.63	2.35	2.95

2.6.1 It will be seen from the tables that the area under rice was 26 percent of the total operated area, the average area per reporting holding being 2.66 acres. Jowar came next claiming 12 percent of the operated area with an average size of 3.66 acres. The area commanded by the cash crops sugarcane, cotton, jute and groundnut was 12 percent of the total area operated.

2.7 *Joint operational holdings.*—The survey results show that about 96 percent of the agricultural holdings were individually operated accounting for 97 percent of the total operated area. The jointly operated holdings in rural India, therefore, constituted only 4 per cent of the total holdings (*vide* Table (25), Appendix II).

2.8 *Chemical manures used in holdings.*—9.3 percent of the agricultural holdings reported use of chemical manures, the corresponding percentage¹ for the sixteenth round being 10.5. The amount of chemical manures used per reporting holding during 1960-61 was 175 seers valued at Rs. 70 compared to 147 seers valued at Rs. 63 during 1959-60 (as obtained from the sixteenth round survey¹). Table (24) in the Appendix II gives the averages for each size class.

2.9 The survey results obtained from the seventeenth round compare well with those from the sixteenth round for most of the item. However, for some items *e.g.*, estimates of livestock, quantity of chemical manure used per reporting holding, the estimates for the two rounds are not in close agreement. The margin of uncertainty of the estimates may however, be had from the sub-samplewise estimates given in Appendix II. It may be mentioned that the distributions by size classes of holdings are available in the appendix II for each item for further analysis of data.

¹*Vide* Table (30), Appendix II, NSS Report No. 159 Tables with notes on some aspects of land holdings in rural India.

APPENDIX I--Concepts, Definitions and Sampling Design

PLATE I - General Features and Sampling Sites

1-10000

CONCEPTS, DEFINITIONS AND SAMPLING DESIGN

1. The concepts and definitions adopted in the survey are given in the subsequent paragraphs.

2. *Household*.—A group of persons who usually live together and take meals from a common kitchen constituted a household. Whether a person satisfying the criterion of common messing would be considered as a member of the household or not was left to the discretion of the head of the household. Temporary absentees who were considered by the head of the household as members of the household were included, while persons like domestic servants, private tutors, paying guests, etc., were not treated as members of the household.

3. *Ownership of land*.—The ownership right over a plot of land was defined as the right of permanent heritable possession with or without the right to transfer the title. Land held in owner-like possession directly from the Government or from others under a long term lease or assignment was also considered as land owned by the household. Land owned or held in ownerlike possession by households was classified as follows :

- (a) land held directly from Government under a grant, lease or assignment with right of permanent and heritable possession with or without the right to transfer title;
- (b) land held from persons other than Government with right of permanent and heritable possession with or without the right to transfer title.

4. *Household ownership holding*.—A household ownership holding was constituted by all plots of land, cultivable or not, owned by the household. In case a plot was owned jointly by two or more households, only sample household's share was taken into account.

5. *Land leased out*.—All land owned by a household might not be under its physical possession. The household might lease out land owned by it without leasing the ownership right. Land owned but not under the physical possession of the household was taken as land 'leased out' by the household.

6. *Land put to non-agricultural uses*.—This stands for all land occupied by buildings, paths etc. or under water (e.g. tanks, canals etc.) and land put to uses other than agricultural production.

7. *Forests*.—These include all actually forested area on the lands classed or administered as forests under any legal enactment dealing with forests, whether state-owned or private. If any portion of such land is not actually wooded but put to some agricultural uses, that portion is excluded.

8. *Operational holding*.—An operational holding was constituted by all lands used wholly or partly for agricultural production and was operated by the person, alone or with the assistance of others, without regard to title, size or location. The holding might consist of one or more parcels of land provided they were situated in the same State and came under the purview of same technical unit. Thus an operational holding was fully defined when the 'person' operating it and the distinct 'technical unit' associated with the work of the holding were identified. A 'person' in the definition refers to a single household or a number of households operating jointly. By technical unit was understood, in the context of agricultural operations, an economic unit with more or less independent technical resources etc., covering items like land, implements, livestock etc. If more than one 'person' had operated land using more or less the same technical resources, the number of holdings in such cases was considered to be the same as the number of 'persons' involved though the technical units were almost the same. On the other hand, number of technical units was taken as the basis for determining the number of operational holdings in cases where under the same 'person', there were more than one distinct technical unit. A holding constituted by lands put to non-agricultural uses only or used exclusively as pastures or for livestock raising or production of livestock products and/or pisciculture was excluded from the scope of the survey.

9. *Agricultural production*.—Agricultural production included the growing of field crops, fruits grapes, nuts, seeds, tree nurseries (except those of forest trees), bulbs, vegetables and flowers, both in open and under glass; production of coffee, tea, cocoa, rubber, the forest production in parcels of land which formed part of the enumeration holding; and the production of livestock and livestock products, poultry and poultry products, honey, rabbits, furbearing animals, silk-worm cocoons, etc., on land forming part of the enumeration holding.

10. For the purpose of the survey, a household was considered to possess at least one operational holding if it had undertaken some 'agricultural production' individually or jointly with other households

during the reference period. An operational holding might possess land owned as well as land leased in by the management of the holding.

11. *Parcels*.—A parcel of an operational holding was defined as all land entirely surrounded by land of other holdings or by land not forming part of any holding. A parcel might consist of one or more cadastral units, plots or fields.

12. *Household operational holding*.—The aggregate of areas under different operational holding possessed by a household was taken to be the household operational holding for the particular household. In case of joint operational holdings managed by more than one household, only sample household's share was taken into account, the share being determined on the assumption that the measure of area contributed by co-partner households was the same.

Sample Design

13. A stratified two-stage design was adopted for this enquiry with villages as the first-stage units and households, the ultimate units.

14. Altogether 3888 villages were planned for this enquiry. The basis for allocation of villages to different states was the same as that adopted in the sixteenth round except for Tripura. The total sample villages for all states (except Jammu & Kashmir and Tripura) was allocated to the states on a joint consideration of their rural populations and areas under food crops. The allocation to a state was finally decided on the basis of the investigating staff available and the figure so arrived was rounded off to multiple of 18. Villages in a state were further allocated to its regions in proportion to their rural populations and in multiples of 18. In Jammu & Kashmir and Tripura, the number of villages to be surveyed was fixed on the basis of the investigating staff available.

15. Regions within states were formed by grouping contiguous districts having similar crop patterns and population densities. Identity of regions remained the same as that the sixteenth round and altogether 48 such regions were formed in whole of India. Within each region, strata were formed covering contiguous tehsils of fairly homogenous character with regard to their population densities in such a manner that the population of each stratum was more or less equal. The number of strata within a region was made one-eighteenth of the allocation to that region. Stratification was exactly similar to that adopted in the sixteenth round except in Manipur and Tripura. While Manipur constituted a stratum by itself, Tripura was divided into 5 strata. The total number of strata in whole of India was 216. Strata with very large area were further divided into two or more investigation zones (groups of contiguous tehsils) having more or less equal areas and three investigation zones were selected from each stratum with probability proportional to the number of villages in the zones and with replacement.

16. Within each stratum (with the exception of Delhi, Himachal Pradesh and Tripura), three independent sub-samples of 6 villages each were selected circular systematically with independent random starts after arranging the tehsils in order of their geographical nearness. In Tripura, from each stratum, three independent balanced linear systematic samples of 6 villages each were drawn after arranging the villages in a stratum in the increasing order of their 1951 census population. Though Delhi and Himachal Pradesh formed one stratum, 6 villages were selected from the Delhi portion to form sub-sample 1 and two sets of 6 villages each were drawn from Himachal Pradesh to form sub-samples 2 and 3. The frame used for the selection was the list of 1951 census villages but the revenue village corresponding to the selected census village was taken as the unit of survey. In case of large villages, specified number of hamlet groups of roughly equal population were formed, and one of them selected with equal probability was taken up for survey.

17. The survey period was partitioned into 6 sub-rounds of 8 weeks each. The investigators were grouped into 3 parties and each party was entrusted with the work of surveying an independent sub-sample of 6 villages in a stratum. Thus in each stratum, three independent and interpenetrating net-work of samples of villages were surveyed by three investigators belonging to different parties. It may be noted that due to some delay in recruiting the field staff allotted for the survey work in regard to sub-sample 3, villages of sub-round 1 pertaining to sub-sample 3 could not be surveyed. In Orissa, the entire work of sub-sample 3 was abandoned due to the non-availability of staff.

18. It was planned to survey 90 households from the 6 villages selected for a sub-sample within each stratum. The total number of households to be interviewed was allocated to the 6 villages in proportion to their rural population as per 1951 census.

19. Before selecting the households in the sample villages, all households in each sample village were classified into three groups (termed as second-stage strata) depending on the land possessed by each household. For generating second-stage strata, all households were classified first into the following 10 size classes of land possessed.

class	area possessed by households (0.00 acre)
1	up to 0.99
2	1.00—2.49
3	2.50—4.99
4	5.00—7.49
5	7.50—9.99
6	10.00—14.99
7	15.00—19.99
8	20.00—29.99
9	30.00—49.99
10	50.00 & above

The households falling in the first size class, i.e. those possessing land less than 1 acre constituted the first 'second-stage stratum', the first half of the remaining households arranged in size classes 2 to 10 formed the second 'second-stage stratum' and the rest of households (the other half) constituted the third 'second-stage stratum'. The total number of households¹ to be surveyed in a village was allocated to the three second-stage strata in proportion to the number of size classes represented in each stratum, so as to give greater weights to strata 2 and 3 than to stratum 1. A circular systematic sample of the allocated number of households was drawn from each stratum within a village.

Estimation procedure

20. The stratum estimate of total for any characteristic for a particular sub-sample is given by

$$\frac{A}{T} = \frac{N_s}{n_s} \sum_{i=1}^{n_s} f_{si} D_{si} \sum_{r=1}^3 \frac{H_{si}^{(r)}}{h_{si}^{(r)}} \sum_{j=1}^{h_{si}^{(r)}} x_{sij}^{(r)} \quad \text{where}$$

- $x_{sij}^{(r)}$ = value of the characteristic for the *j*th household of *r*th second-stage stratum in *i*th village of the *s*th stratum.
- $h_{si}^{(r)}$ = number of households surveyed from the *r*th second-stage stratum in *i*th village of the *s*th stratum.
- $H_{si}^{(r)}$ = total number of households in the *r*th second-stage stratum in *i*th village of *s*th stratum.
- f_{si} = the adjustment factor for revenue village which is as follows:
 - = 1 when surveyed revenue village coincides with the sampled census village.
 - = *r*, when the surveyed revenue village is one of *r* revenue villages which are wholly contained in the sampled census village.
 - = $\frac{1}{r}$, when the surveyed revenue village contains wholly *r* census villages one of which is the sampled census village.
- D_{si} = number of hamlet groups formed in the *i*th village of *s*th stratum.
- n_s = number of villages surveyed in the *s*th stratum.
- N_s = total number of villages in the *s*th stratum.

2.19 For any character for a sub-sample, the state estimate was built up by adding the estimates of all the strata of the state and all-India estimate was obtained by summing the state estimates. The combined estimate was obtained by taking the arithmetic mean of the sub-sample estimates.

1 In some villages, the total number of households to be surveyed was enhanced to cover the following cases:—
 (i) If the number of households allocated for survey was less than the number of second-stage strata, one household was sampled from each second-stage stratum.
 (ii) If the allocation to any second-stage stratum had been zero and there was at least one household in it, then one household was sampled from that stratum.

2 In case of a character relating to an operational holding, x_{sij} corresponded to the sum of the values of the characteristic for the different operational holdings of the *j*th household in *i*th village of the *s*th stratum. For a joint operational holding the value of the characteristic was divided by the number of households participating in the joint holding before taking the sum.

Some Features of First Nations in French Canada

The first part of the paper discusses the historical background of the First Nations in French Canada, from the early 17th century to the mid-18th century. It covers the role of the Jesuits and the impact of the fur trade on the indigenous population.

The second part of the paper examines the social and economic structures of the First Nations in French Canada, including the role of the family and the impact of European trade goods.

The third part of the paper discusses the cultural and religious practices of the First Nations in French Canada, including the influence of Catholicism and the role of the Jesuits.

The fourth part of the paper discusses the political and military aspects of the First Nations in French Canada, including the role of the Iroquois and the impact of the Seven Years' War.

The fifth part of the paper discusses the impact of the French Revolution and the Napoleonic Wars on the First Nations in French Canada.

The sixth part of the paper discusses the role of the First Nations in the development of the French Canadian identity and the impact of the British conquest of 1763.

The seventh part of the paper discusses the impact of the American Revolution and the War of 1812 on the First Nations in French Canada.

The eighth part of the paper discusses the role of the First Nations in the development of the Canadian Confederation and the impact of the British North America Act of 1867.

The ninth part of the paper discusses the impact of the First World War and the Second World War on the First Nations in French Canada.

The tenth part of the paper discusses the role of the First Nations in the development of the modern Canadian state and the impact of the Indian Act of 1876.

The final part of the paper discusses the current status of the First Nations in French Canada and the impact of the Indian Act of 1985.

APPENDIX II—Statistical Tables

Some Features of First Nations in French Canada

The first part of the paper discusses the historical background of the First Nations in French Canada, from the early 17th century to the mid-18th century. It covers the role of the Jesuits and the impact of the fur trade on the indigenous population.

The second part of the paper examines the social and economic structures of the First Nations in French Canada, including the role of the family and the impact of the fur trade on the economy.

The third part of the paper discusses the cultural and religious practices of the First Nations in French Canada, including the role of the Jesuits and the impact of the fur trade on the culture.

The fourth part of the paper discusses the political and military aspects of the First Nations in French Canada, including the role of the Jesuits and the impact of the fur trade on the military.

The fifth part of the paper discusses the impact of the fur trade on the First Nations in French Canada, including the role of the Jesuits and the impact of the fur trade on the economy.

The sixth part of the paper discusses the role of the Jesuits in the First Nations in French Canada, including the role of the Jesuits in the education and the impact of the fur trade on the culture.

The seventh part of the paper discusses the impact of the fur trade on the First Nations in French Canada, including the role of the Jesuits and the impact of the fur trade on the economy.

The eighth part of the paper discusses the role of the Jesuits in the First Nations in French Canada, including the role of the Jesuits in the education and the impact of the fur trade on the culture.

The ninth part of the paper discusses the impact of the fur trade on the First Nations in French Canada, including the role of the Jesuits and the impact of the fur trade on the economy.

The tenth part of the paper discusses the role of the Jesuits in the First Nations in French Canada, including the role of the Jesuits in the education and the impact of the fur trade on the culture.

The eleventh part of the paper discusses the impact of the fur trade on the First Nations in French Canada, including the role of the Jesuits and the impact of the fur trade on the economy.

Table (3) : Percentage and cumulative percentage distributions of area owned under different types of ownership by size class of household ownership holding	18
Table (4) : Percentage distribution of household ownership holdings reporting agricultural land and of area owned by them excluding area under forests and non-agricultural uses by size class of household ownership holding and by sub-samples	22
Table (5) : Percentage of number of household ownership holdings reporting area under forests and non-agricultural uses to all ownership holdings and percentage of area under forests and non-agricultural uses to total area owned by reporting holdings for each size class of household ownership holding and by sub-samples.	23
<i>Characteristics of household operational holding Livestock owned</i>	
Table (6) : Estimated number of heads of livestock (other than cattle and buffaloes) and poultry under different categories owned per 100 households for each size class of household operational holding and by household type (Household type : all households)	24
Table (7) : Estimated number of heads of livestock (other than cattle and buffaloes) and poultry under different categories owned per 100 households for each size class of household operational holding and by household type (Household type : households possessing only one individual operational holding)	28
Table (8) : Estimated number of heads of livestock (other than cattle and buffaloes) and poultry under different categories owned per 100 households for each size class of household operational holding and by household type (Household type : households other than those possessing only one individual operational holding)	32
Table (9) : Percentage distribution of number of heads of livestock (other than cattle and buffaloes) and poultry under different categories by size class of household operational holding and by household type (Household type : all households)	36
Table (10) : Percentage distribution of number of heads of livestock (other than cattle and buffaloes) and poultry under different categories by size class of household operational holding and by household type (Household type : households possessing only one individual operational holding)	40
Table (11) : Percentage distribution of number of heads of livestock (other than cattle and buffaloes) and poultry under different categories by size class of household operational holding and by household type (Household type : households other than those possessing only one individual operational holding)	44

List of tables—contd.

	PAGE
Table (12) : Percentage of households reporting operated area under categories (i) entirely owned, (ii) entirely leased in, (iii) both owned and leased in and percentage shares of area under categories (i) and (ii) and separately for area owned and area leased in under category (iii) for each size class of household operational holding .	48
Table (13) : Percentage of households having one or multiple operational holdings and the respective percentage shares of area operated for each size class of household operational holding .	52
Table (14) : Percentage distribution of households reporting one or multiple operational holdings and of area operated by reporting households by size class of households operational holding and by sub-samples .	56
<i>Characteristics of operational holding</i>	
<i>Land under crops</i>	
Table (15) : Gross area sown expressed as percentage of operated area for each size class of operational holding and by sub-samples .	60
Table (16) : Average area sown (gross) per reporting holding by size class of operational holding and by sub-samples .	61
Table (17) : Percentage number of operational holdings reporting area under different crops for each size class of operational holding .	62
Table (18) : Percentage of operated area under different crops for each size class of operational holding .	66
Table (19) : Percentage distribution of number of operational holding reporting area under different crops by size class of operational holding .	70
Table (20) : Percentage distribution of operated area under different crops by size class of operational holding .	74
Table (21) : Cumulative percentage distribution of number of operational holdings reporting area under different crops by size class of operational holding .	78
Table (22) : Cumulative percentage distribution of operated area under different crops by size class of operational holding .	82
Table (23) : Average area under different crops per reporting holding by size class of operational holding .	86
<i>Chemical fertilizers</i>	
Table (24) : Average amount (quantity and value) of chemical manures used in operational holdings per reporting holding by size class of operational holding and by sub-samples .	90
<i>Individual and joint operational holdings</i>	
Table (25) : Percentage of individual and joint operational holdings and their percentage shares of area by size class of operational holding .	91
Table (26) : Percentage distribution of number of individual and joint operational holdings and of respective areas by size class of operational holding .	95
Table (27) : Cumulative percentage distribution of number of individual and joint operational holdings and of respective areas by size class of operational holding .	99
<i>Owned area under self-operation</i>	
Table (28) : Percentage of owned area self-operated for each size class of household ownership holding by sub-samples states and all-India	103

TABLE (1) : NUMBER OF SAMPLE VILLAGES AND HOUSEHOLDS BY SUB-SAMPLES
(States and all-India)

States	villages surveyed				households surveyed

Some Features of First Nations in French Canada

The first part of the paper discusses the historical background of the First Nations in French Canada, from the early 17th century to the mid-18th century. It covers the role of the Jesuits and the impact of the fur trade on the indigenous population.

The second part of the paper examines the social and economic structures of the First Nations in French Canada, including the role of the family and the impact of European trade goods.

The third part of the paper discusses the cultural and religious practices of the First Nations in French Canada, including the influence of Catholicism and the role of the Jesuits.

The fourth part of the paper discusses the political and military aspects of the First Nations in French Canada, including the role of the Five Nations and the impact of the Seven Years' War.

The fifth part of the paper discusses the impact of the French Revolution and the Napoleonic Wars on the First Nations in French Canada.

The sixth part of the paper discusses the role of the First Nations in the development of the French Canadian identity and the impact of the British conquest of 1763.

The seventh part of the paper discusses the impact of the American Revolution and the War of 1812 on the First Nations in French Canada.

The eighth part of the paper discusses the role of the First Nations in the development of the Canadian Confederation and the impact of the British North America Act of 1867.

The ninth part of the paper discusses the impact of the First World War and the Second World War on the First Nations in French Canada.

The tenth part of the paper discusses the role of the First Nations in the development of the modern Canadian state and the impact of the Indian Act of 1876.

The final part of the paper discusses the current status of the First Nations in French Canada and the impact of the Indian Act of 1985.

APPENDIX III—FACSIMILE OF SCHEDULES OF INVESTIGATION

NATIONAL SAMPLE SURVEY REPORTS ALREADY PUBLISHED

No.

- 1 General Report No. 1 on the First Round (October 1950-March 1951)
- 2 Tables with Notes on the Second Round (April-June 1951)
- 3 Tables with Notes on the Third Round (August-November 1951)
- 4 Special Report on the Survey on the Persons in the "Live Register" of Delhi Employment Exchange (August-Sept. 1951)
- 5 Technical Paper on Some Aspects of the Development of the Sample Design
- 6 Survey of Faridabad Township (March-April 1954)
- 7 Couple Fertility (Second Round, April-June, 1951 and Fourth Round : April-September 1952)
- 8 Report on Preliminary Survey of Urban Un-Employment (September 1953)
- 9 Report of the Sample Survey of Displaced Persons in the Urban Areas of the Bombay State (July-Sept. 1953)
- 10 First Report on Land Holdings, Rural Sector (Eighth Round : July 1954-March 1955)
- 11 Report on Sample Survey of Manufacturing Industries, 1949-50
- 12 A Technical Note on Age Grouping, Oct. 1953.
- 13 Report on Household Transport Operations (Seventh Round : October 1953-March 1954)
- 14 Report on Some Characteristics of the Economically Active Population (Fourth to Seventh Rounds : April 1952-March-1954)
- 15 Report on Sample Survey of Manufacturing Industries, 1951
- 16 Preliminary Report on Employment and Unemployment (Ninth Round : May-November 1955)
- 17 Report on Sample Survey of Employment in Calcutta (September 1953)
- 18 Tables with Notes on Consumer Expenditure (Fourth Round : April-September 1952)
- 19 Report on small Scale Manufacture : Household Enterprises smaller than Registered Factories (Seventh Round : October 1953-March 1954)
- 20 Report on Pattern of Consumer Expenditure (Second to Seventh Rounds : April 1951-March 1954)
- 21 Household Small Scale Manufacturing Establishments smaller than those covered by Industries (Development & Regulations), Act 1951 (Ninth Round : May-November 1955)
- 22 Report on Sample Survey of Manufacturing Industries, 1952
- 23 Report on Sample Survey of Manufacturing Industries, 1953
- 24 Report on Household Retail Trade (Seventh to Ninth Rounds : October 1953-November 1955)
- 25 Sample Verification of Livestock Census : 1956
- 26 A Preliminary Report on Housing Condition (Seventh Round: October 1953-March 1954)
- 27 Technical Records of Sample Design, Instructions to Field Workers and List of Sample Villages and Urban Blocks (Ninth) Round : May-November 1955)
- 28 Report on Sample Survey of Manufacturing Industries, 1954(1)
- 29 Notes on Some Results of the Land Utilisation Survey (Tenth Round : December 1955-May 1956)
- 30 Report on Land Holdings (2) : Operational Holdings in Rural India (Eighth Round : July 1954-April 1955)
- 31 Tables with Notes on Household Transport Operations (Eighth to Tenth Rounds : July 1954-May 1956)
- 32(I) Some Aspects of Costs of Cultivation of Paddy, Wheat, Jowar and Bajra (Fifth to Seventh Rounds : 1951-52 & 1952-53)
- 32(II) Some Aspects of Costs of Cultivation of Barley, Maize, Ragi, Gram, Small Millets, Groundnut, Cotton and Jute (Fifth to Seventh Rounds : 1951-52 & 1952-53)
- 32(III) Some Aspects of Costs of Cultivation of Minor Cereals, Pulses, Sugarcane, Oil Seeds, Potato, Spices and Tobacco (Fifth to Seventh Rounds : 1951-52 & 1952-53)
- 33 Tables with Notes on Wages, Employment, Income and Indebtedness of Agricultural Labour Households in Rural Areas (Eleventh and Twelfth Rounds : August 1956-August 1957)
- 34 Tables with Notes on Employment and Unemployment (Tenth Round : December 1955-May 1956)
- 35 Tables with Notes on Livestock Products (Fifth to Seventh Rounds : April 1952-March 1954)
- 36 Report on Land Holdings (3) : Some Aspects of Ownership Holdings (Eighth Round : July 1954-April 1955)
- 37 Survey of Book Readers Preference in India (Thirteenth Round : September 1957-May 1958)
- 38 Some Results of the Land Utilisation Survey and Crop-cutting Experiments (Thirteenth Round : September 1957-May 1958)
- 39 Tables with Notes on Consumer Expenditure (Eighth Round : July 1954-March 1955)
- 40 Tables with Notes on Consumer Expenditure (Ninth Round : May-November 1955)
- 41 Household Retail Trade (Tenth Round : December 1955-May 1956)
- 42 Report on Small Scale Manufacture : Household Enterprises smaller than Registered Factories (Seventh to Eighth Rounds October 1953-April 1955)
- 43 Tables with Notes on Small Scale Manufacture : Household Enterprises smaller than Registered Factories (Ninth and Tenth Rounds : May 1955-May 1956)

NATIONAL SAMPLE SURVEY REPORTS ALREADY PUBLISHED

- 44 A Note on Profession and Services (Fourth to Eighth Rounds : April 1952-April 1955)
- 45 Report on Indian Villages : A Study of Some Social and Economic Aspects (Tenth to Twelfth Rounds : December 1955-August 1957).
- 46 Tables with Notes on Consumer Expenditure of Agricultural Labour Households in Rural Areas (Eleventh and Twelfth Rounds August 1956-August 1957)
- 47 Tables with Notes on Consumer Expenditure (Tenth Round : December 1955-May 1956)
- 48 Preliminary Estimates of Birth and Death Rates and of the Rate of Growth of Population (Fourteenth Round : July 1958-July 1959)
- 49 Report on Morbidity (Seventh Round : Oct. 1963-March 1964 and Eleventh to Thirteenth Rounds : August 1956-May 1958)
- 50 Tables with Notes on Housing Condition (Tenth Round : December 1955-May 1956)
- 51 Tables with Notes on Housing Condition (Eleventh Round : August 1956-January 1957)
- 52 Tables with Notes on Employment and Unemployment (Eleventh and Twelfth Rounds : August 1956-August 1957)
- 53 Tables with Notes on Internal Migration (Ninth, Eleventh, Twelfth and Thirteenth Rounds : May 1955-May 1958)
- 54 Vital Rates (Seventh Round : October 1953-March 1954)
- 55 Report on Sample Survey of Manufacturing Industries, 1954 (2) : Exploratory Survey of Scheduled Industries
- 56 Report on Sample Survey of Manufacturing Industries, 1955(1) : Survey of Scheduled Industries
- 57 Report on Sample Survey of Manufacturing Industries, 1955(2)
- 58 Report on Sample Survey of Manufacturing Industries 1956 (1) : Survey of Scheduled Industries
- 59 Tables with Notes on Pattern of Household Ownership and Possession of Land in Rural Areas, 1950-51 to 1953-54 (Eighth Round : July 1954-April 1955)
- 60 Tables with Notes on Farming Condition and Practices in Rural Areas 1953-54 (Eighth Round: July 1954-April 1955)
- 61 Notes on the Results of the Land Utilisation Survey and Crop-cutting Experiments (Eleventh Round : August 1956-February 1957)
- 62 Supplementary Report on Employment and Unemployment (Ninth Round : May-November 1955)
- 63 Tables with Notes on Employment and Unemployment in Urban Areas (Thirteenth Round : September 1957-May 1958)
- 64 Indian Villages : A Study of Some Social and Economic Aspects (Thirteenth Round : September 1957-May 1958)
- 65 Tables with Notes on Animal Husbandry (Eleventh Round : August 1956-January 1957)
- 66 Report on Land Holdings (4) : Rural Sector, States (Eighth Round : July 1954-April 1955)
- 67 Tables with Notes on Housing Condition (Twelfth Round : March-August 1957)
- 68 Tables with Notes on Rural Indebtedness (Eighth Round : July 1954-April 1955)
- 69 Notes on the Results of the Land Utilisation Survey and Crop-cutting Experiments (Twelfth Round : March-August 1957)
- 70 Technical Paper on Sample Design (Fourteenth Round : July 1958-June 1959)
- 71 Consumer Expenditure by Levels of Household Expenditure (Thirteenth Round : September 1957-May 1958)
- 72 Tables with Notes on Milk Production (Twelfth Round : March-August 1957)
- 73 Some Results of the Land Utilisation Survey and Crop-cutting Experiments (Fourteenth Round : July 1958-June 1959)
- 74 Report on Land Holdings (3) - Rural Sector (Some Aspects of Operational Holdings—Population Zones and All India) (Eighth Round : July 1954-April 1955)
- 75 Report on Sample Survey of Manufacturing Industries, 1956(2)
- 76 Fertility and Mortality Rates in India (Fourteenth Round : July 1958-June 1959)
- 77 Tables with Notes on Consumer Expenditure (Eleventh Round : August 1956-February 1957)
- 78 Tables with Notes on Consumer Expenditure (Twelfth Round : March-August 1957)
- 79 Some Results of the Land Utilisations Survey and Crop-cutting Experiments (Fifteenth Round : July 1959-June, 1960)
- 80 Tables with Notes on Consumer Expenditure (Thirteenth Round : September 1957-May 1958)
- 81 Report on Land Holdings : Urban Sector (Eighth Round : July 1954-April 1955)
- 82 Tables with Notes on Some Aspects of Cost of Cultivation of Paddy, Wheat, Barley, Maize, Millets, Pulses, Oil Seeds and Vegetables : Urban India (Fifth to Seventh Rounds, 1951-1953)
- 83 Report on Sample Survey of Manufacturing Industries, 1957(1)
- 84 Tables with Notes on Sample Survey of Manufacturing Industries : Survey of Scheduled Industries, 1957 (3)
- 85 Tables with Notes on Employment and Unemployment in Urban Areas (Fourteenth Round : July 1958-June 1959)
- 86 Tables with Notes on Sample Survey of Manufacturing Industries, 1957(2)
- 87 Tables with Notes on Average Budget of Agricultural Labour Households in Rural Areas (Eleventh and Twelfth Rounds : August 1956-August 1957)
- 88 Tables with Notes on Household Receipts and Disbursements (Fourteenth Round : July 1958-June 1959)
- 89 Table with Notes on Dwelling Habits of Occupants of the Two-room Government Residences in New Delhi, July 1960
- 90 Tables with Notes on Survey of Scheduled Industries, 1958 : Sample Survey of Manufacturing Industries.
- 91 Tables with Notes on the Annual Survey of Industries, 1959 : Sample Sector : Summary Results
- 92 Some Results of Land Utilisation Survey and Crop-cutting Experiments (Sixteenth Round : July 1960-June 1961)
- 93 Tables with Notes on Sample Survey of Manufacturing industries 1958, Factory Establishment : Summary Results.

NATIONAL SAMPLE SURVEY REPORTS ALREADY PUBLISHED

- 94 Tables with Notes on Small Scale Manufacture : Rural and Urban (Fourteenth Round : July 1958-June 1959)
- 95 Tables with Notes on Household Indebtedness (Sixteenth Round : July 1960-June 1961)
- 96 Tables with Notes on the Annual Survey of Industries, 1960 : Sample Sector, Summary Results
