NON-DIRECTORY ESTABLISHMENTS IN COMMUNITY AND NON-COMMERCIAL  
CULTURAL SERVICES

SECTION ONE

INTRODUCTION

1.1 A survey on small scale enterprises in trade, hotels, restaurants, transport, storage & warehousing and service sector was carried out by the National Sample Survey Organisation in the thirty fourth round of its survey from 1st July 1979 to 30th June 1980. This was a follow-up survey of the first Economic Census which was conducted by the Central Statistical Organisation during the last quarter of 1977. In the Economic Census some broad information about non-agricultural enterprises of the country was collected. As a follow-up of the Economic Census detailed sample surveys of small scale enterprises in (i) manufacture & (ii) trade, hotel & restaurant, transport, storage & warehousing and service sector were conducted by the NSSO respectively in the 33rd and 34th round of the NSS.

1.2 The survey in the 34th round of the NSS covered the entire geographical area of the Indian Union except Sikkim, Andaman & Nicobar Islands, Lakshadweep, Dadra Nagar Haveli and the rural area of Nagaland. Two tehsils of district Surguja and four tehsil of district Bastar of Madhya Pradesh, three tehsil of district Chandrapur and one tehsil of district Amravati of Maharashtra and Ladakh district of Jammu & Kashmir were also not covered.

1.3 The Governments of all the States and Union Territories participating in the National Sample Survey programme participated in the survey by canvassing samples at least of equal size as the central sample in the respective States and Union Territories.

1.4. In the Economic Census enterprises were classified into two groups namely, (i) own account enterprises (OAE) i.e., enterprises without any hired worker and (ii) establishments i.e. enterprises with at least one hired worker. Establishments having hired workers were further classified into two categories namely, (a) non-directory establishments (NDE) i.e., establishments with total number of workers

including household worker, if any, 5 or less and annual output/turnover/receipt less than Rs.1,00,000 and (b) directory establishments (DE) i.e., establishments with 6 or more workers and/or annual output/turnover/receipt Rs.1,00,000 or more. The survey conducted by the NSSO in the thirty fourth round was restricted to non-directory establishments and own account enterprises in trade, hotel and restaurant, transport, storage & warehousing and service sector. The enquiry for the directory establishments was covered by a separate survey conducted by the C.S.O. during October, 1979 to September 1980. Government and public sector enterprises were kept out of the purview of the survey.

1.5 The basic design for the survey was a two-stage stratified one with enumeration block (EB) formed during the Economic Census as the first stage units (f.s.us) and enterprises as the ultimate units of enumeration. In each sample f.s.u enterprises which had operated for at least 30 days (or 15 days for seasonal enterprises) during the last 365 days and existed on the date of survey formed the frame for selection of enterprises. A sample of own account enterprises and non-directory establishments in trade, hotel & restaurants, transport, storage & warehousing and service sector was selected for the detailed enquiry in each sample EB.

1.6 In each sample EB the enquiry schedule 2.54B - Community and non-commercial cultural non-directory establishments was canvassed for a sample of non-directory establishments in community and cultural services under NIC<sup>a/</sup> major groups 94 and 95. To be precise, the schedule was canvassed for non-directory establishments under institutional ownership registered under public trust or Society's Act engaged in community services (NIC major group 94) or recreational services (NIC major group 95). Also the same schedule was canvassed for non-directory establishments with ownership neither proprietary nor partnership but rather institutional without strictly being a corporate body engaged in community services (NIC major group 94) or recreational services (NIC major group 95). As<sup>a</sup> special case the schedule 2.54B was also canvassed for non-directory unrecognised educational establishments under private and non-public sector institutional ownership for physically handicapped and mentally retarded persons (NIC group 920 and 921).

/of selected categories

a/ National Industrial Classification (NIC)-1970, issued by C.S.O.

1.7 This report is based on data collected in Schedule 2.54B canvassed in the central sample. It gives number of non-directory establishments, estimated employment, earnings, expenditure and government grants & donations by states, union territories and all-India separately by rural and urban sectors. Section II gives concepts and definition used in the survey and section III gives summary findings of the Survey. Appendix I gives statistical tables. A note on sample design and estimation procedure is given in Appendix II.

## SECTION TWO

### CONCEPTS AND DEFINITIONS

2.1 Some of the important concepts and definitions followed in the survey are given below :

2.2 Enterprise : An enterprise was an undertaking engaged in production and/or distribution of some goods and/or services not for the sole purpose of domestic consumption and carried out by members of the household/institutional body and/or hiring outside labour. An enterprise might be owned and operated by a single household or by several households jointly (on a partnership basis) or by an institutional body.

2.3 Establishment : An enterprise with at least one hired worker on a fairly regular basis was called an establishment. An establishment with six or more workers (including both household and hired) and/or with annual output/turnover/receipt Rs.1,00,000 or more was termed a directory establishment. On the other hand, an establishment with less than six workers and annual output/turnover/receipt less than Rs.1,00,000 was termed a non-directory establishment.

2.4 Ownership : Establishments owned by a single or a group of persons with no participation of the government, local body etc. in it both in terms of management and shares were covered.

Proprietary : Type of ownership was said to be proprietary where an individual was the sole owner of the enterprise.

Partnership : Where there were two or more owners of the enterprise on a partnership basis, with or without formal registration, type of ownership of the enterprise was categorised as partnership.

Registered and unregistered institutions : An enterprise with institutional ownership, registered under public trust or Society's Act, was termed a registered institution. An enterprise with ownership neither proprietary nor partnership but rather institutional

without being a public limited, or private limited company or co-operative society and not registered under Society's Act was termed an unregistered institution.

2.5 Employment-Hired Staff : Persons employed in an enterprise on regular wage or salary were treated as hired staff. Apprentices, paid or unpaid, and proprietors receiving regular salary were treated as hired staff.

Employment-Not Hired Staff : Persons working in or for the enterprise without regular wage or salary were treated as not hired staff.

2.6 Earnings : Earnings included receipts for services provided by the enterprise.

2.7 Government grants : Recurring and non-recurring annual aid from the central, state and local government.

2.8 Donation : Recurring and non-recurring annual cash assistance from persons, national and international organisations.

2.9 Emoluments : Wages, allowances, retirement benefits, social benefits such as employer's contribution to employees's state insurance to hired staff and other benefits such as ex-gratia payment or bonus, benefit, in kind etc. to hired as well as not hired staff were included.

2.10 Rent for assets not owned : Rent for assets not owned was rent payable for the reference period for assets hired for the enterprise.

2.11 Interest on loan : Interest payable for the reference period for current loan and also outstanding loans taken prior to the reference period for the enterprise was treated as interest on loan.

2.12 Total recurring expenditure : Total recurring expenditure was total of <sup>emoluments,</sup> / rent for assets not owned, interest on loan and other operational expenditure of the enterprise. It excluded all the expenditure of a capital nature.

2.13 Reference period : The reference period for the different items was last year. For establishments maintaining regular books of accounts information for the last accounting year was collected. For establishments not maintaining accounts information for last 365 days ending on the day preceeding the date of enquiry was collected.

SECTION THREE  
SUMMARY RESULTS

3.1 Table 1 below presents estimated number of non-directory establishments and estimated employment in community and non-commercial cultural non-directory establishments at all-India level separately by rural and urban sectors. It is seen from the table that <sup>at</sup> all India

Table 1 : Estimated number of establishments and estimated employment - all-India, NSS 34th round : July 1979 - June 1980

item	aggregate estimates			percentage of -- total		
	rural	urban	total	rural	urban	total
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1. number of establishments	1,07,795	27,179	1,34,974	80	20	100
2. hired & not hired persons employed	2,22,784	65,757	2,88,539	77	23	100

level there were 1,34,974 establishments of which 1,07,795 establishments were located in the rural sector and the residual 27,179 establishments were in the urban sector i.e. about 80 per cent of the establishments were in the rural sector and only 20 per cent of the establishments were in the urban sector. From the table it is also seen that at all-India level these establishments provided employment <sup>to</sup> 2.9 lakh persons of which 2.2 lakhs were in the rural sector and the residual 0.7 lakh in the urban sector.

3.2 Table 2 below presents estimated aggregate and per establishment annual earnings, expenditure and recurring government grants and donations at all-India level separately by rural and urban sectors. It is seen from the table that at all-India level total earnings of these establishments was Rs.17 crores, the rural and urban shares being respectively 10.5 and 6.5 <sup>rupee</sup> crores. Total expenditure of these estab-

Table 2 : Estimated (i) aggregate and (ii) per establishment annual earnings, expenditure and recurring government grants and donations - all-India, NSS 34th round : July 1979-June 1980

item	aggregate estimates in million Rs.			per establishment estimates in Rs.		
	rural	urban	total	rural	urban	total
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1. earnings	105	65	170	971	2408	1261
2. expenditure	261	135	396	2423	4954	2933
3. recurring govt. grants & donations	185	98	283	1717	3617	2100

Establishments at all-India level was Rs. 39.6 crores, the rural and urban shares being respectively 26.1 and 13.4 <sup>rupee</sup> crores. Earnings, expenditure and government grants and donations per establishment in the rural sector were Rs. 971, Rs. 2423 and Rs. 1717. The corresponding estimates for the urban sector for earnings, expenditure and government grants and donations were respectively Rs. 2408, Rs. 4954 and Rs. 3617. In both the sectors earnings per establishment fell short of expenditure as well as grants and donations per establishment. The gap between earnings and expenditure in the rural as well as the urban sector was met by grants and donations.

N.D.

APPENDIX - IISAMPLE DESIGN AND ESTIMATION PROCEDURE

1. Basic design : The sample design in both rural and urban areas was a stratified two stage one with enumeration blocks (EB<sub>s</sub>) of economic census being first stage units and enterprises in sample EB<sub>s</sub> being second stage units.
2. Stratification : There were 73 regions all over India (excluding areas not covered by NSS). These regions were formed within a state/union territory except in Gujarat by grouping contiguous districts of similar agricultural profile. In Gujarat, regions were formed by grouping contiguous tehsils taking into consideration the concentration of tribal population and dry areas of the state. Each district was treated as a stratum except in Gujarat where parts of a district belonging to different regions were treated as different strata.
3. Sampling frame : The enumeration blocks (EB) formed during 1977 Economic Census showing the number of DE and NDE for the different industries for each EB were used as sampling frame for the selection of EB<sub>s</sub>, the first stage units of sampling. However, due to non-availability of EC frame, UFS frame was used as the sampling frame for the urban areas of Nagaland and 1971 census list of villages was used as sampling frame for rural areas of Chandigarh.
4. Sub-strata : All the EB<sub>s</sub> in each district/stratum were divided into 2 sub-strata. Sub-stratum 1 consisted of all EB<sub>s</sub> having at least one DE and/or NDE in any of the 4 industries namely, (i) trade, (ii) hotel and restaurant, (iii) transport and (iv) storage and warehousing. Residual EB<sub>s</sub> constituted sub-stratum 2. However, in rural areas of Gujarat, 3 sub-strata were formed by sub-dividing sub-stratum 2 in two parts, viz. EB<sub>s</sub> not having any DE or NDE in any of the 4 industries specified above but containing at least one DE and/or NDE in any of the remaining industries covered by the Economic Census constituted sub-stratum 2 and the residual EB<sub>s</sub> constituted sub-stratum 3.

5. Allocation : The total sample size of enumeration blocks for the state/union territory was fixed on the basis of the number of investigators available for the survey in the state. The total number of sample EB<sub>s</sub> in a state or union territory was allocated to the rural and urban sectors of the districts in proportion to total number of directory and non-directory establishments in the four industries (viz. trade, hotel and restaurant, transport and storage & warehousing) in the respective districts and sectors. District-wise sample size was distributed between sub-stratum 1 and 2 approximately in the ratio 5 : 1, separately for the rural and urban sectors.

6. Selection of EB<sub>s</sub> : Sample EB<sub>s</sub> were selected from sub-stratum 1 with probability proportional to total number of DE + NDE under the industries namely, (i) trade, (ii) hotel and restaurant, (iii) transport and (iv) storage and warehousing with replacement. From sub-stratum 2 and sub-stratum 3 (in rural areas of Gujarat) sample EB<sub>s</sub> were selected at random.

7. Sub-division of EB<sub>s</sub> : Normally each sample EB was completely surveyed. But where the EB population exceeded 1,000 or number of DE + NDE exceeded 200, the EB was sub-divided into two or more sub-blocks of nearly equal population or DE + NDE content and the survey was confined to one of the sub-blocks selected at random.

8. Sampling of enterprises : There were 11 schedules of enquiry for the different enterprises under survey coverage as :

<u>Schedule type</u>	<u>Enterprise type</u>
1. 2.31B	mechanised passenger & goods transport - NDE & OAE
2. 2.32B	non-mechanised passenger & goods transport - NDE & OAE
3. 2.33B	services incidental to transport - NDE & OAE
4. 2.34B	storage & warehousing - NDE & OAE
5. 2.41B	trade - NDE & OAE

A-2/3:

<u>Schedule type</u>	<u>Enterprise type</u>
6. 2.42B	hotel & restaurant - NDE & OAE
7. 2.51B	OAE in service sector
8. 2.52B	un-recognised educational non-directory establishment
9. 2.53B	non-Govt. medical and health non-directory establishment
10. 2.54B	community & non-commercial cultural non-directory establishment
11. 2.55B	non-directory establishment in service sector other than education, medical, health, community & non-commercial cultural services

In each sample EB all the OAEs eligible for sch. 2.51B were surveyed. Also in each EB a maximum of 12 NDEs were surveyed. Further in each EB 3 OAEs other than OAEs eligible for sch 2.51B were surveyed. In EBs having no eligible NDE, 5 OAEs were surveyed.

NDE : When total number of NDE eligible for survey exceeded 12 in an EB, 12 sample NDEs were distributed over different schedule types as follows. First, one NDE was allotted to each schedule type. Next, one more was allotted to each schedule type in the priority order of schedules 2.31B, 2.32B, 2.33B, 2.34B, 2.52B, 2.53B, 2.55B, 2.41B and 2.42B until the total number of sample NDEs became 12. This procedure was repeated as many times as warranted to arrive at 12 sample NDEs. Circular systematic sample of NDEs was selected independently from each schedule type.

OAE : A circular systematic sample of 3 or 5 OAEs, as required was selected taking all the schedule types (excepting schedule 2.51B) together.

Estimation Procedure

Notations : The following notations are used for obtaining various estimates.

- s : subscript for district/stratum  
 $s_1$  : subscript for sub-stratum 1 of s-th district/stratum  
 $s_2$  : subscript for sub-stratum 2 of s-th district/stratum  
 $s_3$  : subscript for sub-stratum 3 of s-th district/stratum  
 (for Gujrat - rural areas only)  
 t : subscript for non-directory establishment (NDE) of a particular schedule type 2.52B/2.53B/2.54B/2.55B under enquiry.  
 $i_1$  : subscript for sample enumeration block (EB) in sub-stratum 1  
 $i_2$  : subscript for sample enumeration <sup>block</sup> (EB) in sub-stratum 2  
 $i_3$  : subscript for sample enumeration block (EB) in sub-stratum 3 (for Gujarat - rural areas only)  
 j : subscript for enterprise/establishment  
 z : size of an EB  
 Z : total size of a district/stratum  
 D : number of sub-blocks actually formed in an EB  
 n : number of EBs surveyed  
 H : total number of NDEs in the EB/sub-block  
 h : number of NDEs surveyed in the EB/sub-block  
 k : number of districts/strata in a state/UT

$$H_{s_1 i_1 t} / H_{s_2 i_2 t} = \text{no. of NDEs of schedule type 2.52B/2.53B/2.54B/2.55B listed in the } i\text{-th sample block of sub-stratum 1/sub-stratum 2 of } s\text{-th stratum}$$

$$h_{s_1 i_1 t} / h_{s_2 i_2 t} = \text{no. of NDEs of schedule type 2.52B/2.53B/2.54B/2.55B surveyed in the } i\text{-th sample block of sub-stratum 1/sub-stratum 2 of } s\text{-th stratum.}$$
