

# Appendix A

## **Notes:**

- i) *In the statements and tables presented in this report, ‘-’ has been used if the survey could not net any household in that particular level of disaggregation. On the other hand, the figure ‘0’ has appeared in some levels of disaggregation where the estimated figure is very low and has become ‘0’ because the figures are rounded off.*
- ii) *The marginal totals and proportions presented in various tables may, in some cases, vary slightly due to the rounding off of figures.*
- iii) *The estimates provided in this report for various sub-populations of the entire population surveyed, e.g. a specific expenditure class of a specific State, should be used with caution keeping in view the number of sample households of the sub-population which were surveyed. For example, while using the estimates for a particular State/UT, or area type (e.g., urban squatter settlements, urban no house, etc.); the corresponding number of households surveyed may be borne in mind.*
- iv) *To get an idea of the precisions of the estimates for various sub-populations of the entire population presented in Appendix-A, relative standard error (RSE) in percentages with respect to all the estimates of a few representative tables have been provided in Appendix-E of this report.*

**Table 1: Number of first stage units (FSUs) allotted, surveyed and number of sample households surveyed for each State /UT**

State/UT	rural			urban			combined		
	number of fsu		number of households	number of fsu		number of households	number of fsu		number of households
	allotted	surveyed		allotted	surveyed		allotted	surveyed
