THE NATIONAL SAMPLE SURVEY

TWENTYTHIRD ROUND : JULY 1968 - JUNE 1969

NUMBER 240

SPECIAL TABLES ON CONSUMER EXPENDITURE

FOR

THE NATIONAL COMMISSION ON AGRICULTURE

1. This set of tables, requisitioned by the National Commission on Agriculture, contains (a) value and (b) quantity of monthly per capita consumption for some specified items in rural and urban areas for the year 1968-69. The results have been derived from the information collected by the National Sample Survey Organisation (NSSO) through its Integrated Household Survey (Schedule 16) of the twentythird round, carried out during July 1968 - June 1969. In addition to statewise tables, pooled estimates for all Union Territories as well as for all States and Union Territories combined have also been presented.

2. In this set of tables, the value of consumption have been shown for the following 16 items :

- (1) rice & rice products, (2) wheat & wheat products, (3) other cereals, (4) pulses and pulse products, (5) oil (edible) and oil seeds, (6) vanaspati, (7) sugar (crystalline), (8) gur, (9) milk & milk products, (10) meat, egg & fish, (11) tea (no. of cups), (12) tea leaf, (13) coffee (no. of cups), (14) coffee powder, (15) tobacco products, (16) leaf tobacco;

for each of the following 14 groups of per capita monthly total expenditure on consumption (in rupees) :

- (1) 0-8, (2) 8-11, (3) 11-13, (4) 13-15, (5) 15-18, (6) 18-21,
- (7) 21-24, (8) 24-28, (9) 28-34, (10) 34-43, (11) 43-55,
- (12) 55-75, (13) 75 & above, (14) all expenditure class.

[The groups 0-8, 8-11 etc. stand for 0-less than 8, 8-less than 11 and so on]

3. Of the above listed 16 items, quantity estimates were readily available for the items numbered as (6), (7), (8), (11), (12), (13), (14). The quantity estimates for those items are also shown in the tables under the same per capita monthly expenditure groups. Estimates of quantity for the remaining items were not directly available i.e., those were to be built up from the respective constituent items. Hence those were not included in the programme of tabulation.

4. On a preliminary scrutiny some of the quantity estimates appeared to be doubtful. Possibility of errors being introduced in deriving the conversion factor from the local to the standard unit cannot perhaps be ignored. Such doubtful results were therefore not shown in the tables.

5. The value (in rupees 0.00) and quantity (0.00 kg.) of consumption per person for a period of 30 days by selected items and by monthly per capita expenditure classes are shown for each of the States and Union Territories as listed below :

table no.	All-India/state	page no.	
		rural	urban
1	All-India	4	52
