## INTRODUCTION

1.0 Data on household consumer expenditure ~~are~~ being collected in every round of the National Sample Survey (NSS), beginning from the first round which started in October, 1950 through the 28th round (1973-74). After the 26th round of the survey, the Governing Council of NSSO decided that the survey on consumer expenditure and on Employment & Unemployment, be undertaken ~~separately~~ together once in every five years beginning from the 27th round. Thus, the first quinquennial survey on consumer expenditure was held in 27th round (Sept, 1972 - Oct. 1973). To meet some specific ad-hoc requirements, a survey on consumer expenditure was also conducted in the 28th round, outside this quinquennial programme. The present report has been prepared from the data collected during the 32nd round, that is, the second quinquennial survey on consumer expenditure, carried out during the period July 1977 to June 1978\*.

1.1 In this report some of the basic results of the survey have been presented. Incidentally it may be mentioned that in this round the Rural Labour Enquiry (RLE) was integrated with the consumer expenditure survey as per decision of the Governing Council. The present report, however, does not contain separate estimates relating to rural labour households. Detailed results and results demonstrating the consumer expenditure pattern of rural labour households will be presented in separate reports.

1.2 The field work of the thirtysecond round started in July 1977 and continued upto June 1978, covering a period of one complete year. The reference period for collection of data on consumer expenditure was 30 days preceding the date of survey. The estimates presented in the report, therefore, broadly relate to the period June 1977 to June 1978.

---

\* Data on consumer expenditure survey are generally being processed round-wise and published in the form of reports - the only exception being 26th round, which has not been released so far. Results of 27th round survey were published in Sarveshana Vol.II, No. 3.

1.3 The geographical coverage of the survey was the entire Indian Union excluding Sikkim, Ladakh district of Jammu & Kashmir, rural areas of Pal and Semri tehsils of district Sunguja and Bijapur, Dantewara, Konta and Narayanpur tehsils of district Bastar of Madhya Pradesh, Rajani, Simorha and Gadh-Chiroli tehsils of district Chandrapur and Malghat of district Amravati of Maharashtra; rural areas of Chandigarh, Mizoram and Nagaland; Andaman and Nicobar Islands; Lakshadweep; Dadra and Nagar Haveli. The survey in North Eastern Region covered Arunachal Pradesh, two hill districts (Mukir hills and Cachar hills) of Assam, Manipur, Meghalaya, Mizoram, Tripura and urban areas of Nagaland. Information was collected by interviewing the members (usually the head of the household) of the sample households. Altogether 99766 sample households selected from 8216 sample villages in rural areas and 58162 sample households from 4971 sample blocks (including 6363 sample households selected from 534 sample blocks in the 4 big cities of Bombay, Calcutta, Delhi and Madras) in the urban areas were surveyed in the present round.

1.4 In this round all the states and Union territories (included in the geographical coverage) except Chandigarh participated in the survey on at least equal matching basis.

1.5 The concepts and definitions followed in the survey are given in section 2. Section 3 gives explanatory notes on Tables. A broad outline of the sampling design adopted in the survey and the method of estimation is given in section 4, while 'summary of findings' of the survey is presented in section 5. The main results of the survey i.e., statistical tables are provided in the Appendix.

sc/

## SECTION TWO

### Concepts and Definitions

2.1 The concepts and definitions followed in the consumer expenditure enquiry continue to remain broadly the same as in earlier rounds. Some of those concepts and definitions are explained below.

2.2 Household : A household is a group of persons normally living together and taking food from a common kitchen. A boarding house, a hotel or a hostel is treated as a cluster of households, where each individual boarder (with his dependents or guests) forms a separate household. Households maintained and fed directly by government, such as those in prisons, police quarters, cantonments, hospitals, asylums, relief camps are, however, excluded from the scope of the survey.

2.3 Household member : Any person who is a normal resident of the sample household is considered to be a member of the household. Household members are grouped into three categories viz., adult male, adult female and child. One who has already attained the age of 15 (in completed years) is considered as an adult.

2.4 Household size : The total number of members (as defined above) in a household is considered to be the size of the household.

2.5 Household consumer expenditure : Consumer expenditure comprises all expenditure incurred by the household, exclusively on domestic account, including consumption out of home-grown produce or transfer receipts like gift, loan etc. The expenditure on household enterprise is excluded from consumer expenditure. While consumption out of transfer receipts is included, transfer payments of all kinds (loans, gifts, charities, monetary as well as in kind, like grain loan etc.) are excluded. Expenditure on purchase and construction of residential houses are considered to be expenses on capital account and hence are excluded from the consumer expenditure; but the expenditure towards maintenance of residential building are included in the consumer expenditure of the household. Monetary value of food articles consumed during the reference period is taken to represent consumer expenditure on food articles. For semi-durable and durable goods, monetary value of articles acquired during the reference period is

considered as the consumer expenditure of the articles. For items of clothing & footwear there is a slight departure from earlier rounds. Monetary value of articles (other than meant for gift etc.) acquired during the reference period (even though not used) is taken as the consumer expenditure on the articles concerned.

2.6 Consumer unit : The number of consumer unit for a person of a sex-age group is his/her requirement of energy in relation to that for the reference man. A man belonging to the age group 20-39 is considered as the reference man and his energy requirement is one consumer unit.

### SECTION THREE

#### Explanatory Notes on Tables

3.1 Three types of tables have been presented in this report which are described below.

3.2 Table 1 series give the distribution of (i) sample households, (ii) percentage distribution of estimated no. of households, persons, consumer unit (iii) average household size (adult male, adult female and children) and (iv) total consumer units per household by monthly per-capita expenditure classes.

3.3 Table 2 series give quantity and value of consumption of cereals per person for a period of 30 days by monthly per capita expenditure classes.

3.4 Table 3 series give value of consumption of broad groups of items per person for a period of 30 days by monthly per-capita expenditure classes. Estimates are given for 21 broad groups of items. The groups are (1) cereals; (2) gram; (3) cereal substitutes; (4) pulse and products; (5) milk and products; (6) edible oil; (7) meat, egg and fish; (8) vegetables; (9) fruits and nuts; (10) sugar; (11) salt; (12) spices; (13) beverages and refreshments; (14) pan, tobacco & intoxicants; (15) fuel and light; (16) clothing; (17) foot-wear; (18) miscellaneous goods and services (including rents and taxes); and (19) durable goods. Apart from this, estimates on (20) Rents and (21) Taxes have been shown separately also. The results are presented also for (i) food-total; (ii) non-food total and (iii) total consumer expenditure.

**3.5 Monthly per capita expenditure classes :** Estimates have been given by monthly per-capita expenditure classes in rupees, arranged in ascending order of magnitude. The expenditure levels are grouped into 16 classes (15 classes for the rural areas) as follows :

srl. no.	monthly per-capita expenditure classes (in rupees)	srl. no.	monthly per-capita expenditure classes (in rupees)
(1)	(2)	(1)	(2)
1	0 - 10	9	60 - 70
2	10 - 15	10	70 - 80
3	15 - 20	11	80 - 100
4	20 - 30	12	100 - 150
5	30 - 35	13	150 - 200
6	35 - 40	14	200 - 300
7	40 - 50	15	300 & above
8	50 - 60	16	all class pooled

Note : (i) For the rural areas and also for the urban areas of few states, the last ~~highest~~ class is 200 and above.  
(ii) The groups 0-10, 10-15 etc. stand for 0 - less than 10, 10 - less than 15 and so on.

The tables have been grouped into three Sets.

**3.6 Three sets of tables** are included in the report. One set represents tables for the entire rural areas and the other set for the entire urban areas. The third set represents tables for the 4 big cities of Bombay, Calcutta, Delhi and Madras. The urban areas include the 4 cities as well. For convenience of reference the table numbers have been coded. The digits to the left of the decimal point refers to the nature of information. The digits to the right side of the decimal point refer to the state/union territory/city for which the estimates are supplied. This is followed by R for rural tables, U for urban tables and C for city tables.

The code numbers assigned to the states/union territory and cities are as follows :

- |                            |                       |
|----------------------------|-----------------------|
| 0. all India/cities pooled | 14. Nagaland          |
| 1. Andhra Pradesh          | 15. Orissa            |
| 2. Assam                   | 16. Punjab            |
| 3. Bihar                   | 17. Rajasthan         |
| 4. Gujarat                 | 18. Tamil Nadu        |
| 5. Haryana                 | 19. Tripura           |
| 6. Himachal Pradesh        | 20. Uttar Pradesh     |
| 7. Jammu & Kashmir         | 21. West Bengal       |
| 8. Karnataka               | 22. Arunachal Pradesh |
| 9. Kerala                  | 23. Chandigarh        |
| 10. Madhya Pradesh         | 24. Delhi             |
| 11. Maharashtra            | 25. Goa, Daman & Diu  |
| 12. Manipur                | 26. Pondicherry       |
| 13. Meghalaya              | 27. Puducherry        |

Cities

- 1. Bombay
- 2. Calcutta
- \*3. Delhi
- 4. Madras

---

\* In urban area the table for Delhi and Delhi city is same.

#### SECTION FOUR

##### A broad outline of the Sampling Design and Estimation Procedure

4.1 Broad design : The sampling design is stratified two-stage; the first-stage units are villages in the rural sector and blocks in the urban sector. The second stage units are households in both the sectors.

4.2 Formation of strata : For the purpose of stratifications, the country was first divided into 75 agro-economic regions by grouping contiguous districts of similar agricultural profile - the number of regions in a state/union territory varying from one to five. "Basic strata" were formed within regions based on districts as follows. Each district with less than 1.5 million 1971 census rural population forms one basic stratum by itself except in Gujarat and Arunachal Pradesh where some districts with less than 1.5 million population have been divided into two or more basic strata. A district with more than 1.5 million 1971 census rural population has been divided into a number of basic strata, depending on its rural population, by grouping contiguous tehsils, homogeneous as far as possible with respect to rural population density and crop pattern. Basic strata so formed have been treated as the strata for sampling for both rural and urban sectors. In the urban sector, however, some of the basic strata having very small urban population have been merged together to form the ultimate urban strata. Total number of rural and urban strata are 516 and 386 respectively.

4.3 Allocation : The all India sample of 8820 villages and 4940 urban union territories blocks were allocated to the states/... considering the field strength and rural and urban populations of each. Within each state and union territory these have been further allocated to the rural and urban strata in proportion to their 1971 census rural and urban population respectively. The final stratum allocations have been so adjusted as to make them a multiple of 4 at the stratum level and a multiple of 8 at the region level.

4.4 Sampling of villages : In each rural basic stratum the allocated number of villages have been selected with probability proportional to population and with replacement. The frame used was the 1971 census list of villages. This procedure however, was not followed for the north-eastern region.

4.5 Sampling of villages - NE region : In the North-Eastern region, clusters of villages formed around some 'nucleus' villages were selected for survey. These nucleus villages were selected systematically with equal probability. A cluster consisted of 4 villages, in general, but did not exceed 6 in any case. In Manipur (plains) stratum, clusters were not formed. All the allocated villages were selected in one step systematically with equal probability.

4.6 Sampling of urban blocks : In each urban stratum, the allocated number of sample blocks were selected with probability proportional to size (a measure of population) and with replacement. The same procedure was followed for the North-eastern region also. The frame used was Urban Frame Survey (UFS) blocks in cities and towns where UFS had been done and 1971 census blocks elsewhere.

4.7 Sampling of households (rural) : All the households of a sample village were arranged into the following means of livelihood classes - (1) self-employed in non-agriculture, (2) rural labour and (3) others. A sample of 12 households was selected circular systematically from the arranged frame. In the North-Eastern region, if a cluster consisted of L villages then  $24/L$  households were selected in the above manner from each village of that cluster.

4.8 Sampling of households (urban) : In a sample block, the sampling frame was prepared by arranging the households into 4 classes on the basis of their nature of employment (self-employed, not self-employed) and their per capita expenditure level (less or greater than the pre-specified per capita expenditure for the state). As in the case of villages, 12 households were selected circular systematically from this frame.

4.9 Survey period and sub-rounds : The survey was started in July 1977 and completed in June 1978. The entire survey period of one year was divided into 4 sub-rounds each of three months' duration coinciding approximately with the 4 agricultural seasons. The 4 sub-round periods are :

- Sub-round 1 : July to September 1977;
- Sub-round 2 : October to December 1977;
- Sub-round 3 : January to March 1978;
- Sub-round 4 : April to June 1978.

The sample villages & blocks were distributed over the 4 sub-rounds in equal numbers so as to provide equally valid estimates for each of the sub-round separately.

4.10 Estimation Procedure : The estimate of the aggregate of any characteristic  $y$  for a state/u.t. was obtained as follows :

$$\hat{Y} = \frac{\sum_{r=1}^R M_r}{\sum_{r=1}^R n_r} \sum_{i=1}^{n_r} Y_{ri}$$

where  $M_r = \frac{P_r}{P_T} * P_T$ , where  $P_r$  is the projected rural/urban population of  $r$  th region and  $P_T$  is the number of sample persons in the rural/urban area of that region (i.e.,  $P_T$  is the sum of the household sizes of all the surveyed households).

$R$  = number of regions in the state

$n_r$  = number of surveyed households in  $r$  th region

$Y_{ri}$  = value of  $y$  for the  $i$ -th household of  $r$ -th region.

4.11 Estimates of Ratios : Estimate of a ratio of two characteristics is given by the ratio of the estimates of their aggregates.

---

\* The values of  $P$  are based on the Expert Committee Projection, tentatively revised in the light of 1971 census data.

Summary of findings

5.1 The detailed results of the survey have been given in the Appendix under breakdowns. In this section some important findings are presented to give a broad comparative picture of the composition and consumption pattern of the households at state and all India levels.

Section five  
Summary of findings

5.2 Distribution of households by monthly per capita expenditure class (MPCE) :

The percentage distribution of households and the household size by monthly per capita expenditure class over rounds 27, 28 & 32 is presented in Table (I). It is seen from the table that there is striking difference in percentage of households in an expenditure class in passing from 27th round<sup>to</sup> 28th round to 32nd round. In the first two expenditure groups, there was a sharp fall from 27th to 28th round and again from 28th to 32nd round. From the third expenditure group i.e. from 34 - 100, the trend was reversed which continued ever afterwards. This shows that households belonging to lower per capita expenditure class were spending more towards consumption and they shifted to higher expenditure class with the passage of rounds. This might be primarily due to increase in general price level and cost of living. Thus in the rural areas the percentage of households spending less than Rs. 100 per person decreased from 95% in 27th round to 92% in 28th round with a further decline to 82% in the 32nd round while in the higher per capita expenditure levels, the percentage of households spending Rs. 100 or more per person increased from 5% to 8% and further stepped up to 18% over these rounds. It is worthwhile to note that in any round the capacity to spend more than Rs. 100 per person greatly diminished resulting in very steep decline in the percentage of households from per-capita class 35-100 to 100+150. What has been observed for rural areas also holds good for the urban areas, the only difference being that in urban areas, percentage of households in higher expenditure class was more than in the rural areas. Thus percentage of households with per capita expenditure of Rs. 100 or more over the rounds were 21, 26 and 44 in urban areas compared to the corresponding percentage of 5, 8 and 18 in the rural areas.

Table (1) : Percentage distribution of households and average number of persons per household by broad groups of monthly per capita expenditure classes in rural/urban areas.

monthly per capita expenditure class (in rupees)	percentage of households						average number of persons per household

*15 - 34	37.84	22.32	-	16.88	9.02	-	5.60	5.90	-	6.27	6.60	-
15 - 35	-	-	12.60	-	-	3.51	-	-	5.79	-	-	6.17
*34 - 100	54.34	68.46	-	61.11	65.13	-	5.04	5.27	-	4.94	5.28	-
35 - 100			68.78			51.94			5.41			5.72
100 - 150	3.54	6.07	11.74	12.51	14.70	21.92	4.29	4.18	4.67	3.12	3.29	4.47
150 - 200	0.92	1.46	3.41	4.57	5.85	10.25	3.23	3.72	4.18	2.70	2.74	3.59
200 & above	0.65	0.95	2.82	4.33	5.02	12.00	3.94	3.15	3.76	2.42	2.40	2.89
300 & above	-	-	-	-	-	-	-	-	-	-	-	-
all classes	100.00	100.00	100.00	100.00	100.00	100.00	5.22	5.51	5.23	4.72	4.81	4.89

\*The monthly per capita expenditure groups were changed in 32nd Round. The groups 15-34 & 34-100 are not applicable for 32nd round. The nearest corresponding groups for this round are 15-35 & 35-100.

### 5.3 Average size of household by MPCE class

The table also shows average number of persons per household over the rounds. The all India rural and urban average household sizes in 32nd round were 5.23 and 4.89 respectively. And there was not much difference in these figures over the rounds. In general the rural household size was larger than the urban and also with the rise in per capita expenditure the size declined. In general while the 'average' rural household was larger in size compared to its urban counter part, the usual tendency of the size to gradually fall with increasing per capita expenditure is observed in all the three rounds considered.

### 5.4 Monthly per capita consumption of cereals :

The per capita quantity of consumption of different items of cereals has been shown in Table (2) relating to the states and all India, for the rural and the urban areas separately. The all India per capita consumption of cereals was 18.19 kg. (col.11) in rural areas against 15.55 kg. in the urban areas. This trend of higher consumption of cereals in the rural areas persists through out all the states except in Madhya Pradesh and Goa, Daman & Diu where the per capita consumption in the rural areas was slightly lower than in the urban areas. The states where the per capita consumption of total cereals was higher than the national average in both rural and urban areas were Haryana (24.23 kg. and 18.11 kg.), Rajasthan (22.66 kg. and 21.13 kg.), Delhi (21.22 kg. and 17.34 kg.) Uttar Pradesh (20.47 kg. and 19.15 kg.), Madhya Pradesh (19.67 kg. and 19.79 kg.), Bihar (19.48 kg. and 18.16 kg.) and Manipur (18.52 kg. and 17.07 kg.). Besides these, higher consumption was also observed in the rural areas of Jammu & Kashmir (19.10 kg.) and the Punjab (19.93 kg.).

5.5 The states where the per capita consumption of total cereals was less than 16 kg. (against national average of 18 kg. in rural areas) were Kerala (9.46 kg.), Pondicherry (13.51 kg.), Goa, Daman & Diu (13.77 kg.), Assam (15.08 kg.), Meghalaya (15.22 kg.), Tamil Nadu (15.34 kg.), Karnataka (15.66 kg.) and Tripura (15.86 kg.). In the urban areas against the national average of 15.55 kg. of per capita consumption of total cereals, states showing per capita consumption of 13 kg. or less of cereals were Kerala (19.17 kg.), Meghalaya (11.67 kg.), Tamil Nadu (11.78 kg.), Pondicherry (11.91 kg.), Nagaland (11.92 kg.) and Himachal Pradesh (12.01 kg.).

5.6 It is further observed that so far as per capita consumption is concerned, rice was the main staple food in both rural and urban areas for the states of Andhra Pradesh, Assam, Jammu & Kashmir, Kerala, Manipur, Orissa, Tamil Nadu, Tripura, Arunachal Pradesh, Goa, Daman & Diu and Pondicherry. It was also observed to be the main cereal item of consumption for the states of Bihar and West Bengal in rural areas only and in the urban areas of ~~Karnataka, Nagaland and West Bengal~~ wheat was also an equally important item of cereal consumed. Against this, the per capita consumption of wheat was more in both rural and urban areas of Gujarat, Haryana, Himachal Pradesh, Madhya Pradesh, Punjab, Rajasthan, Uttar Pradesh and Delhi. For urban areas of Bihar, Maharashtra and Chandigarh wheat was the major item of cereal consumed.

5.7 Apart from rice and/or wheat among the other important cereal items, jowar and ragi were consumed both in the rural and urban areas of Andhra Pradesh and Karnataka, jowar and bajra in rural areas of Gujarat and Tamil Nadu, Jowar in both rural and urban areas of Madhya Pradesh and Maharashtra, bajra in rural areas of Haryana, maize in rural areas of Bihar, Himachal Pradesh, Jammu and Kashmir and Punjab, jowar, bajra, maize and barley in both rural and urban areas of Rajasthan, maize, small millets in rural areas of Arunachal Pradesh and ragi in rural areas of Pondicherry. In Maharashtra, the per capita consumption of jowar was found to be the highest in rural areas (11.20 kg.) and wheat was the highest in urban areas (8.56 kg.). However, in this state rice, wheat and jowar together accounted for 16.69 kg. of per capita consumption in rural areas and 14.97 kg. in urban areas. In Karnataka, the per capita consumption of rice, wheat, jowar and ragi together accounted for 14.96 kg. in rural areas and 13.37 kg. in urban areas.

5.8 The per capita consumption of gram and cereal substitutes was negligible in most of the states. But in Kerala the consumption ~~of~~ of cereal substitutes of 5.54 kg. in rural areas and 2.58kg. in urban areas supplemented the inadequate quantity of cereal consumption.

Table (2) : quantity (in 0.00 kg.) of consumption of cereals and cereal substitutes per person during a period of 30 days by rural and urban areas.

- 9 Consumer Expenditure over Broad Groups of items : In table (3) has been shown the per capita value of consumption of some broad groups of items of food and non-food for all-India rural and All-India urban areas by NSS rounds. The total per capita consumption for 32nd round was Rs. 73.55 (Rs. 49.77 on food and Rs. 24.78 on non-food) in the rural areas against Rs. 104.62 (Rs. 65.76 on food and Rs. 38.86 on non-food) in the urban areas. The total per capita expenditure in 32nd round was substantially higher than the 28th round which again was higher than the 27th round ~~approximately~~. But the increase from 28th round to 32nd round was more sharp (41% in rural areas against 49% in urban areas) than the increase from 27th to 28th round (24% in rural areas against 11% in urban areas). These results are more or less consistent in view of the price increase during the periods. Further, the percentage of expenditure on food to total expenditure increased from 72% to 76% from 27th round to 28th round and then declined sharply to 66% in the 32nd round rural areas. The corresponding figures for the urban areas were 64%, 68% and 63%. This shows a better position for 32nd round so far as the level of living is concerned.
- 10 Pattern of Consumer Expenditure in Different States : Table (4) presents the monthly per capita expenditure on food, non-food and total consumer expenditure by states for the rural and urban areas. At the national level the per capita total expenditure was Rs. 73.55 in the rural sector. States which had higher per capita total consumption ~~were~~ were Punjab (Rs. 126.68), Rajasthan (Rs. 115.49), Delhi (Rs. 108.22), Haryana (Rs. 104.63), Goa, Daman & Diu (Rs. 100.08), Himachal Pradesh (Rs. 83.62), Maharashtra (Rs. 83.30), Kerala (Rs. 77.36) and Gujarat (Rs. 76.93). Some of the states where the per capita total expenditure was very low were Orissa (Rs. 53.19), Tripura (Rs. 56.53), Assam (Rs. 59.84), West Bengal (Rs. 60.66) and Bihar (Rs. 62.35).

(Rs. 00)  
Table (3) : Value of consumption of broad group of items per person  
for a period of 30 days by rounds.

12.	non-food total	11.67	12.64	24.78	22.49	22.49	38.86		
13.	total consumer expenditure	42.32	52.34	73.55	63.33	70.42	104.69		

11 In the urban areas, again some of the states which had much higher per capita total expenditure than the national average of Rs. ~~104.62~~ <sup>104.62</sup> 104.58 were Chandigarh (Rs. 230.35), Delhi (Rs. 140.79), Goa, Daman & Diu (Rs. 139.42), Arunachal Pradesh (Rs. 138.46), Madhya Pradesh (Rs. 137.97), Nagaland (Rs. 137.62) and the Punjab (Rs. 125.73). Compared to these, perceptibly lower per capita expenditure was reported by Manipur (Rs. 82.23), Kerala (Rs. 83.09), Jammu & Kashmir (Rs. 86.68), Tamil Nadu (Rs. 87.11), Orissa (Rs. 87.59), Karnataka (Rs. 88.50) and Bihar (Rs. 89.39).

5.12 Percentage of Expenditure on food to Total Expenditure : It will be worth while to examine the percentage of expenditure on food to total expenditure in this context. These results are also presented in Table (4). It is found that in the rural areas ~~of the~~ states having the lowest percentage of expenditure on food were Rajasthan (51.40%), Maharashtra (53.47%), Jammu & Kashmir (55.80%), and Goa, Daman & Diu (59.10%), (which demonstrate that the states which show better level of living are not necessarily the ones which have very high per capita total expenditure). Also the states having very high percentage of expenditure on food were Bihar (77.00%), Assam (75.17%), West Bengal (73.29%), Tripura (73.08%), Orissa (71.57%), Manipur (71.56%) and Gujarat (71.12%). The all-India average for the rural areas turned out to be 66.31 percent.

5.13 In case of urban areas, states with high percentages of expenditure on food were Madhya Pradesh (72.38%), Bihar (71.27%), Orissa (66.71%), Jammu & Kashmir (65.99%), Uttar Pradesh (65.76%), Manipur (65.67%) and Rajasthan (65.27%) and those with low percentages were Chandigarh (48.12%), Assam (51.89%), Goa, Daman & Diu (55.07%), Punjab (55.42%), Nagaland (56.99%), and Delhi (57.82%). The all-India urban average was 62.87 percentage.

- 5.14 Per Capita Expenditure and per Household Expenditure : On examining the per household expenditure on total consumption (col.3) of Table 4, it is found that in both rural and urban areas, states having high or low per capita total consumer expenditure have also high or low per household expenditure except for certain states in urban areas like Rajasthan and Jammu & Kashmir where the average size of a household was relatively large.
- 5.15 Average size of Household : Table (4) also gives the average size of the household. In the rural areas, compared to the all-India average size of 5.23, high household sizes were reported by Haryana (6.27), Gujarat (5.71), Karnataka (5.68), Delhi (5.66), Pondicherry (5.61) etc. Tamil Nadu (4.49), Andhra Pradesh (4.65), Meghalaya (4.81) and Orissa (4.99) were the states where the average size of the household ~~was~~ observed to be relatively small.
- 5.16 In the urban areas, Jammu & Kashmir reported the highest size of household (5.60) followed by Rajasthan (5.43), Kerala (5.40), Gujarat (5.24), Manipur & Madhya Pradesh (5.23 each), Karnataka and Pondicherry (5.22 each). The lower household size compared to the all-India average of 4.89, was reported by the states of Arunachal Pradesh (3.67), ~~fellow state~~ Himachal Pradesh (3.85), Chandigarh (3.91) and Nagaland (4.00).
- 5.17 Level of Expenditure and Household Size in Big Cities : The table also provides the above estimates for the four big cities viz, Bombay, Calcutta, Delhi and Madras.  
The highest per capita total consumer expenditure was reported by Bombay city (Rs. 161.87) followed by Delhi (Rs. 140.79), Calcutta (Rs. 127.35) and Madras (Rs. 98.25). The percentage expenditure on food was the highest in Calcutta and the lowest in Bombay.
- 5.18 In case of cities also, the order of per capita and per household total consumption was the same. The highest household size was reported by Madras and the lowest by Calcutta city.

Table (4) : Average size of household, per-capita and per household total monthly consumer expenditure per-capita monthly expenditure and food and non-food items and percentage of expenditure on food to total expenditure

APPENDIX

List of Statistical Tables

Table series (1)	Description (2)	page number		
		rural (3)	urban (4)	city (5)
1.	Percentage distribution of estimated number of households, persons, consumer units, and estimated number of adult males, adult females, children and total persons and total consumer units per household by monthly per capita expenditure classes.	A1	A76	A154
2.	Quantity and value of consumption of items of cereals per person for a period of 30 days by monthly per capita expenditure classes.	A26	A102	A158
3.	Value of consumption of broad groups of items per person for a period of 30 days by monthly per capita expenditure classes.	A51	A128	A162

NATIONAL SAMPLE SURVEY 32ND ROUND : JULY 1977 - JUNE 1978
