FOREWORD

In this report are presented the results of the household consumer expenditure survey conducted as part of the NSS 25th Round (July 1970—June 1971). The main enquiry of the NSS 25th Round was concerned with the economic conditions of the weaker sections in rural areas of the country. This was supplemented by the consumer expenditure survey covering the whole population, both in rural and urban areas in order to maintain continuity of the consumer expenditure surveys conducted regularly until then.

This report presents information on consumer expenditure per household and also per person per 30 days on broad groups of items by monthly per capita expenditure classes in both rural and urban areas. The information has been provided both at state and all-India level. It is worth mentioning here that some special tabulations based on the 25th round consumer expenditure data were made available to the National Commission on Agriculture for its use.

The sample design and schedule of enquiry were prepared by the Survey Design and Research Division (SDRD) of the National Sample Survey Organisation (NSSO). The field work of the survey was done by the Field Operations Division (FOD) in all states excepting West Bengal and Bombay city where the survey work was the charge of the field staff of the Indian Statistical Institute (subsequently merged with FOD, NSSO). Processing of the data was done by the Data Processing Division (DPD) of the NSSO.

Drafting of the report was the responsibility of Shri S. Sengupta, Deputy Director of the SDR Division. S/Shri B. R. Paneswar, Deputy Director, M. Bhattacharyya, N. R. Dhar, P. C. Kundu, Assistant Directors; S. Chakraborty and N. K. Dasgupta, Statisticians of the DPD of NSSO were in technical charge of the manual tabulation of the data. S/Shri A. K. Chaudhury, S. Das, S. Palit, D. Sarkar, and G. R. Varnwal did the overall supervision of computation work. I take this opportunity to record my appreciation of the work of these officers. I wish to mention the names of Shri Nisith Chowdhury, Statistical Assistant for his work in scrutinising the end results, and Shri A. Roy for his assistance in typing the report.

TABLES WITH NOTES ON
CONSUMER EXPENDITURE

SECTION ONE

INTRODUCTION

1.1 This report presents results on consumer expenditure of the rural and urban population of the different States And all-India, based on the data collected in the NSS 25th round (July 1970—June 1971). The main enquiry of the NSS 25th round was the survey of the economic condition of the weaker section households in the rural areas of the country. Besides, to maintain continuity of the consumer expenditure data regularly collected through NSS, provision for obtaining information on consumer expenditure for the general population was also made.

1.2 Households in a sample village were divided into three strata : (1) small cultivator households, (2) non-cultivating wage earner households, (3) remaining households¹. Consumer expenditure data were collected from samples drawn from each of these three sets of households in a sample village. In an earlier report the tables on consumer expenditure for small cultivators and non-cultivating wage earners have been presented². In urban areas, however, no further stratification of households in a sample block was made. Information on consumer expenditure in the NSS Twentyfifth Round were collected through the 'Integrated Household Survey' conducted in the urban areas.

1.3 The field work was undertaken by the Directorate of NSS in all States and Union Territories excepting in West Bengal and Bombay City where the field staff of the Indian Statistical Institute collected data.

1.4 All the states excepting West Bengal and Nagaland and all the Union Territories excepting Himachal Pradesh, Goa, Pondicherry and Chandigarh participated in the work of the survey on a full matching basis (states which conducted the survey with a sample size equal to that of the central sample are considered to have participated on a full matching basis). The collection of data for the State samples was the responsibility of the respective state. The estimates presented in this report are based on the central sample only. States and Union Territories for which results have been presented should be identified as those existing at the time of commencement of the NSS Twentyfifth Round of Survey (July 1970).

1.5 In Section Two, some important concepts used in the enquiry on consumer expenditure have been presented, explanatory notes on the tables covers Section Three and some salient features about the pattern of consumer expenditure of the population are noted in Section Four. Geographical coverage, sample design and estimation procedure have been described in Section Five.

1.6 APPENDIX I of this report contains detailed tables for rural and urban areas of each of the States and Union Territories. Tables for All-India, Union Territories pooled, have been presented also for rural and urban areas. A third set of tables contain results for the four big cities.—Bombay, Calcutta, Delhi and Madras—separately and those for the four big cities pooled.

1.7 The following seven tables have been presented in the report:

Table (1) : Distribution of sample households by monthly per capita expenditure classes

¹The Schedule — 'Economic Condition of the Small Cultivator Households', Schedule 16.1—was canvassed in the samples from the first group of households. Schedule 16.2, 'Economic Condition of the Rural non-cultivating Wage-earner Households' was framed for the second group of households and the 'Integrated Household Survey' Schedule 16 (Revised) was used for the residual group of households.

- Table (3) : Distribution of estimated number of adult males, adult females and children per household by monthly per capita expenditure classes
- Table (4) : Percentage distribution of estimated number of adult males, adult females and children by monthly per capita expenditure classes
- Table (5) : Consumer expenditure (Rs. 0.00) per person for a period of 30 days by broad groups of items and by monthly per capita expenditure classes
- Table (6) : Consumer expenditure (Rs. 0.00) per household for a period of 30 days by broad groups of items of consumption and by monthly per capita expenditure classes
- Table (7) : Consumer expenditure on broad groups of items as percentage to total consumer expenditure by monthly per capita expenditure classes.

1.8 In numbering the tables in Appendix I the following system has been adopted: The first left hand number is the table number listed above; the second one represents the number assigned to a State/Union Territory. States were first arranged in alphabetic order of their respective names and were assigned serial numbers in that order. The Union Territories were then listed in the same manner and were assigned continued serial numbers. For cities the serial numbers 1,2,3 and 4 were assigned to Bombay, Calcutta, Delhi and Madras respectively. The alphabet at the end of a table number stands for the area (rural, urban or city). The alphabet 'R' at the end will mean that the table is for the rural areas. Similarly, 'U' will mean urban and 'C' city. Thus, Table (5.20/U) will represent table number 5 for urban areas of Manipur.

SECTION TWO CONCEPTS AND DEFINITIONS

2.1 Concepts and definitions used in the twentyfifth round of survey for items of information presented in the report are described in this section.

2.2 *Household* : A household is a group of persons normally living together and taking food from a common kitchen. A boarding house, a hotel or a hostel is treated as a cluster of households, where each individual boarder (with his dependents or guests) forms a separate household. Households maintained and fed directly by government such as those in prisons, police quarters, cantonments, hospitals, asylums, relief camps are, however, excluded from the scope of the enquiry.

2.3 *Household member* : Any persons who is a normal resident of the sample household is considered to be a member of the household. Household members are grouped into three categories viz., adult male, adult female and child. One who has already attained the age of 15 (in completed years) is considered as an adult.

2.4 *Household size* : The number of members (as defined above) in a household gives the household size.

2.5 *Household consumer expenditure* : Consumer expenditure comprises all expenditure incurred by the household during the reference period (30 days preceding the date of enquiry) exclusively towards its non-productive domestic consumption purposes. Thus expenditure towards the enterprises of the household are not included in the household consumption. The consumption by the livestock of the household is also excluded as it is a part of the enterprise expenses of the household. Transfer payment *in kind* like loans advanced, charities, gifts and other payments in kind, if any is not considered as consumer expenditure for the households which make such payments. But any consumption out of transfer receipts *in kind* like borrowings, gifts, charities, perquisites received by the household, free collections and other receipts in kind, if any, is considered for determining the total consumption of the household.

SECTION THREE

EXPLANATORY NOTES ON TABLES

3.1 In NSS consumer expenditure data are usually collected for a number of items of consumption. For the purpose of presenting the results, similar items have however, been lumped together to form 21 more or less homogeneous groups. The groups are : (1) cereals; (2) gram; (3) cereal substitutes; (4) pulse and products; (5) milk and products; (6) edible oil; (7) meat, fish and egg; (8) vegetables; (9) fruits and nuts; (10) sugar; (11) salt; (12) spices; (13) beverages and refreshments; (14) pan, tobacco and intoxicants; (15) fuel and light; (16) clothing; (17) foot-wear; (18) miscellaneous goods and services; (19) rents; (20) taxes and (21) durable goods. Over and above, results are presented also for (i) food-total, (ii) non-food total, and (iii) total consumer expenditure.

3.2 The groups of items of consumption as presented in the table are defined here in terms of their constituents:

- (1) *cereals* : rice, wheat, jowar, bajra, maize, barley, small millets, ragi and their products;
- (2) *gram* : Bengal gram and its products;
- (3) *cereal substitutes* : cereal substitutes like tapioca, pea etc;
- (4) *pulse and products* : arhar, tur, gram, moong, masoor, urd, khesari, pea and other pulses and their products;
- (5) *milk and products* : liquid milk (cow, buffalo, goat) and other milk (condensed, powder etc). ghee (cow and buffalo), butter, dahi, ghol, lassi and other milk products;
- (6) *edible oil* : vanaspati, mustard oil, cocoanut oil, gingelly oil, groundnut oil, linseed oil, refined oil, other edible oils and oil seeds;
- (7) *meat, fish and eggs* : meat (goat meat, mutton, beef, pork, buffalo meat and other meat) egg, poultry, fish (fresh and dried), bird and others;
- (8) *vegetables* : potato, onion, tomato, brinjal, cabbage, cauliflower, root vegetables (arum radish etc.), leafy vegetables and other vegetables;
- (9) *fruits and nuts* : banana, orange, lemon, mango, coconut, guava, pineapple, grapes, other fresh fruits, coconut copra, groundnut, cashewnut, date, raisins, other dry fruits and nuts;
- (10) *sugar* : sugar (factory), khandsari sugar, gur (cane and others), candy, other sugars;
- (11) *salt* : sea salt, rock salt and other salts;
- (12) *spices* : turmeric, black pepper, pepper, drychillies, green chillies, garlic, tamarind, ginger, curry powder, other spices;
- (13) *beverages and refreshments* : tea (number of cups), tea leaf, coffee (no. of cups), coffee powder, other drinking beverages, biscuits, confectioneries etc., salted refreshments, prepared sweets, cooked meals, pickles, sauce, jams and jellies, other processed food items;
- (14) *pan, tobacco and intoxicants* : pan leaf, pan finished, supari (betel nut, other ingredients, for pan), biri, cigarettes, leaf tobacco, hookah tobacco, cheroot, snuff, zarda, kimam, surti, other tobacco products, opium, ganja, toddy, country liquor, foreign liquor, other drugs and intoxicants;
- (15) *fuel and light* : coke, coal, firewood, electricity, gas, dung cake, charcoal, kerosene, candle, matches, methylated spirit, other fuel and light;
- (16) *clothing* : cotton (mill made, power loom, hand-loom, khadi), wool, art silk or rayon, pure silk and others including items of bedding and upholstery;
- (17) *footwear* : boot, shoe, slipper, sandal, chappal, wooden sandal etc;
- (18) *miscellaneous goods and services* : amusements (cinema, theatre etc.), education, medicine, toilet, articles, sundry articles, consumer services, conveyances, etc;

- (19) *rents* : rents on residential house, residential land and other consumer goods (no imputation of rent for residential houses, owned by the sample household was made);
- (20) *taxes* : licence fees for keeping gun, radio, cycle, motor car etc., and other consumer taxes like the municipal taxes, road taxes etc., but does not include income tax;
- (21) *durable goods* : furniture, musical instruments, ornaments, utensils and other equipments and their repairing expenses including the maintenance of residential houses.

3.3. Estimates have been given by monthly per capita expenditure classes in rupees, arranged in ascending order of magnitudes. The expenditure levels are grouped into 14 classes as follows:

Sl. no.	monthly per capita expenditure class (in rupees)	Sl. no.	monthly per capita expenditure class (in rupees)
(1)	(2)	(1)	(2)
1	0—8	8	24—28
2	8—11	9	28—34
3	11—13	10	34—43

5	15—18	12	55—75
6	18—21	13	75 and above
7	21—24	14	all classes

The groups 0-8, 8-11 stand for : 0 less than 8, 8-less than 11 and so on

SECTION FOUR
SOME FINDINGS

4.1 The average size of household that is, the average number of persons per household was 5.42 in rural and 4.61 in urban areas in NSS 25th round. Compared to the results of NSS 22nd and 23rd Rounds, the household size in 25th Round turned out to be slightly higher in rural and lower in urban areas. Excepting in two or three expenditure classes at the bottom, the average size of household decreases with rise in per capita expenditure, both in rural and urban areas. This general observation has also been made in earlier NSS Rounds.

4.2 In rural areas 26.69 percent of households reported to be in the expenditure class Rs. 43/- and above; the corresponding proportion in urban areas was as high as 57.85 percent. Proportion of households in the lower per capita expenditure level below Rs. 21/- was 19.81 and 6.46 percent in rural and urban areas respectively. In Table (1), the average size of household and percentage distribution of household by per capita monthly expenditure classes are shown for rural and urban areas from NSS 23rd and 25th Round of survey.

4.3 Results presented in Table (2) for the last few NSS Rounds exhibit a gradual fall in the proportion of households in the lowest per capita expenditure groups of below Rs. 21/- and opposite trend in the highest per capita expenditure level of Rs. 43/- and above over rounds. In rural areas, the rate of decline of the proportion in the lowest expenditure level was faster than the rate of its increase in the highest expenditure class, resulting in a steady growth in the middle expenditure class (Rs. 21/- to Rs. 43/-). In the urban areas as a whole and in the cities, on the other hand, the percentage of households in the highest expenditure class increased relatively at a faster rate over rounds, compared to the rate of decline in the proportion in the lowest expenditure class. The middle expenditure class (Rs. 21/- to Rs. 43/-), in proportion thus shrank in these two areas. The percentage of households in the expenditure groups below Rs. 21/-, Rs. 21/- to Rs. 43/- and Rs. 43/- and above were respectively 19.81, 53.50 and 26.69 in rural; 6.46, 35.69 and 57.85 in urban; 1.72, 15.30 and 82.98 in cities (results of NSS 25th Round). It may however be mentioned that there are certain points of deviations, mostly in the results of the NSS 23rd Round, from the general trend enumerated. The possible reasons for such deviations have been discussed in the report on consumer expenditure for the NSS 23rd Round.¹

4.4 In Table (3) consumer expenditure per person per month on food and non-food items and percentage of expenditure on food to total expenditure in rural and urban areas and in four big cities are shown for five NSS Rounds. In general per capita consumer expenditure on food and non-food items was increasing from one year to the next. Visible exceptions are : (a) expenditure on food in rural areas declined from NSS 22nd to 23rd round and (b) expenditure on non-food items in big cities remained almost fixed in NSS 21st to 23rd Rounds. With the total expenditure in 20th Round (1965-66) as base (100) the index numbers of expenditure in 23rd Round (1968-69) were 144, 137 and 110 in rural, urban and cities respectively. The corresponding indices in 25th Round (1970-71) with the same base were respectively 169, 161 and 123. The percentage of expenditure on food to total expenditure increased from NSS 20th to 22nd Rounds and then declined in the 23rd and 25th Rounds in rural and urban areas and also in cities.

4.5 Table (4) shows the average size of household, per capita and per household total monthly consumer expenditure, per capita monthly expenditure on food and non-food items and percentage of expenditure on food to total expenditure for rural and urban areas of each state. The average size of household that is, the number of persons per household was the highest in Haryana (6.48) and the lowest in Tamil Nadu (4.38) in rural areas. In urban areas the largest household size was recorded for Jammu Kashmir (5.86) and the smallest for Nagaland (3.38). Both in rural and urban areas, Tamil Nadu recorded the lowest household expenditure. In rural areas, the Punjab topped the expenditure level, household as well as per person, in food and also in non-food items. In urban areas Nagaland had similarly the topmost position. The level of per capita expenditure were the lowest for Orissa in rural areas and Tamil Nadu in urban areas. In rural areas, Punjab recorded the lowest proportion (67.85 per cent) of expenditure on food while West Bengal recorded the highest proportion (80.00 percent). In urban areas again, the Punjab reported only 61.05 percent of total consumer expenditure to have been spent on food items whereas Orissa exhausted 69.47 percent of total expenditure on food account.

SECTION FIVE

SAMPLE DESIGN AND ESTIMATION PROCEDURE

5.1 *Sample Design* : The general sample design in the NSS twentyfifth round was a stratified one with two-stage selection within each stratum. The first stage units were villages/blocks in the rural/urban areas; and the second stage units were households for the socio-economic enquiries. The sample design had been made *self-weighting* for each of the schedules of enquiry at the state level.

5.2 *Sample size (Central Sample)* : The total sample size for household enquiries in the rural areas was 8400 sample villages and in the urban areas the sample size was 4640 blocks.

5.3 *Work Programme* : The survey period (one year) of this round had been divided into four sub-rounds of three months duration each for both the rural and the urban areas. In each sub-sample of a rural stratum there were 12 sample villages. These 12 villages were sub-divided into four sets of three villages each in a specified manner. For one sub-round, out of these 12 villages, only three villages were selected and were surveyed in the sub-round. Thus, on the whole, all the 12 villages were covered once during the full survey period. Similarly in urban areas the sample blocks had been divided into four sets and one set of blocks was surveyed in one sub-round so as to cover all the sample blocks during the survey period.

Rural sample design

5.4 *Sampling frame* : The frame was the list of villages as per the 1961 population census.

5.5 *Stratification* : The country had been divided into 65 agricultural regions by grouping within each state or union territory, districts having similar population density and crop pattern. Strata are formed within each region, by grouping tensils (i) which are contiguous, (ii) having similar crop pattern and population density, and (iii) having good transport facilities amongst them. The number of persons engaged in agricultural occupation is more or less the same for each stratum within a region.

5.6 *Allocation* : The all-India sample size had been allocated to the states on a joint consideration of their rural population, area under cereal crops and available, investigator strength. This was modified to (i) ensure a minimum of 360 villages in each state (excepting Haryana and Punjab), (ii) take account of state-wise variation in work-load, and (iii) make the sample size a multiple of 24 in order to facilitate allocation of 24 villages in each rural stratum.

5.7 *Selection of villages* : For the central sample in each stratum two independent sub-samples of 12 villages each had been selected circular systematically with equal probability.

5.8 *Selection of households* : All the households in the sample village were divided into the following three sub-strata : (1) households having no cultivated land, (2) the lowest ten percent of households having cultivated land and (3) remaining households. Households deriving more or less regular and major income in the last year from self-employment in trading establishment, manufacture, construction, mechanised transport, professions or salaried employment or rent are excluded from both sub-strata 1 and 2 and were included in sub-stratum 3. Samples for schedules 16.1 and 16.2 were selected from sub-stratum 1 and 2 respectively. Sample households were selected linear systematically using intervals and random starts specified for this purpose so as to get about 2 sample households on an average, from each sub-stratum.

Urban sample design

5.9 *Sampling frame* : The list of Urban Frame Survey (UFS) blocks and the list of 1961 census enumeration blocks have been used as the sampling frame.

5.10 *Stratification* : In each state/union territory, towns with population less than 50,000 form stratum 1, and the remaining towns and cities with population 50,000 or more, form stratum

2 except the four big cities—Bombay, Calcutta, Delhi and Madras. Each one of them form stratum 3 of its respective state.

5.11 *Allocation* : The total sample size has been allocated to the states in proportion to their 1961 census urban population with some necessary adjustments.

5.12 *Selection of blocks* : After arranging the blocks in a stratum for a state, the blocks within a stratum were selected circularly systematically with probability proportional to population.

5.13 *Selection of households* : Households listed in a sample block were arranged according to employment status and size. From this arrangement, a linear systematic selection of households was made for the integrated household survey (Schedule 16 revised) using preassigned interval and random start.

5.14 *Estimation Procedure* :

s : subscript for sth stratum

i : subscript for ith sample village/block

j : subscript for jth sample household

k : number of strata in the state

n_s : number of sample villages/blocks in a sub-sample of the sth rural/urban stratum for the whole round

h : number of households selected for the enquiry

y : value of the characteristic

Y, the estimate of the *state total* for the characteristic y in the concerned schedule from a *sub-sample* for the whole round is expressible as:

for rural areas

$$Y = M \sum_{s=1}^k \sum_{i=1}^{12} \sum_{j=1}^{h_{si}} Y_{sij}$$

Where M is the constant multiplier for the concerned schedule. So that the total estimate for the whole rural population is given by the sum of the total estimates from the three schedules.

for urban areas

$$Y = M \sum_{s=1}^k \sum_{i=1}^{n_s} \sum_{j=1}^{h_{si}} Y_{sij}$$

Where M is the constant multiplier.
