RESULTS OF THE SECOND QUINQUENNIAL SURVEY ON
EMPLOYMENT AND UNEMPLOYMENT UTTAR PRADESH

I N T R O D U C T I O N

The second country wide quinquennial survey on Employment and Unemployment was carried out by the National Sample Survey Organisation (NSSO) in its 32nd round survey operations (July 1977 - June 1978). Provisional estimates of two key indicators of employment and unemployment obtained through manual tabulation of selected items of data collected in this survey for the population of age 15-59 years have been released for all India and the different States/Union Territories in the NSSO Journal.^{1/} Detailed results for all India and some important summary results for all-India and States/Union Territories with discussions have been presented in the NSSO mimeographed Report No. 298.^{2/} The present document gives the detailed results generated as per the approved tabulation plan for the State of Uttar Pradesh .

2. The details of sampling design, survey coverage, estimation procedure and salient features of the conceptual frame and data collection procedure adopted in the survey are given in the Report containing the all-India results (Report no. 298). A brief summary of the scope and coverage of the survey, the concepts, definition etc. is given below.

3. Geographical Coverage : The survey covered the whole area of the Indian Union excepting Sikkim, Andaman & Nicobar Islands, Lakshadweep, Dadra and Nagar Haveli, Ladakh District of Jammu and Kashmir, rural areas of Pal and Samri Tehsils of district Bastar of Madhya Pradesh, rural areas of Rajura, Sironcha and Gadchiroli Tehsils of district Chandrapur and Belghat tehsil of district Amravati of Maharashtra and rural areas of Chandigarh, Mizoram and Nagaland.

2/ Report on the Second Quinquennial Survey on Employment and Unemployment (all-India) : Sarvekshana, vol. V, Nos. 182

4. Sampling design and Sample size: A stratified two - stage sampling design was adopted in the survey with census villages and urban blocks (Urban Frame Survey blocks formed by USSO) as the first stage units respectively for the rural and urban areas and households as the second stage units. But in the rural areas of the North Eastern States the first stage units were clusters of villages. Altogether 8620 vill. and 4340 urban blocks were selected as the first stage units. In each of the selected first stage units, 12 households were selected as second stage units (for the rural areas of North Eastern Region, 24 households were selected from each cluster of villages).

5. Survey period and sub-round formation: The survey was started in July 1977 and was completed in June 1978. The entire survey period of one year was divided into four sub-rounds of three months each coinciding approximately with the four agricultural seasons. The four sub-round periods were, July to September 1977, October - December 1977, January to March 1978 and April - June 1978. The sample villages and blocks were distributed over the four sub-rounds in equal numbers^{so} to provide valid estimates for each of the sub-rounds

6. Estimation procedure In order to reduce work-load at the tabulation stage and to provide estimates at the regional level, the following estimation procedure was adopted:

$$Y = y \times \frac{P}{p} \text{ where,}$$

Y = estimated rural/urban total of^a characteristic for any region for any sub-round/all sub-rounds

y = rural/urban sample total of the characteristic for the region for the sub-round/all sub-rounds

P = projected rural/urban population of the region for January 1978 and

p = total sample persons in the sample villages/ blocks of the region surveyed in the sub-round/all sub-rounds

The estimation was done separately for the rural and urban areas.

III

The values of "P" have been arrived at using 'Estimates (provisional) based on Expert Committee projections tentatively revised in the light of 1971 census data'. [Source : Bulletin on Food Statistics, 25th Issue (1975), Table 1.2. The estimates given in this set of projections relate to 1st July of each year. To centre them at 1.1.78, (the mid-point of the survey period covered by the 32nd round), the averages of the projected population figures for 1977 and 1978 have been used.]

At the time of the preparation of this report, 1981 census population tables have become available for each state and union territory, with break-down by residence status (rural/urban) and sex. Using these provisional figures and the corresponding population totals of 1971 census, revised estimates of population as on 1.1.78 have been obtained by interpolation (assuming an exponential growth rate between the two censal time points) independently for males and females residing in urban and rural areas of each state. To make the estimates presented in this report conform to the revised estimates, adjustment factors have been computed for each population group as the ratio of the revised estimate of population to the corresponding estimate given in the report. These ratios are given in the table below.

Each aggregate estimate presented in this report may be multiplied by its corresponding adjustment factor (i.e. that of the population group to which it belongs) to obtain a revised estimate of aggregate.

Ratios (rates, percentages etc.) involving distribution of any one state/union territory x residence status x sex group are unaffected by this adjustment. However, any ratio or proportion involving aggregation of more than one group will have to be built up by first computing the aggregates of its numerator and denominator separately by addition of relevant adjusted aggregates.

* Factors could not be worked out for these states as the 1981 census totals are not available

7. Salient features of the conceptual frame and data collection procedure : The main objective of the survey was to measure, in quantitative terms, the nature and extent of employment and unemployment at disaggregated levels. To achieve this objective, the attempt in the survey was to classify the population as belonging to different activity categories, independently, by using three different approaches, namely, (i) the usual status approach, (ii) the current weekly status approach and (iii) the current day status approach. Persons distributed according to the various activity categories were further classified by several meaningful correlates, such as age, sex, general and technical education, industry, occupation etc. The different activity categories, adopted for the purpose were as under.

Description of the activity category*	Category code
working with an employer under obligation but work not specifically compensated by any wage/salary	01-04
Worked (self employed) in household enterprises	11
Worked as helper in household enterprises	21
Worked as regular salaried/wage employee	31
Worked as casual wage labour in public works	41
Worked as casual wage labour in other types of work	51
Did not work though there was work in household enterprise	61
Did not work but had regular salaried/wage employment	71
sought work	81

VI

Description of the activity category*	Category code
Did not seek but was available for work	82
Attended educational institutions	91
Attended domestic duties only	92
Attended domestic duties and was also engaged in free collection of goods (vegetables, roots, fire-wood, cattle feed, etc.) sewing, tailoring, weaving, etc. for household use	93
Too young to work/to attend school/to seek employment	94
Old and disabled	95
Rentiers, pensioners, remittance recipients, etc.	96
Beggars, prostitutes etc.	97
Others	98
Did not work due to temporary sickness (for casual workers only)	99

* The activity category codes 61, 71, ⁸²and 99 were used only for current status approaches.

tkb/
31.8.82

VII

Persons assigned any one of the activities listed under the category codes 01 to 71 were treated as 'working' (or employed). Persons assigned activity category codes 81 or 82 were treated as 'seeking and /or available for work' (or unemployed). The remaining persons i.e. the persons assigned any of the activity category codes 91 to 99 were treated as 'not available for work' (or not in labour force). The data on activity particulars of the persons were, however, tabulated only for population of age 5 years and above.

8. Classification according to usual status approach

For classification of population into various activity categories according to usual status, persons were first classified into three major activity status groups, namely, 'working', 'seeking and/or available for work' and 'not available for work' on the basis of a major-time-spent criterion with reference to the period of 365 days preceding the date of survey. Accordingly, one was categorised as 'working' if one was reported to be engaged for a relatively longer time during the reference period in one or more of the gainful activities (category codes 01-51), 'seeking and/or available for work' if one was reported to be either 'seeking or available for work' (category code 81 or 82) for a relatively longer time during the same reference period and 'not available for work' if one was reported to be not available for work during a relatively longer time of the reference period. Within each of these three broad groups of categories, the detailed activity status categories were then determined ^{using} by ~~again~~ the major-time-spent criterion.

9. Classification according to current weekly status approach :

For classification of person according to current weekly status, he or she had to be assigned a unique activity status with reference to a period of seven days preceding the date of survey. For a person pursuing more than one activity during the week, his/her unique status was decided by adopting a 'priority-cum-major time rule. Under the priority rule, the

status of 'working' got priority over the status of 'not working but seeking/available for work' which in turn got priority over the status of 'not working and not seeking/available for work'. For a person classified under the first or the last category, his/her detailed activity status was determined by major-time-spent criterion i.e. the detailed activity on which major time was spent was considered, his/her current weekly status. Further, if a person had worked for one hour on any one day of the week he was considered 'working'. A person who had not worked during the week but was available for work even for one hour on any one day of the week was considered 'seeking and/or available for ~~the week~~^{work}'. Others constituted the category 'not available for work' (or not in labour force). Each person was thus assigned a unique activity status for the week. Aggregate of persons under the different activity status provided the distribution of persons by activity on an average in a week of the survey period of one year.

10. Classification according to current day status approach :

In adopting the current day status approach attempt was made to account for two major activities pursued by a person on each day of the seven days reference week allocating 'half day' to each activity. The unit of classification according to this approach, was thus half day though data were collected for all the seven days of the reference week. In assigning the activity status on a day, a person was considered 'working' (or employed) for the entire day if he/she had worked 4 hours or more on the day, and assigned the one or two (as the case may be) work activities (01-71) to which he/she devoted the working time. But if the work was done for one hour or more but less than 4 hours, he/she was considered 'working' (or employed) for half day and 'seeking/available for work' (or unemployed) or 'not available for work' (or not in labour force) for the other half of the day depending on whether he/she was seeking/available for work or not on the day. On the other hand, if a person was not

engaged in any gainful work even for one hour on the day but was seeking or available for work for four hours or more, he/she was considered 'unemployed' for the entire day. But if ~~the~~ reported availability for work was for less than four hours only, he/she was considered 'unemployed' for half day and 'not in labour force' for the other half of the day.

A person who neither was having any gainful work to do nor ~~was~~ available for work even for half of the day, was considered 'not available for work (or not in labour force)' for the entire day and assigned the one or two of the non-gainful ~~activity status~~ which he/she had during the day. The aggregate of person-days so classified under the different activity categories for all the seven days of the week divided by seven gave the distribution of persons (strictly speaking, person-days) by activity category on an average on a day of the survey period of one year.

11. Probing questions In order to understand the complex dimensions of the work pattern, the extent of under utilisation and the nature of reported preferences for additional work etc. among those classified as employed according to usual status, the types of work desired, efforts made to get work etc. for those classified as 'unemployed', students, persons engaged in domestic duties etc. some relevant probing questions were put to the above categories of persons to elicit the required information. These probing questions apart, a second set of probing questions were also canvassed in this round exclusively for those classified according to usual status as engaged in domestic duties with a view to eliciting information on the reasons for their usual attachment in household chores, whether they would report as available for work if work was provided at their residences etc,

12. Activity category 91 : It is known that a part of the total working time of the women-particularly rural women-usually engaged in household chores is spent on certain activities to meet household needs. These activities are considered gainful if the goods or services produced as a result of such work are essentially for sale. It was generally felt that information on this aspect of participation in household activities of persons, mostly women, classified according to usual status as 'engaged in domestic duties' could not be obtained from the NSS surveys. In the 32nd round survey, therefore, attempt was made to sub-divide persons who usually remain predominately engaged in domestic duties into two sub-categories, namely, (i) engaged exclusively in domestic duties and (ii) engaged in domestic duties as well as in the activities like free collection of fish, small games etc. listed above. The adoption of this new activity sub-category for those engaged in household chores was intended to identify separately those who along with their domestic duties also carry out the above activities from those who carry out only domestic duties.

SURVEY RESULTS

1. Tables 9 and 37 are not presented.
2. Marginal totals between tables may not in all cases exactly agree in view of rounding off errors.

Codes used in the tables

1. <u>Occupation</u> :		
codes are as in National Classification of Occupation (NCO), 1968.		
2. <u>village irrigation type</u> :		
the irrigated area is more than 25% of the total area under cultivation	...	1
the irrigated area is more than 10% and upto 25% of the total area under cultivation	...	2
the irrigated area is less than and upto 10% of the total area under cultivation	...	3
others	...	4
3. <u>village crop pattern</u> :		
cultivated area is predominantly under Kharif crop	...	1
cultivated area is predominantly under Rabi crop	...	2
cultivated area is under mixed Rabi and Kharif crop	...	3
others	...	4
4. <u>educational standard</u> : <u>general</u>		
illiterate	...	1
literate but below primary	...	2
primary	...	3
middle	...	4
secondary	...	5
graduate and above in agriculture	...	6
graduate and above in engineering & technology	...	7
graduate and above in medicine	...	8
graduate and above in other subjects	...	9
5. <u>educational standard</u> : <u>technical</u>		
no technical education (no diploma or certificate in addition to what have been covered by general education categories listed above)	...	1
additional diploma or certificate in engineering	...	2
additional diploma or certificate in technology	...	3
additional diploma or certificate in crafts	...	4
additional diploma or certificate in medicine	...	5
additional diploma or certificate in other subjects	...	6

contd. . . .

6. activity(usual and current) :

A. status :

worked with an employer under obligation but work not specifically compensated by any wage/salary	... 01-04
worked(self-employed) in household enterprise	... 11
worked as helper in household enterprise	... 21
worked as regular salaried/wage employee	... 31
worked as casual wage labour in public works	... 41
worked as casual wage labour in other types of work	... 51
did not work though there was work in household enterprise (for current status only)	... 61
did not work but had regular salaried/wage employment (for current status only)	... 71
sought work (for current status only)	... 81
did not work but was seeking and/or available for work (for usual status only)	... 81
did not seek but was available for work(for current status only)	... 82
attended educational institutions	... 91
attended domestic duties only	... 92
attended domestic duties and was also engaged in free collection of goods (vegetables, roots firewood, cattle feed etc.), tailoring, weaving etc. for household use	... 93
too young to work/to attend school/to seek employment	... 94
old and disabled	... 95
rentiers, pensioners, remittance recipients etc.	... 96
beggars, prostitutes etc.	... 97
others	... 98
casual workers who did not work due to temporary sickness (for current status only)	... 99

B. industry (division) :

agriculture, hunting, forestry & fishing	... 0
mining and quarrying	... 1
manufacturing	... 2 or 3
electricity, gas and water	... 4
construction	... 5
wholesale and retail trade and restaurants and hotels	... 6
transport, storage and communication	... 7
financing, insurance, real estate and business services	... 8
community, social and personal services	... 9

C. operation :

ploughing	... 1
sowing	... 2
transplanting	... 3
weeding	... 4
harvesting	... 5
others (manual)	... 6
others (non-manual)	... 7
